[&] On a fully diluted basis calculated taking into account 692,540 Equity Shares which will result upon exercise of vested options under the Clean Max ESOP Scheme as on the date of this Prospectus.

RISKS IN RELATION TO THE FIRST OFFER

This being the first public issue of Equity Shares of our Company, there has been no formal market for the Equity Shares. The face value of each Equity Share is ₹ 1 each. The Floor Price, Cap Price and Offer Price, as determined by our Company, in consultation with the book running lead managers to the Offer (“**BRLMs**”), in accordance with the SEBI ICDR Regulations, and on the basis of the assessment of market demand for the Equity Shares by way of the Book Building Process as stated in “*Basis for Offer Price*” beginning on page 189, should not be considered to be indicative of the market price of the Equity Shares after the Equity Shares are listed. No assurance can be given regarding an active or sustained trading in the Equity Shares or regarding the price at which the Equity Shares will be traded after listing.

GENERAL RISK

Investments in equity and equity-related securities involve a degree of risk and Bidders should not invest any funds in the Offer unless they can afford to take the risk of losing their entire investment. Bidders were advised to read the risk factors carefully before taking an investment decision in the Offer. For taking an investment decision, Bidders were advised to rely on their own examination of our Company and the Offer, including the risks involved. The Equity Shares in the Offer have neither been recommended, nor approved by the Securities and

Exchange Board of India (“SEBI”), nor does SEBI guarantee the accuracy or adequacy of the contents of this Prospectus. Specific attention of the Bidders was invited to “Risk Factors” beginning on page 45.

ISSUER’S AND THE SELLING SHAREHOLDERS’ ABSOLUTE RESPONSIBILITY

Our Company, having made all reasonable inquiries, accepts responsibility for and confirms that this Prospectus contains all information with regard to our Company and the Offer, which is material in the context of the Offer, that the information contained in this Prospectus is true and correct in all material aspects and is not misleading in any material respect, that the opinions and intentions expressed herein are true and correct and that there are no other facts, the omission of which makes this Prospectus as a whole or any of such information or the expression of any such opinions or intentions misleading in any material respect. Further, each of the Selling Shareholders, severally and not jointly, accepts responsibility for and confirms only the statements expressly and specifically confirmed by such Selling Shareholder in this Prospectus, to the extent such statements are solely in relation to itself as a Selling Shareholder and its respective portion of the Offered Shares, and assumes responsibility that such statements are true and correct in all material respects and not misleading in any material respect. The Selling Shareholders, severally or jointly, assume no responsibility for any other statements in this Prospectus, including, *inter alia*, any or all of the statements made or confirmed by or in relation to our Company or our business or any other person(s) in this Prospectus.

LISTING

The Equity Shares offered through the Red Herring Prospectus and this Prospectus are proposed to be listed on BSE Limited (“BSE”) and National Stock Exchange of India Limited (“NSE” and together with the BSE, the “Stock Exchanges”). For the purposes of the Offer, NSE is the Designated Stock Exchange.

BID/ OFFER PERIOD

ANCHOR INVESTOR BID/ OFFER PERIOD OPENED AND CLOSED ON [^]	Friday, February 20, 2026	BID/ OFFER OPENED ON	Monday, February 23, 2026	BID/ OFFER CLOSED ON	Wednesday, February 25, 2026

[^] Our Company, in consultation with the Book Running Lead Managers, undertook a private placement of 2,819,548 Equity Shares of face value ₹1 each at a price of ₹1,053 per Equity Share (including a premium of ₹1,052 per Equity Share), aggregating to ₹ 2,968.98 million, as permitted under the applicable law (“Pre-IPO Placement”). The Pre-IPO Placement was at a price decided by our Company, in consultation with the Book Running Lead Managers and was completed prior to filing of the Red Herring Prospectus with the RoC. The amount raised pursuant to the Pre-IPO Placement was reduced from the Fresh Issue, subject to compliance with Rule 19(2)(b) of the Securities Contracts (Regulation) Rules, 1957, as amended and the size of the Fresh Issue has been revised to ₹ 12,000.00 million. The Pre-IPO Placement did not exceed 20% of the original size of the Fresh Issue as disclosed in the Draft Red Herring Prospectus. Our Company had appropriately intimated the subscribers to the Pre-IPO Placement, prior to allotment pursuant to the Pre-IPO Placement, that there is no guarantee that our Company may proceed with the Offer or the Offer may be successful and will result into listing of the Equity Shares on the Stock Exchanges. Further, relevant disclosures in relation to such intimation to the subscribers to the Pre-IPO Placement has been appropriately made in the relevant sections of the Red Herring Prospectus and this Prospectus.

CLEAN MAX ENVIRO ENERGY SOLUTIONS LIMITED

Our Company was originally incorporated as 'Clean Max Enviro Energy Solutions Private Limited' at Mumbai, Maharashtra as a private limited company under the Companies Act, 1956 pursuant to a certificate of incorporation dated September 29, 2010, issued by the Deputy Registrar of Companies, Maharashtra at Mumbai. Subsequently, upon conversion of our Company into a public limited company, the name of our Company was changed to 'Clean Max Enviro Energy Solutions Limited', pursuant to the resolution passed by our Board on July 9, 2025, and the resolution passed by our Shareholders at the extra-ordinary general meeting on July 14, 2025. A fresh certificate of incorporation dated August 7, 2025 was issued by the Registrar of Companies, Maharashtra at Mumbai consequent to the conversion. For details in relation to changes in the name and registered office of our Company, see "History and Certain Corporate Matters – Brief history of our Company" and "History and Certain Corporate Matters – Changes in the registered office" on page 363.

OUR COMPANY, IN CONSULTATION WITH THE BOOK RUNNING LEAD MANAGERS, UNDERTOOK A PRIVATE PLACEMENT OF 2,819,548 EQUITY SHARES OF FACE VALUE ₹ 1 EACH AT A PRICE OF ₹ 1,053 PER EQUITY SHARE (INCLUDING A PREMIUM OF ₹ 1,052 PER EQUITY SHARE), AGGREGATING TO ₹ 2,968.98 MILLION, AS PERMITTED UNDER THE APPLICABLE LAW. THE PRE-IPO PLACEMENT WAS AT A PRICE DECIDED BY OUR COMPANY, IN CONSULTATION WITH THE BOOK RUNNING LEAD MANAGERS AND WAS COMPLETED PRIOR TO FILING OF THE RED HERRING PROSPECTUS WITH THE ROC. THE AMOUNT RAISED PURSUANT TO THE PRE-IPO PLACEMENT WAS REDUCED FROM THE FRESH ISSUE, SUBJECT TO COMPLIANCE WITH RULE 19(2)(B) OF THE SECURITIES CONTRACTS (REGULATION) RULES, 1957, AS AMENDED AND THE SIZE OF THE FRESH ISSUE HAS BEEN REVISED TO ₹ 12,000.00 MILLION. THE PRE-IPO PLACEMENT DID NOT EXCEED 20% OF THE ORIGINAL SIZE OF THE FRESH ISSUE AS DISCLOSED IN THE DRAFT RED HERRING PROSPECTUS. OUR COMPANY HAD APPROPRIATELY INTIMATED THE SUBSCRIBERS TO THE PRE-IPO PLACEMENT, PRIOR TO ALLOTMENT PURSUANT TO THE PRE-IPO PLACEMENT, THAT THERE IS NO GUARANTEE THAT OUR COMPANY MAY PROCEED WITH THE OFFER OR THE OFFER MAY BE SUCCESSFUL AND WILL RESULT INTO LISTING OF THE EQUITY SHARES ON THE STOCK EXCHANGES. FURTHER, RELEVANT DISCLOSURES IN RELATION TO SUCH INTIMATION TO THE SUBSCRIBERS TO THE PRE-IPO PLACEMENT HAS BEEN APPROPRIATELY MADE IN THE RELEVANT SECTIONS OF THE RED HERRING PROSPECTUS AND THIS PROSPECTUS.

THE OFFER INCLUDES A RESERVATION OF 314,795^{*} EQUITY SHARES OF FACE VALUE OF ₹ 1 EACH, AGGREGATING TO ₹ 300.00^{*} MILLION (CONSTITUTED 0.27% OF THE POST-OFFER PAID-UP EQUITY SHARE CAPITAL), FOR SUBSCRIPTION BY ELIGIBLE EMPLOYEES ("EMPLOYEE RESERVATION PORTION"). OUR COMPANY, IN CONSULTATION WITH THE BRLMs OFFERED A DISCOUNT OF 9.50% OF THE OFFER PRICE TO ELIGIBLE EMPLOYEES BIDDING IN THE EMPLOYEE RESERVATION PORTION ("EMPLOYEE DISCOUNT"), SUBJECT TO NECESSARY APPROVALS AS MAY BE REQUIRED. THE OFFER LESS THE EMPLOYEE RESERVATION PORTION IS HERINAFTER REFERRED TO AS THE "NET OFFER". THE OFFER AND THE NET OFFER CONSTITUTED 25.04% AND 24.77% OF THE POST-OFFER PAID-UP EQUITY SHARE CAPITAL OF OUR COMPANY, RESPECTIVELY. THE FACE VALUE OF EQUITY SHARES IS ₹ 1 EACH. THE OFFER PRICE IS 1,053 TIMES THE FACE VALUE OF THE EQUITY SHARES.

^{*} Subject to finalisation of rejection of Bids and Basis of Allotment.

^{**} An Employee Discount of ₹ 100 per Equity Share was offered to Eligible Employees Bidding in the Employee Reservation Portion.

This Offer was made in terms of Rule 19(2)(b) of the Securities Contracts (Regulation) Rules, 1957, as amended, read with Regulation 31 of the SEBI ICDR Regulations. The Offer was made through the Book Building Process and is in compliance with Regulation 6(1) of the SEBI ICDR Regulations wherein in terms of Regulation 32(1) of the SEBI ICDR Regulations, not more than 50% of the Net Offer was available for allocation on a proportionate basis to QIBs, and such portion, the "QIB Portion" provided that our Company, in consultation with the BRLMs, allocated 60% of the QIB Portion to Anchor Investors on a discretionary basis in accordance with the SEBI ICDR Regulations ("Anchor Investor Portion"), of which at least 40% was reserved for domestic Mutual Funds, Life Insurance Companies and Pension Funds, in the following manner (i) 33.33% was reserved for domestic Mutual Funds, and (ii) 6.67% was reserved for Life Insurance Companies and Pension Funds, subject to valid Bids having been received from domestic Mutual Funds and Life Insurance Companies and Pension Funds at or above the Anchor Investor Allocation Price. In the event of under-subscription in the Anchor Investor Portion reserved for Life Insurance Companies and Pension Funds, the balance Equity Shares could have been available for allocation to domestic Mutual Funds. In the event of under-subscription or non-allocation in the Anchor Investor Portion, the balance Equity Shares available for allocation in the Mutual Fund Portion would have been added to the remaining QIB Portion for proportionate allocation to QIBs. Further, not less than 15% of the Net Offer was available for allocation to Non-Institutional Bidders out of which (a) one-third of such portion was reserved for applicants with application size of more than ₹ 200,000 and up to ₹ 1,000,000; and (b) two-third of such portion was reserved for applicants with application size of more than ₹ 1,000,000, provided that the unsubscribed portion in either of such sub-categories could have been allocated to applicants in the other sub-category of Non-Institutional Bidders and not less than 35% of the Net Offer was available for allocation to RIBs in accordance with the SEBI ICDR Regulations ("Retail Portion"), subject to valid Bids having been received from them at or above the Offer Price. Further, Equity Shares was allocated on a proportionate basis to Eligible Employees Bidding in the Employee Reservation Portion, subject to valid Bids received from them at or above the Offer Price. All Bidders (except Anchor Investors) were mandatorily required to participate in the Offer through the Application Supported by Blocked Amount ("ASBA") process by providing details of their respective ASBA accounts and UPI ID in case of UPI Bidders, as applicable, pursuant to which their corresponding Bid Amount were blocked by the Self Certified Syndicate Banks ("SCSBs") or by the Sponsor Bank(s) under the UPI Mechanism, as the case may be, to the extent of the respective Bid Amounts. Anchor Investors were not permitted to participate in the Offer through the ASBA process. For details, see "Offer Procedure" beginning on page 928.

RISKS IN RELATION TO THE FIRST OFFER

This being the first public issue of Equity Shares of our Company, there has been no formal market for the Equity Shares. The face value of the Equity Shares is ₹ 1 each. The Floor Price, Cap Price and Offer Price as determined by our Company, in consultation with the BRLMs, in accordance with the SEBI ICDR Regulations, and on the basis of assessment of market demand for the Equity Shares by way of the Book Building Process, as stated in "Basis for Offer Price" beginning on page 189 should not be considered to be indicative of the market price of the Equity Shares after the Equity Shares are listed. No assurance can be given regarding active or sustained trading in the Equity Shares nor regarding the price at which the Equity Shares will be traded after listing.

GENERAL RISK

Investments in equity and equity-related securities involve a degree of risk and Bidders should not invest any funds in the Offer unless they can afford to take the risk of losing their entire investment. Bidders were advised to read the risk factors carefully before taking an investment decision in the Offer. For taking an investment decision, Bidders were advised to rely on their own examination of our Company and the Offer, including the risks involved. The Equity Shares in the Offer have neither been recommended, nor approved by SEBI, nor does SEBI guarantee the accuracy or adequacy of the contents of this Prospectus. Specific attention of the Bidders is invited to "Risk Factors" beginning on page 45.

COMPANY'S AND SELLING SHAREHOLDERS' ABSOLUTE RESPONSIBILITY

Our Company, having made all reasonable inquiries, accepts responsibility for and confirms that this Prospectus contains all information with regard to our Company and the Offer, which is material in the context of the Offer, that the information contained in this Prospectus is true and correct in all material aspects and is not misleading in any material respect, that the opinions and intentions expressed herein are honestly held and that there are no other facts, the omission of which makes this Prospectus as a whole or any of such information or the expression of any such opinions or intentions misleading in any material respect. Further, each of the Selling Shareholders, severally and not jointly, accepts responsibility for and confirms only the statements expressly and specifically confirmed by itself as a Selling Shareholder in this Prospectus, to the extent such statements are solely in relation to such Selling Shareholder and its respective portion of the Offered Shares, and assumes responsibility that such statements are true and correct in all material respects and not misleading in any material respect. The Selling Shareholders, severally or jointly, assume no responsibility for any other statements in this Prospectus, including, inter alia, any or all of the statements made or confirmed by or in relation to our Company or our business or any other person(s) in this Prospectus.

LISTING

The Equity Shares Allotted through the Red Herring Prospectus and this Prospectus are proposed to be listed on the Stock Exchanges. Our Company has received 'in-principle' approvals from BSE and NSE for the listing of the Equity Shares pursuant to their letters each dated October 10, 2025, respectively. For the purposes of the Offer, the Designated Stock Exchange shall be NSE. A copy of the Red Herring Prospectus and this Prospectus has been filed with the RoC in accordance with Sections 26(4) and 32 of the Companies Act, 2013. For details of the material contracts and documents which were made available for inspection from the date of the Red Herring Prospectus until the Bid Offer Closing Date, see "Material Contracts and Documents for Inspection" beginning on page 966.

DEFINITIONS AND ABBREVIATIONS

This Prospectus uses certain definitions and abbreviations which, unless the context otherwise indicates or implies or unless otherwise specified, shall have the meanings as provided below. References to any legislation, act, regulation, rules, guidelines, clarifications or policies or articles of association or memorandum of association shall be to such legislation, act, regulation, rules, guidelines, clarifications or policies or articles of association or memorandum of association as amended, updated, supplemented, re-enacted or modified from time to time, and any reference to a statutory provision shall include any subordinate legislation made from time to time under that provision. In case of any inconsistency between the definitions given below and the definitions contained in the General Information Document, the definitions given below shall prevail.

The words and expressions used in this Prospectus but not defined herein shall have, to the extent applicable, the same meanings ascribed to such terms under the SEBI ICDR Regulations, the SEBI Listing Regulations, the SEBI Act, the Companies Act, the SCRA, the Depositories Act and the rules and regulations notified thereunder.

Notwithstanding the foregoing, the terms used in “Objects of the Offer”, “Basis for Offer Price”, “Statement of Possible Special Tax Benefits”, “Industry Overview”, “Key Regulations and Policies in India”, “History and Certain Corporate Matters”, “Restated Consolidated Financial Information”, “Financial Indebtedness”, “Outstanding Litigation and Material Developments”, “Other Regulatory and Statutory Disclosures” and “Description of Equity Shares and Terms of the Articles of Association” beginning on pages 160, 189, 214, 229, 344, 363, 550, 825, 870, 893 and 949, respectively, shall have the meanings ascribed to them in the relevant section.

"Non-Resident Indians" or "NRI(s)"	A non-resident Indian as defined under the FEMA NDI Rules

Term	Description
Offer	<p>The initial public offer of 29,315,993[^] Equity Shares of face value of ₹ 1 each for cash consideration at a price of ₹ 1,053 each (including a share premium of ₹ 1,052 each), aggregating to ₹ 30,838.26 million comprising the Fresh Issue and the Offer for Sale.</p> <p>Our Company, in consultation with the Book Running Lead Managers, undertook a Pre-IPO Placement of Equity Shares, aggregating to ₹ 2,968.98 million, as permitted under the applicable law. The Pre-IPO Placement was at a price decided by our Company, in consultation with the Book Running Lead Managers and was completed prior to filing of the Red Herring Prospectus with the RoC. The amount raised pursuant to the Pre-IPO Placement was reduced from the Fresh Issue, subject to compliance with Rule 19(2)(b) of the SCRR and the size of the Fresh Issue has been revised to ₹ 12,000.00 million. The Pre-IPO Placement did not exceed 20% of the original size of the Fresh Issue as disclosed in the Draft Red Herring Prospectus. Our Company had appropriately intimated the subscribers to the Pre-IPO Placement, prior to allotment pursuant to the Pre-IPO Placement, that there is no guarantee that our Company may proceed with the Offer or the Offer may be successful and will result into listing of the Equity Shares on the Stock Exchanges. Further, relevant disclosures in relation to such intimation to the subscribers to the Pre-IPO Placement has been appropriately made in the relevant sections of the Red Herring Prospectus and this Prospectus.</p> <p>For further details, see “<i>The Offer</i>” beginning on page 100.</p> <p>[^] <i>Subject to finalisation of rejection of Bids and Basis of Allotment</i></p>
Offer Agreement	<p>The offer agreement dated August 16, 2025 entered into amongst our Company, the Selling Shareholders and the BRLMs, pursuant to which certain arrangements have been agreed upon in relation to the Offer</p>
Offer for Sale	<p>Offer for Sale of 17,890,087[^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 18,838.26 million by the Selling Shareholders, consisting of 2,041,341[^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 2,149.53 million by Kuldeep Jain and 8,510,959[^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 8,962.04 million by BGTF One Holdings (DIFC) Limited and 687,357[^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 723.79 million by KEMPINC LLP, and 5,102,639[^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 5,373.08 million by Augment India I Holdings, LLC and 1,547,791[^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 1,629.82 million by DSDG HOLDING APS.</p> <p>For further details, see “<i>The Offer</i>” beginning on page 100.</p> <p>[^] <i>Subject to finalisation of rejection of Bids and Basis of Allotment</i></p>
Offer Price	<p>₹ 1,053 per Equity Shares being the final price at which Equity Shares will be Allotted to successful ASBA Bidders (except for the Anchor Investors) in terms of the Red Herring Prospectus and this Prospectus. Equity Shares will be Allotted to Anchor Investors at the Anchor Investor Offer Price which was determined by our Company, in consultation with the BRLMs in terms of the Red Herring Prospectus and this Prospectus.</p> <p>The Offer Price was determined by our Company, in consultation with the BRLMs on the Pricing Date, in accordance with the Book Building Process and in terms of the Red Herring Prospectus.</p> <p>A discount of 9.50% on the Offer Price (equivalent of ₹ 100 per Equity Share) was offered to Eligible Employees Bidding in the Employee Reservation Portion. This Employee Discount was determined by our Company in consultation with the BRLMs</p>
Offer Proceeds	<p>The proceeds of the Fresh Issue which shall be available to our Company and the proceeds of the Offer for Sale (net of their respective portion of Offer-related expenses and relevant taxes/levies thereon) which shall be available to each of the Selling Shareholders in proportion to the respective portion of Offered Shares of each such Selling Shareholder. For further information about use of the Offer Proceeds, see “<i>Objects of the Offer</i>” beginning on page 160.</p>
Offered Shares	<p>17,890,087[^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 18,838.26 million offered by the Selling Shareholders in the Offer for Sale.</p> <p>[^] <i>Subject to finalisation of rejection of Bids and Basis of Allotment</i></p>
Pre-IPO Placement	<p>Our Company, in consultation with the Book Running Lead Managers, undertook a Pre-IPO Placement of 2,819,548 Equity Shares of face value ₹1 each at a price of ₹1,053 per Equity Share (including a premium of ₹1,052 per Equity Share), aggregating to ₹ 2,968.98 million, as permitted under the applicable law. The Pre-IPO Placement was at a price decided by our Company, in consultation with the Book Running Lead Managers and was completed prior to filing of the Red Herring Prospectus with the RoC. The amount raised pursuant to the Pre-IPO Placement was reduced from the Fresh Issue, subject to compliance with Rule 19(2)(b) of the SCRR and the size of the Fresh Issue has been revised to ₹ 12,000.00 million. The Pre-IPO Placement did not exceed 20% of the original size of the Fresh Issue as disclosed in the Draft Red Herring Prospectus. Our Company had appropriately intimated the subscribers to the Pre-IPO Placement, prior to allotment pursuant to the Pre-IPO Placement, that there is no guarantee that our Company may proceed with the Offer or the Offer may be successful and will result into listing of the Equity Shares on the Stock</p>

Term	Description
	Exchanges. Further, relevant disclosures in relation to such intimation to the subscribers to the Pre-IPO Placement has been appropriately made in the relevant sections of the Red Herring Prospectus and this Prospectus
Price Band	The price band ranging from the Floor Price of ₹ 1,000 per Equity Share to the Cap Price of ₹ 1,053 per Equity Share.
Pension Fund(s)	A fund registered with the Pension Fund Regulatory and Development Authority under the provisions of the Pension Fund Regulatory and Development Authority Act, 2013

Technical, Industry and Business-Related Terms or Abbreviations

Term	Description
Advance Stage Capacity	Projects which have received evacuation approval
Average Grid Availability	Is calculated as weighted average of grid availability by fully operational project capacity in the portfolio during the period/year
Average Plant Availability	is calculated as weighted average of plant availability by fully operational project capacity in the portfolio during the period/year
Capex Services	Turnkey development services, including land, evacuation infrastructure, EPC services, power evacuation and O&M services for the lifetime of the project
CERC	The Central Electricity Regulatory Commission functioning under the Electricity Act, 2003
CTU	Central Transmission Utility
CTU-Connected	Projects in high wind generating states and solar irradiation states in India such as Rajasthan and Karnataka, according to the CRISIL Report, and supply the energy generated from such plants to customers located within and outside the relevant states through the CTU
Capex	Means projects which are wholly invested in by the customers
COD	Commercial operation date of a Project
Contracted Capacity	Refers to projects for which we have signed power purchase agreements (“PPAs”) or letters of intent (“LOI”) with customers
Capacity	Refers to the rated power generation potential of a project
C&I	Commercial and Industrial and refers to the business sector that includes commercial businesses and industrial operations (such as factories and production units).
Customer	Customer includes customer groups i.e., a set of related entities—such as subsidiaries, joint ventures, associates, or affiliates—that are connected through ownership, control, or significant business relationships, and are treated together as one group
DISCOMs	State-owned distribution companies
EAPAs	Energy Attribute Purchase Agreements
ESG	Environment, social and governance
ESG Report	Refers to Clean Max Enviro Energy Solutions Limited’s (formerly Clean Max Enviro Energy Solutions Private Limited) ESG Report for the Period April 1, 2024 to March 31, 2025
Evacuation Capacity	Refers to the maximum amount of electrical power that can be transmitted from a project to the grid or end consumer through the available transmission infrastructure, including substations, transmission lines, and associated grid connectivity/evacuation approval
EPC	Engineering, procurement and construction
Expected generation	Means the electricity units that the Project is expected to generate annually taking into account specific PLF and photovoltaic module or wind turbine degradation
Farm	Means the physical site or set of co-located facilities where solar and/or wind energy is generated through generating units, operated, or maintained by the Company. A farm may host multiple projects serving different customers or regulatory schemes and includes all associated infrastructure

Term	Description
	such as inverters, transformers, pooling substations, and internal evacuation lines
Grid availability	Is the percentage of time over a given period that the grid substation is able to receive injection of power from the generating plant, compared to the total time in that period. It is calculated as weighted average of grid availability by fully operational project capacity in the portfolio during the period/year (trailing 12 months)
Hybrid	Hybrid is defined as wind-solar hybrid project that combines wind turbines and solar photovoltaic (PV) panels to generate electricity
GW	Gigawatt
GWh	Gigawatt hour
GWp	Gigawatt peak
Greenfield	Means projects where the PSS (Pooling substation) for injecting the project's power has not been constructed and charged yet
I-RECs	International Renewable Energy Certificates
KW	Kilowatt
kWh	Kilowatt hour
kV	Kilovolt
LCOE	Levelized cost of energy is metric used to assess and compare the average cost of generating electricity from different sources over the lifetime of a power plant
MW	Megawatt
MWp	Megawatt peak
MWh	Megawatt-hour
Offsite	Renewable energy plants including solar, wind and hybrid plants, within the renewable energy (solar, wind and hybrid) farms that we developed
Onsite	Refers to solar projects that are located within the premises or in the immediate vicinity of the end consumer's facility. These projects are typically installed on rooftops, building structures, carports, or unused land within or adjacent to the consumer's premises, and supply power directly to the consumer without using the distribution network
Onsite Solar	Solar power plants that are located within customer's premises
Opex	Means Projects which are wholly or partly invested in by the developer
Operational Capacity	Refers to projects commissioned as of March 31, 2025, September 30, 2025 or October 31, 2025 as applicable, and includes 355.9 MW of capacity as of October 31, 2025 for which Central Electrical Inspector to Government ("CEIG") charging approval has been received and COD certificate is awaited
Under Development Capacity	Refers to projects with evacuation approval applied for as of September 30, 2025 or October 31, 2025
O&M	Operation and maintenance
PLF	Plant load factor - is calculated as total generation by fully operational project capacity divided by maximum generation from fully operational project capacity during the period of operation in the portfolio during the period/year
Projects	Refers to a defined rooftop utility scale capacity of renewable energy generation developed, owned, or operated by the Company, typically backed by a specific power purchase agreements and regulatory approvals
PPAs	Power Purchase Agreements
PSS	Pooling substation
RECs	Renewable Energy Certificates
Renewable Energy Power Sales Segment	Our business segment that sells electricity generated at our renewable energy plants to customers through long-term PPAs and EAPAs, with offerings including Onsite Solar, Offsite, STU-Connected, and CTU-Connected
Renewable Energy Services Segment	Our business segment that provides services to help our customers achieve their Net Zero goals, including Capex Services and Carbon Services
RTC	Round the Clock
Scope 1 emissions	Means direct emissions that occur from sources that are controlled or owned by a company, as mentioned in the ESG Report
Scope 2 emissions	Means indirect emissions from generation of purchased energy, as mentioned in the ESG Report
Scope 3 emissions	Means all indirect emissions that occur in the value chain of a company, as mentioned in the ESG Report
SERC(s)	Relevant state level electricity regulatory commissions functioning under the Electricity Act, 2003
Solar Onsite	Solar Onsite is defined as solar projects that are located within the premises or in the immediate vicinity of the end consumer's facility. These projects are typically installed on rooftops, building structures, carports, or unused land within or adjacent to the consumer's premises, and supply power directly to the consumer without using the distribution network
Solar Offsite	Means solar projects that are located away from the premises of the end consumer and supply electricity through the grid under open access regulatory mechanisms. These projects are connected to the distribution network, allowing energy to be wheeled to customers located at different geographic locations
Steady state	Means the period of normal and sustained operation of the Plant after completion of commissioning,

Term	Description
	when output, efficiency, and availability have stabilized under standard operating conditions, excluding temporary disruptions due to testing, maintenance, or abnormal events
STU	State Transmission Utility
STU – Capex	Refers to STU projects which are wholly invested in by customers
STU - Group Captive	Refers to open access projects where customers invest at least 26% equity in a SPV established by us and consume a minimum of 51% of the power generated to qualify as a group captive consumer under the Electricity Act
STU - Third Party, Open Access	Refers to models where we do not require customer equity participation and supply power pursuant to PPAs
tCO2e	Metric tons of CO2 equivalent
Technology customers	Customers across data centre, AI and technology industries.
TW	Terawatt
TWh	Terawatt-hour
VPPAs	Virtual Power Purchase Agreements
Wind projects	Wind projects that are located away from the premises of the end consumer and supply electricity through the grid under open access regulatory mechanisms. These projects are connected to the distribution network, allowing energy to be wheeled to customers located at different geographic locations
WTG	Wind turbine generator

Key Performance Indicators (“KPIs”) as stated in the Basis for Offer Price section on page 191.

Metrics	Description
Revenue from operations	Revenue from operations is as per the Restated Consolidated Statement of Profit and Loss. It is sum of revenue from sale of power, revenue from sale of goods, revenue from projects, revenue from operation and maintenance services, revenue from common infra services and other operating income
-Renewable Energy Power Sales	Renewable Energy Power Sales Segment includes sale of electricity generated at our renewable energy plants to customers through long-term Power Purchase Agreements (“PPAs”), Energy Supply Agreement (“ESAs”) and Energy Attribute Purchase Agreements (“EAPAs”).
-Renewable Energy Services	Renewable Energy Services Segment includes Capital Expenditure Services and Carbon Services
Total income	Total Income is as per the Restated Consolidated Statement of Profit and Loss and includes Revenue from operations and other income.
Gross Margin	Gross Margin % is calculated as Gross Margin of the segment as a percentage of Revenue from Operations of the respective segment
- Renewable Energy Power Sales	
- Renewable Energy Services	
EBITDA	EBITDA is calculated as Revenue from operations minus Cost of materials consumed and cost of services minus Purchase of traded goods minus Employee benefits expense minus other expenses. The cost of services and other expenses include any maintenance expense towards our renewable energy plants
3 Year EBITDA CAGR	3 Year EBITDA CAGR calculated as EBITDA growth from Fiscal 2023 to Fiscal 2025
Adjusted EBITDA	Adjusted EBITDA is calculated as Restated profit/(loss) for the period/year plus Total tax expenses, Exceptional items, Depreciation, impairment and amortisation expenses, Finance costs and Non-Cash/One-time expenses Less Share of profit of joint ventures and associate (net of taxes) and Non-Cash/One-time incomes.
Adjusted EBITDA of the Segment	Adjusted EBITDA of the Segment for Renewable Energy Power and Renewable Energy

Metrics	Description
- Renewable Energy Power Sales	services segment is computed as segment result plus finance cost less share of profit of joint ventures and associate (net of taxes). Depreciation and amortisation expenses and Total tax expense are not included in Segment result
- Renewable Energy Services	
Adjusted EBITDA Margin of the Segment (%)	Adjusted EBITDA Margin of the Segment is calculated as Adjusted EBITDA of the Segment as a percentage of Total income for the respective segment.
- Renewable Energy Power Sales	
- Renewable Energy Services	
Non-cash/One-time expenses	Non-cash/One-time expenses include but are not restricted to Gratuity expense, Employee share based payment expenses, Net foreign currency exchange loss, Bad debts written off, Expected credit loss allowance, MTM loss on forward contracts (net), Listing Fees, Non-operating sundry expense, Loss on derecognition of ROU and Loss on assets sold/written off
Non-cash/One-time incomes	Non-cash/One-time incomes include but are not restricted to Cash flow hedges - ineffective portion of changes in fair value, Profit on derecognition of ROU, Net foreign exchange gain, Interest income from amortisation of financial liability, Gain on modification of borrowing terms, Gain on change of ownership interest in subsidiary, Gain on sale of property, plant and equipment (net) and Gain on financial assets classified at fair value through profit and loss
PAT attributable to owners	PAT attributable to owners is Restated (Loss)/Profit for the year attributable to Owners of the company as per Restated Consolidated Statement of Profit and Loss
Debt (net off liquid assets) / Adjusted EBITDA	Debt (net off liquid assets) / Adjusted EBITDA is calculated as Opening Debt (net off liquid assets) divided by Adjusted EBITDA.
3 Year average Cash ROIC (based on opening funds invested)	3 Year average Cash ROIC (based on opening funds invested) is calculated as Average Adjusted EBITDA of last 3 fiscal years as a percentage of Average of Funds invested in business at the beginning of the year for last three fiscal years
3 Year Average Gross Block to Adjusted EBITDA	EBITDA efficiency is calculated as Average Gross Block of last 3 fiscal years divided by Adjusted EBITDA
3 year Average cash ROE (based on opening equity)	3 Year average Cash ROE (based on opening equity) is calculated as average Cash PAT for last 3 fiscal years as a percentage of average opening equity attributable to the owners for the last three fiscals
DSO (days) or Trade receivable turnover	DSO (days) or Trade receivable as average trade receivables divided by the Revenue from Operations for the year multiplied by 365 days (in the case of fiscal), or 182 days (in the case of six month period)
- Renewable Energy Power Sales	DSO (days) or Trade receivable turnover of Renewable Energy Power Sales Segment is calculated as average trade receivables of the Renewable Energy Power Sales Segment divided by the Revenue from Operations of that segment for the year multiplied by 365 days (in the case of fiscal), or 182 days (in the case of six month period)
- Renewable Energy Services	DSO (days) or Trade receivable turnover of Renewable Energy Services Segment is calculated as average trade receivables of the Renewable Energy Services Segment divided by the Revenue from Operations of that segment for the year multiplied by 365 days (in the case of fiscal), or 182 days (in the case of six month period)
Cash SG&A/Adjusted EBITDA	Calculated as Cash SG&A as a percentage of Adjusted EBITDA
Debt (net off liquid assets) to Equity	Debt (net off liquid assets) to Equity is calculated as Debt (net off liquid assets) divided by Total Equity
Cost of Project debt	Cost of Project Debt calculated as the weighted average interest rate on project loans outstanding as at the end of the respective Fiscals or six month period.
Net Worth	Net worth is calculated as the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account, after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, as per the Restated Consolidated Financial Information, but does not include reserves created out of revaluation of assets, write-back of depreciation, amalgamation and foreign currency translation reserve
Return on Net Worth	Return on Net Worth is calculated as Restated Profit/loss for the year/period attributable to owners of the company as per the Restated Consolidated Statement of Profit and Loss divided by Net Worth
Net Asset value per equity share	Net Asset value per equity share is calculated as Net Worth divided by Number of equity shares outstanding at the end of the fiscal year or six month period.
Net Asset value per equity share (bonus and split adjusted)	Net Asset value per equity share (bonus and split adjusted) is calculated as Net Worth divided by Number of equity shares outstanding at the end of the fiscal year (post spilt and bonus issue) or six month period.

Non-GAAP Measures

Particulars	Definitions
Net Worth	Net worth is calculated as the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account, after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, as per the Restated Consolidated Financial Information, but does not include reserves created out of revaluation of assets, write-back of depreciation, amalgamation and foreign currency translation reserve

Particulars	Definitions
Return on Net Worth	Return on Net Worth is calculated as Restated Profit/loss for the year/period attributable to owners of the company as per the Restated Consolidated Statement of Profit and Loss divided by Net Worth
Net Asset value per equity share	Net Asset value per equity share is calculated as Net Worth divided by Number of equity shares outstanding at the end of the fiscal year or six month period
Net Asset value per equity share (bonus and split adjusted)	Net Asset value per equity share (bonus and split adjusted) is calculated as Net Worth divided by Number of equity shares outstanding at the end of the fiscal year (post split and bonus issue) or six month period
Cost	Cost includes Cost of materials consumed and cost of services and Purchase of traded goods
Gross Margin	Gross margin is calculated as revenue from operations minus cost of materials consumed and cost of services minus purchase of traded goods
Capital expenditure	Capital Expenditure is calculated as Property, plant and equipment plus Capital work in-progress plus Other intangible assets plus Intangible assets under development minus Opening Total Capital Assets plus Depreciation, amortisation and impairment expenses minus Additions - through asset acquisition minus Additions - through business combination plus Payment towards business acquisition
Total Capital and Operational expenditure	Total Capital and Operational expenditure is calculated as Capital expenditure plus Cost of materials consumed and cost of services plus Purchase of traded goods
Total Borrowings	Total Borrowings is calculated as Non-current liabilities – Financial liabilities – Borrowings plus Current liabilities – Financial liabilities – Borrowings
Debt (net off liquid assets)	Debt (net off liquid assets) is calculated as Total Borrowings minus cash and cash equivalents, other balances with bank, balances with bank held as margin money, Lien marked mutual funds - Quoted (measured at FVTPL) and current investments
Funds invested in the business	Funds invested in business is calculated as Total Equity and Total Borrowings (non-current borrowings and current borrowings)
Funds invested in business at the beginning of the year	Funds invested in business at the beginning of the year is Funds invested in the business at the end of previous fiscal
Total equity attributable to the owners of the Company at the beginning of the year	Total equity attributable to the owners of the Company at the beginning of the year is calculated as Total equity attributable to the owners of the Company as per Restated Consolidated Statement of Assets and Liabilities as at the end of the previous fiscal
Cash SG&A	Cash SG&A is calculated as Employee Benefit expenses plus other expenses, adjusted for non-cash expenses
Cash PAT	Cash PAT is calculated as Restated Profit/(Loss) before share of profit of joint venture and associate minus Restated (Loss)/Profit for the year attributable to Non-controlling interests plus Exceptional items plus Depreciation, amortisation and impairment expenses plus Non-cash finance cost plus Non-cash expenses minus Deferred tax credit minus Non-cash incomes. For break-down of Non-cash expenses, Non cash finance cost and Non-cash incomes refer "Management's Discussion and Analysis of Financial Condition and Results of Operations" on page 829.
Cash ROE (based on average equity)	Cash ROE (based on average equity) is calculated as Cash PAT as a percentage of Average equity
Cash ROE (based on opening equity)	Cash ROE (based on opening equity) is calculated as Cash PAT as a percentage of Opening equity. Opening equity is Total equity attributable to the owners of the Company as at the end of previous fiscal/period.
Reported ROE (based on average equity)	Reported ROE (based on average equity) is calculated as Restated (Loss)/Profit for the year attributable to Owners of the company divided by Average equity
Reported ROE (based on opening equity)	Reported ROE (based on opening equity) is calculated as Restated (Loss)/Profit for the year attributable to Owners of the company divided by Opening equity. Opening equity is Total equity attributable to the owners of the Company as at the end of previous fiscal/period
Cash ROIC (based on average funds invested)	Cash ROIC (based on average funds invested) is calculated as Adjusted EBITDA as a percentage of Average funds invested in business
Cash ROIC (based on opening funds invested)	Cash ROIC (based on opening funds invested) is calculated as Adjusted EBITDA as a percentage of Opening funds invested in business. Opening funds invested in business is Funds invested in the business at the end of previous fiscal/ period.
Reported ROIC (based on average funds invested)	Reported ROIC (based on average funds invested) is calculated as EBITDA as a percentage of Average funds invested in business
Reported ROIC (based on opening funds invested)	Reported ROIC (based on opening funds invested) is calculated as EBITDA as a percentage of Opening funds invested in business. Opening funds invested in business is Funds invested in the business at the end of previous fiscal/period
EBITDA	EBITDA is calculated as Revenue from operations minus Cost of materials consumed and cost of services minus Purchase of traded goods minus Employee benefits expense minus other expenses. The cost of services and other expenses include any maintenance expense towards our renewable energy plants
Adjusted EBITDA	Adjusted EBITDA is calculated as Restated profit/(loss) for the period/year plus Total tax expenses, Exceptional items, Depreciation, impairment and amortisation expenses, Finance costs and Non-Cash/One-time expenses Less Share of profit of joint ventures and associate (net of taxes) and Non-Cash/One-time incomes.

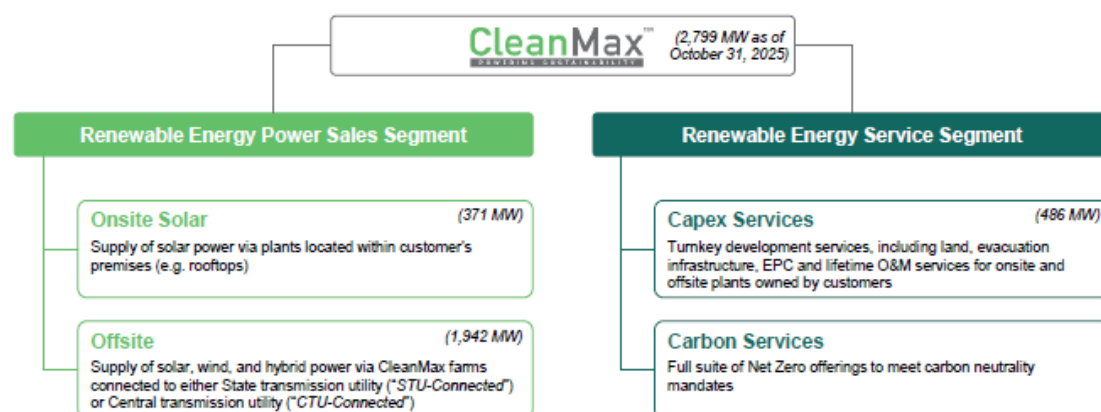

Particulars	Definitions
Non-cash/One-time expenses	Non-cash/One-time expenses include but are not restricted to Gratuity expense, Employee share based payment expenses, Net foreign currency exchange loss, Bad debts written off, Expected credit loss allowance, MTM loss on forward contracts (net), Listing Fees, Non-operating sundry expense, Loss on derecognition of ROU and Loss on assets sold/written off
Non-cash/One-time incomes	Non-cash/One-time incomes include but are not restricted to Cash flow hedges - ineffective portion of changes in fair value, Profit on derecognition of ROU, Net foreign exchange gain, Interest income from amortisation of financial liability, Gain on modification of borrowing terms, Gain on change of ownership interest in subsidiary, Gain on sale of property, plant and equipment (net) and Gain on financial assets classified at fair value through profit and loss
Adjusted EBITDA of the Segment	Adjusted EBITDA of the Segment for Renewable Energy Power and Renewable Energy services segment is computed as segment result plus finance cost less share of profit of joint ventures and associate (net of taxes). Depreciation and amortisation expenses and Total tax expenses are not included in Segment result.
Adjusted EBITDA Margin of the Segment (%)	Adjusted EBITDA Margin of the Segment is calculated as Adjusted EBITDA of the Segment as a percentage of Total income for the respective segment.
- Renewable Energy Power Sales	
- Renewable Energy Services	
Average equity	Average equity is calculated as an average of Total equity attributable to the owners of the Company as at the end the fiscal and Total equity attributable to the owners of the Company at the end of the previous fiscal as per Restated Consolidated Statement of Assets and Liabilities
Average funds invested in business	Average funds invested in business is calculated as an average of Funds invested in business at the end of the fiscal and Funds invested in business at the end of previous fiscal
Debt (net off liquid assets) / Adjusted EBITDA	Debt (net off liquid assets) / Adjusted EBITDA is calculated as Debt (net off liquid assets) divided by Adjusted EBITDA. Opening Debt (net off liquid assets) for the fiscal is Debt (net off liquid assets) at the end of previous fiscal/ period.

SUMMARY OF THE OFFER DOCUMENT

The following is a general summary of certain disclosures, and the terms of the Offer included in this Prospectus and is not exhaustive, nor does it purport to contain a summary of all the disclosures in this Prospectus, when filed or all details relevant for investors. This summary should be read in conjunction with, and is qualified in its entirety by, the more detailed information appearing elsewhere in this Prospectus, including in “Risk Factors”, “The Offer”, “Capital Structure”, “Objects of the Offer”, “Industry Overview”, “Our Business”, “Our Promoters and Promoter Group”, “Restated Consolidated Financial Information” “Offer Procedure”, “Outstanding Litigation and Material Developments” and “Description of Equity Shares and Terms of the Articles of Association” beginning on pages 45, 100, 118, 160, 229, 293, 543, 550, 928, 870 and 949, respectively.

Summary of the primary business of our Company

We are a provider of renewable energy to commercial & industrial customers. With 15 years of experience since our inception in 2010, we specialize in delivering decarbonization solutions, including supplying renewable power and offering energy services and carbon credit solutions to customers. We operate a fully business-to-business model, serving only commercial and industrial clients. Our expertise spans across providing EPC services and O&M services of renewable energy plants including solar, wind and hybrid plants, within our customer’s premises and within CleanMax-developed farms. We operate two business segments: (i) Renewable Energy Power Sales Segment (where we sell power under long-term PPAs); and (ii) Renewable Energy Services Segment (where we offer EPC, O&M services and carbon services to customers). As of October 31, 2025, we had 2,799 MW operational capacity.

(MW Operational)

Note: 1. Offsite includes STU-Group Captive (1,402 MW), STU-Third Party Open Access (540 MW); 2. Capex Services includes Onsite Solar-Capex (111 MWp) and STU-Capex (375 MW); 3. As per CRISIL, Net zero refers to cutting greenhouse gas (GHG) emissions to a minimum levels of residual emissions that can be absorbed and durably stored permanently by technological or natural solutions, leaving zero carbon in the atmosphere.

The table below presents a breakdown of revenue by business segment, along with the percentage contribution of each segment to total revenue for the periods indicated.

Particulars	Units	Six months ended September 30,		Fiscal		
		2025	2024	2025	2024	2023
Revenue from operations⁽¹⁾	₹ million	9,329.53	6,764.66	14,957.01	13,898.37	9,295.82
- Renewable Energy Power Sales	₹ million	7,192.15	5,736.14	11,072.48	8,663.33	4,748.15
% of Revenue from Operations	%	77.09	84.80	74.03	62.33	51.08
- Renewable Energy Services	₹ million	2,050.07	980.44	3,766.53	5,180.04	4,547.67
% of Revenue from Operations	%	21.97	14.49	25.18	37.27	48.92

⁽¹⁾ Revenue from operations is as per the Restated Consolidated Statement of Profit and Loss. It is a sum of revenue from sale of power, revenue from sale of goods, revenue from projects, revenue from operation and maintenance services, revenue from common infra services and other operating income.

Renewable Energy Power Sales Segment: we earn revenue primarily from the sale of electricity generated at our renewable energy plants to customers under long-term Power Purchase Agreements (“PPAs”) and Energy Attribute Purchase Agreements (“EAPAs”) across a range of offerings.

Renewable Energy Services Segment: we earn revenue primarily from providing services to customers to enable them to achieve their Net Zero aspirations. These services include providing Capex Services such as designing, developing,

constructing and maintaining renewable energy plants owned by customers.

For further information, see “Our Business” and “Management’s discussion and analysis of our results of operations” beginning on pages 293 and 829, respectively.

Summary of the industry in which our Company operates

India is expected to experience rapid growth, with its annual solar and wind capacity additions increasing from 35 GW in 2024 to 61 GW in 2030. This would translate into a total Renewable Energy capacity addition of about 345 GW between 2025-2030. Over 90% of the Renewable Energy capacity (about 315 GW) is expected from solar and wind projects. This would be driven by large-scale government procurement programmes, attractive tariffs and a strong commitment to addressing the effects of climate change. Within solar and wind technologies, Open Access (OA) mode, which enables C&I consumers to procure electricity directly from an Independent Power Producer rather than the state utility, is emerging as an attractive option for both consumers given the potential cost savings. As a result, the share of OA in solar and wind capacity addition has increased to 34% in CY2024 from just 5% in CY2019 (Source: CRISIL Report).

For further information, see “Industry Overview” beginning on page 229.

Our Promoters

Kuldeep Jain, Pratap Jain, Nidhi Jain, BGTF One Holdings (DIFC) Limited and KEMPINC LLP are the Promoters of our Company.

For further details, see “Our Promoters and Promoter Group” beginning on page 543.

Offer size

The following table summarizes the details of the Offer size:

Offer of Equity Shares⁽¹⁾⁽²⁾⁽³⁾⁽⁴⁾⁽⁵⁾	29,315,993 [^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 30,838.26 million ^{^*}
of which:	
(i) Fresh Issue⁽¹⁾	11,425,906 [^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 12,000.00 million ^{^*}
(ii) Offer for Sale⁽²⁾⁽³⁾	17,890,087 [^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 18,838.26 million [^]
The Offer comprises:	
Employee Reservation Portion⁽⁴⁾	314,795 [^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 300.00 million ^{^*}
Net Offer	29,001,198 [^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 30,538.26 million ^{^*}

[^] Subject to finalisation of rejection of Bids and Basis of Allotment.

^{*} An Employee Discount of ₹ 100 per Equity Share was offered to Eligible Employees Bidding in the Employee Reservation Portion.

⁽¹⁾ The Offer has been authorized by resolution of our Board of Directors at their meeting held on August 14, 2025 read with their resolutions passed at their meetings held on December 4, 2025 and February 9, 2026 and the Fresh Issue has been authorised by a special resolution passed by our Shareholders on August 14, 2025.

⁽²⁾ Our Board of Directors has taken on record the respective consent letters of each of the Selling Shareholders to severally and not jointly, participate in the Offer for Sale pursuant to its resolution dated February 9, 2026. For further details, see “The Offer” and “Other Regulatory and Statutory Disclosures” beginning on pages 100 and 893, respectively.

⁽³⁾ Each of the Selling Shareholders has, severally and not jointly, specifically confirmed that its respective portion of the Offered Shares will be offered for sale in compliance with Regulation 8 of the SEBI ICDR Regulations. For further details, see “The Offer” and “Other Regulatory and Statutory Disclosures” beginning on pages 100 and 893, respectively. Each of the Selling Shareholders has, severally and not jointly consented to its respective participation in the Offer for Sale to the extent of its respective portion of the Offered Shares as set out below:

Name of the Selling Shareholder	Aggregate proceeds from Offer for Sale	Number of Offered Shares	Date of board resolution/ authorization	Date of consent letter
Promoter Selling Shareholders				
Kuldeep Jain	₹ 2,149.53 million [^]	2,041,341 [^] Equity Shares of face value of ₹ 1 each	-	February 7, 2026
BGTF One Holdings (DIFC) Limited	₹ 8,962.04 million [^]	8,510,959 [^] Equity Shares of face value of ₹ 1 each	August 15, 2025	February 8, 2026
KEMPINC LLP	₹ 723.79 million [^]	687,357 [^] Equity Shares of face value of ₹ 1 each	August 14, 2025	February 7, 2026
Investor Selling Shareholders				
Augment India I Holdings, LLC	₹ 5,373.08 million [^]	5,102,639 [^] Equity Shares of face value of ₹ 1 each	August 13, 2025	February 8, 2026
DSDG HOLDING APS	₹ 1,629.82 million [^]	1,547,791 [^] Equity Shares of face value of ₹ 1 each	August 12, 2025	February 7, 2026

[^] Subject to finalisation of rejection of Bids and Basis of Allotment.

⁽⁴⁾ Our Company, in consultation with the Book Running Lead Managers, undertook a Pre-IPO Placement of Equity Shares, aggregating to ₹ 2,968.98 million, as permitted under the applicable law. The Pre-IPO Placement was at a price decided by our Company, in consultation with the Book Running Lead Managers and was completed prior to filing of the Red Herring Prospectus with the RoC. The amount raised pursuant to the Pre-IPO Placement was reduced from the Fresh Issue, subject to compliance with Rule 19(2)(b) of the SCRR and the size of the Fresh Issue has been revised to up to ₹ 12,000.00 million. The Pre-IPO Placement did not exceed 20% of the original size of the Fresh Issue as disclosed in the Draft Red Herring Prospectus. Our Company had appropriately intimated the subscribers to the Pre-IPO Placement, prior to allotment pursuant to the Pre-IPO Placement, that there is no guarantee that our Company may proceed with the Offer or the Offer may be successful and will result into listing of the Equity Shares on the Stock Exchanges. Further, relevant disclosures in relation to such intimation to the subscribers to the Pre-IPO Placement has been appropriately made in the relevant sections of the Red Herring Prospectus and this Prospectus.

- ⁽⁵⁾ The Employee Reservation Portion did not exceed 5% of the post-Offer paid up Equity Share capital and the value of Allotment to any Eligible Employee did not exceed ₹ 200,000 (net of Employee Discount, if any). Provided that, in the event of an under-subscription in the Employee Reservation Portion post the initial Allotment, such unsubscribed portion could have been allotted on a proportionate basis to Eligible Employees Bidding in the Employee Reservation Portion, for a value in excess of ₹ 200,000 (net of Employee Discount, if any), subject to the total Allotment to an Eligible Employee not exceeding ₹ 500,000 (net of Employee Discount, if any). Eligible Employees bidding in the Employee Reservation Portion were requested to ensure that the maximum Bid Amount did not exceed ₹ 500,000 (net of Employee Discount, if any). For further details, see “Offer Procedure” and “Offer Structure” beginning on pages 928 and 923, respectively.

The Offer and Net Offer constituted 25.04% and 24.77%, respectively, of the post Offer paid-up Equity Share capital of our Company. For further details, see “The Offer”, “Other Regulatory and Statutory Disclosures” and “Offer Structure” beginning on pages 100, 893 and 923, respectively.

Objects of the Offer

Our Company proposes to utilise the Net Proceeds towards funding the following objects:

Objects	Estimated amount to be funded from Net Proceeds ⁽²⁾ (in ₹ million)
Repayment and/or pre-payment, in part or full, of all or certain outstanding borrowings of our Company and/or our Subsidiaries	11,226.74
General corporate purposes ⁽¹⁾	237.89
Total	11,464.63

⁽¹⁾ The amount utilised for general corporate purposes shall not exceed 25% of the Gross Proceeds.

⁽²⁾ Our Company, in consultation with the Book Running Lead Managers, undertook a Pre-IPO Placement of Equity Shares, aggregating to ₹ 2,968.98 million, as permitted under the applicable law. The Pre-IPO Placement was at a price decided by our Company, in consultation with the Book Running Lead Managers and was completed prior to filing of the Red Herring Prospectus with the RoC. The amount raised pursuant to the Pre-IPO Placement was reduced from the Fresh Issue, subject to compliance with Rule 19(2)(b) of the SCRR and the revised size of the Fresh Issue has been adjusted to ₹ 12,000.00 million. The Pre-IPO Placement did not exceed 20% of the original size of the Fresh Issue as disclosed in the Draft Red Herring Prospectus. Our Company had appropriately intimated the subscribers to the Pre-IPO Placement, prior to allotment pursuant to the Pre-IPO Placement, that there is no guarantee that our Company may proceed with the Offer or the Offer may be successful and will result into listing of the Equity Shares on the Stock Exchanges. Further, relevant disclosures in relation to such intimation to the subscribers to the Pre-IPO Placement has been appropriately made in the relevant sections of the Red Herring Prospectus and this Prospectus. Further, the proceeds from the Pre-IPO Placement, shall be completely utilised towards the general corporate purposes portion of the Objects of the Offer.

For further details, see “Objects of the Offer” beginning on page 160.

Aggregate pre-Offer Shareholding of our Promoters, members of our Promoter Group, the Selling Shareholders and other Shareholders to the extent applicable, as a percentage of our paid-up Equity Share capital

The details of the aggregate pre-Offer Shareholding of our Promoters, members of our Promoter Group, the Selling Shareholders and other Shareholders to the extent applicable, as a percentage of our paid-up Equity Share capital, is as follows:

Sr. No.	Name	Number of Equity Shares of face value of ₹ 1 each	Percentage of the pre-Offer paid-up Equity Share capital on a fully diluted basis (%) [§]	Number of Equity Shares post-Offer*	Percentage of the post-Offer paid-up Equity Share capital on a fully diluted basis (%) [*]

Revenue from operations	9,329.53	6,764.66	14,957.01	13,898.37	9,295.82
Total income	9,693.45	7,058.45	16,103.42	14,253.09	9,609.79
Restated profit/(loss) for the period/year	190.04	65.18	194.29	(376.43)	(594.73)
Restated Earnings per equity share (Face value of ₹ 1/-) (Rs. per share) ⁽¹⁾					
-basic	1.09	0.36	2.88	(3.94)	(9.01)
-diluted	1.05	0.35	2.79	(3.94)	(9.01)
Net Worth ⁽²⁾	25,983.38	22,983.31	25,454.39	18,179.62	12,099.33
Return on Net Worth (%) ⁽³⁾	0.43	0.15	1.09	(1.70)	(5.39)
Net Asset value per equity share (bonus and split adjusted) (₹) ⁽⁴⁾	256.14	236.29	250.93	206.62	166.80
Total borrowings ⁽⁵⁾	101,214.60	65,647.98	79,736.98	55,145.64	38,434.15

Notes:

⁽¹⁾ Subsequent to the year ended March 31, 2025, the Company in extra-ordinary general meeting dated June 27, 2025, has approved split of each equity share of face value of ₹ 10 each into 10 shares of face value of ₹ 1 each (the 'Split'). Further, pursuant to a resolution passed in extra-ordinary general meeting dated August 8, 2025, shareholders have approved the issuance of bonus shares to the equity shareholders in the ratio of 1:1 (the 'Bonus').

⁽²⁾ Net worth is calculated as the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account, after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, as per

the Restated Consolidated Financial Information, but does not include reserves created out of revaluation of assets, write-back of depreciation, amalgamation and foreign currency translation reserve.

⁽³⁾ Return on Net Worth is calculated as Restated Profit/loss for the year/period attributable to owners of the company as per the Restated Consolidated Statement of Profit and Loss divided by Net Worth

⁽⁴⁾ Net Asset value per equity share (bonus and split adjusted) is calculated as Net Worth divided by Number of equity shares outstanding at the end of the fiscal year (post split and bonus issue) or six month period. The number of equity shares outstanding at the end of the fiscal year is after giving the impact of a 1:10 share split and a 1:1 bonus issue.

⁽⁵⁾ Total Borrowings is calculated as Non-current liabilities – Financial liabilities – Borrowings plus Current liabilities – Financial liabilities – Borrowings.

For details, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations –Non-GAAP Measures” on page 838.

Qualifications of the Statutory Auditor which have not been given effect to in the Restated Consolidated Financial Information

There are no qualifications included by the Statutory Auditor in their audit reports and hence no effect is required to be given in the Restated Consolidated Financial Information.

* To the extent quantifiable.

** Other than the Directors who are Promoters of our Company.

** Of which, ₹ 0.08 million has been paid under protest to the income tax authorities.

Other than the KMPs who are also Directors and Promoters of our Company.

Other than the SMPs who are also KMPs of our Company.

Notes:

⁽¹⁾ Includes communication received under Rule 142(1A) of the Central Goods and Services Tax Rules, 2017 for an amount aggregating to ₹ 119.99 million which has been duly responded to by our Company. As on date of this Prospectus, no notice of demand has been received in furtherance of this communication and our responses. Hence, the same has not been classified under material litigation, if any hereunder.

⁽²⁾ Other than amounts which are contractually passed through to offtakers.

⁽³⁾ Includes communication received under Rule 142(1A) of the Central Goods and Services Tax Rules, 2017 for an amount aggregating to ₹ 464.88 million which has been duly responded to by our Subsidiaries. As on date of this Prospectus, no notice of demand has been received in furtherance of this communication and our responses. Hence, the same has not been classified under material litigation, if any hereunder.

⁽⁴⁾ Excluding the compounding application filed by our Company on January 15, 2026, which is included in ‘Actions taken by statutory or regulatory authorities against our Company.’

As on date of this Prospectus, our Group Companies are not party to any outstanding litigation which has or may have a material impact on our Company.

For further details, see “*Outstanding Litigation and Material Developments*” beginning on page 870.

Risk Factors

Specific attention of the Bidders was invited to “*Risk Factors*” beginning on page 45 to have an informed view before making an investment decision. Bidders were advised to read the risk factors carefully before taking an investment decision in the Offer. Set forth below are the top 10 risk factors applicable to our Company, in their order of materiality that could cause actual results to differ materially from our expectations:

Sr. No.	Risk Factors
1.	In Fiscals 2024 and 2023, we incurred restated loss for the year of ₹376.43 million and ₹594.73 million respectively and generated profits in Fiscal 2025 and during the six months ended September 30, 2025 and September 30, 2024. Further, some of our Subsidiaries have incurred losses in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023. If we are unable to generate adequate cash profits and make scheduled loan repayments, we may not be able to maintain our profitability
2.	Our top 10 customers, all of whom are based in India, contributed 34.95%, 38.55%, 36.16%, 45.39% and 44.32% of our Revenue from operations in the six months ended September 30, 2025 and September 30, 2024 and Fiscals 2025, 2024 and 2023, respectively. The proportion of Operational Capacity attributed to our top 10 customers is expected to increase as we begin commissioning projects under construction with certain of such customers. Any failure to maintain renew or enter into new engagements with our top 10 customers could have a material adverse impact on our operations and financial condition
3.	Our PPAs or EAPAs may be terminated by counterparties upon the occurrence of certain events. In the event our PPAs or EAPAs are terminated, and we are unable to secure a replacement PPA or EAPA in a timely manner or on similar terms, our business, results of operations, cash flows and prospects may be adversely affected
4.	We are developing our first CTU project and ISTS project and have not commissioned a CTU project before. Any failure to develop this project successfully could have a material adverse impact on our expansion plans, business, results of operations, financial conditions and prospects
5.	Certain of our PPAs and EAPAs may not extend through project lifespans, and challenges in renewing or replacing them on favourable terms could adversely affect our business, results of operations, cash flows, and prospects
6.	Some of our Promoters had encumbered certain Equity Shares of our Company held by them in favour of 360 One Prime Limited pursuant to loans availed by one of our Promoters, KEMPINC LLP, from 360 One Prime Limited by way of pledge. Such encumbrance may be created in the future as well. Further, one of our Promoter Group, BGTF Four Holdings (DIFC) Limited, has pledged its entire shareholding in one of our Promoters, BGTF One Holdings (DIFC) Limited. Any exercise of such encumbrance by such pledgee could dilute the shareholding of such persons and consequently dilute the aggregate shareholding of some of our Promoters, which may also result in change in control and adversely affect our business and financial condition
7.	We have pledged certain of our shareholding in our Subsidiaries in favour of certain lenders. If any event of default arise under the financing agreements, such lenders could invoke the relevant share pledge agreements, adversely affecting our business, results of operations, cash flows and prospects
8.	We may be unable to accurately estimate costs for our STU-Capex business contracts, fail to maintain the quality and performance guarantees under such contracts and we may experience delays in completing the construction of our projects, which may increase our construction costs and working capital requirements, and may have a material adverse effect on our financial condition, cash flow and results of operations
9.	A portion of the Net Proceeds is proposed to be utilized for repayment and/or pre-payment, in full or part, of all or certain borrowings of our Company from Nomura Capital (India) Private Limited and Nomura Investments (Singapore) Pte. Ltd., affiliates of a certain BRLM to the Offer
10.	We have in the past entered into a number of related party transactions and may continue to enter into related party transactions in the future, and there can be no assurance that we could not have achieved more favourable terms if such transactions had not been entered into with related parties

Summary of contingent liabilities

The details of our contingent liabilities as at September 30, 2025, as per Ind AS 37, derived from the Restated Consolidated Financial Information are set forth in the table below:

Particulars	(₹ in million) As at September 30, 2025
Income tax	903.66
Goods and service tax	1,063.75

For further details of contingent liabilities as at September 30, 2025 as per Ind AS 37, see “*Restated Consolidated Financial Information – Note 39 – Contingent Liabilities and Commitments*” on page 642.

Summary of related party transactions

A summary of related party transactions as per the requirements under Ind AS 24 – Related Party Disclosures, entered into by our Group with related parties for the six months periods ended September 30, 2025 and September 30, 2024 and Financial Years ended March 31, 2025, March 31, 2024 and March 31, 2023 (post inter-company eliminations), as derived from the Restated Consolidated Financial Information are as follows:

Note:

- The transactions with related parties are made in the normal course of business and on terms equivalent to those that prevail in arm's length transactions. Outstanding balances at the period/year end are unsecured and settlement occurs in cash.
- With effect from October 1, 2024, Cleanmax Alpha LeaseCo FZCO ceased to be an associate and was converted into a subsidiary of Cleanmax Solar MENA FZCO. Hence, transactions shown above are up to 30th September, 2024.
- Managerial Remuneration does not include provision made for gratuity since the same is provided for the company as a whole based on independent actuarial valuation.

For further details of the related party transactions, see "Other Financial Information – Related Party Transactions" on page 824.

For details of the transactions eliminated during the six months period ended September 30, 2025 and September 30, 2024 and Financial Years ended March 31, 2025, March 31, 2024 and March 31, 2023, see "Restated Consolidated Financial Information – Note 49(b) - Related party transactions eliminated during the periods while preparing the Restated Consolidated Financial Information on page 658.

Weighted average price at which the specified securities were acquired by our Promoters and Selling Shareholders in the one year preceding the date of this Prospectus

The weighted average price at which the specified securities were acquired by our Promoters and Selling Shareholders, in the one year preceding the date of this Prospectus is as follows:

Name	Number of equity shares of the Company acquired in the last one year [^]	Weighted average price of acquisition per equity share ^{**} (in ₹)
Promoters		
KEMPINC LLP [#]	11,205,330	353.91

* As certified by V. Singhi & Associates, Chartered Accountants, by way of their certificate dated February 25, 2026.

[#] Also a Promoter Selling Shareholder.

[^] Pursuant to the resolution of the Board dated June 25, 2025, and the resolution of Shareholders dated June 27, 2025, each equity share of the Company of face value of ₹ 10 each was subdivided into 10 Equity Shares of face value of ₹ 1 each. Further, pursuant to shareholders resolution dated August 8, 2025, 50,720,910 Equity Shares were allotted to the existing shareholders pursuant to a bonus issue. Accordingly, the number of equity shares held and average cost of acquisition per equity share has been adjusted to give effect to such sub-division and bonus issuance.

[§] Computed based on the equity shares acquired/allotted/purchased (including acquisition pursuant to transfer). However, the equity shares disposed off have not been considered while computing number of Equity Shares acquired.

Except as stated above, our Promoters and Selling Shareholders did not acquire any specified securities, in the one year preceding the date of this Prospectus.

Weighted average cost of acquisition of all equity shares transacted in one year, eighteen months and three years preceding the date of this Prospectus:

Period	Weighted average cost of acquisition per equity share (in ₹) [#]	Cap Price is 'X' times the weighted average cost of acquisition	Range of acquisition price: lowest price – highest price [®] (in ₹)
Last one year preceding the date of this Prospectus	681.45	1.55	NA – 1,053.00
Last 18 months preceding the date of this Prospectus	655.82	1.61	NA – 1,053.00
Last three years preceding the date of this Prospectus	522.34	2.02	NA – 1,053.00

Note: Pursuant to the resolution of the Board dated June 25, 2025, and the resolution of Shareholders dated June 27, 2025, each equity share of the Company of face value of ₹ 10 each was subdivided into 10 Equity Shares of face value of ₹ 1 each. Further, pursuant to shareholders resolution dated August 8, 2025, 50,720,910 Equity Shares were allotted to the existing shareholders pursuant to a bonus issue. Accordingly, the number of equity shares held and average cost of acquisition per equity share has been adjusted to give effect to such sub-division and bonus issuance.

* As certified by V. Singhi & Associates, Chartered Accountants, by way of their certificate dated February 25, 2026.

[#] Computed based on the equity shares acquired/allotted/purchased (including acquisition pursuant to transfer). However, the equity shares disposed off have not been considered while computing number of Equity Shares acquired.

[®] While determining the range of acquisition price, the acquisition price of each transaction has been adjusted to reflect the effects of sub-division and bonus issues of equity shares.

Average cost of acquisition of equity shares for our Promoters and Selling Shareholders

The average cost of acquisition of equity shares for our Promoters and Selling Shareholders as on the date of this Prospectus is as follows:

Name	Number of Equity Shares	Percentage of pre Offer Equity Share capital on a fully diluted basis [§] (%)	Average cost of acquisition per Equity Share ^{**} (in ₹)
Promoters			
Kuldeep Jain [#]	11,675,640	10.98	0.70

Nidhi Jain	501,300	0.47	26.38
BGTF One Holdings (DIFC) Limited [#]	33,417,101	31.42	434.40
KEMPINC LLP [#]	13,678,677	12.86	311.40
Selling Shareholders (other than the Promoter Selling Shareholders)			
Augment India I Holdings, LLC	16,232,133	15.26	285.31
DSDG HOLDING APS	3,676,182	3.46	288.21

* As certified by V. Singhi & Associates, Chartered Accountants, by way of their certificate dated February 25, 2026.

[#] Also a Promoter Selling Shareholder.

[§] On a fully diluted basis calculated taking into account 692,540 Equity Shares which will result upon exercise of vested options under the Clean Max ESOP Scheme as on the date of this Prospectus.

[^] Pursuant to a resolution passed by the Board on June 8, 2025 and a resolution passed by the Shareholders on June 27, 2025, the Company sub-divided the face value of its equity shares from ₹ 10 each to ₹ 1 each. Further, pursuant to shareholders resolution dated August 8, 2025, 50,720,910 Equity Shares were allotted to the existing shareholders pursuant to a bonus issue. Accordingly, the number of equity shares held and average cost of acquisition per equity share has been adjusted to give effect to such sub-division and bonus issuance.

Note: The cost of share sold is determined based on the FIFO (First In First Out) method.

Details of price at which specified securities were acquired by each of the Promoters, members of our Promoter Group, Selling Shareholders and Shareholders entitled with the right to nominate directors or other rights in the last three years immediately preceding the date of this Prospectus

Except as stated below, none of our Promoters, members of Promoter Group, Selling Shareholders and Shareholders entitled with the right to nominate or other rights, have acquired specified securities in the last three years immediately preceding the date of this Prospectus. The details of the price at which the acquisition of specified securities was undertaken in the last three years preceding the date of this Prospectus are stated below:

[^] As certified by V. Singhi & Associates, Chartered Accountants, by way of their certificate dated February 25, 2026.

[#] Also a Promoter Selling Shareholder.

^{\$} Pursuant to the resolution of the Board dated June 25, 2025, and the resolution of Shareholders dated June 27, 2025, each equity share of the Company of face value of ₹ 10 each was subdivided into 10 Equity Shares of face value of ₹ 1 each. Further, pursuant to shareholders resolution dated August 8, 2025, 50,720,910 Equity Shares were allotted to the existing shareholders pursuant to a bonus issue. Accordingly, the number of equity shares held and average cost of acquisition per equity share has been adjusted to give effect to such sub-division and bonus issuance.

[%] Our Board of Directors pursuant to a resolution dated August 7, 2025, have approved the issuance of 50,720,910 bonus Equity Shares in the ratio of 1 Equity Share for every 1 Equity Share held.

[@] The acquisition price includes security premium paid at the time of allotment of the Preference Shares.

^{*} The cash consideration for such allotments of equity shares was paid at the time of allotment of the relevant Preference Shares.

[‡] As per the KEMPINC-BGTF SPA, KEMPINC-Augment SPA II and KEMPINC-DSDG HOLDING SPA II, the total consideration for the respective transfers is ₹ 1. For further details, see "History and Certain Corporate Matters -Shareholders' agreements and other material agreements – Material share purchase agreements and share subscription agreements" on page 374.

Details of pre-IPO placement

Our Company, in consultation with the Book Running Lead Managers, undertook a Pre-IPO Placement of Equity Shares, aggregating to ₹ 2,968.98 million, as permitted under the applicable law. The Pre-IPO Placement was at a price decided by our Company, in consultation with the Book Running Lead Managers and was completed prior to filing of the Red Herring Prospectus with the RoC. The amount raised pursuant to the Pre-IPO Placement was reduced from the Fresh Issue, subject to compliance with Rule 19(2)(b) of the SCRR and the size of the Fresh Issue has been revised to ₹ 12,000.00 million. The Pre-IPO Placement did not exceed 20% of the original size of the Fresh Issue as disclosed in the Draft Red Herring Prospectus. Our Company had appropriately intimated the subscribers to the Pre-IPO Placement, prior to allotment pursuant to the Pre-IPO Placement, that there is no guarantee that our Company may proceed with the Offer or the Offer may be successful and will result into listing of the Equity Shares on the Stock Exchanges. Further, relevant disclosures in relation to such intimation to

the subscribers to the Pre-IPO Placement has been appropriately made in the relevant sections of the Red Herring Prospectus and this Prospectus. Further, our Company has intimated the Stock Exchanges and published a public announcement within twenty-four hours and forty-eight hours of the Pre-IPO Placement, respectively, in compliance with the Association of Investment Bankers of India guidance on “*Disclosure of Information pertaining to Pre-IPO placement and transactions of shares by promoters and promoter group(s) in the public Announcement and Price Band Advertisement*” dated July 4, 2023.

For further details, see “*Capital Structure - Notes to the Capital Structure – Share capital history of our Company – (a) Equity Share capital*” on page 120

Issuances of Equity Shares made in the last one year for consideration other than cash

Except as disclosed in “*Capital Structure– Notes to the Capital Structure – Share capital history of our Company – (a) Equity Share capital*” on page 120, our Company has not issued any Equity Shares for consideration other than cash in the one year preceding the date of this Prospectus.

Financing Arrangements

There have been no financing arrangements whereby the Promoters, members of the Promoter Group, our Directors, and their relatives (as defined under the Companies Act, 2013) have financed the purchase by any other person of securities of our Company (other than in the normal course of the business of the relevant financing entity) during a period of six months immediately preceding the date of filing of the Red Herring Prospectus and this Prospectus.

Split or Consolidation of Equity Shares in the last one year

Pursuant to a resolution passed by our Board on June 25, 2025, and by our Shareholders in their meeting held on June 27, 2025, the then issued, subscribed and paid-up capital of our Company was sub-divided from 5,072,091 equity shares of face value of ₹10 each to 50,720,910 equity shares of face value ₹ 1 each. Except as disclosed above, our Company has not undertaken a split or consolidation of the Equity Shares in the last one year preceding the date of this Prospectus.

Exemption from complying with any provisions of SEBI ICDR Regulations, if any, granted by SEBI

As on the date of this Prospectus, our Company has not sought or obtained any exemption from the SEBI from compliance with any provisions of securities laws from SEBI.

CERTAIN CONVENTIONS, PRESENTATION OF FINANCIAL, INDUSTRY AND MARKET DATA

Certain Conventions

All references to “India” contained in this Prospectus are to the Republic of India and its territories and possessions and all references herein to the “Government”, “Indian Government”, “GoI”, “Central Government” or the “State Government” are to the Government of India, central or state, as applicable.

In this Prospectus, unless otherwise specified:

- any time mentioned is in IST;
- all references to a year are to a calendar year; and
- all references to page numbers are to the corresponding page numbers of this Prospectus.

Financial Data

Our Company’s financial year commences on April 1 and ends on March 31 of the next year. Unless stated otherwise, all references to a year in this Prospectus are to a calendar year and references to the terms Fiscal or Fiscal Year or Financial Year are to the 12 months ended March 31 of such year.

Unless stated otherwise or where the context otherwise requires, the financial information and financial ratios in this Prospectus is derived from the Restated Consolidated Financial Information. For further information, see “*Restated Consolidated Financial Information*” beginning on page 550. Certain other financial information pertaining to our Subsidiaries and Joint Ventures are derived from their respective audited financial statements.

Restated consolidated financial information of our Group as at and for the six months period ended September 30, 2025 and September 30, 2024 and the financial years ended March 31, 2025, March 31, 2024 and March 31, 2023 comprising the restated consolidated statement of assets and liabilities as at September 30, 2025, September 30, 2024, March 31, 2025, March 31, 2024 and March 31, 2023, the restated consolidated statement of profit and loss (including other comprehensive income), the restated consolidated statement of changes in equity, the restated consolidated statement of cash flows for the six months period ended September 30, 2025 and September 30, 2024 and for the years ended March 31, 2025, March 31, 2024 and March 31, 2023, the material accounting policies, and other explanatory information and notes (collectively, the “**Restated Consolidated Financial Information**”), prepared as per in accordance with Indian Accounting Standards (“**Ind AS**”) as prescribed under Section 133 of the Act read with Companies (Indian Accounting Standards) Rules 2015, as amended, and other accounting principles generally accepted in India, SEBI ICDR Regulations, as amended and the Guidance Note on ‘Reports in Company Prospectuses (Revised 2019)’ issued by the Institute of Chartered Accountants of India, as amended from time to time For further information, see “*Restated Consolidated Financial Information*” beginning on page 550.

There are significant differences between Ind AS, Indian GAAP, US GAAP and IFRS. Our Company does not provide reconciliation of its financial information to IFRS or US GAAP. Our Company has not attempted to explain those differences or quantify their impact on the financial data included in this Prospectus and it is urged that you consult your own advisors regarding such differences and their impact on our Company’s financial data. For details in connection with risks involving differences between Ind AS, U.S. GAAP and IFRS see, “*Risk Factors – Significant differences exist between Ind AS and other accounting principles, such as IFRS and U.S. GAAP, which may be material to investors’ assessments of our financial condition, result of operations and cash flows.*” on page 94. The degree to which the financial information included in this Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting policies and practices, the Companies Act, 2013, Ind AS and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting policies and practices on the financial disclosures presented in this Prospectus should accordingly be limited.

Unless the context otherwise indicates, any percentage amounts, or ratios (excluding certain operational metrics) as set forth in “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on pages 45, 293 and 829, respectively, and elsewhere in this Prospectus have been calculated on the basis of amounts derived from our Restated Consolidated Financial Information, as applicable.

Non-GAAP Financial Measures

Certain non-GAAP financial measures relating to our financial performance, namely Net Worth, Return on Net Worth, Net Asset value per equity share, Net Asset value per equity share (bonus and split adjusted), Cost, Gross Margin, Capital expenditure, Total Capital and Operational expenditure, Total Borrowings, Debt (net off liquid assets), Funds invested in the business, Funds invested in business at the beginning of the year, Total equity attributable to the owners of the Company at the beginning of the year, Cash SG&A, Cash PAT, Cash ROE (based on average equity), Cash ROE (based on opening equity), Reported ROE (based on average equity), Reported ROE (based on opening equity), Cash ROIC (based on average funds

invested), Cash ROIC (based on opening funds invested), Reported ROIC (based on average funds invested), Reported ROIC (based on opening funds invested), EBITDA, Adjusted EBITDA, Non-cash/One-time expenses, Non-cash/One-time incomes, Adjusted EBITDA of the Segment, Adjusted EBITDA Margin of the Segment, Average equity, Average funds invested in business, Debt (net off liquid assets) / Adjusted EBITDA, and certain other industry metrics and financial parameters have been included in this Prospectus and are a supplemental measure of our performance and liquidity that are not required by, or presented in accordance with, Ind AS, IFRS or US GAAP. Further, these Non-GAAP measures are not a measurement of our financial performance or liquidity under Ind AS, IFRS or US GAAP and should not be considered in isolation or construed as an alternative to cash flows, profit/ (loss) for the year or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Ind AS, IFRS or US GAAP. These non-GAAP financial measures and other information relating to financial performance may not be computed on the basis of any standard methodology that is applicable across the industry and therefore may not be comparable to financial measures of similar nomenclature that may be computed and presented by other companies and are not measures of operating performance or liquidity defined by Ind AS. Such supplemental financial and operational information should not be considered in isolation or as a substitute for an analysis of our Restated Consolidated Financial Information disclosed elsewhere in this Prospectus. For further details, see “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*”, “*Other Financial Information*” and “*Risk Factors – We track certain operational and non-GAAP metrics with internal systems and tools that are not independently verified by third parties. Certain of our operational metrics are subject to inherent challenges in measurement and any real or perceived inaccuracies in such metrics may adversely affect our business and reputation.*” on pages 829, 823 and 89, respectively.

Currency and Units of Presentation

All references to:

- “Rupees” or “₹” or “INR” or “Rs.” are to Indian Rupee, the official currency of the Republic of India; and
- “U.S. Dollar(s)” or “USD” or “US Dollar” are to United State Dollars, the official currency of the United State of America.
- “THB” is to Thai Baht, the official currency of the Kingdom of Thailand.
- “AED” is to Dirham, the official currency of the United Arab Emirates.
- “BHD” is to Bahrain Dinar, the official currency of the Kingdom of Bahrain.

Our Company has presented certain numerical information in this Prospectus in “million” and “billion” units or in whole numbers where the numbers have been too small to represent in millions or billions. One million represents 1,000,000, one billion represents 1,000,000,000 and one trillion represents 1,000,000,000,000. Figures sourced from third-party industry sources may be expressed in denominations other than millions and such figures have been expressed in this Prospectus in such denominations as provided in such respective sources.

In this Prospectus, any discrepancies in any table between the total and the sums of the amounts listed are due to rounding off. All per share and percentage figures have been rounded off to one/ two decimal places. However, where any figures may have been sourced from third-party industry sources, such figures may be rounded off to such number of decimal places as provided in such respective sources.

Exchange Rates

This Prospectus contains conversion of certain other currency amounts into Indian Rupees that have been presented solely to comply with the SEBI ICDR Regulations. These conversions should not be construed as a representation that these currency amounts could have been, or can be converted into Indian Rupees, at any particular rate or at all.

The following table sets forth, for the periods indicated, information with respect to the exchange rate between the Rupee and respective foreign currencies:

Currency	Exchange rate as at				
	September 30, 2025	September 30, 2024	March 31, 2025*	March 31, 2024**	March 31, 2023
1 USD	88.79	83.79	85.58	83.37	82.22
1 THB	2.76	2.59	2.52	2.29	2.41
1 AED	24.16	22.79	23.27	22.69	22.36
1 BHD	235.36	222.08	227.28	221.67	218.39

Source: www.rbi.org.in, www.fbil.org.in, xe.com and <https://wise.com/in/>

Note: Exchange rate is rounded off to two decimal points.

* Since March 31, 2025, was a public holiday, the exchange rate was considered as on March 28, 2025, being the last working day prior to March 31, 2025.

** Since March 31, 2024, was a Sunday, the exchange rate was considered as on March 28, 2024, being the last working day prior to March 31, 2024.

Industry and Market Data

Unless stated otherwise, industry and market data used in this Prospectus has been obtained or derived from the CRISIL Report, and publicly available information as well as other industry publications and sources.

CRISIL is an independent agency which has no relationship with our Company, our Promoters, our Subsidiaries, any of our Directors or Key Managerial Personnel or members of Senior Management or the Book Running Lead Managers. The CRISIL Report has been exclusively paid for and commissioned by our Company pursuant to an engagement letter with CRISIL dated May 7, 2025, for the purposes of confirming our understanding of the industry in which the Company operates, in connection with the Offer. The CRISIL Report is available on the website of our Company at <https://cleanmax.com/ipo-2025> and has also been included in “*Material Contracts and Documents for Inspection – Material Documents*” on page 966.

Industry publications generally state that the information contained in such publications has been obtained from publicly available documents from various sources. Although we believe that the industry and market data used in this Prospectus is reliable, the data used in these sources may have been re-classified by us for the purposes of presentation. Data from these sources may also not be comparable.

The extent to which the market and industry data used in this Prospectus is meaningful depends on the reader’s familiarity with and understanding of the methodologies used in compiling such data. There are no standard data gathering methodologies in the industry in which business of our Company is conducted, and methodologies and assumptions may vary widely among different industry sources. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate. Such data involves risks, uncertainties and numerous assumptions and is subject to change based on various factors, including those discussed in “*Risk Factors – Certain sections of this Prospectus contain information from the CRISIL Report which has been exclusively commissioned and paid for by us in relation to the Offer and any reliance on such information for making an investment decision in this offering is subject to inherent risks.*”, on page 90. Accordingly, investment decision should not be based solely on such information.

About CRISIL

“Crisil Intelligence, a division of Crisil Limited, provides independent research, consulting, risk solutions, and data & analytics to its clients. Crisil Intelligence operates independently of Crisil’s other divisions and subsidiaries, including, Crisil Ratings Limited. Crisil Intelligence’s informed insights and opinions on the economy, industry, capital markets and companies drive impactful outcomes for clients across diverse sectors and geographies. For the preparation of this Report, Crisil Intelligence has relied on third party data and information obtained from various sources. Any forward-looking statements contained in this Report are based on certain assumptions which in its opinion are true as on the date of the Report and could fluctuate due to changes in underlying factors or events in future. The Report does not consist of any investment advice, and nothing contained in the Report should be construed as a recommendation to invest/disinvest in any entity. This industry report is intended for use only within India. The Company will be responsible for ensuring compliance and consequence of non-compliance for use of the Report and part thereof outside India.”

Notice to Investors in the United States

The Equity Shares have not been recommended by any U.S. federal or state securities commission or regulatory authority. Furthermore, the foregoing authorities have not confirmed the accuracy or determined the adequacy of this Prospectus or approved or disapproved the Equity Shares. Any representation to the contrary is a criminal offence in the United States. In making an investment decision, investors must rely on their own examination of our Company and the terms of the Offer, including the merits and risks involved. The Equity Shares offered in the Offer have not been and will not be registered under the United States Securities Act of 1933, as amended (the “**U.S. Securities Act**”) or any other applicable law of the United States. Accordingly, the Equity Shares are being offered and sold outside of the United States in offshore transactions as defined in and in compliance with Regulation S and the applicable laws of the jurisdiction where those offers and sales are made. See “*Other Regulatory and Statutory Disclosures – Eligibility and Transfer Restrictions*” on page 897.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made, by persons in any such jurisdiction except in compliance with the applicable laws of such jurisdiction.

FORWARD-LOOKING STATEMENTS

This Prospectus contains certain statements which are not statements of historical fact and may be described as “forward-looking statements”. All statements regarding our expected financial condition and results of operations, business, plans and prospects are “forward-looking statements”.

These forward-looking statements generally can be identified by words or phrases such as “aim”, “anticipate”, “believe”, “expect”, “estimate”, “intend”, “likely to”, “seek to”, “shall”, “objective”, “plan”, “project”, “propose” “will”, “will continue”, “will pursue” or other words or phrases of similar import. Similarly, statements that describe our expected financial condition, results of operations, business, prospects, strategies, objectives, plans or goals are also forward-looking statements. All forward-looking statements whether made by us or any third parties in this Prospectus are based on our current plans, estimates, presumptions and expectations and are subject to risks, uncertainties and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement, including but not limited to, regulatory changes pertaining to the industry in which our Company has businesses and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions, in India and globally, which have an impact on our business activities or investments, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in domestic laws, regulations and taxes and changes in competition in our industry, incidence of natural calamities and/or acts of violence.

Certain important factors that could cause actual results to differ materially from our expectations include, but are not limited to, the following:

Sr. No.	Risk Factors
1.	In Fiscals 2024 and 2023, we incurred restated loss for the year of ₹376.43 million and ₹594.73 million respectively and generated profits in Fiscal 2025 and during the six months ended September 30, 2025 and September 30, 2024. Further, some of our Subsidiaries have incurred losses in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023. If we are unable to generate adequate cash profits and make scheduled loan repayments, we may not be able to maintain our profitability
2.	Our top 10 customers, all of whom are based in India, contributed 34.95%, 38.55%, 36.16%, 45.39% and 44.32% of our Revenue from operations in the six months ended September 30, 2025 and September 30, 2024 and Fiscals 2025, 2024 and 2023, respectively. The proportion of Operational Capacity attributed to our top 10 customers is expected to increase as we begin commissioning projects under construction with certain of such customers. Any failure to maintain renew or enter into new engagements with our top 10 customers could have a material adverse impact on our operations and financial condition
3.	Our PPAs or EAPAs may be terminated by counterparties upon the occurrence of certain events. In the event our PPAs or EAPAs are terminated, and we are unable to secure a replacement PPA or EAPA in a timely manner or on similar terms, our business, results of operations, cash flows and prospects may be adversely affected
4.	We are developing our first CTU project and ISTS project and have not commissioned a CTU project before. Any failure to develop this project successfully could have a material adverse impact on our expansion plans, business, results of operations, financial conditions and prospects
5.	Certain of our PPAs and EAPAs may not extend through project lifespans, and challenges in renewing or replacing them on favourable terms could adversely affect our business, results of operations, cash flows, and prospects
6.	Some of our Promoters had encumbered certain Equity Shares of our Company held by them in favour of 360 One Prime Limited pursuant to loans availed by one of our Promoters, KEMPINC LLP, from 360 One Prime Limited by way of pledge. Such encumbrance may be created in the future as well. Further, one of our Promoter Group, BGT Four Holdings (DIFC) Limited, has pledged its entire shareholding in one of our Promoters, BGT One Holdings (DIFC) Limited. Any exercise of such encumbrance by such pledgee could dilute the shareholding of such persons and consequently dilute the aggregate shareholding of some of our Promoters, which may also result in change in control and adversely affect our business and financial condition
7.	We have pledged certain of our shareholding in our Subsidiaries in favour of certain lenders. If any event of default arise under the financing agreements, such lenders could invoke the relevant share pledge agreements, adversely affecting our business, results of operations, cash flows and prospects
8.	We may be unable to accurately estimate costs for our STU-Capex business contracts, fail to maintain the quality and performance guarantees under such contracts and we may experience delays in completing the construction of our projects, which may increase our construction costs and working capital requirements, and may have a material adverse effect on our financial condition, cash flow and results of operations
9.	A portion of the Net Proceeds is proposed to be utilized for repayment and/or pre-payment, in full or part, of all or certain borrowings of our Company from Nomura Capital (India) Private Limited and Nomura Investments (Singapore) Pte. Ltd., affiliates of a certain BRLM to the Offer
10.	We have in the past entered into a number of related party transactions and may continue to enter into related party transactions in the future, and there can be no assurance that we could not have achieved more favourable terms if such transactions had not been entered into with related parties

Certain information in “Risk Factors”, “Industry Overview”, “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 45, 229, 293 and 829, respectively of this Prospectus has been obtained from the CRISIL Report. The CRISIL Report is available on the website of our Company at <https://cleanmax.com/ipo-2025>.

For further discussion of factors that could cause the actual results to differ from the expectations, see “*Risk Factors*”, “*Our Business*”, “*Industry Overview*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on pages 45, 292, 229 and 829, respectively. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual future gains or losses could materially differ from those that have been estimated and are not a guarantee of future performance.

Forward-looking statements reflect current views as on the date of this Prospectus and are not a guarantee of future performance. There can be no assurance to investors that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements to be a guarantee of our future performance.

These statements are based on our management’s belief and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based on are reasonable, any of these assumptions could prove to be inaccurate and the forward-looking statements based on these assumptions could be incorrect. Neither our Company, our Promoter, any of the Selling Shareholder, our Directors, the Syndicate nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition.

In accordance with the requirements of the SEBI ICDR Regulations, our Company shall ensure that Bidders in India are informed of material developments, until the time of the grant of listing and trading permission by the Stock Exchanges for the Equity Shares pursuant to the Offer. In accordance with the requirements of the SEBI ICDR Regulations, each of the Selling Shareholders shall, severally and not jointly, ensure that our Company and BRLMs are informed of material developments in relation to the statements and undertakings specifically made or undertaken by such Selling Shareholder in relation to itself as a Selling Shareholder and its respective portion of the Offered Shares in this Prospectus, from the date thereof until the time of the grant of listing and trading permission by the Stock Exchanges for the Offer. Only statements and undertakings which are specifically confirmed by such Selling Shareholders, as the case may be, in this Prospectus shall, severally and not jointly, deemed to be statements and undertakings made by such Selling Shareholder.

SECTION II: RISK FACTORS

An investment in equity shares involves a high degree of risk. You should carefully consider each of the following risk factors and all other information in this Prospectus, including the risks and uncertainties described below before making an investment in the Equity Shares.

We have described the risks and uncertainties that we believe are material, but these risks and uncertainties may not be the only risks relevant to us, the Equity Shares, or the industry in which we currently operate or propose to operate. Some risks may be unknown to us and other risks, currently believed to be immaterial, could be or become material. Unless specified or quantified in the relevant risk factor below, we are not in a position to quantify the financial or other implications of any of the risks mentioned in this section. If any or a combination of the following risks actually occur, or if any of the risks that are currently not known or deemed to be not relevant or material now actually occur or become material in the future, our business, cash flows, prospects, financial condition and results of operations could suffer, the trading price of the Equity Shares could decline and you may lose all or part of your investment. To obtain a more detailed understanding of our business and operations, please read this section in conjunction with the sections “Our Business”, “Industry Overview”, “Key Regulations and Policies in India”, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Restated Consolidated Financial Information” on pages 293, 229, 344, 829 and 550 respectively, as well as other financial information contained elsewhere in this Prospectus.

In making an investment decision, you must rely on your own examination of our Company and the terms of the Offer, including the merits and risks involved and you should consult your tax, financial and legal advisors about the consequences of investing in the Offer. Investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is subject to a legal and regulatory environment which may differ in certain respects from that of other countries. This Prospectus also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements because of certain factors, including but not limited to the considerations described below. For details, see “Forward-Looking Statements” on page 43.

Unless otherwise indicated, industry and market data used in this section have been derived from the CRISIL Report, which has been commissioned by and paid for by our Company exclusively in connection with the Offer for the purposes of confirming our understanding of the industry in which we operate. The data included herein includes excerpts from the CRISIL Report and may have been re-ordered by us for the purposes of presentation. A copy of the CRISIL Report is available on the website of our Company at <https://cleanmax.com/ipo-2025>. Unless otherwise indicated, operational, industry and other related information derived from the CRISIL Report and included herein with respect to any particular year refers to such information for the relevant calendar year. For further details, please see “Industry Overview” on page 229.

Unless otherwise indicated or unless context requires otherwise, the financial information in this section has been derived from the Restated Consolidated Financial Information. See “Restated Consolidated Financial Information” on page 550. Our financial year commences on April 1 and ends on March 31 of the subsequent year, and references to a particular financial year are to the 12 months ended March 31 of that year. The risk factors have been ordered on the basis of their materiality.

INTERNAL RISKS

- 1. In Fiscals 2024 and 2023, we incurred restated loss for the year of ₹376.43 million and ₹594.73 million respectively and generated profits in Fiscal 2025 and during the six months ended September 30, 2025 and September 30, 2024. Further, some of our Subsidiaries have incurred losses in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023. If we are unable to generate adequate cash profits and make scheduled loan repayments, we may not be able to maintain our profitability.***

We incurred losses in Fiscals 2024 and 2023 as shown in the table below. However, we have been EBITDA positive during this period. We operate in a capital-intensive industry, requiring significant upfront investment for project development. Post-commissioning, our projects typically take a period of up to two years to achieve steady state of operations where the plant is operational, during which time generation levels ramp up and operational performance stabilizes. Additionally, these are the years where the financing costs are typically high as the debt we incurred for the construction of the project continues to remain outstanding. Although our SPVs often report cash profits from the first year of operations, actual cash flows are subject to this variability. Further depreciation expenses contributes a significant portion of our EBITDA and project maintenance expenses are typically a small portion of our EBITDA. Thus, demonstrating that depreciation is essentially a non-cash cost. While we typically seek to refinance SPV-level debt on more favourable terms after achieving steady state of operations, there is no assurance that we will be able to successfully refinance the debt. Any delays in achieving steady state of operations once a project is commissioned could adversely impact our liquidity, debt refinancing ability, debt repayment and in turn overall profitability. For further information, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Results of Operations” on page 833.

Particulars	For the six months ended September 30,		Fiscal		
	2025	2024	2025	2024	2023
	(₹ million)				
Restated Profit/(Loss) for the period/year (A)	190.04	65.18	194.29	(376.43)	(594.73)
Exceptional items (B)	-	-	-	107.66	891.90
Depreciation, impairment and amortisation expenses (C)	1,722.57	1,361.53	2,999.90	2,215.32	1,176.15
Profit after tax after adjusting exceptional items and depreciation, amortisation and impairment expenses (D = A+B+C)	1,912.61	1,426.71	3,194.19	1,946.55	1,473.32
EBITDA ⁽¹⁾	6,378.58	4,887.40	10,150.72	7,415.73	4,059.19

(1) EBITDA is calculated as Revenue from operations minus Cost of materials consumed and cost of services minus Purchase of traded goods minus Employee benefits expense minus other expenses. The cost of services and other expenses include any maintenance expense towards our renewable energy plants. For a reconciliation, see "Management's Discussion and Analysis of our Results of Operations – Non-GAAP Measures" starting on page 838.

We had 6 foreign Subsidiaries and 189 Indian Subsidiaries as on September 30, 2025. Some of our subsidiaries have incurred loss in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, on a standalone basis as indicated below:

	For the six months ended September 30,				As of March 31,					
	2025		2024		2025		2024		2023	
Total Number of Subsidiaries	195		135		163		120		89	
Particulars	For the six months ended September 30,				As of and for the Fiscal year ended March 31,					
	2025		2024		2025		2024		2023	
	Number of subsidiaries	Aggregate Loss	Number of subsidiaries	Aggregate Loss	Number of subsidiaries	Aggregate Loss	Number of subsidiaries	Aggregate Loss	Number of subsidiaries	Aggregate Loss
		(₹ million)		(₹ million)		(₹ million)		(₹ million)		(₹ million)
Material subsidiary as per SEBI Listing Regulations (that are loss making)	-	-	-	-	0	-	0	-	3	63.55
Subsidiaries with no operational capacity as of the relevant period	97	119.47	64	40.10	76	48.39	59	107.11	42	64.23
Subsidiaries that are operating a commissioned project for less than two years	19	152.33	18	127.09	46	658.48	29	698.40	7	66.47
Other international subsidiaries	3	65.31	3	54.79	3	198.72	2	181.46	3	326.38
Other loss-making subsidiaries	16	208.77	1	1.33	3	33.97	4	40.02	4	49.88

As we continue to be in a growth stage, we may in the future incur additional losses. Our ability to maintain and improve profitability from our existing portfolio depends on factors like project Subsidiaries achieving stabilisation after the project is commissioned, our ability to generate cash profits from the projects, and make the scheduled debt repayments to reduce finance cost. Our ability to increase profitability depends on various factors, including our ability to secure additional power purchase agreements ("PPAs") or EPC contracts on beneficial terms, manage our costs and meet project delivery timelines and secure financing at competitive costs. Any failure to do so could adversely impact our operations, financial condition and results of operations.

2. ***Our top 10 customers, all of whom are based in India, contributed 34.95%, 38.55%, 36.16%, 45.39% and 44.32% of our Revenue from operations in the six months ended September 30, 2025 and September 30, 2024 and Fiscals 2025, 2024 and 2023, respectively. The proportion of Operational Capacity attributed to our top 10 customers is expected to increase as we begin commissioning projects under construction with certain of such customers. Any failure to maintain renew or enter into new engagements with our top 10 customers could have a material adverse impact on our operations and financial condition.***

We derive a significant portion of our revenue from our top 10 customers, all of whom are based in India. The table below demonstrates the contribution of our top 10 customers to our revenue from operations for the years indicated:

Particulars	For the six months ended September 30,		Fiscal		
	2025	2024	2025	2024	2023
Revenue					
Revenue from top 10 customers (based on Revenue from operations) (₹ million)	3,260.67	2,607.63	5,408.58	6,309.05	4,120.05
Revenue from operations (₹ million)	9,329.53	6,764.66	14,957.01	13,898.37	9,295.82
Revenue from top 10 customers as % of Revenue from operations (%)	34.95%	38.55%	36.16%	45.39%	44.32%
Revenue from top 10 customers (based on Revenue from renewable energy power sales) (₹ million)	2,791.04	2,305.52	4,055.34	3,488.97	2,325.96
Revenue from renewable energy power sales (₹ million)	7,192.15	5,736.14	11,072.48	8,663.33	4,748.15
Revenue from top 10 customers as % of Revenue from renewable energy power sales (%)	38.81%	40.19%	36.63%	40.27%	48.99%

While we are adding new capacities with new customers and have not faced material reductions in business from our top 10 customers other than in the ordinary course of business, or terminations of any of our PPAs in the six months ended September 30, 2025 and Fiscals 2023, 2024 and 2025, there is no assurance that we will be able to successfully expand our customer base and diversify our customer portfolio. Further, if any of our top 10 customers reduce their business with us or do not renew their contracts with us, it could have an adverse impact on our operations and financial condition.

3. Our PPAs or EAPAs may be terminated by counterparties upon the occurrence of certain events. In the event our PPAs or EAPAs are terminated, and we are unable to secure a replacement PPA or EAPA in a timely manner or on similar terms, our business, results of operations, cash flows and prospects may be adversely affected.

We sell electricity generated at our renewable energy plants to customers through long-term PPAs and EAPAs. Through our contracting practices, we have built a portfolio of PPAs and EAPAs with a weighted average tenure of 22.85 years and a weighted average lock-in periods of 16.86 years, as of September 30, 2025. Further, beyond lock-in periods our contracts provide for termination penalties. Our customers may terminate their agreements with us upon the occurrence of certain events, including our failure to complete project construction or connect to the transmission grid by a certain date, supply the minimum amount of renewable energy specified, interruption in supply of energy for a stipulated period of time, termination of the relevant shareholders' agreement, among others. Further, our PPAs and EAPAs typically include covenants imposing obligations on us prior to or during the commissioning of the plant, such as, (i) an obligation to acquire/lease required land parcels for the project, (ii) an obligation to obtain and maintain the necessary statutory and regulatory approvals, (iii) procure high quality imported solar photovoltaic modules or indigenous modules and pay customers duties, (iv) ensure execution of banking and wheeling agreements with power transmission companies, (v) comply with safety standards and grid codes during designing and construction of our projects, (vi) obtain and maintain necessary insurance in relation to the project and (vii) provision of bank guarantees. Our PPAs and EAPAs also generally provide for commitment charges payable by us in instances of delay of commissioning of our projects. A breach of these obligations and failure to cure such breaches may entitle our customers to terminate the PPAs and EAPAs. The following table presents our Contracted yet-to-be-executed Capacity, which represents the outstanding order book as of the respective periods:

Particulars	Units	For the six months ended September 30,		Fiscal		
		2025	2024	2025	2024	2023
Contracted yet to be executed Capacity ⁽³⁾	MW	2,538.18	637.57	2,769.66	435.80	580.97
Solar Onsite	MWp	85.12	48.26	70.10	32.09	54.82
Solar Offsite	MWp	1,705.26	442.16	1,887.16	367.41	263.29
Wind	MW	747.80	147.15	812.40	36.30	262.86

Note:

- (1) *Contracted yet-to-be-executed capacity refers to the total renewable energy capacity (in MW) for which power purchase agreements (PPAs)/ Letter of Intent (LOI)/energy services contracts have been signed with customers but project commissioning is still underway as at end of period.*

For more details, see “*Basis for Offer Price*” section on page 189.

In the half year ended September 30, 2025, we faced an instance where we had to pay commitment charges of ₹67.80 million for delays in commissioning a project – the delay related to a project at the Saraipalli farm in Chhattisgarh primarily due to delays in land aggregation in the region. There is no assurance that such events will not occur in the future. See, “*History and Certain Corporate Matters – Time and Cost Over-runs*” on page 369. If there is an untimely termination of our PPAs or EAPAs, we may not be able to recontract the available capacity on time or on commercially viable terms. Further, specifically for Onsite Solar projects, we may have to abandon the project and write off the costs incurred for setting up a solar plant at our customers’ premises. Furthermore, our group captive consumers are typically entitled to a put option under their shareholders’/investment agreements with us, by which they may require us to buy back all or part of their equity shares in the relevant group captive SPV in case of termination of the corresponding PPA at a price calculated in accordance with the relevant shareholders’/investment agreements and applicable foreign exchange laws. All of this could have a material adverse impact on our operations, financial condition and results of operations. For more details on our PPAs and EAPAs see, “*Our Business – Our Customer Contracts*” on page 324.

Our PPAs typically provide for a minimum supply guarantee, whereby we are required to supply a minimum contracted electricity generation. Failure to do so requires us to compensate our customers or arrange for supply of renewable energy from other sources. In the past, there have been instances where we were not able to meet the minimum supply guarantee under our PPAs with Conventional C&I customers due to reasons such as poor environmental condition leading to lower performance of our wind or solar capacity compared to estimated electricity generation or longer than usual breakdown time of our equipment due to lack of availability of replacements for our plant components. In addition, in fiscals 2023, 2024 and 2025, and in the six months ended September 30, 2025, there have been certain shortfalls in maintaining the minimum supply guarantees of certain projects. As our PPAs include clauses that provide protection to the Company against variations in energy supply to customers due to resource shortfall, external grid unavailability, and lower generation during the stabilization or ramp-up period immediately following plant commissioning, there have been a total of seven instances over Fiscals 2023, 2024 and 2025 and the six months ended September 30, 2025 where we were in contractual breach of the minimum supply guarantees stipulated in our PPAs. These instances corresponded to 0.35%, 3.26%, and 0.99% of our operational capacity as of September 30, 2025, March 31, 2025, and March 31, 2024, respectively. While these events did not have a significant impact on our operations, there is no assurance that future breaches of contractual obligations will not result in early termination of the relevant PPAs or EAPAs or cause us to incur significant charges or penalties. As of the date of this Prospectus, we have not made any monetary payments against penalties in relation to breaches of minimum supply obligations under our PPAs in the last three Fiscals and six months period ended September 30, 2025.

Our group captive open access customers achieve between 27.63-54.30% savings over grid tariff based on grid prices today, which are subject to favourable government policies and regulations. Any taxes, duties, levies, wheeling & banking charges, transmission costs, losses and other open access related charges are typically passed through to the customer. Our contracts often specify a minimum savings guarantee in contracts that is linked to grid prices. If we breach the minimum savings guarantee, pricing for contracts can be renegotiated and our contracts typically provide for a floor pricing i.e., a reduced tariff below which neither party can reduce pricing. For example, in Gujarat and Karnataka there have been downward revisions in tariff in Fiscals 2025 and 2026 due to which we have revised tariff for a few customers under older PPAs corresponding to ~18.48 MWp solar and ~23.10 MW wind in Gujarat and ~208.00 MWp solar in Karnataka. While such instances did not have a material impact on our operations, such changes in the future may require us to further reduce tariffs which could adversely impact our business, financial condition, cash flows and results of operations.

In relation to sale of EAPAs in our Carbon business, we have entered into terms with customers such as (i) damages to be paid in case of a deficit in attributes transferred and generated capacity; (ii) requirement of maintaining a minimum availability guarantee, non-compliance of which may require commitment charges to be paid by Company; (iii) the customer having right of first refusal over the environmental attributes.

While our PPAs are generally long term, after the expiry of our PPAs for our projects, we may face increased competition from other suppliers of electricity (conventional or clean energy suppliers) who may be willing to offer electricity at lower prices. Further, customers may invite proposals in various forms which could include bilateral negotiations, auctions, tenders among others. There is no assurance that we will be able to successfully win bids. As a result, we may not be able to renew or obtain new PPAs at similar or higher tariffs as compared to our current PPAs or may not be able to procure new PPAs at all for some or all of our capacity. While we have not faced such instances during the six months ended September 30, 2025 and Fiscals 2023, 2024 and 2025, in case we are unable to procure new PPAs, we may have to sell the electricity at spot prices, thereby exposing us to price realization risk on the sale of electricity from our projects, which could adversely affect our business, cash flows, financial condition and results of operations.

4. We are developing our first CTU project and ISTS project and have not commissioned a CTU project before. Any failure to develop this project successfully could have a material adverse impact on our expansion plans, business, results of operations, financial conditions and prospects.

We are currently developing CTU or ISTS connected projects that can supply power throughout India by utilising the national grid network. We have 1,421.10 MW of Contracted CTU-Connected capacity as of September 30, 2025. Our first CTU project - a 525 MWp solar in Bikaner, Rajasthan is expected to commence operations by July 31, 2026. We received evacuation approval for this capacity on December 20, 2024. As of September 30, 2025, we had incurred total costs of ₹ 6,675.35 million for this project. The following table provides additional details about the first phase of these projects as of September 30, 2025. For more details, see “Our Business – Project Development – Project – Contracted Capacity” on page 329.

Type of project	Site	Solar Capacity (MWp)	Wind Capacity (MW)	Status of contracted capacity	Evacuation status	Project type	Financing status (% of total capacity sanctioned)	Land status (% of required land acquired/leased/entered into agreement to lease or sell)^	
								Solar	Wind
CTU	Bikaner 2, Rajasthan	525.00	-	100%	Final connectivity received	Greenfield	100%	100% (Leased / Owned - 36%; ATS/ATL- 64%)	NA
CTU	Koppal 2, Karnataka	0	225.00	100%	Final connectivity received	Greenfield	0%	NA	100% (Leased / Owned - 8%; ATS/ATL- 92%)

(1) ATS/ ATL = Agreement to Sell/ Agreement to Lease; (2) Contracting status means percentage of the mentioned capacity committed to a customer under a Power Purchase Agreement (“PPA”) or Letter of Intent (“LOI”). ^For risks pertaining to land contracted through ATL or ATS, see “- We may suffer significant construction delays and finance or construction cost increases in excess of our expectations, leading to time and cost overruns, or we may not be able to acquire the required land rights which could have a material adverse effect on our business, cash flows, financial condition, results of operations and reputation” on page 57.

While we have made progress on both projects there is no assurance that we will be able to complete the construction and achieve commercial operations by the committed timelines for all our upcoming and contracted CTU capacities. The occurrence of any of the following factors could adversely affect our business, results of operations, cash flows, reputation and prospects.

- **Dependence on CTU substation readiness:** Timely commissioning of the respective CTU substations is critical to enable power evacuation. Any delay or mismatch in CTU substation availability could result in project-level delays and impact our ability to generate and deliver contracted energy. Consequently, even if we are able to generate power before this date, we might not be able to evacuate some or all of the power generated, leading to potential loss of revenue.
- **Delays in execution:** Further any unforeseen delays or disruptions in execution, whether due to any additional land acquisition challenges, transmission infrastructure readiness, EPC delays or external regulatory dependencies, may impact the timely execution of our projects. There is no assurance that we will be able to complete construction of the ISTS project within the set commissioning date.
- **Regulatory compliance and performance security:** The regulatory procedures for CTU projects, are different from STU projects, and may encounter some operational, administrative, and strategic challenges as we adjust to this new process. Further, we have submitted bank guarantees to the CTU authorities for both projects to comply with connectivity conditions. Any delay in project commissioning could lead to invocation of these guarantees or regulatory penalties. We have provided bank guarantees in relation to regulatory approvals for connectivity. Any delay meeting key milestones including land acquisition and/or in the commissioning of the ISTS project could result in our bank guarantees being encashed.
- **Exposure to Commitment charges from customers:** Under PPAs signed with customers for these projects, we may be subject to commitment charges in the event of a delay beyond the agreed commissioning date, which could materially affect our profitability and customer relationships.
- **Delay from customers in getting Open Access approvals including National Open Access Registry approvals, GNA approvals etc.,** could delay supply of power to customers impacting our revenues.

Any delay in commissioning the ISTS project could result in our bank guarantees being encashed and subject us to commitment charges payable to our customers under the PPAs. Furthermore, delays in commissioning may require us to pay commitment charges to our customers or penalties to regulators and may also result in our connectivity being cancelled. For more information regarding these projects and their applicable regulations, please see “Key Regulations and Policies in India” on page 344. Also see “- We may suffer significant construction delays and finance or construction cost increases in excess of our expectations, leading to time and cost overruns, which could have a material adverse effect on our business, cash flows, financial condition, results of operations and reputation” on page 57.

5. ***Certain of our PPAs and EAPAs may not extend through project lifespans, and challenges in renewing or replacing them on favourable terms could adversely affect our business, results of operations, cash flows, and prospects.***

We have built a portfolio of PPAs and EAPAs with a weighted average tenure of 22.85 years and a weighted average lock-in periods of 16.86 years, as of September 30, 2025. Further, beyond lock-in periods our contracts typically provide for termination penalties in the event of termination. However, some of our PPAs have tenures that are shorter than the relevant project life and therefore are generally renewed upon expiry. The following table provides the proportion of operational capacity under our PPAs.

Particulars	For the six months ended September 30,		As of March 31,		
	2025	2024	2025	2024	2023
Operational Capacity with PPAs with tenure of more than 10 years (MW)	2,287.70	1,489.91	1,693.55	1,323.76	738.40
Operational Capacity with PPAs with tenure of less than 10 years (MW)	22.62	18.50	19.24	18.50	16.11
Total Operational Capacity for Renewable Energy Power Sales Segment (MW)	2,310.32	1,508.42	1,712.79	1,342.26	754.51
% of PPAs with tenure of more than 10 years	99.02%	98.77%	98.88%	98.62%	97.86%
% of PPAs with tenure of less than 10 years	0.98%	1.23%	1.12%	1.38%	2.14%

Our PPAs typically include termination penalties based on a predetermined number of months' revenue from guaranteed generation. While this arrangement offers a buffer to mitigate revenue loss from terminated contracts and provides time to secure a new offtaker for the project, there is no assurance that a new offtaker will be found on similar commercial terms or at all. Failure to identify a new offtaker or renew the PPA could adversely affect our business, cash flows, financial condition, and results of operations. For additional risks related to our PPAs, see “ - *Our PPAs or EAPAs may be terminated by counterparties upon the occurrence of certain events. In the event our PPAs or EAPAs are terminated, and we are unable to secure a replacement PPA or EAPA in a timely manner or on similar terms, our business, results of operations, cash flows and prospects may be adversely affected*” on page 47.

6. ***Some of our Promoters had encumbered certain Equity Shares of our Company held by them in favour of 360 One Prime Limited pursuant to loans availed by one of our Promoters, KEMPINC LLP, from 360 One Prime Limited by way of pledge. Such encumbrance may be created in the future as well. Further, one of our Promoter Group, BGTF Four Holdings (DIFC) Limited, has pledged its entire shareholding in one of our Promoters, BGTF One Holdings (DIFC) Limited. Any exercise of such encumbrance by such pledgee could dilute the shareholding of such persons and consequently dilute the aggregate shareholding of some of our Promoters, which may also result in change in control and adversely affect our business and financial condition.***

Out of a total of 25,855,617 Equity Shares held by Kuldeep Jain, Nidhi Jain and KEMPINC LLP, 10,731,094 Equity Shares (“**Pledged Shares**”) (amounting to 10.09% of the pre-Offer share capital of our Company on a fully diluted basis) are pledged in favour of 360 One Prime Limited pursuant to an unattested deed of pledge dated July 22, 2025 between KEMPINC LLP, Kuldeep Jain, Nidhi Jain and 360 One Prime Limited. The pledge was created in relation to a loan amounting up to ₹ 6,700.00 million availed by KEMPINC LLP from 360 One Prime Limited, pursuant to the master facility agreement dated July 22, 2025 between KEMPINC LLP, Kuldeep Jain, Nidhi Jain and 360 One Prime Limited, read with sanction letter dated July 22, 2025 between KEMPINC LLP, Kuldeep Jain, Nidhi Jain and 360 One Prime Limited. The loan has been availed towards purchase of Equity Shares by KEMPINC LLP through secondary transactions, permissible investments and general purposes. As on date of the Red Herring Prospectus, all the Pledged Shares had been released. Except for the Offered Shares of the Promoter Selling Shareholders which will be transferred and allotted to Allottees in the Offer for Sale, all or a portion of the remaining Pledged Shares will be re-pledged post creation of statutory lock-in in accordance with Regulation 16(1)(b) of the SEBI ICDR Regulations.

Details of the pledged Equity Shares held by our Promoters are as follows:

Name of the pledgor	Number of Equity Shares held	% of pre-Offer share capital of the Company on a fully diluted basis*	Number of Equity Shares pledged	% of pre-Offer share capital of the Company on a fully diluted basis	Number of Equity Shares released from pledge	Name of the lender	Date of encumbrance	Amount secured pursuant to the encumbrance (in ₹ million)	Top-up/covenant covenants	Events of Default	Date of sanction letter	Sanctioned amount (in ₹ million)	Purpose
Kuldeep Jain	11,675,640	10.98	2,384,118	2.24	2,384,118	360 One Prime Limited	July 22, 2025	NA	NA	NA	July 22, 2025	6,700.00	Acquisition of Equity Shares of our Company.
Nidhi Jain	501,300	0.47	198,916	0.19	198,916			NA	NA	NA			
KEMPINC LLP	13,678,677	12.86	8,148,060	7.66	8,148,060			6,700.00	A minimum-	The events of default			

Name of the pledgor	Number of Equity Shares held	% of pre- Offer share capital of the Company on a fully diluted basis*	Number of Equity Shares pledged	% of pre- Offer share capital of the Company on a fully diluted basis	Number of Equity Shares released from pledge	Name of the lender	Date of encumbrance	Amount secured pursuant to the encumbrance (in ₹ million)	Top-up/cover covenants	Events of Default	Date of sanction letter	Sanctioned amount (in ₹ million)	Purpose
									security cover of 2.25x of the outstanding amount In the event the cover falls below 2.25x, a margin call/top-up shall be triggered, and the cover must be restored within 7 (seven) business days from receipt of notice from the lender.	include, inter alia: (i) payment default; (ii) any restraint on enforcement/sale of pledged shares; (iii) breach of mandatory prepayment events; (iv) breach of minimum security cover; (v) misrepresentation of warranties.			other permissible investment and general corporate purposes.
Total	25,855,617	24.31	10,731,094	10.09	10,731,094			6,700.00				6,700.00	

*The percentage of the Equity Share capital on a fully diluted basis has been calculated on the basis of total Equity Shares held by a Shareholder and assuming 692,540 Equity Shares which will result upon exercise of vested options under the Clean Max ESOP Scheme as on date of this Prospectus.

Upon recreation of pledge on such Equity Shares held by our Promoters, any default under the pledge agreements pursuant to which these Equity Shares will be pledged would entitle the pledgee to enforce the pledge over these Equity Shares. If this happens, the aggregate shareholding of some of our Promoters will be diluted and we will face certain impediments in taking decisions on certain key, strategic matters. As a result, we may not be able to conduct our business or implement our strategies as planned, which may adversely affect our business and financial condition. Further, any rapid sale of Equity Shares by such third parties may adversely affect the price of the Equity Shares.

Further, one of the members of our Promoter Group, BGTF Four Holdings (DIFC) Limited, has also pledged its entire shareholding in one of our Promoters i.e. BGTF One Holdings (DIFC) Limited, in connection with one of its borrowings. Enforcement of such encumbrances may result in a reduction in BGTF Four Holdings (DIFC) Limited's shareholding in our Promoter, BGTF One Holdings (DIFC) Limited, and may result in an indirect change in control of our Company, which may adversely affect our business, results of operations, financial condition and cash flows. For more details, see "Capital Structure – History of the share capital held by our Promoters - Encumbrance on Equity Shares held by our Promoters" on page 146.

7. We have pledged certain of our shareholding in our Subsidiaries in favour of certain lenders. If any event of default arise under the financing agreements, such lenders could invoke the relevant share pledge agreements, adversely affecting our business, results of operations, cash flows and prospects.

We have pledged certain of our shareholding in our Subsidiaries in favour of lenders to secure certain borrowings availed by the Group. For details pertaining to such pledges as of September 30, 2025, see "Restated Consolidated Financial Information - Note 55 - Details of Borrowings" on page 768. Further, for the details in relation to the pledge of our shareholding in our Subsidiaries, see Annexure A on page 985. Any default or breach under the relevant financing agreements and share pledge agreements pursuant to which such equity shares have been pledged will entitle the lenders to invoke the pledge over

the equity shares. Such lenders could take ownership of the pledged equity shares and may even sell them to third parties. If these pledges are invoked, our shareholding and control in such Subsidiaries may be reduced or divested completely and such entities may cease to be our Subsidiary. Such occurrences could adversely affect our economic interest in such Subsidiaries and our ability to manage the affairs of these Subsidiaries.

8. *We may be unable to accurately estimate costs for our STU-Capex business contracts, fail to maintain the quality and performance guarantees under such contracts and we may experience delays in completing the construction of our projects, which may increase our construction costs and working capital requirements, and may have a material adverse effect on our financial condition, cash flow and results of operations.*

In relation to our STU - Capex business, we enter into fixed-price EPC contracts with certain of our customers. We offer turnkey development services, including land, evacuation infrastructure, EPC services, power evacuation and O&M services for the lifetime of the projects. The following table provides details of our Capex Services for the periods indicated:

Capex services	For the six months ended September 30,				As of March 31,					
	2025		2024		2025		2024		2023	
	Number of Commissioned projects	Total Commissioned Capacity (MW)	Number of Commissioned projects	Total Commissioned Capacity (MW)	Number of Commissioned projects	Total Commissioned Capacity (MW)	Number of Commissioned projects	Total Commissioned Capacity (MW)	Number of Commissioned projects	Total Commissioned Capacity (MW)
	240	485.78	217	422.92	232	465.20	214	412.95	184	285.63

The following table provides our gross margin % for the Renewable Energy Services segment for the periods indicated:

Particulars	For the six months ended September 30,		Fiscal		
	2025	2024	2025	2024	2023
Gross Margin % - Renewable Energy Services	32.80%	29.13%	16.17%	25.11%	12.88%

Gross Margin % is calculated as Gross Margin of the segment as a percentage of Revenue from operations of the respective segment. See "Management's Discussion and Analysis from Result of Operations – Non-GAAP measures" on page 838.

We estimate essential costs, such as the cost of construction materials, land and direct project costs, at the time we enter into an EPC contract for a particular project, and these are reflected in the price that we charge our customers for the project. However, these cost estimates are preliminary, and at the time we submit bids for a project or enter into EPC contracts for some part of the required outputs, we may not have finalized these costs in our related contracts with subcontractors, suppliers and other parties involved in the project. We generally cannot reprice or renegotiate an EPC contract once it has been entered into with our customer, except in cases of variation in applicable duties and taxes. While we have not had such instances in the six months ended September 30, 2025 and the past three fiscals, any failure to accurately estimate costs could result in our actual costs exceeding our estimated costs, thereby causing an increase in our construction costs and working capital requirements, and as a result, we may impact our margins in this business vertical.

Under our EPC contracts we also typically provide certain performance guarantees that require us to complete the project in accordance with a specified timeline and to be responsible for the solar power project maintaining a specified plant performance ratio for a specified time period, typically for up to two years after commissioning of the solar power project. While we have not had material instances of failing to maintain plant performance ratios in the six months ended September 30, 2025 and the last three fiscals, any such failure to maintain these performance guarantees may subject us to penalties under our EPC contracts, such as requiring us to perform remediation work to meet the guarantees or pay commitment charges. As a result, we may face losses under a particular project, may not be able to achieve our expected margins in the relevant financial period. While we have not had material instances of cost or time overruns in the six months ended September 30, 2025 and the last three fiscals, we may fail to complete our solar and/ or wind power projects by the specified timeline due to construction delays as a result of various factors, including unanticipated changes in engineering design; shortages of skilled labour; supply shortages or delays in the delivery of equipment and materials to the project site; unforeseen conditions or occurrences, including the inability to obtain the requisite environmental and other approvals, resulting in delays and increased costs; adverse local weather conditions; suppliers' or subcontractors' failure to perform; disputes, delay or failure in obtaining required cash inflow and financial assistance from our customers; or delays caused by us or due to factors outside our control. Delays in project completion may subject us to penalties under our EPC contracts and harm our reputation with our customers and other stakeholders.

9. *A portion of the Net Proceeds is proposed to be utilized for repayment and/or pre-payment, in full or part, of all or certain borrowings of our Company from Nomura Capital (India) Private Limited and Nomura Investments (Singapore) Pte. Ltd., affiliates of a certain BRLM to the Offer.*

We propose to either repay and/or pre-pay, in full or part, all or certain borrowings availed by our Company from Nomura Capital (India) Private Limited and Nomura Investments (Singapore) Pte. Ltd., an affiliate of Nomura Financial Advisory and Securities (India) Private Limited, from the Net Proceeds.

Nomura Financial Advisory and Securities (India) Private Limited, one of the Book Running Lead Managers in the Offer, is related to certain holders of the listed non-convertible debentures issued by our Company, namely, Nomura Capital (India) Private Limited and Nomura Investments (Singapore) Pte. Ltd. However, on account of this relationship, Nomura Financial Advisory and Securities (India) Private Limited does not qualify as an associate of our Company in terms of Regulations 21(A)(1) of the Securities and Exchange Board of India (Merchant Bankers) Regulations, 1992, as amended, read with Regulation 23(3) of the SEBI ICDR Regulations.

We have received a certificate dated October 12, 2025, from Nomura Financial Advisory and Securities (India) Private Limited confirming that its appointment does not violate SEBI ICDR Regulations, Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 2015, as amended, Securities and Exchange Board of India (Merchant Bankers) Regulations, 1992, as amended or any other applicable SEBI rules or regulations in relation to the repayment of the non-convertible debentures in which Nomura Capital (India) Private Limited and Nomura Investments (Singapore) Pte. Ltd. are debenture holders. The said certificate has also been included as a material document available for inspection. See “*Material Contracts and Documents for Inspection – Material Documents*” beginning on page 966.

Further, please note that our Company has also issued and allotted 40,000 listed, rated, unsecured, redeemable non-convertible debentures of face value of ₹100,000 each, amounting to ₹4,000 million on October 31, 2025. (“**Additional NCDs**”) to Nomura Investments (Singapore) Pte. Ltd., which are not proposed to be repaid or prepaid, in full or in part from the Net Proceeds. The debentures subscribed to by Nomura Capital (India) Private Limited and Nomura Investments (Singapore) Pte. Ltd. of our Company, are part of their ordinary course of lending business. The Board of Directors of our Company have chosen the loans and facilities to be repaid/ prepaid based on commercial considerations. For further information, see “*Objects of the Offer – Details of the objects of the Fresh Issue - Repayment and/or pre-payment, in part or full, of all or certain outstanding borrowings of our Company and/or certain of our Subsidiaries*” beginning on page 161. However, there can be no assurance that the repayment/prepayment of such loans from the Net Proceeds will not be perceived as a current or potential conflict of interest.

10. We have in the past entered into a number of related party transactions and may continue to enter into related party transactions in the future, and there can be no assurance that we could not have achieved more favourable terms if such transactions had not been entered into with related parties.

In the ordinary course of our business, we enter into and will continue to enter into transactions with related parties. The following table provides the contribution of related parties to our total income for the periods indicated:

Particulars	Six months ended September 30,				Fiscal					
	2025		2024		2025		2024		2023	
	Amount (₹ million)	(% of total income)	Amount (₹ million)	(% of total income)	Amount (₹ million)	(% of total income)	Amount (₹ million)	(% of total income)	Amount (₹ million)	(% of total income)
RPT contribution ⁽¹⁾	83.82	0.86%	60.56	0.86%	177.98	1.11%	475.98	3.34%	391.24	4.07%

Note:

(1) Intergroup transactions that have been eliminated on consolidation are excluded from the above figures.

For further information, see “*Summary of the Offer Document – Summary of related party transactions*” and “*Other Financial Information - Related Party Transactions*” on page 26 and 824, respectively. While all such transactions have been conducted on an arm’s length basis in accordance with the Companies Act, relevant Accounting Standards and other applicable regulations pertaining to the evaluation and approval of such transactions, we cannot assure you that we might not have achieved more favourable terms had such transactions not been entered into with related parties. While we will conduct all related party transactions post-listing of the Equity Shares subject to the approval of the Audit Committee, or the Board or Shareholders, as applicable, and in compliance with the applicable accounting standards, provisions of Companies Act, 2013, as amended, provisions of the SEBI Listing Regulations and other applicable law, such future related party transactions may potentially involve conflicts of interest. While we endeavour to address such conflicts of interest as and when they may arise, we cannot assure you that such future transactions, individually or in the aggregate, will not involve potential conflict of interest which will not have an adverse effect on our business, cash flows, financial condition and results of operations. In respect of loans or advances that our Company and Subsidiaries provide to related parties, there can be no assurance that we will be able to recover all or any part of such loans or advances which, if unrecoverable, may have an adverse effect on our business, cash flows, financial condition and results of operations.

11. Failure to develop and secure rights to land suitable for the development of our solar and wind projects, including converting agricultural land acquired or leased for non-agricultural use, could adversely affect our business, including our ability to generate electricity and mortgage such land or subject us to loan recalls.

We secure rights to land for the development of our solar and wind projects through a mix of leases and land acquisitions. Suitable sites are determined based on availability of grid connection infrastructure, distance of transmission line from proposed

land to the grid substation, wind and solar resource levels, cost, type of land, type of soil, availability of contiguous land, number of owners and other relevant factors. Further, our projects must be interconnected to the power grid in order to deliver electricity, which requires us to find suitable sites with adequate evacuation and transmission infrastructure, including right of way. Land acquisition or availing of leases may be delayed due to commercial reasons, government or regulatory approvals, land aggregator delays or other reasons. We have experienced delays in transfer of land title or sublease deeds in the past for reasons beyond our control. For example, we faced delays in the past due to delays in procuring certain government approvals - for instance, in relation to the Saraipalli project in Chhattisgarh, we were unable to obtain the non-agricultural conversion as per our required timeline as the relevant authorities were on strike. While the delay did not have a material impact on our operation, there is no assurance that we would not face such delays in the future which could have a material adverse impact on our business such as delay in commissioning of our projects and consequential delay in revenue and cashflows from the project as well as levy of liquidated damages by our clients for such delays. We cannot assure you that lease or sublease deeds will be executed in a timely manner in the future such that our projects will be unaffected.

We may, from time to time, procure or lease agricultural land for the development of our projects, and depending on the location of these projects and transmission lines, we may also need to obtain additional no objection certificates (“NOCs”) from relevant authorities. Typically, the turnaround time of relevant authorities for applications in relation to no-objection certificates from the Power and Telecommunication Co-ordination Committee, the Indian Railways, and National Highways Authority of India and Ministry of Defence, as applicable, for setting up and energisation of transmission lines, and approvals under Section 68 and Section 164 of the Electricity Act, 2003, as applicable, for the purpose of laying overhead transmission lines, ranges from 2 to 7 months, depending on the state in which our projects are located. The transfer of such land from agriculturalists to non-agriculturalists and the use of such land for non-agricultural purposes may require an order from the relevant state land or revenue authority. Failure to fully convert such land for non-agricultural use or obtain no-objection certificates from relevant authorities would adversely affect our ability to develop and operate our projects on such sites. In addition, we may not be able to use such land as collateral for financing agreements, limiting the assets that can be used as collateral and potentially increasing our cost of borrowings and subjecting us to penal interests. It could also result in a loan recall by lenders, as our financing arrangements typically require that we obtain the necessary requisite regulatory approvals for the construction and operation of our projects. For instance, we have applied for certificate for change in land use from agricultural land to non-agricultural land for certain land parcels in relation to our under-construction projects in Gujarat. Further, one of our Subsidiaries, Clean Max Kratos Private Limited (“**Kratos**”) which has 33.00 MW wind and 28.05 MWp solar capacity, had acquired certain land parcels in Gujarat on lease in relation one of our operational projects and applied for conversion of the use of the land for non-agricultural purposes. However, the application was rejected by the relevant authority. We have subsequently filed a writ petition before the High Court of Gujarat challenging the rejection, which is currently pending. For details, see “*Outstanding Litigation and Material Development - Litigation involving our Subsidiaries - Litigation by our Subsidiaries*” on page 876. Furthermore, a writ petition has been filed by certain individuals before the High Court of Karnataka alleging non-compliance with the conditions of land conversion approvals granted in relation to certain land parcels underlying our solar project in Sedam, Karnataka which has 98.31 MWp capacity. For details, see “*Outstanding Litigation and Material Development - Litigation involving our Company - Litigation against our Company – Material civil litigation*” on page 871. There is no assurance that we will not face challenges or be denied such conversions by the relevant authorities in the future.

Failure to obtain appropriate land rights results in delay in perfection of security for borrowings availed and levy of associated charges. The following table provides the amount of penal interest paid for delays in the perfection of security for the indicated Fiscals. Penal interest refers to the further interest payable at the prescribed rate over and above the applicable interest rate, in case the security is not created or perfected within stipulated time period. The following table shows the penal interest we have paid, including for instances related for perfection of security for land.

Particulars	For the six months ended September 30,		Fiscal		
	2025	2024	2025	2024	2023
	(₹ million, unless otherwise indicated)				
Penal interest paid for delays on security perfection	17.84	7.36	19.23	4.83	2.30
Finance costs	4,160.75	3,055.81	6,628.87	5,043.84	2,172.22
Penal interest paid for delays on security perfection as % of finance costs (%)	0.43%	0.24%	0.29%	0.10%	0.11%

While we have not been subject to any loan recalls by lenders or been required to cease operation of our projects as a result of failure to perfect security or obtain regulatory approvals in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, there is no assurance that we will not experience such issues in the future should we fail to perfect security, particularly in relation to agricultural land.

12. Land title in India can be uncertain and we may not be able to identify or correct defects or irregularities in title to the land which we own, lease or may from time to time acquire in connection with our current or future operations.

According to the CRISIL Report, the availability of contiguous land and acquisition challenges associated with land parcels and title are some of the key challenges that developers are facing, which slows down the pace of project execution. In India, the absence of a central title registry and incomplete computerization of land records—often maintained regionally in local

languages and updated manually—can result in illegible, incomplete, or inconsistent records, making title investigations difficult and unreliable. Discrepancies between various records, improperly executed or unregistered conveyance instruments, unregistered encumbrances, and claims by third parties or prior owners can further complicate title verification. As a result, disputes over land title may arise that we may not be able to fully resolve. We have easement rights associated with certain wind power projects for land areas beyond the actual turbine foundation and periphery, such as the rotor sweep (blade shadow) region and access pathways, where acquiring ownership or leasehold rights is neither operationally necessary nor commercially feasible. In such cases, we typically acquire easement rights, granting us a non-possessory right to use the land for specific purposes—such as ensuring airspace clearance for blade rotation, maintenance access, and statutory setback compliance—while the ownership remains with third parties. Such rights are not transferable or usable as security, and while we have not experienced any material instances in the six months ended September 30, 2025, and Fiscals, 2025, 2024, and 2023, any dispute or encumbrance affecting these lands over which we have easement rights could disrupt our operations and adversely impact our business or financial condition. While we carry out due diligence before acquiring land in undertaking any project, not all risks—such as disputed title, unregistered encumbrances, adverse possession, or potential government expropriation—can be fully identified or mitigated, which may lead to legal disputes or financial liabilities. Presently, certain legal disputes, pertaining to certain land parcels underlying some of our projects, are pending which may affect our title to such land parcels. For details, see “*Outstanding Litigation and Material Developments*” beginning on page 870.

We have obtained title reports between August, 2025 and January, 2026, for our projects that are under construction in Rajasthan, Karnataka, Gujarat, Maharashtra, Chhattisgarh, Tamil Nadu and Haryana. With respect to the land parcels underlying our operational projects, we have reviewed the title reports obtained at or around the time of acquiring the interest, conveyance and/or lease deeds, as applicable. Such title reports for land underlying our operational projects were obtained at or around the time of acquisition. A significant amount of time has elapsed since then, however, as we are in possession of the land, we have not obtained further updates to such title reports. The Company owns certain freehold land as disclosed in its balance sheet. The gross carrying value of such freehold land as at September 30, 2025, September 30, 2024, March 31, 2025, March 31, 2024 and March 31, 2023, is as follows:

Particulars	Freehold land (in ₹ million)
Gross carrying value	
Balance as at March 31, 2023	2,596.08
Additions	1,051.24
Additions - through asset acquisition	-
Additions - through business combination	-
Disposals	-
Exchange differences on translation of foreign operations	-
Balance as at March 31, 2024	3,647.32
Additions	132.04
Additions - through asset acquisition	67.95
Additions - through business combination	-
Disposals	-
Exchange differences on translation of foreign operations	-
Balance as at September 30, 2024	3,847.31
Additions	923.17
Additions - through asset acquisition	37.09
Additions - through business combination	-
Disposals	(12.30)
Exchange differences on translation of foreign operations	-
Balance as at March 31, 2025	4,795.27
Additions	711.79
Exchange differences on translation of foreign operations	-
Disposals	-
Balance as at September 30, 2025	5,507.06

Further, the Company is required to pay rents on the lands owned by the Company on a leasehold basis. The details of the rents payable by the Company for the six months period ended September 30, 2025 and September 30, 2024 and for the Financial Year ended March 31, 2025, March 31, 2024 and March 31, 2023, basis the lease agreements, is as follows:

(in ₹ million)

Particulars	For the six months period ended September 30, 2025	For the six months period ended September 30, 2024	For the Financial Year ended March 31, 2025	For the Financial Year ended March 31, 2025	For the Financial Year ended March 31, 2025

Lease rent payable not later than 1 year	182.67	81.79	151.25	54.72	35.87
Lease rent payable later than 1 year and not later than 5 years	845.21	457.32	470.18	249.74	87.63
Lease rent payable later than 5 years	4,214.97	2,336.96	2,720.89	1,256.55	824.37
Total lease rent payable	5,242.85	2,876.07	3,342.32	1,561.01	947.87

Any irregularities of title may result in loss of development rights over land, which may prejudice our success and may require us to write off substantial expenditures in respect of a wind and solar power project. Furthermore, our operations required certain land related approvals for construction and also require labour related approvals which require renewal from time to time. There can be no assurance that we will be able to procure or renew such approvals from relevant authorities in the future, which might impede our ability to carry out our operations in the event of non-renewal of such approvals.

Certain state legislations also provide for ceiling on holding of agricultural lands by landowners. Holding in excess of such ceilings require exemptions from the relevant government authorities. In case acquisition of land is undertaken in excess of the prescribed ceilings, we would be required to obtain such exemptions. Failure to obtain such exemptions may result in forfeiture of land held by us. Further, in certain cases, permissions from local authorities are required for creation of leasehold/sub-leasehold rights. Failure to obtain such permissions may result in inability to acquire necessary rights for development of our projects. Such occurrences could adversely affect our business, cash flows, financial condition and results of operations. For instance, for certain land parcels underlying our under-construction project in Maharashtra, we have not applied for exemptions for holdings in excess of the prescribed ceiling under the Maharashtra Agricultural Lands (Ceiling on Holdings) Act, 1961 read with the Maharashtra Agricultural Lands (Lowering of Ceiling on Holdings) (Grant of Exemption) Rules, 1976. To address potential risks, we have made a post facto application for such exemption. Furthermore, 2 leased land parcels underlying our project under-construction in Maharashtra have been further sub-leased to other entities within our Group. However, we failed to apply for necessary permission for local authorities for creation of such sub-leases, which have been applied for subsequently.

13. We are required to obtain certain approvals, licenses, registrations and permissions for operating our business, and any delay or failure to obtain, renew or maintain necessary such approvals, licenses, registrations and permissions would adversely affect the operation of our projects.

We are required to maintain various approvals, licenses, registrations and permissions for operating our business, some of which may have expired and for which we may have either made or are in the process of making an application for obtaining the approval or its renewal. Such approvals, licenses, registrations and permissions are subject to certain terms, and failure to comply with such terms could result in the suspension or revocation of such approvals, licenses, registrations or permissions. Additionally, we may need to apply for more approvals in the future and we cannot assure you that we will make these applications and filings on time in the future. Furthermore, there is no assurance that we may be able to renew our existing approvals in a timely manner or at all.

Failure by us to renew, maintain or obtain the required material permits or approvals at the requisite time may result in the interruption of our operations and may have a material adverse effect on our business such as delays in commissioning of our projects, loss of revenue, levy of penalty charges on our Company, risk of losing the invested capital in the project if such approval is not renewed by the relevant governmental authority, thus adversely affecting our cash flows, financial condition and results of operations. For instance, (a) our projects at Isharwal, Haryana and Amravati, Maharashtra, we have applied for factory license under the Factories Act, 1948, (b) our projects at Isharwal, Haryana and Bikaner, Rajasthan, we have applied for authorization under section 164 of the Electricity Act, 2003 for transmission line, and (c) our projects at Bikaner, Rajasthan and Amravati, Maharashtra we have applied for no objection certificate before the applicable state fire department. Further, for our project in Koppal, Karnataka, in anticipation of the need for additional time for required for commissioning of such project, we have filed a petition before the relevant authority, seeking an extension of validity granted in relation to the connectivity approval. There can be no assurance that such applications will be decided in our favour or such extensions will be granted. In the absence of an extension, we may not be able to commission the project within the granted validity of the connectivity approval. Details on our pending regulatory approvals can be found in the “Government and Other Approvals” section beginning on page 884.

Additionally, for instance, in relation to 34.22 MW AC capacity of our solar projects at Amravati and Ghatanji, Maharashtra, our applications for short term open access permission have not been granted, citing inaccuracies in the applications. Such permission is a pre-requisite for entering into wheeling and banking agreements with relevant power transmission companies, our off-takers and jurisdictional distribution companies, as applicable and required prior to operationalisation. We are currently in the process of seeking necessary clarifications from the relevant authority.

In particular, connectivity approvals have a set timeline by which the relevant project must be commissioned before the approval expires. The expiry period for connectivity approvals varies by state. Failure to meet such timelines may require us to file renewal/extension applications, incur additional costs, and affect the timelines for commissioning of our projects, thereby adversely affecting our business, cash flows, financial condition and results of operations. For instance, in relation to the Kalavad project in Gujarat with 100 MW AC hybrid capacity, we had filed a petition before the Gujarat Electricity Regulatory

Commission seeking grant of extension of time for connectivity. Such petition was allowed and extension of 465 days was granted from the last expiry date. Any delays in commissioning of projects beyond the expiry date of the connectivity approval requires that we apply for extension and may require us to pay certain renewal charges/penalties.

- Our Vaghasia hybrid project in Gujarat with 49.50 MW wind and 44.83 MWp solar capacity had a requirement to demonstrate common infrastructure commissioning by July 31, 2025 for securing connectivity timelines which could not be met and a petition for extension filed before the Gujarat Electricity Regulatory Commission. Subsequently, an extension of 329 days was granted.
- In relation to our Ghatanji project in Maharashtra with 100 MW AC solar capacity, the connectivity expired on February 3, 2025. We had applied for renewal of the same based on progress made on the project and were granted a renewal on May 29, 2025, and currently, we have completed the works and obtained the final grid connectivity on September 15, 2025.
- In relation to another of our project in Kalavad, Gujarat with 25 MW AC wind-solar hybrid capacity, where the connectivity expired on March 12, 2025, and we had applied for an extension, and we have received the extension on October 17, 2025 which is valid until March 13, 2026.
- In relation to our Jagalur solar project of 70 MW AC, we had received a government order on December 28, 2021. However, as client finalisation took additional time, we obtained an extension of the government order, which was valid until June 27, 2025 and the entire capacity was commissioned within this extended timeline.

While we have not been required to incur any material monetary penal charges in relation to the extension of such connectivity approvals in the past, we cannot assure you that we will not be required to incur such costs in the future.

In renewing our existing permits and approvals, the relevant state agency imposes additional conditions. While we have maintained all applicable approvals, licenses, registrations and permissions required for the operation of our business, there can be no assurance that the relevant authorities will issue to us the required such approvals, licenses, registrations or permissions in the time frame anticipated by us or at all.

14. We may suffer significant construction delays and finance or construction cost increases in excess of our expectations, leading to time and cost overruns, or we may not be able to acquire the required land rights which could have a material adverse effect on our business, cash flows, financial condition, results of operations and reputation.

Developing existing sites and finalizing sites to develop new projects directly impact our business' growth. The following table provides details of our capacity and project pipeline as of March 31, 2025, as of September 30, 2025 and as of October 31, 2025:

Stage	Contracting Strategy	As of March 31, 2025			As of September 30, 2025			As of October 31, 2025		
		Solar (MWp)	Wind (MW)	Total (MW)	Solar (MWp)	Wind (MW)	Total (MW)	Solar (MWp)	Wind (MW)	Total (MW)
Operational Capacity ⁽¹⁾	Onsite Solar	339	NA	2,178	368	NA	2,796	371	NA	2,799

Notes:

- (1) *Operational Capacity refers to projects commissioned as of March 31, 2025 or September 30, 2025 or October 31, 2025 as applicable. Operational Capacity as on September 30, 2025 as well as October 31, 2025 includes 355.9 MW of capacity for which CEIG charging approval has been received and COD certificate is awaited;*
- (2) *Contracted Capacity refers to projects for which we have signed PPAs or LOIs with customers as of March 31, 2025 or September 30, 2025 or October 31, 2025 but are yet to execute projects; Contracted capacity includes 1,346 MW of contracted capacity for scheduled commissioning in the next 12 months i.e., on or before September 30, 2026.*
- (3) *Advance Stage Capacity refers to projects which have received evacuation approvals as of March 31, 2025 or September 30, 2025 or October 31, 2025;*
- (4) *Under Development Capacity refers to projects with evacuation approval applied for as of March 31, 2025 or September 30, 2025 or October 31, 2025.*

We may be unable to meet our operational, financial and development targets or may not be able to find suitable projects to add to our development portfolio. We may experience significant construction delays or cost overruns due to factors such as equipment or land access delays, supply chain or regulatory issues, inadequate infrastructure, adverse weather or environmental conditions, financing challenges, or other events beyond our control, including force majeure and currency fluctuations. Any of these factors could also prevent us from completing the construction of a project, cause defaults under our financing agreements or cause the affected project to be unprofitable for us, in particular, in cases where penalties or commitment charges are levied or tariff rates change unfavourably due to delays, which could also adversely affect our business, cash flows, financial condition, results of operations and reputation. In addition, the commissioning of under construction projects may be delayed or may not be completed due to failure to meet the installation inspection protocol, changes in regulations and other factors including obtaining required statutory approvals, inspection, field commissioning, acceptance testing and controller power-up test and start-up work for each unit. Non-commissioning of projects may lead to contractual and legal liabilities, disputes, financial loss, and reputational damage. Political changes and delays caused by state and local elections, demonstrations or protests by local communities and special interest groups could result in, or contribute to, project time and cost overruns.

We may face delays in operationalizing some part of the capacity of our projects as we may not be able to acquire the required land rights for our under-construction projects and currently, we are yet to acquire some land rights. For details in relation to the status of land contracted in relation to our Under Development capacity that is scheduled to be commissioned by July 31, 2026, see “*Our Business - Project Development - (ii) Project – Contracted Capacity*” on page 329. Certain portions of our land requirements have been contracted through an agreement to sell or an agreement to lease. Such agreements provide for consummation of sale/lease transactions in the future through execution of definitive agreements such as sale deeds and lease deeds. Until we enter into such definitive agreements, we do not acquire rights over such land. Execution of definitive agreements are subject to inherent uncertainties and completion of necessary formalities. If we are unable to enter into definitive documents, we may not be able to develop our projects or may have to relocate our projects, which could adversely affect our business, cash flows, financial condition and results of operations

Additionally, for example, we have faced delays in the past due to delay by government authorities in giving non-agricultural use approvals for instance in our Saraipalli project in Chhattisgarh with 75.00 MWp solar capacity. Any of these factors could give rise to construction delays and increase our construction costs in excess of our estimates, which could prevent us from completing the construction of our projects on time and delay commissioning. Substantial expenses are incurred in the construction and development of projects and if such projects cannot be developed into operational projects, we may have to write-off such expenses. While we have not had to incur material write-offs in the six months ended September 30, 2025 and Fiscals 2023, 2024 and 2025, there is no assurance that this may not occur in the further which could have a material adverse effect on our business, cash flows, financial condition and results of operations.

Further, some of our contracted capacity is in the form of LOIs. These are non-binding engagements with our customers. If these LOIs are withdrawn, our contracted capacity will reduce and we may not be able to find alternate customers quickly or on favourable terms. This in turn could adversely impact our financial condition and results of operations.

15. *We face risk and uncertainties when developing renewable energy projects which could cause delays to the completion of our projects, increase our projects costs or result in the short closing of our project capacity, thereby adversely affect our cash flows, financial condition and prospects.*

Our ability to successfully develop a renewable energy project is contingent upon a number of factors, including but not limited to:

- availability of adequate grid infrastructure and our ability to obtain rights to interconnect our project to the grid;
- our ability to secure appropriate land, with land use permissions;
- solar and wind resource availability at acceptable levels for project operations;
- our ability to enter into PPAs or other offtake arrangements or EPC contracts on acceptable terms;
- our ability to obtain financing on competitive terms;
- receipt of critical components and equipment on schedule and on commercially reasonable terms;
- completion of the project on schedule;
- our ability to secure necessary project approvals, license and permits in a timely manner; and
- our ability to build/access evacuation infrastructure and high voltage transmission lines, which, according to – the CRISIL Report has been challenging.

If any of the aforementioned factors or other factors occur, it could cause delays in the completion of our projects, increase our project cost, require us to reduce the size and/or capacity of our projects. If we were to reduce a project's capacity we may be required to build a project with power capacity lesser than initially planned which could result in an increase in cost per megawatt produced. We have not experienced any reduction in project size of our projects that have had a material impact on our operations in the six months ended September 30, 2025, and Fiscals 2025, 2024 and 2023 and there have been no delays or cost overruns in commissioning of the operational capacities of our projects during the same period. Budgeted cost refers to cost of constructing a project budgeted by the Company at the inception of the project used for computing revenue under the percentage completion method. However, if such issues were to arise in the future, our profitability, results of operations, cash flows and prospects could be adversely affected. See also “– We may suffer significant construction delays and finance or construction cost increases in excess of our expectations, leading to time and cost overruns, which could have a material adverse effect on our business, cash flows, financial condition, results of operations and reputation” on page 57. See also, “History and Certain Corporate Matters – Time and Cost Over-runs” on page 369.

16. Selling electricity on exchanges carries inherent risks due to the variability and unpredictability of market prices, and we have limited experience in selling power through exchange.

As of September 30, 2025, we had 1,331.1 MW of Contracted Capacity in the states of Karnataka and Rajasthan which, when built, will be connected to the CTU for which we will be selling power on exchange. Under the terms of our contract with the customers, in relation to 1,111.7 MW of the total capacity contracted, the customer is required to compensate us for any shortfalls in the price of electricity sold on exchanges. Thus, 83.52% of this portfolio is secured from risk of price fluctuations by selling on these exchanges. Prices on power exchanges can fluctuate significantly based on a variety of factors, including seasonal demand patterns, fuel price variations, and government policy changes. Prices also vary during the day, influenced by peak and off-peak demand. While peak periods may yield higher prices, over-reliance on these time slots could lead to financial strain during off-peak hours or if demand patterns shift unexpectedly. These fluctuations make it challenging to predict and plan revenues. With increased competition in the renewable energy industry, prices on exchanges may decline. While our PPAs with customers typically provide that we will be compensated for any shortfalls in the price of electricity sold on exchanges, there is no assurance that we will not incur any losses as a result of the fluctuations in prices on energy exchanges. We have limited experience in selling power through exchanges as this is a new business line for us, typically prior to this we have sold power on exchange via power traders. For additional risks related to our CTU project, see “ - We are developing our first CTU project and ISTS project and have not commissioned a CTU project before. Any failure to develop this project successfully could have a material adverse impact on our expansion plans, business, results of operations, financial conditions and prospects.” on page 49.

17. Our operational projects located in the States of Karnataka and Gujarat contributed an aggregate of 77.16%, 78.76%, 79.71% and 66.91% of our revenue from Renewable Energy Power Sales in the six months ended September 30, 2025, Fiscals 2025, 2024 and 2023, respectively. Any adverse developments including changes in the regulatory framework affecting such states may have a heightened impact on our business, cash flows, financial condition and results of operations.

We supply renewable power - solar, wind, and hybrid - through our farms, which are contracted through bilateral PPAs with Technology customers and Conventional C&I customers (“Offsite”) and build solar power plants that are located within customer's premises (“Onsite Solar”). For more details, see “Our Business – Overview – Our Offerings” starting on page 295. The following table sets forth a breakdown of revenue from Renewable Energy Power Sales Segment by states for the periods/years indicated:

Particulars	For the six months ended September 30,				Fiscals					
	2025		2024		2025		2024		2023	
	Revenue (₹ million)	Contribution as a percentage of Revenue from Renewable Energy Power Sales	Revenue (₹ million)	Contribution as a percentage of Revenue from Renewable Energy Power Sales	Revenue (₹ million)	Contribution as a percentage of Revenue from Renewable Energy Power Sales	Revenue (₹ million)	Contribution as a percentage of Revenue from Renewable Energy Power Sales	Revenue (₹ million)	Contribution as a percentage of Revenue from Renewable Energy Power Sales

Revenue from Renewable Energy Power Sales	7,192.15	100.00%	5,736.14	100.00%	11,072.48	100.00%	8,663.33	100.00%	4,748.15	100.00%

Additionally, the following tables sets forth a breakdown of operational capacity for Renewable Energy Power Sales Segment by states for the years indicated:

Operational Capacity (MW) as at end of the period

State	For the six months ended September 30,		Fiscal		
	2025	2024	Fiscal 2025	Fiscal 2024	Fiscal 2023
Gujarat	612.15	380.43	380.43	380.43	25.53
Haryana	93.11	56.10	88.16	-	-
Karnataka	928.11	641.83	784.83	618.73	425.64
Maharashtra	103.37	14.38	14.38	10.38	5.10
Tamil Nadu	136.15	106.15	106.15	29.96	29.96
Chhattisgarh	69.38	-	-	-	-
Total Offsite capacity	1,942.26	1,198.89	1,373.95	1,039.49	486.22
Total Onsite capacity	368.06	309.53	338.84	302.77	268.29
Total Renewable Energy Power Sales Capacity	2,310.32	1,508.42	1,712.79	1,342.26	754.51

(1) Operational Capacity refers to projects commissioned as of September 30, 2025 in our Renewable Energy Power Sales segment.

Contracted yet to be executed capacity (MW) as at end of the period

State	For the Six months ended September 30,		Fiscal		
	2025	2024	Fiscal 2025	Fiscal 2024	Fiscal 2023
Gujarat	272.76	226.98	419.66	6.77	346.33
Karnataka	686.45	149.60	771.06	158.00	110.63
Tamil Nadu	214.14	6.50	174.00	76.19	16.96
Chhattisgarh	37.50	75.00	75.00	75.00	-
Haryana	86.73	50.46	77.80	59.40	-
Maharashtra	148.56	35.32	216.99	9.00	-
Rajasthan	892.50	-	892.50	-	-
Uttarakhand	20.70	-	13.20	-	-
Total Offsite capacity	2,359.33	543.86	2,640.21	384.36	473.92
Total Onsite capacity	85.42	31.81	69.80	20.28	29.84
Total Renewable Energy Power Sales Capacity	2,444.75	575.67	2,710.01	404.65	503.76

(1) Contracted yet-to-be-executed capacity refers to the total renewable energy capacity (in MW) for which power purchase agreements (PPAs)/ Letter of Intent (LOI)/energy services contracts have been signed with customers but project commissioning is still underway as at end of period.

For key policy dependencies by state; please refer to the “Key Regulations and Policies in India” section beginning on page 344 of this Prospectus

Our offsite projects in Karnataka and Gujarat contributed to a significant portion of our revenue from Renewable Energy Power Sales segment in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, respectively. As such, our operations are more susceptible to local and regional factors in these States, such as accidents, political factors, economic, and social and weather conditions, natural disasters, and demographic and population changes, pandemics and other unforeseen events and circumstances. While we have not faced material instances of disruptions from these states in the six months ended September 30, 2025 and Fiscals 2023, 2024 and 2025, any disruptions, damage or destruction of projects situated in such States may adversely affect our ability to meet our contractual obligations and customers’ demand and the loss of any one of our key customers or a significant reduction in demand from such customers could adversely affect our business, cash flows, financial condition and results of operations. See “ - Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business, financial condition, and results of operations” on page 93.

Material adverse changes in the applicable regulatory framework in Karnataka and Gujarat would also adversely affect our business, cash flows, financial condition and results of operations. For instance, certain regulatory changes *inter alia* providing for increase in open access charges were notified in Karnataka which has been set aside, and is currently subject to further ongoing litigation proceedings before the Karnataka High Court initiated by our Company and other third parties. For details, see “Outstanding Litigation and Material Developments – Litigation Involving our Company – Litigation against our Company – Material Civil Litigation” on page 871. We are in the process of expanding our presence across other states in India. However, our ability to expand into new states depends on various factors, including our ability to obtain suitable land and applicable regulatory approvals for the development of our projects, the level of customer demand within such State, the nature of the

state's policies and regulations in relation to renewable energy, and climate. Even if we are able to obtain the necessary regulatory approvals and procure a suitable land site, there is no assurance that we will be able to generate expected returns from such business expansion. All of this could have a material adverse impact on our operations, financial condition and results of operations.

18. *Our Carbon business is a newer business and there is no assurance that we will be able to grow this business or achieve expected returns.*

Within our Carbon business, we provide our customers with various solutions to assist them in offsetting their carbon emissions, including carbon credit trading and the generation of carbon credits. In the six months ended September 30, 2025 and 2024, we generated ₹21.01 million and ₹37.35 million from our carbon business, contributing 0.23% and 0.55% of our revenue from operations, respectively, and in Fiscal 2025, we generated ₹144.37 million from our Carbon business, contributing 0.97% to our revenue from operations. No revenue from the Carbon business was earned in Fiscals 2024 and 2023. The growth of our Carbon business depends in part on the development of global carbon credit marketplaces. The efficiency of the voluntary carbon credit market is currently affected by several concerns, including the risk of price volatility and concerns around the quality of carbon credits. Delayed development of a global carbon credit market could negatively impact the commercial viability of our Carbon projects and could limit the growth of the business and adversely impact our financial condition and future results. In addition, our ability to generate carbon credits through our carbon removal and carbon avoidance projects will depend in part on our ability to grow and maintain the trees that we plant. We may not be able to derive expected returns on our investments in our Carbon business.

19. *The delay between making upfront investments in our wind and solar power projects and receiving revenue could materially and adversely affect our business, cash flows, financial condition and results of operations.*

There is generally 12 to 15 months between the date on which we start project development and construction and the date on which we begin to recognize revenue from the sale of electricity generated by such projects. Our initial investments include payments for interconnection and grid connectivity arrangements fees, costs associated with project analysis and feasibility studies, payments for initial portion of land leased/acquired, which may be non-refundable. We bear the costs of these initial investment upfront. As a result, we may need significant working capital. Further, there is judgment involved in the estimation of the total revenue and costs to complete a project. Any delays in the commissioning of a project or our failure to adequately budget project costs and timelines, could have an adverse impact on our business, financial condition and results of operations. Furthermore, we have historically relied on our own equity contribution and debt to pay for costs and expenses incurred during project development. We typically recognize revenue from energy projects only when they are operational, and we commence supply of power to customers. There may be long delays from the initial development to projects becoming shovel ready. Between our initial investment in the development of permits for energy projects and their connection to the transmission grid, there may be adverse developments, such as unfavourable environmental or geological conditions, labour strikes, panel shortages or monsoon weather. We may not be able to obtain all of the permits as anticipated or permits that were obtained may expire or become ineffective and we may not be able to obtain project level debt financing as anticipated. In addition, the timing gap between our upfront investments and actual generation of revenue, or any added delay in between due to unforeseen events, could put strains on our liquidity and resources, and materially and adversely affect our business, cash flows, financial condition and results of operations.

20. *Conflicts of interest may arise among us and other affiliates of Brookfield in course of the growth of our business.*

Our Company is promoted by BGTF One Holdings (DIFC) Limited, an entity which forms part of Brookfield group. As on the date of this Prospectus, BGTF One Holdings (DIFC) Limited holds 33,417,101 shares of face value of ₹1 each, which will constitute 31.42% on a fully diluted basis of the issued, subscribed and paid up Equity Share capital of our Company. For further details of the shareholding of BGTF One Holdings (DIFC) Limited in our Company, see "*Capital Structure - History of the share capital held by our Promoters*" on page 140. Pursuant to a resolution dated May 27, 2025, passed by our Board of Directors, BGTF One Holdings (DIFC) Limited was identified as a Promoter of our Company. Brookfield is a global investment firm engaged in investing in a number of sectors, including renewable power and transition, and therefore, may hold interests in businesses that directly compete with us. For details, see "*Our Business – Our Competitive Strengths – Sponsorship by Brookfield – A Leading Global Investor with Deep Local Expertise*" on page 334. In particular, we may compete with existing and future private and public investments owned and/or managed by Brookfield, which may create differing or competing interests to our Company and our Shareholders. Certain of these competitors and entities have or may have an investment strategy similar to our investment strategy and therefore may compete with us. In particular, Brookfield's global transition funds and other investment vehicles of Brookfield have invested or may seek to invest in a broad range of renewable power and transition investments including in renewable energy assets, which could be purchased by us in the future. As a result, conflicts of interest may arise in allocating or addressing business opportunities and strategies among other Brookfield entities and us. Any future investments of Brookfield in businesses other than our Company may compete with our business. Such businesses may also have access to alternative sources of private capital as compared to our Company, which may only raise capital through permitted means following the listing of our Company on the Stock Exchanges.

As of the date of this Prospectus, the Group has entered into transactions with certain related parties of Brookfield. The

following table provides the revenue, receivables and payables with Brookfield related parties as of and for the six months ended September 30, 2025 and Fiscal 2025.

Transactions during the six months ended September 30, 2025	Amount in ₹ million	% of Total Revenue from Operations

While Brookfield's strategy will be to pursue attractive and accretive investment opportunities, there can be no assurance that all potentially suitable investment opportunities that come to the attention of Brookfield will be made available to us. We may also from time to time dispose of all or a portion of our assets by way of a third-party purchaser's bid where member(s) of Brookfield are providing financing as part of such bid or acquisition of the investment or underlying assets thereof. Such involvement of Brookfield as a provider of debt financing in connection with the potential acquisition of assets by third parties from us may give rise to potential or actual conflicts of interest. We are also likely to enter into other related-party transactions in the ordinary course of business, including supplying power to other affiliates of Brookfield. Further, there could be certain related party transactions between us and other affiliates of Brookfield. While we will enter into these related party transactions in compliance with applicable law, we cannot assure you that we could not achieve more favorable terms if such transactions were not entered into with related parties. For details of our related party transactions with affiliates of Brookfield in the six months ended September 30, 2025 and Fiscals 2025, 2024, and 2023, see "Summary of the Offer Document - Summary of related party transactions" on page 26. Further, we cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on our business and results of operations.

21. We have issued non-convertible debentures which are listed on the BSE. We have in the past been unable to comply with applicable rules and regulations. Such non-compliances may have adverse effect on our business, cash flows, financial condition and results of operations.

We have issued certain non-convertible debentures ("NCDs") amounting to ₹5,990.00 million, of which ₹4,990.00 million are listed, as of September 30, 2025. Further the Company has issued and allotted 40,000 listed, rated, unsecured, redeemable non-convertible debentures of face value of ₹100,000 each amounting to ₹4,000 million on October 31, 2025 ("Additional NCDs") by way of a debenture trust deed dated October 27, 2025 (the "DTD"), which have been listed on the BSE on November 4, 2025. The date of redemption of the Additional NCDs is June 30, 2027, which is 1 year 8 months from the date of deemed allotment. Further, the Additional NCDs have been issued at an interest rate of 10.20% per annum for first 12 months with an incremental interest of 0.25% every quarter till maturity of the Additional NCDs as per the terms mentioned in the DTD. Since the NCDs and Additional NCDs are listed, we are subject to the listing requirements of the BSE and continuous disclosure obligations under the SEBI Listing Regulations. For details of our NCDs, see "Financial Indebtedness" beginning on page 825. This requires us to publish our quarterly financial results for every quarter within 45 days from completion of the previous quarter.

There has been a delay by our Company in preparation of our quarterly financial results for the quarter ended June 30, 2025, accompanied by a limited review report beyond the required timeline. Under the SEBI Listing Regulations, we are also required to give prior intimation to the stock exchanges regarding the board meeting to consider our quarterly financial results. As on the date of the DRHP, we had not made such intimation to BSE, however, we had intimated the delay in relation to publishing of our results through stock exchange intimation dated August 14, 2025. Further to the same, by way of an intimation dated August 29, 2025, we submitted our unaudited standalone financial results for the quarter ended June 30, 2025, and the limited review report of the statutory auditor thereon to the BSE. Subsequently, we received an email dated September 12, 2025, from the BSE imposing fine for the said non-compliance. We thereafter made a payment of ₹0.08 million to BSE and intimated the BSE by way of a letter dated September 13, 2025. Further, as on the date of this Prospectus, we have not released our quarterly financial results for the quarter ended December 31, 2025, and the limited review report of the Statutory Auditors, to BSE within the required timeline. We have intimated the delay to BSE on February 14, 2026.

Such non-compliance with SEBI Listing Regulations may subject us to certain actions initiated by BSE, including, without limitation, imposition of fine by the BSE.

We cannot assure you that there will not be any non-compliance with any applicable rules and regulations. If we fail to comply with applicable rules and regulations, we may be subject to certain actions, which may have an adverse effect on our business, cash flows, financial condition and results of operations.

22. *In the past, our Company has contravened certain provisions of the Companies Act, 2013 in connection with the term of appointment of certain directors. If we are subject to penalties in the future or other regulatory actions in relation to the non-compliance, our reputation, business and results of operations could be adversely affected.*

Our Company had appointed Sumit Banerjee as an additional non-executive director on the Board of our Company and was subsequently regularised as a non-executive independent director on September 30, 2015, for first term consisting of 5 years, commencing from September 30, 2015 till September 30, 2020. Thereafter, Sumit Banerjee was re-appointed as a non-executive independent director by our Board at its meeting on September 30, 2020, and the shareholders' meeting held on January 12, 2021, for second term consisting of 2 years, commencing from October 1, 2020 to September 30, 2022. Being a private limited company, our Company was not obligated to appoint an independent director under the Companies Act, 2013. However, the appointment was made pursuant to the provisions in the articles of association of our Company. Further, our Company decided to re-appoint Sumit Banerjee for a third term basis the articles of association approved by the shareholders in their meeting held on September 29, 2022, thereby violating sections 149(10), 149(11) and 161(1) of the Companies Act, 2013 in relation to the term of his appointment. Subsequently, our Company suo-moto filed an adjudication application on August 15, 2025 (“**Adjudication Application**”) with the Registrar of Companies, Maharashtra at Mumbai (“**ROC, Maharashtra**”) in accordance with the provisions of Section 454 of the Companies Act, 2013 and implemented corrective action wherein Sumit Banerjee stepped down from our Board on July 9, 2025, for the said violations. Further to the above, the RoC, Maharashtra issued an order dated December 31, 2025 for adjudication of penalty under Section 454 of the Companies Act (“**Adjudication Order**”) resulting in the imposition of penalties amounting to ₹0.30 million payable by our Company and ₹0.10 million each, payable by our (i) Chairperson and Managing Director, Kuldeep Jain; (ii) our Chief Financial Officer, Nikunj Ghodawat; and (iii) our Company Secretary and Compliance Officer, Ullash Parida (together, the “**Relevant Individuals**”). As on the date of this Prospectus, our Company and the Relevant Individuals have duly paid the stipulated penalties. Further, our company has filed form INC-28 on January 8, 2026, intimating compliance with Adjudication Order and the aforesaid form has been approved by the ROC, Maharashtra. Additionally, pursuant to its letter dated December 11, 2025, the ROC Maharashtra, clarified that certain associated contraventions of the Companies Act, such as (i) non-attachment of form DIR-2 in form DIR-12, in relation to Sumit Banerjee’s first term of appointment as Independent Director; and (ii) non-filing of form DIR-12, in relation to Sumit Banerjee’s second term of appointment, cannot be adjudicated in light of subsequent amendments to the Companies Act. Accordingly, our Company has been advised to compound such offences. As on the date of this Prospectus, our Company, along with the Relevant Individuals has filed an application of compounding on January 15, 2026 for the aforesaid contraventions in accordance with the advice received from the ROC, Maharashtra. For further details, see “- *Litigation involving our Company - Litigation against our Company - Actions taken by regulatory and statutory authorities*” on page 871. We cannot assure you that such lapses will not occur in the future and that we will not be subject to penalties or other regulatory action.

23. *We are unable to trace certain of our historical corporate filings with respect to certain corporate records and secretarial forms filled by us with the Registrar of Companies. We cannot assure you that no legal proceedings or regulatory actions will be initiated against our Company in the future in relation to such matters, which may adversely impact our financial condition and reputation.*

We have been unable to trace form filings for certain allotments of our Company as the relevant information was not available in the records maintained by our Company or on the online portal of the Ministry of Corporate Affairs (“**MCA Portal**”) or in the physical records available at the RoC premises. Despite conducting internal searches and engaging an independent practicing company secretary, i.e., N. Kothari & Associates, to conduct a physical search of our records at the RoC, we have not been able to trace the following documents:

Sr. No.	Details of missing document	Documents checked for cross-verification	Violations, if any
1.	Form 2 for the equity share allotment of 640,000 equity shares on January 3, 2011 to Kuldeep Jain	Board resolutions, register of members and minutes of the Board meeting held on January 3, 2011.	Not applicable
2.	Form 2 for the preference share allotment of 4,707 Series A CCPS on February 21, 2012 to Bessemer Venture Partners Trust	Board resolutions, register of members and minutes of the Board meeting held on February 21, 2012.	Not applicable
3.	Form 2 for the preference share allotment of 2,824 Series A CCPS on May 4, 2012 to Bessemer Venture Partners Trust	Board resolutions, register of members and minutes of the Board meeting held on May 4, 2012.	Not applicable

Accordingly, for the purpose of making disclosures in the “*Capital Structure*” section of this Prospectus, we have relied on the search report dated August 16, 2025 prepared by N. Kothari & Associates, independent practicing company secretary (having peer review certificate bearing number 3865/2023), and certified by their certificate dated August 16, 2025 (“**RoC**”).

Search Report”) pursuant to their inspection and independent verification of the documents available or maintained by our Company, the Ministry of Corporate Affairs at the MCA Portal. We have also, by way of a letter dated August 4, 2025, intimated the RoC of such untraceable records.

We cannot assure you that the records mentioned above will be available in the future or that the information gathered through other available documents is correct. We also cannot assure you that the filing of all the forms mentioned above was done, at all or in timely manner, and although no regulatory action / litigation is pending against us in relation to such untraceable approvals, we cannot assure you that regulatory proceedings or actions will not be initiated against us in the future, or that we will not be subject to any penalty imposed by the competent regulatory authority in this respect.

24. We have provided corporate guarantees or sponsor support for certain loans availed by certain of our Subsidiaries from various lenders, mostly in relation to projects under construction. In the event of default by our Subsidiaries on their repayment obligations, we may be required to fulfil our guarantee or sponsor obligations, which could adversely affect our business, cash flows, financial condition and results of operations.

In line with industry practice, we and some of our Promoters have provided corporate guarantees or sponsor support for certain loans availed by certain of our Subsidiaries from various lenders, mostly in relation to projects under construction, typically for under-construction phase. The following table provides an overview of the amount of our corporate guarantees and sponsor support, including as a percentage of total borrowings, as of the dates indicated:

Particulars	For the six months ended September 30,		As of March 31,		
	2025	2024	2025	2024	2023
	(₹ million, unless otherwise indicated)				
Corporate Guarantee given by/for the Group in favour of the respective lenders (A)	57,921.62	43,960.59	48,260.95	34,682.81	31,315.33
Total Borrowings ⁽¹⁾ (B)	1,01,214.60	65,647.98	79,736.98	55,145.64	38,434.15
Corporate Guarantee given by/for the Group in favour of the respective lenders as % of Total Borrowings ((A)/(B))	57.23%	66.96%	60.53%	62.89%	81.48%

(1) Total Borrowings is calculated as Non-current liabilities – Financial liabilities – Borrowings plus Current liabilities – Financial liabilities - Borrowings. Please see “Management’s Discussions and Analysis of our Results of Operations – Non-GAAP Measures” on page 838.

Our Corporate Promoter, BGTF One Holdings (DIFC) Limited, has not issued any guarantees on behalf of the obligations of the Group. If our Subsidiaries default on their repayment obligations under the loan agreements, we or our Promoter may be required to fulfil our guarantee or sponsor obligations, which could adversely affect our business, cash flows, financial condition and results of operations. Any default by our Subsidiaries could also adversely affect their creditworthiness and ability to avail further financing, which may in turn affect their operational and financial performance. This could indirectly impact our consolidated cash flows, financial condition and results of operations. While our corporate guarantees and sponsor support have not been invoked in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, we cannot assure you that our Subsidiaries will be able to generate sufficient cash flows to meet their debt service obligations or that we will not be required to fulfil our obligations under these corporate guarantees.

25. There are outstanding litigation proceedings involving our Company, Subsidiaries, Promoters, Directors and our Key Managerial Personnel. The monetary claims in such outstanding proceedings involving our Company disclosed in accordance with SEBI ICDR Regulations and the Materiality Policy, aggregate to approximately 11.36%, 12.86%, 11.61%, 16.26%, and 24.23% of the Net Worth of the Company for the six months period ended September 30, 2025, and September 30, 2024, and the Financial Years ended March 31, 2025, March 31, 2024, and March 31, 2023, respectively, and any adverse outcome in such proceedings may have an adverse impact on our reputation, business, cash flows, financial condition and results of operations.

We have been involved in legal proceedings, claims and other litigation that arise in the ordinary course of business. Individuals and interest groups may sue to challenge the issuance of a permit for our projects or seek to prevent construction of our projects. In addition, we may be subject to legal proceedings or claims contesting operation of our projects. In addition, from time to time, we may be involved in disagreements or disputes with our counterparties in relation to the terms of our performance under our existing and potential PPAs. Unfavourable outcomes or developments relating to these proceedings, such as judgments for monetary damages, injunctions or denial or revocation of permits, could have a material adverse effect on our business, cash flows, financial condition and results of operations. In addition, settlement of claims could adversely affect our business, cash flows, financial condition and results of operations.

The summary of outstanding matters set out below includes details of criminal proceedings, tax proceedings, actions by statutory and regulatory authorities and material civil litigation (as defined in the section “Outstanding Litigation and Material Developments” beginning on page 870) involving our Company, Subsidiaries, Promoters, Directors, and our Key Managerial Personnel.

Name	Criminal proceedings	Tax proceedings	Actions taken by statutory or regulatory authorities	Disciplinary actions by the SEBI or Stock Exchanges against our Promoters in the last five years, including outstanding action	Material litigation	Aggregate amount involved* (in ₹ million)

** Of which, ₹ 0.08 million has been paid under protest to the income tax authorities.

[#] Other than the KMPs who are also Directors and Promoters of our Company.

^{##} Other than the SMPs who are also KMPs of our Company.

Notes:

⁽¹⁾ Includes communication received under Rule 142(1A) of the Central Goods and Services Tax Rules, 2017 for an amount aggregating to ₹ 119.99 million which has been duly responded to by our Company. As on date of this Prospectus, no notice of demand has been received in furtherance of this communication and our responses. Hence, the same has not been classified under material litigation, if any hereunder.

⁽²⁾ Other than amounts which are contractually passed through to off-takers.

⁽³⁾ Includes communication received under Rule 142(1A) of the Central Goods and Services Tax Rules, 2017 for an amount aggregating to ₹ 464.88 million which has been duly responded to by our Subsidiaries. As on date of this Prospectus, no notice of demand has been received in furtherance of this communication and our responses. Hence, the same has not been classified under material litigation, if any hereunder.

⁽⁴⁾ Excluding the compounding application filed by our Company on January 15, 2026, which is included in 'Actions taken by statutory or regulatory authorities against our Company.'

For further information, see “Outstanding Litigation and Material Developments” beginning on page 870.

As on the date of this Prospectus, there are no litigation involving the Group Companies which may have a material impact on business, cash flows, financial condition and results of operations.

There can be no assurance that these legal proceedings will be decided in our favour or in favour of our Company, Subsidiaries, Promoters, Key Managerial Personnel, or members of our Senior Management. Furthermore, as at September 30, 2025, we have not considered making any significant provisioning as necessary for possible liabilities arising out of such legal proceedings. In the event of any adverse rulings in these proceedings or consequent levy of penalties including for amounts, we may need to make payments or make provisions for future payments, which may increase expenses and current or contingent liabilities. In addition, we cannot assure you that no additional liability will arise out of these proceedings. The decisions in such proceedings adverse to our interests may have an adverse effect on our reputation, business, cash flows, financial condition and results of operations.

Further, while certain legal proceedings may not have been decided against our Company, Subsidiaries, Promoters, or members of our Senior Management, Group Companies, the relevant parties may elect to settle such proceedings without admitting or denying regulatory findings, as permitted, for the purposes of operational convenience by complying with monetary or non-monetary terms of settlement agreed with the relevant regulator. Such proceedings may have an adverse effect on our reputation, business, cash flows, financial condition and results of operations. For instance, in the past, the Clean Max Renewable Trust, a category II AIF registered with SEBI (“Clean Max AIF”), Clean Max Energy Ventures Private Limited (in its capacity as the Investment Manager of the Clean Max AIF, the “Investment Manager”) and Kuldeep Jain, Nikunj Ghodawat, and Nitai Vijay, in their capacity as key management personnel of the Investment Manager (the “AIF KMPs”) paid a settlement amount of ₹1.93 million to SEBI on October 10, 2024, in relation to a show cause notice dated May 29, 2024, issued by SEBI pursuant to an inspection where SEBI observed that the Clean Max AIF, the Investment Manager and the AIF KMPs were in violation of certain provisions of the SEBI AIF Regulations for exceeding the prescribed investment limit of 25% with respect to its investments in three portfolio entities, namely Clean Max Pluto Solar Power LLP, Clean Max Power 3 LLP, and KAS Onsite Power Solutions LLP, Subsidiaries of our Company through Clean Max Renewable Series I Yield Fund,

a scheme of the Clean Max AIF (“Scheme”).

Further, our Company and the Investment Manager (“Applicants”) paid a settlement amount of ₹1.74 million to SEBI on November 2, 2023, pursuant to a *suo motu* settlement application filed with SEBI in respect of any proceedings that may be initiated by SEBI against the Applicants in respect of certain violations of the SEBI AIF Regulations. Under the SEBI AIF Regulations and relevant circulars thereunder, prior approval from SEBI was required for any change in control of an AIF, its sponsor or investment manager, and the AIF was also required to obtain consent of 75% of the unitholders for such change in control, with the dissenting holders being provided with an exit option. During Fiscal 2022, there was a change in control of our Company (being the sponsor of Clean Max AIF) and consequent indirect change in control of its Subsidiary, Clean Max Energy Ventures Private Limited i.e. the Investment Manager. For details of the change in control of our Company, see “*Our Promoters and Promoter Group - Change of Control*” on page 546. Clean Max AIF failed to obtain prior approval from SEBI for such change in control and additionally, the consent of the contributors of Clean Max AIF was also obtained with a delay of 68 days. Further to the settlement, a post-facto approval for such change of control was granted by SEBI on March 16, 2023. As on the date of this Prospectus, our Company does not intend to pursue further investment activities through the Clean Max AIF.

26. *Management judgement is used when ascertaining our funding requirements and the proposed deployment of Net Proceeds. Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency, and our management and Board will have broad discretion over the use of the Net Proceeds. We have not entered into any definitive arrangements to utilize certain portions of the Net Proceeds of the Offer. We may incur certain pre-payment penalties for the pre-payment of outstanding borrowings from the Net Proceeds.*

The Objects of the Offer have not been appraised by any bank or financial institution or any other independent agency. Our funding requirement is based on management estimates, current state of our business and prevailing market conditions, which are subject to changes in external factors. See “*Objects of the Offer*” on page 160. We intend to utilize a portion of the proceeds for repayment and/or pre-payment, in part or full, of all or certain outstanding borrowings of our Company and/or our Subsidiaries and for general corporate purposes. To the extent our Company deploys the Net Proceeds in our Subsidiaries, for the purpose of prepayment or repayment of all or a portion of the borrowings, it shall be in the form of debt or equity, including inter-corporate loans, non-convertible debentures or in any other manner as may be decided by our Board. As a foreign-owned or controlled company, we may be subject to increased compliance and reporting requirements in relation to downstream investments undertaken by us in our Subsidiaries. Further, we may incur pre-payment penalties for the pre-payment of outstanding borrowings from the Net Proceeds. In the six months ended September 30, 2025 and the last three Fiscals, we have paid a total of ₹9.31 million as pre-payment penalties.

Further, pursuant to sections 13(8) and 27 of the Companies Act, 2013 and applicable rules, and Regulation 59 and Schedule XX of the SEBI ICDR Regulations, a special resolution of the Shareholders and controlling Shareholders is required for any variation in the Objects of the Offer. This provides an exit opportunity to the Shareholders who do not agree to vary the Objects of the Offer, at such price and in such manner in accordance with applicable law. In the event of any such circumstances that require us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders’ approval may adversely affect our business or operations. In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in this Prospectus, even if such variation is in the interest of our Company.

Our Company, in accordance with the applicable law and to attain the Objects set out above, will have the flexibility to deploy the Net Proceeds. Pending utilization of the Net Proceeds for the purposes described above, our Company will deposit the Net Proceeds with one or more scheduled commercial banks included in the Second Schedule of Reserve Bank of India Act, 1934 as may be approved by our Board or IPO Committee. We will appoint a Monitoring Agency for monitoring the utilization of Gross Proceeds in accordance with Regulation 41 of the SEBI ICDR Regulations and the Monitoring Agency will submit its report to us on a quarterly basis in accordance with the Regulation 41(2) of SEBI ICDR Regulations until such time as the Gross Proceeds have been utilised in full.

27. *Our ability to deliver projects in a timely manner depends on our ability to secure key equipment from suppliers in a timely manner and the cost of solar modules and wind turbine generators, and any delays in the procurement of such equipment may result in project delays and cost overruns and subject us to penalties. While our top-10 suppliers as of September 30, 2025 are based in India, in the future, we may need to source certain supplies from outside India, which may increase our operating and logistic costs.*

We procure various equipment and materials from suppliers for the development and construction of our projects. However, for certain materials and equipment, particularly our solar modules and wind turbine generators, we currently rely on a limited number of suppliers. For example, in Fiscal 2025 Emmvee Photovoltaic Power Private Limited accounted for 8.98%, while Envision Wind Power Technologies India Private Limited accounted for 14.38% of the total capital expenditure & operational

expenditure. We enter into supply agreements with our suppliers for sourcing parts and equipment for our operations. Typical terms under these agreements are as follows:

1. Solar module suppliers typically provide a product warranty of around 12 years and a limited power output warranty of around 30 years. Suppliers also provide guarantees for module performance and/or power output based on agreed thresholds. These agreements also typically include a cap on liquidated damages for delayed delivery of up to 5% of the contract value or purchase consideration and an overall limitation of liability of up to 100% of the purchase price and additional amounts, depending on the nature of the liability. During the supply phase, each party may terminate the agreement in case of a breach of material provisions in the contract (including material defects), bankruptcy, or insolvency.
2. Wind WTG suppliers typically provide defect liability coverage for the initial few years post commissioning or WTG dispatch. Additionally, they provide power curve guarantees based on agreed thresholds. Most contracts feature caps on liquidated damages, and suppliers typically provide performance bank guarantees. During the supply phase, each party may terminate the agreement in case of a breach of material provisions in the contract (including material defects), bankruptcy, or insolvency.
3. Balance of Parts suppliers (e.g., steel, cables, BOP EPC) typically operate under purchase order-based contracts that include select terms on product warranty. Most contracts feature liquidated damages caps based on the aggregate order value. These contracts typically do not include performance bonds.

While we maintain a diverse supplier base, any delays in the execution of vendor arrangements or the delivery of such supplies or failure by our suppliers to deliver the supplies in the specified amount or at the specified specifications could require us to incur additional expenses and cause a delay in the completion of our project, and consequently, cost overruns and delays in revenue generation from such projects. According to the CRISIL Report, the renewable industry is currently facing cost pressures on account of volatility in module prices, exchange rates, freight and commodity prices due to geopolitical dynamics. This may impact on the EPC margin of renewable players as they may not be able to pass on the cost increase to project developing SPVs. The following table provides the costs paid to our top 10 suppliers (*domestic and foreign*), as an absolute amount and as a proportion of capital expenditure and operational expenditure for the years indicated:

Particulars	For the six months ended September 30,		As of March 31,		
	2025	2024	2025	2024	2023
	(₹ million, except as stated otherwise)				
Costs ⁽¹⁾ paid to top 10 suppliers- Domestic	15,374.90	2,465.59	12,351.62	4,434.84	15,888.75
Costs ⁽¹⁾ paid to top 10 suppliers- Foreign	-	-	- ⁽³⁾	5,037.53	4,559.49
Costs ⁽¹⁾ paid to top 10 suppliers	15,374.90	2,465.59	12,351.62	9,472.38	20,448.24
Total Capital and Operational expenditure ⁽²⁾	35,089.87	8,270.94	31,059.23	23,783.05	34,489.51
Costs paid to top 10 suppliers as % of capital expenditure & Operational expenditure for the year ⁽²⁾ (%)	43.81%	29.81%	39.77%	39.83%	59.29%

(1) Cost is a sum of Cost of materials consumed and cost of services and Purchase of traded goods.

(2) Total Capital and Operational expenditure is calculated as capital expenditure plus cost of materials consumed and cost of services plus Purchase of traded goods. Capital Expenditure is calculated as Property, plant and equipment plus Capital work in-progress plus Other intangible assets plus Intangible assets under development minus Opening Total Capital Assets plus Depreciation, amortisation and impairment expenses minus Additions - through asset acquisition minus Additions - through business combination plus Payment towards business acquisition. For a reconciliation of Capital Expenditure, see "Management's Discussion and Analysis of our Results of Operations – Non-GAAP Measures" starting on page 838.

(3) Following the implementation of ALMM regulations in April 2024, the Company started sourcing its solar modules domestically. Thus, the top 10 suppliers for FY 2025 do not include any foreign suppliers.

Any execution delays by our suppliers - including late delivery, performance issues, or failure to meet technical specifications - could impact project timelines and expose us to penalties under our PPAs and EAPAs with our customers. For example, in a project in Gujarat, we faced a six-month delay in the delivery of 20 wind turbines by Envision in 2025 due to industry-wide demand-supply constraints. We mitigated this risk through close coordination with the supplier, reprioritization of turbine deliveries and bilateral negotiations with customers to extend the date of project commissioning. While this incident was one-time event and did not have a material impact on our operations, there is no assurance that we will not be exposed to supplier delays and related penalties and charges under our PPAs and EAPAs. Further, our supply agreements limit the amount of liquidated damages we can claim from suppliers for their delay and non-performance of their obligations under the supply contract. We may therefore not be able to fully recover losses from suppliers, and the damages we pay to customers under PPAs and EAPAs may exceed the quantum that can be recovered under supply agreements. Such agreements also typically provide for rights to the supplier to modify delivery schedules in certain circumstances, negotiate for price escalation, and renegotiate contracts due to change in law, among others. Suppliers also have limited product warranties and provide limited indemnities. While we have not had such instances in the six months ended September 30, 2025, and Fiscals 2025, 2024 and 2023, if our claims exceed such limitations, we may suffer losses. Such rights could affect our ability to pass on additional

costs that we may incur to our customers or lead to delayed completion of projects. If any of these events occur, could impact our project timelines and adversely affect our business and results of operations.

We import certain materials for our operations such as solar cells and turbines. However, there are certain requirements under Indian laws for procuring materials from an approved list of vendors primarily consisting of Indian manufacturers, which has reduced our dependence on imports. The MNRE mandates sourcing of solar PV modules for certain projects from specified manufacturers under the Approved List of Models and Manufacturers of Solar Photovoltaic Modules (Requirement for Compulsory Registration) Order, 2019. Further, pursuant to an amendment to the said order, certain solar projects will also be required to mandatorily source solar cells from specified manufacturers from June 2026, unless exempted. The MNRE has also issued procedures for inclusion of a wind turbine model in the revised list of models and manufacturers of wind turbines (“**RLMM**”) eligible for installation of wind turbines in India and is currently considering certain amendments which may provide for certain components of wind turbines such as gearbox, generators, and blade towers to be sourced from manufacturing facilities in India only. Further to this, the MNRE issued an official memorandum on July 31, 2025, setting out revised requirements for enlistment of wind turbine manufacturers/models in the RLMM. Pursuant to this order, a special list named as Approved List of Models and Manufacturers (Wind Turbine Components) will be issued and the wind turbine components shall be sourced from listed facilities. Prior to March 31, 2024, there has been no impact of the Approved List of Models and Manufacturers (“**ALMM**”) on projects commissioned. For modules procured in Fiscal 2025 and for the six months ended September 30, 2025, the weighted average cost has been ₹14.20 million per MW and ₹14.08 million per MW respectively. The average lead time between the placing of order and delivery of domestic modules has been 86 days and 99 days in Fiscal 2025 and in the six months ended September 30, 2025 respectively. Prior to the implementation of ALMM and up to March 31, 2024, we imported solar modules from foreign manufacturers; however, in compliance with ALMM requirements, we have since transitioned to procuring modules domestically. For further details, see “*Key Regulations and Policies in India*” on page 344. While such regulatory changes have not had a material impact on our operations in the six months ended September 30, 2025, and Fiscals 2025, 2024 and 2023, there is no assurance that we will be able to manage our costs if there are new regulatory changes or additional duties imposed. Therefore, any such restrictions may increase our capital costs for building new projects.

28. Counterparties to our PPAs may not fulfil their obligations, including defaulting on or delaying payments owed, and failure to recover our trade receivables may adversely affect our business, results of operations, cash flows and financial condition.

The financial condition of our customers with whom we engage with may be affected by the performance of their business, which may be impacted by several factors including general economic conditions or conditions related to the industry in which they operate, which are beyond our control. A slowdown in the general economy or a potential credit crisis could cause our customers to suffer disruptions in their businesses or experience financial distress, their access to the credit markets could be limited, and they could file for insolvency or bankruptcy protection during the term of their PPAs with us. Such conditions could cause our customers to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which could increase our receivables. Further, under applicable insolvency laws such as the Insolvency and Bankruptcy Code, 2016, we may not be able to terminate the supply of electricity if a moratorium is granted for our customers pursuant to an insolvency application. We conduct due diligence before onboarding a customer, which includes credit rating checks, reputation checks, as well as key financial analyses such as reviews of revenue, net worth and profitability. Further, while we maintain a diverse customer base and while our PPAs typically impose minimum energy off-take obligations on our customers, if any of our PPA counterparties become unable or unwilling to fulfil their contractual obligations under the relevant PPAs or refuse to accept delivery of renewable energy pursuant to such PPAs, our business, financial condition, results of operations and prospects may be adversely affected. Further, in the instances where we may be able to recontract the power to another customer, we may face delays in doing so or may not be able to find commercially viable alternatives. Further, for our Onsite Solar projects, since the project is on the premises of the customer, if the customer does not honour their obligations under the contract, we may not be able to relocate the plant or recontract the power supply to another customer. While we have certain rights for such instances under the contract, we are exposed to risks of defaults in payments, delayed payments or litigations. Such instances could adversely affect our business, cash flows and results of operations.

The following table sets forth the credit rating of our portfolio of Renewable Energy Power Sales customers in India for the periods indicated:

Particulars	For the six months ended September 30,				As of March 31,					
	2025		2024		2025		2024		2023	
	Operational and contract executed yet to be executed Capacity (MW)	(% of Capacity)	Operational and contract executed yet to be executed Capacity (MW)	(% of Capacity)	Operational and contract executed yet to be executed Capacity (MW)	(% of Capacity)	Operational and contract executed yet to be executed Capacity (MW)	(% of Capacity)	Operational and contract executed yet to be executed Capacity (MW)	(% of Capacity)
AAA/AA/MNC subsidiary credit ratings ⁽¹⁾	3,800.14	83.19%	1,538.31	77.71%	3,611.71	84.53%	1,401.66	84.95%	1,461.71	84.15%
A/A- credit ratings	526.56	11.53%	336.20	16.98%	473.28	11.08%	160.67	9.74%	197.17	11.35%
Others ⁽²⁾	241.36	5.28%	105.07	5.31%	187.74	4.39%	87.56	5.31%	78.21	4.50%
Total	4,568.06	100.00%	1,979.58	100.00%	4,272.73	100.00%	1,649.89	100.00%	1,737.09	100.00%

Note:

- (1) Based on credit ratings by CRISIL, CARE and ICRA as of September 30, 2025. Includes subsidiaries of multinational corporations whose parent company has received such credit ratings or institutions e.g., educational institutions.
- (2) Includes B ratings, ratings below B and unrated entities.
- (3) Above table does not include our operational Capex Services projects and Onsite Solar operations outside India.

While we are entitled to charge interest for any payment delays, there is no assurance that we will be able to recover such interest amounts from our customers, which could in turn affect our cash flows and financial condition. The average receivable days for our PPAs is 26 days, reflecting the typical period within which we collect payments from our customers following the delivery of power. In the past, we have experienced delays in receivable settlements with certain customers and have not been able to recover payment charges for such delays. We have recognized certain bad debts due to default in payments from customers. We also create a provision for doubtful debts (expected credit loss allowance) for expected losses. While these instances did not have a material impact on our operations, continued defaults by customers could adversely impact our business and results of operations. We first create an expected credit loss allowance on a customer outstanding balance and then, if the recovery has not happened we reverse the expected credit loss allowance created on that customer balance and recognise it as a bad debt. Hence, when looking at the risk associated with customer outstanding recovery, both the bad debts and expected credit loss allowance should be considered. For instance, in Fiscal 2025 while we have written off bad debts amounting to ₹29.06 million that were already provided for in the previous years, the corresponding expected credit loss provision created on the same was reversed. The table below sets forth certain details of bad debts and expected credit loss allowance in relation to our revenue from operations for the years indicated:

Particulars	For the six months ended September 30,		Fiscal		
	2025	2024	2025	2024	2023
	(₹ million, except as stated otherwise)				
Bad Debts written off (A)	NIL	9.38	29.06	11.69	26.85
Expected credit loss allowance (B)	38.36	87.25	(14.29)	33.46	25.58
Total (C = A+B)	38.36	96.63	14.77	45.15	52.43
Revenue from operations (D)	9,329.53	6,764.66	14,957.01	13,898.37	9,295.82
Total as a % of Revenue from operations (E = C/D)	0.41%	1.43%	0.10%	0.32%	0.56%

29. A decline in environmental or physical conditions and seasonal variability surrounding our project sites could adversely affect our business, cash flows, financial condition and results of operations.

The amount of energy generated depends on environmental (wind conditions and solar irradiance) and physical conditions at each project site and is subject to seasonality that can cause quarter-to-quarter fluctuations in operating results. The following table sets forth the actual plant load factor (“PLF”) achieved for the years indicated.

Particulars	For the six months ended September 30,		Fiscal		
	2025	2024	2025	2024	2023
Plant Load Factor (trailing 12 Months) ⁽¹⁾					
Onsite Solar (DC)	14.60%	14.89%	14.86%	15.11 %	14.99 %
Offsite Solar (AC)	23.53%	23.23%	24.65%	23.06%	23.85
Offsite Solar (DC)	16.21%	16.24%	16.98%	16.19%	16.75%
Wind	35.95%	34.86%	31.60%	34.52%	30.95%
Hybrid	46.60%	45.45%	45.90%	39.18%	34.29%
Average plant availability ⁽²⁾	98.08%	98.04%	98.17%	98.19%	98.20%

(1) “Plant Load Factor” is calculated as total generation by fully operational project capacity divided by maximum generation from fully operational project capacity during the period of operation in the portfolio during the period/year.

(2) “Plant Availability” is calculated as weighted average of plant availability by fully operational projects capacity in the portfolio during the period/year.

In India, wind conditions are generally tied to the monsoon season but vary from month to month and year to year. In addition, wind conditions may also change permanently because of climate change or other factors. Because of this variability, meteorological studies may not accurately predict actual wind conditions at our project sites. In addition, physical conditions such as nearby structures like large buildings or turbines, causing wake effect which can also disrupt wind flow and reduce our wind resources. If competitors install turbines close to our project sites, it could negatively impact the energy generated and revenue derived from it. Consequently, the actual electricity generated by our wind projects may not meet our anticipated production levels or the rated capacity of the turbines located at the wind farms, which could adversely affect our business, cash flows, financial condition and results of operations. The following table captures all the instances where we have claimed for insurance due to environmental conditions affecting our projects in the last three fiscal years. Some of the reasons for the damages include storm and lightning.

Type of claim	For the six months ended September 30,				Fiscal					
	2025		2024		2025		2024		2023	
	Aggregate Claimed	Aggregate Received	Aggregate Claimed	Aggregate Received	Aggregate Claimed	Aggregate Received	Aggregate Claimed	Aggregate Received	Aggregate Claimed	Aggregate Received
	(₹ million)									
Claims due to natural calamities	18.96	15.20	54.74	34.73	55.22	34.99	27.11	18.07	11.65	7.51

Note: While there have been no past instances of a claim exceeding the overall insurance cover for a project, certain claims have been partially denied on account of standard insurance policy restrictions and deductions.

The energy output performance of our solar plants is dependent in part on the amount of sunlight and irradiance and hence may be impacted by shorter daylight hours in winters or cloud cover during monsoons or by solar eclipse and environmental pollution. In addition, any conditions near our solar farms, such as shadows from nearby buildings or trees, or additional dust in our solar farms caused by construction work or forestry or plantations works, could reduce the efficiency of our solar farms. The operational performance of solar capacity also depends on the contour of the land on which the project is situated. In case of a highly variable contour, the output of the solar farm situated on such surface may be sub-optimal. Furthermore, components of these projects, such as solar panels and inverters, could be damaged by severe weather conditions, such as hailstorms, tornadoes, lightning strikes or high levels of pollution, dust and humidity. A sustained decline in environmental conditions or physical conditions surrounding our projects could result in a material adverse change in the volume of electricity we generate and consequently negatively impact our business, cash flows, financial condition and results of operations. For instance, in our Kiriwana project in Gujarat, there was damage to the blades of our wind projects due to lightening which resulted in business interruption. Out of 111 days, insurance claims were allowed only for 91 days in business interruption due to coverage restrictions. In our Babra project in Gujarat, in May 2024 due to cyclone internal 33 kV transmission line was damaged. In our Saraipalli project in Chhattisgarh which was in under construction stage, in May 2025 due to storm our key equipment like modules and structures got damaged. While these instances did not have a material impact on our operations and some of the shortfall due to damages resulting from certain force majeure events may be recoverable from insurance covers taken by us, the shortfall resulting from variable weather conditions is not recoverable under insurance policies. While we have not faced material instances in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, if weather patterns change significantly or become more volatile, or if the historical data we use to forecast renewable energy production proves to be inaccurate, this could have a material adverse effect on our business, cash flows, financial condition and results of operations.

In addition, wind and solar projects in India are subjected to regulations that require us to forecast energy generation, subject to certain conditions. In case the actual generation deviates from the forecast generation, then, subject to certain tolerance limits, a penalty is payable for such deviation. We have not paid any material amounts toward such deviations in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023. Given the variable nature of wind speeds and solar irradiance, accurate forecasts are not possible. Therefore, in the event our forecasting accuracy declines or the tolerance limits for deviation are tightened, or the level of penalties are increased by the electricity regulators, our business, cash flows, financial condition and results of operations may be materially and adversely affected. Furthermore, these regulations on forecasting and deviation penalty are relatively new and have been changed several times. If the distribution utilities take interpretations or regulatory commissions issue orders which result in higher than anticipated penalties, our business, cash flows, financial condition and results of operations may be materially and adversely affected.

30. Delays or defaults in repayment of the inter-corporate deposits that will be extended by our Company to our Subsidiaries whose borrowings are proposed to be repaid from the Net Proceeds could affect our cash flows and may adversely affect our financial conditions and operations.

Our Company will extend credit to some of our Subsidiaries in the form of inter-corporate deposits for the repayment/prepayment of their borrowings as disclosed in “Objects of the Offer – Utilisation of loans by our Subsidiaries” on page 175. Set forth below are the details of the Subsidiaries in which our Company intends to deploy a portion of the Net Proceeds aggregating up to ₹4,397.78 million, in one or more tranches, by way of extending loan facilities in the form of inter-corporate loans:

Sr. No.	Term	Particulars
1.		Name of Subsidiary: Clean Max Charge LLP

Sr. No.	Term	Particulars
	% shareholding/capital contribution of our Company in the Subsidiary	74.00
	Amount of Net Proceeds proposed to be deployed (in ₹ million)	114.99
	Interest	11% p.a. simple interest
	Security	Unsecured
	Tenor	5 years, with option for pre-payment without penalty
	Repayment schedule	In one or more tranches as per mutual agreement
2.	Name of Subsidiary: Clean Max Hybrid Power LLP	
	% shareholding/capital contribution of our Company in the Subsidiary	74.00
	Amount of Net Proceeds proposed to be deployed (in ₹ million)	118.19
	Interest	11% p.a. simple interest
	Security	Unsecured
	Tenor	5 years, with option for pre-payment without penalty
	Repayment schedule	In one or more tranches as per mutual agreement
3.	Name of Subsidiary: Clean Max Kratos Private Limited	
	% shareholding of our Company in the Subsidiary	74.00
	Amount of Net Proceeds proposed to be deployed (in ₹ million)	3,132.81
	Interest	11% p.a. simple interest
	Security	Unsecured
	Tenor	5 years, with option for pre-payment without penalty
	Repayment schedule	In one or more tranches as per mutual agreement
4.	Name of Subsidiary: Clean Max Light Power LLP	
	% shareholding/capital contribution of our Company in the Subsidiary	74.00
	Amount of Net Proceeds proposed to be deployed (in ₹ million)	121.65
	Interest	11% p.a. simple interest
	Security	Unsecured
	Tenor	5 years, with option for pre-payment without penalty
	Repayment schedule	In one or more tranches as per mutual agreement
5.	Name of Subsidiary: Clean Max Terra Private Limited	
	% shareholding of our Company in the Subsidiary	74.00
	Amount of Net Proceeds proposed to be deployed (in ₹ million)	910.14
	Interest	11% p.a. simple interest
	Security	Unsecured
	Tenor	5 years, with option for pre-payment without penalty
	Repayment schedule	In one or more tranches as per mutual agreement

There is no assurance that our Subsidiaries will be able to successfully operationalize and maintain the projects owned and operated by them due to factors such as (i) delay in land acquisition; (ii) delay in obtaining approvals; (iii) increase in maintenance costs etc., which may delay the operationalisation of the projects and impact our Subsidiaries' capability to generate revenue and cashflows and consequently, impacting the profitability of the Subsidiaries. Accordingly, the Company may not be able to recover outstanding amount in part, full or at all. Delays or defaults in interest payments and principal repayments with respect to such inter-corporate deposits from the Subsidiaries could result in bad debts, which may lead to a liquidity crunch, thereby adversely affecting our business and results of operation. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

31. Our business depends on the regulatory and policy environment affecting the renewable energy sector in India. A change in policy including those resulting in the termination of policy benefits or curtailment of renewable energy generation may adversely affect our business.

We are subject to various Indian laws, such as the Electricity Act, 2003 and rules made thereunder, National Tariff Policy, regulations by central and state electricity regulatory commissions, regulations by Central Electricity Authority and policies/regulations of the respective state governments that influence our operations and financial stability, which are continuously evolving and subject to change. For instance, in October 2025, the MoP released the Draft Electricity (Amendment) Bill, 2025 for public comments and suggestions. The proposed amendments include, among others, the proposal (a) to fully eliminate cross-subsidy with respect to manufacturing enterprises, railways and metro railways within five years from the date of commencement of these amendments, (b) to allow appropriate governments being the central or the relevant state government, as applicable, to prescribe the eligibility criteria for captive generating plants, (c) to bring in additional reforms in the power distribution sector, including exemption from universal service obligations of distribution licensees, permitting distribution licensees to operate through their own or shared distribution systems within the same area and mandating that distribution licensees provide non-discriminatory open access to their networks for other distribution licensees, (d) to regulate the placing and maintaining electric lines (previously under the repealed Indian Telegraph Act, 1885), with clear procedures for obtaining permissions, resolving disputes, and determining compensation, and allowing state governments to prescribe a framework to facilitate placing of electric lines, including determination of compensation to be paid, and (e) to introduce certain additional measures to improve regulatory efficiency, including a timeline of 120 days for decisions on proceedings before the CERC/ SERC, failing which the reasons for delay shall be recorded in writing, removal of no-objection certificate requirement with respect to transmission or distribution licenses in defence areas, and constitution of an 'Electricity Council' as a policy and advisory body. As these are draft amendments, we cannot ascertain at this stage as to whether the proposed amendments will come into force in the form suggested or at all, or the extent to which the

amendments, if and when they come into force, whether partially, fully or with further modifications, will impact our business and operations. Further, the manner in which new requirements will be enforced or interpreted can also lead to uncertainty in our operations, and may adversely affect our business, cash flows, financial condition and results of operations.

In 2022, the MoP introduced the Electricity (Promoting Renewable Energy through Green Energy Open Access) Rules, 2022 (“**GEOA Rules**”) to facilitate and promote open access procurement of renewable energy for C&I customers. The MoP provided a model set of regulations for state electricity regulatory commissions to adopt which was implemented by many states, aligning them closely with the GEOA Rules. Such rules provide, amongst others, that a banking facility be granted to renewable energy for banking within a calendar month for at least 30% of the energy consumption from a distribution licensee subject to payment of certain charges. Additionally, the Tamil Nadu Electricity Regulatory Commission (TERC) Terms and Conditions for Green Energy Open Access Regulations, 2025 on September 18, 2025, notified an introduction of a granular 15 minute settlement, restricting the settlement of banking of energy generated during normal hours within only normal hours and not during off-peak hours. Further, it prescribes that energy banking facility is prohibited for third-party open access projects and shall be restricted to real-time basis. It also imposes a banking charge of 8% of the banked energy in kind for the renewable energy generated from solar, wind and hybrid projects, and 14% for older wind energy generators commissioned on or before March 31, 2018. Any adverse changes in banking regulations and state-level policies may adversely impact our operations. For further details regarding regulations applicable to us, see “*Key Regulations and Policies in India*” beginning on page 344.

We also benefit from a number of government policies including preferential charges on transmission, wheeling and banking facilities, tax holidays, and availability of accelerated depreciation for wind and solar power assets. For instance, under the Electricity Act, 2003 and the rules and policies made thereunder, upon fulfilling specified criteria, electricity can be supplied to a group of customers in a “captive/group captive structure” without levy of cross-subsidy surcharge (“**CSS**”) and additional surcharge (“**AS**”). For details see “*Key Regulations and Policies in India*” on page 344. Further, at different points in time, state governments have introduced beneficial policy incentives (for limited periods, based on commissioning timelines) for renewable energy projects. Some of our projects/farms have benefited from such policies for example:

- The Karnataka Electricity Regulatory Commission ordered on August 18, 2014, that, all solar power generators achieving commercial operation date between April 1, 2013, and March 31, 2018, were granted a waiver on CSS and AS applicable under open access regulations, and banking and wheeling charges for a period of 10 years from commissioning. Our 207.75 MWp of solar farm in Karnataka was commissioned in the year 2018 by availing these policy benefits. The sale of power from these projects in Karnataka contributed ₹1,610.30 million or 10.77% of our total revenue in Fiscal 2025 and ₹716.33 million or 7.70% of our total revenue in the six months ended September 30, 2025.
- The Government of Gujarat introduced the Gujarat Wind-Solar Hybrid Policy, 2018, effective for projects commissioned during 2018 to 2023. The wind turbine generators/solar PV generation plants developed during this period were eligible for certain benefits for up to 25 years or the project life, whichever was to be earlier. We built our first hybrid project in Gujarat under this policy and availed these benefits for a total of 211.78 MW wind and 168.65 MWp solar capacities of projects. These projects in Gujarat contributed ₹3,486.34 million or 23.31% of our total revenue in Fiscal 2025 and ₹2,048.73 million or 22.01% of our total revenue in the six months ended September 30, 2025.

While we have not faced any impact in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, if any of these incentives or policies are adversely amended or eliminated retrospectively, it could adversely affect the viability of new renewable energy projects constructed based on current tariff and the profitability of our existing projects, or result in reduction in customer savings, and may also have a material adverse effect on our business, cash flows, financial condition and results of operations.

Regulatory authorities also routinely notify technical requirements for projects that could impact us adversely. For example, Maharashtra Electricity Regulatory Commission (MERC) passed orders on March 28, 2025, and June 25, 2025 titled ‘Multi-Year Tariff Order’ which provided for substantial changes in the ‘Determination of Time-of-Day (TOD) Tariff Rate’ and energy banking regulations. Subsequently, certain third-party petitioners challenged the validity of the order dated June 25, 2025, before the Bombay High Court. The estimated impact of this order getting implemented was a reduction in banking hours which could result in renegotiation of our existing PPAs and a decrease in our contracted solar capacities in the state of Maharashtra. However, by way of a judgment dated November 3, 2025, the MERC order dated June 25, 2025, was quashed and the matter was remanded back to the MERC for their consideration post appropriate stakeholder consultation. An appeal was preferred against the judgment dated November 3, 2025, before the Supreme Court of India, pursuant to which the Supreme Court of India on November 17, 2025, remanded the matter back to the MERC as well for their consideration with directions to decide the matter within twelve weeks. Further, the Central Electricity Regulatory Commission (Terms and Conditions for Renewable Energy Certificates in Renewable Energy Generation) Regulations, 2022 (“**REC Regulations**”) provides an alternative voluntary route to a generator to sell its renewable electricity akin to conventional electricity and sell renewable energy certificates (“**RECs**”), representing green attributes, separately to obligated entities, such as distribution licensees, open access consumers and captive power producers, to fulfil their renewable purchase obligations (“**RPO**”) as per applicable law or their internal targets. Therefore, a change in policy that results in the curtailment of renewable energy generation, and sale of RECs may adversely affect our business. According to the CRISIL Report, only a few states are

complying with the RPO fully and there has been limited enforcement on obligated entities - DISCOMs and open access and captive power users - to meet RPO targets. A delay or failure by governmental authorities to administer such government programs could also adversely affect our ability to obtain financing for our projects. These may, in turn, materially and adversely affect our business, cash flows, financial condition and results of operations.

Furthermore, under applicable central and state regulations, to ensure grid stability, we are required to submit our planned electricity supply schedules to the relevant authorities. Specified charges as per such regulations are payable for deviations from schedule by way of over-injection and under-injection. Pursuant to certain proposed amendments to applicable regulations, amounts payable towards deviation charges are expected to increase in relation to supply of electricity to national and certain state grids. If such charges increase materially, it may adversely affect our business, cash flows, financial condition and results of operations.

32. Our Revenue from Renewable Energy Power Sales as a percentage of Revenue from operations amounted to 77.09%, 84.80%, 74.03%, 62.33% and 51.08% for the six months period ended September 30, 2025 and 2024, and Fiscals 2025, 2024 and 2023, respectively. Any disruption in our Renewable Energy Power Sales Segment could adversely affect our business, financial condition, cash flows and results of operations.

In our Renewable Energy Power Sales segment, we sell electricity generated at our renewable energy plants to customers through long-term PPAs and EAPAs across a range of offerings. Our offerings under this segment includes our Onsite Solar (solar power plants that are located within customer's premises) and Offsite projects (supply renewable power - solar, wind, and hybrid - through large farms, which are contracted through bilateral PPAs). For further details on our Renewable Energy Power Sales Segment, see "Our Business – Overview – Our Offerings" on page 295. Our Renewable Energy Power Sales Segment is our key revenue and gross margin contributor, and we rely significantly on the performance of our Renewable Energy Power Sales Segment. The following table sets out the contributions from our Renewable Energy Power Sales Segment to Revenue from Operations and Gross Margin respectively in the periods indicated.

Particulars	For the six months ended September 30,		Fiscal		
	2025	2024	2025	2024	2023
	(₹ million, unless stated otherwise)				
Revenue from operations (A)	9,329.53	6,764.66	14,957.01	13,898.37	9,295.82
Renewable Energy Power Sales (B)	7,192.15	5,736.14	11,072.48	8,663.33	4,748.15
Renewable Energy Services (C)	2,050.07	980.44	3,766.53	5,180.04	4,547.67
Revenue from Renewable Energy Power Sales as a percentage of Revenue from operations (D=B/A)	77.09%	84.80%	74.03%	62.33%	51.08%
Gross Margin ⁽¹⁾ (E)	7,296.66	5,620.64	10,857.44	9,388.67	5,024.25
Gross Margin - Renewable Energy Power Sales ⁽¹⁾ (F)	6,624.19	5,335.03	10,248.49	8,088.13	4,438.46
Gross Margin from Renewable Energy Power Sales as a percentage of Revenue from Renewable Energy Power Sales (G=F/B)	92.10%	93.01%	92.56%	93.36%	93.48%

(1) Gross Margin is defined as the revenue from operations, less the cost of materials consumed and cost of services, and the purchase of traded goods. For a reconciliation of Gross Margin, see "Management's Discussion and Analysis of our Results of Operations – Non-GAAP Measures" starting on page 838.

Our customers may opt to reduce their energy consumption or the frequency of transactions with us for various reasons, some of which may be outside our control, such as the level of satisfaction with our customer service, the pricing and quality of our energy supply and those of our competitors and global economic conditions. While Revenue from our Renewable Energy Power Sales Segment has increased in absolute terms from Fiscal 2023 to Fiscal 2025 there is no assurance that we will be able to continue to grow our revenue from this segment at the same pace or at all. Failure to do so could decrease the attractiveness of our offering as a whole and diminish cross-sell and upsell opportunities which typically leverage existing users of our Renewable Energy Power Sales Segment offerings. This would adversely affect our business, financial condition, cash flows and results of operations.

33. We are required to provide certain bank guarantees and performance bank guarantees under specific regulatory approvals and certain power purchase agreements. As of September 30, 2025 and March 31, 2025, 2024 and 2023, we provide corporate guarantees or sponsor support for certain debt of our Subsidiaries. We have seen a period-on-period increase in bank guarantees as a percentage of our total equity. Breach of the conditions set forth therein could lead to the encashment of our guarantee which would adversely affect our business, results of operation, cash flows and reputation.

Certain of our PPAs, EPC contracts and regulatory approvals require us to provide bank guarantees for the completion of a project within timelines. If a project is significantly delayed or there is a breach of any conditions set forth in the PPA or service contract, the underlying guarantees can be encashed. As governments and/or regulatory authorities have tightened regulations around the award of STU and CTU connected power evacuation capacity, including the criteria of award and time period available to commission, the risk associated with project delays is heightened. The following table sets forth the amount of the bank guarantees furnished by us under our PPAs and EPC contracts and/or regulatory approvals as of the dates indicated.

Particulars	As at September 30,		As of March 31,		
	2025	2024	2025	2024	2023
	(₹ million, unless otherwise provided)				
Bank guarantees	9,221.20	3,557.23	6,962.60	3,625.20	1,621.40
Bank guarantees encashed/enforced during the year	Nil	Nil	Nil	Nil	Nil
Total Equity attributable to the owners of the company ⁽¹⁾	26,666.65	23,223.51	25,634.80	18,334.68	12,107.43
Bank guarantees as a % of Total Equity attributable to the owners of the company	34.58%	15.32%	27.16%	19.77%	13.39%

⁽¹⁾ Total equity attributable to the owners of the Company at the beginning of the year is calculated as Total equity attributable to the owners of the Company as per Restated Consolidated Statement of Assets and Liabilities as at the end of the fiscal period/year.

While the bank guarantees we have provided have not been encashed due to project delays in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, there is no assurance that such issues will not arise in the future. If any of our bank guarantees are encashed, it would have an adverse impact on our financial condition and results of operations.

34. We had Total Borrowings of ₹ 101,214.60 million as of September 30, 2025. If we fail to comply with financial and other covenants under any of our financing agreements, our business, prospects, financial condition, results of operations and cash flows may be materially and adversely affected. Additionally, we have issued and allotted non-convertible debentures of ₹4,000.00 million with interest rate of 10.20% per annum for the first 12 months with an incremental interest of 0.25% every quarter till maturity.

We avail loans to finance the development of our projects and for our operations. While, we make equity investments during the initial project development (evacuation approvals and land), the material procurement and construction largely begins only after the project has procured the necessary finances and the corresponding debt is sanctioned. We expect to continue to finance a portion of our project development costs with debt financing.

We have issued certain non-convertible debentures (“NCDs”) amounting to ₹ 5,990.00 million, of which ₹4,990.00 million are listed, as of September 30, 2025. Further the Company has issued and allotted 40,000 listed, rated, unsecured, redeemable non-convertible debentures of face value of ₹100,000 each amounting to ₹4,000 million on October 31, 2025 (“Unsecured NCDs”) by way of a debenture trust deed dated October 27, 2025. These Unsecured NCDs have been listed on the BSE on November 4, 2025. These Unsecured NCDs amount to 3.95% of the Total Borrowings of the Company i.e. ₹101,214.60 million, as of September 30, 2025. For details of our NCDs and Unsecured NCDs, see “Financial Indebtedness” beginning on page 825.

The following table provides our indebtedness profile as of the periods indicated:

Particulars	As at September 30,		As of March 31,		
	2025	2024	2025	2024	2023
	(₹ million, unless otherwise provided)				
Total Borrowings ⁽¹⁾ (A)	101,214.60	65,647.98	79,736.98	55,145.64	38,434.15
Total Equity (B)	33,991.87	26,761.12	32,047.73	22,339.79	14,687.56
Funds Invested in business ⁽²⁾ (C=A+B)	135,206.47	92,409.10	111,784.71	77,485.43	53,121.71
Total Borrowings as a % of Funds Invested in business (A/C)	74.86%	71.04%	71.33%	71.17%	72.35%

⁽¹⁾ Total Borrowings is calculated as Non-current liabilities – Financial liabilities – Borrowings plus Current liabilities – Financial liabilities - Borrowings. Please see “Management’s Discussions and Analysis of our Results of Operations – Non-GAAP Measures” on page 838.

⁽²⁾ Funds invested in business is calculated as Total Equity and Total Borrowings (Non-current liabilities – Financial liabilities – Borrowings plus Current liabilities – Financial liabilities - Borrowings). Please see “Management’s Discussions and Analysis of our Results of Operations – Non-GAAP Measures” on page 838.

Our debt and leverage may reduce available cash for operations and investments, limit our ability to obtain additional financing, increase borrowing costs, impact our credit rating and restrict our flexibility to respond to business or economic changes. Failure to comply with financial or other covenants could adversely affect our business, financial condition, and results of operations. Our financing agreements may contain covenant that require lender approval for significant financial, structural, or management changes, and may impose project-specific restrictions. There is no assurance that such consents will be granted promptly or at all, and any conditions imposed may further limit our operational flexibility or delay our response to market opportunities. These agreements may also allow lenders to appoint nominee directors in the event of default and require us to maintain certain credit metrics.

If we fail to comply with our credit agreements, our lenders may declare an event of default, accelerate our debt, enforce collateral, or require us to sell assets, restructure debt, or seek additional equity, potentially diluting shareholders’ interests. For example, in Fiscal 2024 and Fiscal 2025, Clean Max Maximus Private Limited, one of our Subsidiaries failed to maintain the financial covenants as required under the financing agreements with total outstanding borrowings of ₹4,290.63 million in Fiscal 2025 and ₹3,822.27 million in Fiscal 2024 with one of its lenders. For a reconciliation of total outstanding borrowings, see “Management’s Discussion and Analysis of our Results of Operations – Non GAAP Measures” starting on page 838. For Fiscal

2024 the respective lender had provided a waiver. Also, for Fiscal 2025, we have subsequently received a confirmation from the relevant lender stating the absence of any outstanding event of default in relation to the said facility.

Further, our Company and certain Subsidiaries failed to create security within the specified timelines agreed with lenders, including due to delays in obtaining change in land use permissions from the relevant authorities. The details of such instances are set forth below:

S. No.	Name of the entity	Name of the lender	Details of failure to create security	Penal interest paid (in ₹ million) [#]
Six months ended September 30, 2025				
1.	Clean Max Theia Private Limited	Power Finance Corporation Limited	Delay in creation of mortgage over project land	9.68
2.	Clean Max Vega Power LLP	India Infradebt Limited		1.28
3.	Clean Max Kratos Private Limited	National Bank for Financing Infrastructure and Development		5.94
4.	Clean Max Terra Private Limited	Exim Bank of India		0.94
Total				17.84
S. No.	Name of the entity	Name of the lender	Details of failure to create security	Penal interest paid (in ₹ million) [#]
Fiscal 2025				
1.	Clean Max Theia Private Limited	Power Finance Corporation Limited	Delay in creation of mortgage over project land	14.39
2.	Clean Max Vega Power LLP	India Infradebt Limited		3.12
3.	Our Company	Kotak Infrastructure Debt Fund Limited		1.19
4.	Clean Max Kratos Private Limited	National Bank for Financing Infrastructure and Development		0.53
Total				19.23
Fiscal 2024				
1.	Clean Max Vega Power LLP	India Infradebt Limited	Delay in creation of mortgage over project land	2.67
2.	Our Company	Kotak Infrastructure Debt Fund Limited		1.93
3.	Clean Max Theia Private Limited	Power Finance Corporation Limited		0.23
Total				4.83
Fiscal 2023				
1.	Clean Max Vega Power LLP	India Infradebt Limited	Delay in creation of mortgage over project land	2.30
Total				2.30

[#] Inclusive of GST.

* The Penal Charges for the period from January 2025 to March 2025 pertain to Fiscal 2025, however the intimation of the same i.e. Lender Advice was not received until June 2025

We have historically been able to cure such breaches, refinance the relevant facility, pay penal interest, or procure waivers or extensions in security creation timelines from the relevant lenders. As of September 30, 2025, none of our lenders have issued a notice of default or accelerated payment under such facilities on the basis of such technical breaches. Nonetheless, there can be no assurance that lenders will not choose to enforce their rights or that we will be able to remedy such technical breaches in the same manner as done in the past.

There is no assurance that we will be able to refinance, sell assets or obtain additional financing on acceptable terms. If external capital is limited or costly, we may be forced to scale back, delay, abandon, or sell projects or default on certain of our commitments, which could adversely affect our business and financial condition.

35. The scale of our business has grown significantly. We may not be able to sustain such growth rates, and our historical growth rates should not be taken as indicative of our future growth prospects.

The scale of our business has grown significantly in recent years, as shown in the table below:

Particulars	Metrics	For the six months ended September 30,		Fiscal		
		2025	2024	2025	2024	2023
Generation exported ⁽¹⁾	Mn units	1,718.81	1,397.82	2,615.92	1,932.68	1,048.85
C&I Operational Capacity ⁽²⁾	MW	2,796.10	1,931.34	2,177.99	1,755.21	1,040.14
Solar (Onsite) ⁽³⁾	MWp	479.21	403.38	448.57	396.09	334.38
Solar (Offsite) ⁽⁴⁾	MWp	1,603.81	996.39	1,171.44	850.64	497.86
Wind ⁽⁵⁾	MW	713.08	531.58	557.98	508.48	207.90
Contracted yet to be executed Capacity ⁽⁶⁾	MW	2,538.18	637.57	2,769.66	435.80	580.97
Solar (Onsite) ⁽³⁾	MWp	85.12	48.26	70.10	32.09	54.82
Solar (Offsite) ⁽⁴⁾	MWp	1,705.26	442.16	1,887.16	367.41	263.29
Wind ⁽⁵⁾	MW	747.80	147.15	812.40	36.30	262.86
Revenue from operations	₹ million	9,329.53	6,764.66	14,957.01	13,898.37	9,295.82
Renewable Energy Power Sales	₹ million	7,192.15	5,736.14	11,072.48	8,663.33	4,748.15
Renewable Energy Services	₹ million	2,050.07	980.44	3,766.53	5,180.04	4,547.67

(1) Generation exported refers to electricity unit generated in million kWh

(2) C&I Operational Capacity means capacity of a project for which a commissioning certificate has been issued or CEIG certificate is received. This KPI refers to

- operational capacity that has been contracted with C&I customers.
- (3) Onsite Solar is defined as solar projects that are located within the premises or in the immediate vicinity of the end consumer's facility. These projects are typically installed on rooftops, building structures, carports, or unused land within or adjacent to the consumer's premises, and supply power directly to the consumer without using the distribution network.
 - (4) Offsite Solar means solar projects that are located away from the premises of the end consumer and supply electricity through the grid under open access regulatory mechanisms. These projects are connected to the distribution network, allowing energy to be wheeled to customers located at different geographic locations.
 - (5) Wind projects that are located away from the premises of the end consumer and supply electricity through the grid under open access regulatory mechanisms. These projects are connected to the distribution network, allowing energy to be wheeled to customers located at different geographic locations.
 - (6) Contracted yet-to-be-executed capacity refers to the total renewable energy capacity (in MW) for which power purchase agreements (PPAs)/ Letter of Intent (LOI)/energy services contracts have been signed with customers but project commissioning is still underway as at end of period.

The growth of our business depends on our ability to contract additional capacity under our PPAs with existing and new clients. Further, our Onsite Solar projects are typically completed within six to nine months of the signing of a PPA, which provides us with limited visibility on future growth. Thus, our historical growth may not be indicative of, or comparable to, our future prospects. Other factors that affect the growth of our business include our ability to: (i) identify suitable sites and connectivity/evacuation approval for our projects; (ii) identify suitable geographic markets to enter based on the business needs of our customers; (iii) enter into PPAs or contracts for sale of services on commercially acceptable terms; (iv) acquire land rights and develop our projects on time, within budget and in compliance with regulatory requirements; (v) obtain cost-effective financing needed to develop and construct projects; (vi) efficiently source components that meet our design specifications on schedule; and (vii) negotiate favourable payment terms with suppliers and contractors. In addition, as part of our Renewable Energy Services business, we operate a Capex Services business whereby investors invest upfront in the project. We derive a one-time service income from EPC services provided for the project, in addition to a recurring fee typically payable quarterly or annually for O&M services and common infrastructure facilities provided for the project. As a result, the growth of our Capex business is largely dependent on our ability to enter into new contracts with customers. There is no assurance that we will be able to expand our portfolio of projects in the Capex business, and failure to do so could adversely affect our business, results of operations, cash flows and prospects.

36. Failure to comply with conditions under captive/group captive norms as per the Electricity Rules, 2005, could lead to imposition of cross-subsidy surcharges and additional surcharges on our commercial and industrial customers, which could result in them terminating their PPAs with us, thereby adversely affecting our business, results of operations, financial condition, cash flows and reputation.

We sell some of the power generated to customers under Group Captive norms as per the Electricity Rules, 2005. Under this model, group captive customers invest 26% or more equity capital into our SPVs. We have 231 PPAs in the Group Captive model across 96 customers with an average PPA size of 12.50 MW and average capacity of 24.08 MW per customer as of September 30, 2025. The following table sets forth the revenue contribution from our STU – Group Captive projects for the years indicated:

Particulars	For the six months ended September 30,		Fiscal		
	2025	2024	2025	2024	2023
	(₹ million, unless otherwise indicated)				
Revenue from STU – Group Captive (A)	3,774.59	2,768.23	5,339.55	3,424.77	1,881.57
Revenue from Operations - Renewable Energy Power Sales (B)	7,192.15	5,736.14	11,072.48	8,663.33	4,748.15
Revenue from STU – Group Captive as a % of Revenue from Operations – Renewable Energy Power Sales (A/B)	52.48%	48.26%	48.22%	39.53%	39.63%

Under the Electricity Act, 2003 and the Electricity rules, 2005 and policies made thereunder, electricity can be supplied to a group of customers in a “captive/group captive structure” without levy of cross-subsidy surcharge and additional surcharge. In order to take advantage of such structure, a captive/group captive project must have, among others, the following characteristics: (a) at least 26% of the voting equity of the project company must be owned by customer(s) of electricity from such project; and (b) at least 51% of electricity generation identified for captive use, must be consumed by such customers in a financial year. We typically contract with one consumer per group captive subsidiary. Consumption of electricity from group captive projects (provided that the criteria are met, and relevant details are filed with the distribution utility/regulator timely) in any financial year exempts such customers from levy of cross-subsidy surcharge and additional surcharge. See “Key Regulations and Policies in India” on page 344. Failure to comply with the conditions could result in the relevant project losing captive status and lead to the imposition of cross subsidy surcharge, additional surcharge or any other charges, as applicable, on our Conventional C&I customers on all energy generated from the relevant project, which in turn, may result in our failure to meet the minimum savings guarantees set forth in our PPAs, giving our customers the right to terminate the relevant PPAs with us. Minimum savings guarantees is the amount of savings per unit a customer is guaranteed as part of our PPA, which is calculated as the difference between the applicable grid tariff and the landed tariff on power procured from us. We have not had any instances of loss of group captive status in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, though there is no assurance that such issues will not arise in the future.

Additionally, under the shareholders'/investment agreements entered with our group captive consumers, certain specified actions in relation to our group-captive subsidiaries typically require affirmative votes from their representatives. Such actions may include alterations in capital structure including by way of issue of new shares or buy-back of existing shares, amendment

of constitutional documents of our group captive subsidiaries, settlement of any material litigation or arbitration, transfer or disposal of ownership in project (including sale of our Company's shareholding in the group captive subsidiaries), or decommissioning thereof, changes in shareholders' rights, major diversifications, investments, capital expenditure, divestments affecting the relevant project or engaging in new business activities. We may therefore be restricted in our ability to undertake such actions in relation to our group captive subsidiaries. There can be no assurance that such approval will be granted in a timely manner, or at all. In the event that such approval is granted, they may impose certain additional conditions on us, which may limit our operational flexibility. The time required to secure consents may prevent us from taking advantage of a dynamic market environment.

37. We aim to enter into battery energy storage systems business ("BESS"). Any failure to launch this offering in time or anticipate related costs and challenges could adversely impact our business and financial condition.

BESS is a form of energy storage technology that can be used for a wide range of grid support activities, such as energy time shift, distribution deferral and energy arbitrage. According to the CRISIL Report, battery energy storage systems (BESS) are becoming crucial in renewable energy offerings, driven by declining storage costs, policy support, and regulatory initiatives. BESS adoption is rising as businesses seek greater power reliability, operational flexibility and the ability to optimise consumption patterns. As per the Rajasthan Electricity Regulatory Commission (Terms and Conditions for Green Energy Open Access) Regulations, 2025 ('Commission'), new renewable energy (RE) projects on the STU network (excluding hydro projects) with an installed capacity of over 5 MW, or as may be specified by the Commission will be mandated to install energy storage system (ESS) (of at least 2 hours storage) for a minimum of 5% of the RE capacity.

As of September 2025, we do not have any operational energy storage projects. With an aim of evolving our operating practices and strategies to address the changing needs of our customers and the evolving energy landscape, we plan to incorporate battery energy storage systems (BESS) in our portfolio in the Renewable Energy Power Sales Segment. We plan to incorporate BESS with our existing offerings and are evaluating opportunities to partner with technology providers to enable integration of BESS at scale.

We have no experience in energy storage capabilities which could result in delays in executing our growth strategies and cause us to incur additional costs, including for adoption of new technology, accuracy in sizing of the right BESS inclusive offering, changes to government policy and regulations around BESS. Additionally, such solutions may require significant upfront investment which could impact our cash flows. This could result in delay in implementation of our projects and projects achieving lower than expected energy outcomes for customers, among other things. This in turn could impact our business, financial condition and results of operations.

38. Majority of our power purchase agreements have fixed tariffs and we do not have the flexibility to charge more if our production costs increase. Thus, failure to effectively manage our costs can adversely affect our business, results of operations, cash flows and prospects.

The following table provides details of the proportion of operational capacity and revenue subject to PPAs with a fixed tariff, as of the dates indicated:

Particulars	For the six months ended September 30,		As of March 31,		
	2025	2024	2025	2024	2023
Operational Capacity (MW) – Renewable Energy Power Sales (A)	2,310.32	1,508.42	1,712.79	1,342.27	754.51
Operational Capacity - Renewable Energy Power Sales subject to fixed tariffs under PPAs (MW) (B)	2,251.90	1,450.00	1,573.99	1,214.46	658.59
Operational Capacity - Renewable Energy Power Sales subject to fixed tariffs as % of total Operational Capacity - Renewable Energy Power Sales (%) (B)/(A)	97.47%	96.13%	91.90%	90.48%	87.29%

Key drivers of our profitability are our ability to estimate the cost of project execution and equipment procurements, as well as our ability to manage costs during the terms of our PPAs and operate our projects at optimal levels. For our Under Development projects, as our PPAs are typically executed between 6-18 months prior to the date of project execution and equipment procurement, failure to estimate or manage our costs would adversely impact as our profitability. For Operational Capacity, the developer tariffs are fixed for the term of majority of our PPAs, while all other regulatory tariffs are passed through to customers. If our production costs increase, we will not be able to charge higher tariffs to our customers, which could have an adverse impact on our profitability. We also have ongoing obligations to pay land use charges under the terms of our subleases for certain projects, which increase annually or in accordance with the schedules to the relevant land use agreements. The entities we sublease land from for our projects may increase these charges unilaterally at the direction of the state governments in accordance with the relevant land revenue rules. While we factor in expected increases in operating expenses, including as a result of expected inflation in India, when negotiating our fixed price PPAs, if our operational costs increase beyond our expectations, our profitability could decline. On the other hand, if the market price for electricity rises above the levels stipulated in the PPAs, we may not be able to realize such higher price.

According to the CRISIL Report, we are able to attract customers to offtake renewable energy from us as we offer lower prices than those available on the grid. Thus, a reduction in the variable grid tariff may require us to reduce the tariff recovered from our customers, or otherwise, be subject to cancellation of our PPAs. Since we operate in an open access market, our PPAs may be subject to an increase in open access charges as imposed by regulators. Inability to pass on such additional charges to customers will adversely impact our revenue and profitability. Our PPAs are structured with a farm gate tariff, which is paid by the customer and forms the basis for our revenue realization. This implies that, typically, all open access charges, including cross-subsidy surcharges and banking charges, are passed through to the customer under the PPAs. Further, cross-subsidy surcharges and additional surcharges are applicable only for third-party open access PPAs and not to group captive PPAs (unless there is a loss of captive status). While our PPAs provide for the passing on of these additional charges to offtakers, customer tariffs in most PPAs have a minimum savings guarantee, and hence, imposition of high additional open access charges could trigger breach of the minimum savings clause, resulting in the termination or sizing down of such PPAs.

While we have not experienced any cost overruns for our projects in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, there is no assurance that we will not experience such issues in the future. Any cost overruns could have an adverse impact on our business, financial condition and results of operations.

39. Our dependency on leased land has been increasing year-on-year. Failure to renew our lease agreements on competitive terms or early termination of such agreements would adversely affect our business, results of operations, cash flows and prospects.

The table below presents a breakdown of capacity sourced from both operational located on leased versus owned land, as of the specified dates. For further details see “Our Business - Properties” on page 339.

Particulars	For the six months ended September 30,		As of March 31,					
	2025		2025		2024		2023	
	Capacity (MW)	(% of C&I Operational Capacity)	Capacity (MW)	(% of C&I Operational Capacity)	Capacity (MW)	(% of C&I Operational Capacity)	Capacity (MW)	(% of C&I Operational Capacity)
Operational Offsite projects – Renewable Energy Power Sales Capacity	1,943.30	100.00%	1,374.98	100.00%	1,039.52	100.00%	486.24	100.00%
Leased land	635.76	32.72%	275.68	20.06%	70.79	6.81%	16.20	3.33%
Owned land	1,307.54	67.28%	1,099.30	79.94%	968.73	93.19%	470.04	96.67%

We enter into lease agreements with landowners to avail leasehold rights. The majority of our counterparties are predominantly private entities. Certain locations of our project with a capacity of 102.3MW under construction in Kalavad, and our operational project in Kiriyaana with a capacity of 16.2 MW are located on government land, for which we have obtained a lease from the relevant government authority or sub-lease from private parties which in turn have leased the properties from state governments.

There is no assurance that we will be able to extend our lease agreements on competitive terms or at all, or that they will not be terminated, subject to the terms and conditions of the relevant agreements. In the case of a sublease, if the original lease for such land is terminated due to any action or omission by the initial party, we may lose our leasehold rights as well. Such land may also be subject to disputes on right of way, encroachment and other related issues. In the event that we are unable to renew a lease agreement, we may be forced to remove our equipment at the end of the lease. Certain of our lease agreements impose certain conditions on our use of the land, such as restrictions on rights to use the land in line with the specified purpose, and payment of applicable statutory charges, taxes or levies imposed by authorities. If we fail to comply with the conditions stipulated in our lease agreements, such lease or sub-lease agreements may be terminated by the relevant lessees. Any of the foregoing would adversely affect our business, prospects, financial condition, results of operations and cash flows. While we have not experienced any non-renewals or termination of our lease agreements in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, there is no assurance that such issues will not arise in the future.

40. There have been certain instances of delays in payment of statutory dues by our Company and our Subsidiaries. Any further delays in payment of statutory dues may attract financial penalties from the respective government authorities and in turn may have a material adverse impact on our financial condition and cash flows.

The table below sets forth the details of delays in statutory dues paid by our Company and our Subsidiaries incorporated in India for the years indicated is set out below:

(₹ in millions, except employee data)

[#]Amounts less than ₹ 0.01 million.

Note:

* We have already taken corrective measures to address the abovementioned delays in payment of statutory dues by our Company. With a more efficient team and timely accounting of data, we have sought to minimize recurrence. A few instances were caused by technical glitches on the portal at the time of filing, which have since been resolved, and we have duly made the corresponding payments.

(1) Dues under Income Tax Act, 1961 include delayed payments of tax deducted at source.

(2) Dues under state legislations on goods and services tax include delayed payments of Tax under in the states of Chhattisgarh, Gujrat, Haryana, Karnataka, Maharashtra, Madhya Pradesh, Rajasthan, and Tamil Nadu.

(3) Dues under state legislations on professional tax include delayed payments of professional tax in the states of Andhra Pradesh, Gujarat, Karnataka, Madhya Pradesh, Maharashtra, Tamil Nadu, and Telangana.

(4) Dues under state legislations on labour welfare fund include delayed payments of contribution to labour welfare fund in the states of Gujarat, Haryana, Karnataka, and Maharashtra.

The table below sets the details of statutory payments made in respect of employees of the Company and its subsidiaries incorporated in India (on a consolidated basis):

Particulars	For the six months ended September 30,						Fiscal								
	2025			2024			2025			2024			2023		
	No. of employees Covered	Total Dues Paid	Unpaid Dues [@]	No. of employees Covered	Total Dues Paid	Unpaid Dues [@]	No. of employees Covered	Total Dues Paid	Unpaid Dues [@]	No. of employees Covered	Total Dues Paid	Unpaid Dues [@]	No. of employees Covered	Total Dues Paid	Unpaid Dues [@]
Employee provident fund	509	24.01	-	342	17.52	-	562	38.03	-	385	33.59	-	301	27.36	-
Tax deducted at source (on salaries of employees)	288	98.21	-	262	99.65	-	364	178.80	-	256	456.24	-	216	134.45	-

[#]Amounts less than Rs. 0.01 million.

[^]The amount reported is the closing balance of defined benefit obligation liability reported in the audited financial statements for the respective fiscals.

^{*}The amount reported is the closing balance of defined benefit obligation liability reported in the actuarial valuation report for the respective periods.

[@]Unless otherwise stated, Statutory Dues appearing in the closing balance as per Restated Consolidated Financial Statements for the respective periods and paid subsequently have been classified under 'Total Dues Paid'.

We are generally regular in depositing statutory dues. These delays were primarily due to administrative reasons.

While we have subsequently made payments in relation to the pending statutory dues, we cannot assure you that in future there will be no similar delays and no penalties or fines that can be levied by regulators and which can have material impact on our financial condition and cash flows.

41. We operate in a capital-intensive industry, requiring significant upfront investment for project development and construction. Any failure to source adequate funding on time or at all could adversely impact our business and

financial condition.

We rely on capital in the form of equity and debt financing to fund our growth. As a result, our ability to access cost effective financing is crucial to our growth strategy. Since our founding, we have had the ability to access diversified pools of Indian and international capital, including equity and debt from a broad section of investors, lenders and other capital providers. Our equity investors include private equity as well as renewables and infrastructure focused investors. We also have access to a range of project finance and other debt instruments from multiple Indian and international lenders. We have availed various debt through financing instruments including term loans, working capital instruments such as letters of credit, overdraft facilities and non-convertible debentures as further detailed in the section “Financial Indebtedness”. For details in relation to the risks associated with our debt funding arrangements, see “*We had Total Borrowings of ₹101,214.60 million as of September 2025. If we fail to comply with financial and other covenants under any of our financing agreements, our business, prospects, financial condition, results of operations and cash flows may be materially and adversely affected*” on page 75.

While we expect to fund the development and construction of our projects with a combination of cash flows from operations, debt financing and equity financing, our ability to arrange for such financing remains subject to various factors, including those affecting the macroeconomic environment. Further, there are few assumptions and judgment involved in the estimation of the total costs required to complete a project. Any delays in the commissioning of a project or our failure to adequately budget project costs and timelines, could require us to source additional funds and have an adverse impact on our business, financial condition and results of operations.

42. The ability to deliver electricity to our various counterparties requires the availability of and access to evacuation infrastructure and transmission systems.

Our ability to sell electricity is impacted by the availability of, and access to, the various transmission systems to deliver power to its contractual delivery point and the arrangements and facilities for interconnecting our generation projects to the transmission systems which are owned and operated by third parties or state electricity boards. Under our PPAs and the electricity grid codes in India, if the state transmission or distribution utilities determines that our project endangers personal safety or the integrity of the grid system or electrical service where real time visibility of electricity is not provided to load despatch centres, our project may be disconnected from the grid system (without compensation in the case of an emergency) partly or fully from time to time. Non-availability of or damage to the evacuation infrastructure may impair our ability to generate electricity from an entire farm during the period of such failure. The electricity grid beyond the interconnection points of our projects which is under the management and control of the grid utilities may suffer its own constraint, downtime for maintenance and natural disasters. We are not entitled to deemed generation during such times of unavailability of external grid or curtailments. However, while we have a cover ~20% coverage for certain business interruptions under the Industrial All Risk Policy, we may not be able to recover all our losses. For instance, in our Hosahalli project in Karnataka, the existing Grid Substation faced evacuation limitations in May, June, and July due to its capacity constraint of 30 MW for evacuation and local consumption demands. However, the total connected generation units total 48.9 MW, resulting in surplus generation instances that lead to curtailment imposed by KPTCL. In our Sanathali Project in Gujarat, the grid curtailment issue due to infrastructure limitations, which had restricted evacuation to 12 MW out of 30 MW since June 2023 which was resolved in May 2024. We were able to only claim a certain portion of the losses for these instances under the Industrial All Risk Policy. Notwithstanding these instances, our average grid availability for operational offsite projects in the trailing twelve months ended September 30, 2025 and September 30, 2024 Fiscals 2025, 2024, and 2023 was 99.08%, 99.25% 99.10%, 99.26%, and 98.95%, respectively. Accordingly, we have not faced any material impact on account of grid unavailability.

The following table provides our unused evacuation capacity⁽¹⁾ available for the years indicated:

Particulars	Units	For the six months ended September 30,		Fiscal		
		2025	2024	2025	2024	2023
Offsite STU (Solar)	MWp	1,880.92	1,059.28	1,135.45	597.29	650.10
Offsite STU (Wind)	MW	759.52	263.32	400.91	220.11	286.40
Offsite CTU (Solar)	MWp	1,273.50	450.00	1,125.00	450.00	0.00
Offsite CTU (Wind)	MW	1,030.00	300.00	750.00	300.00	0.00
Total	MW	4,943.94	2,072.60	3,411.36	1,567.40	936.50

Note: Unused Evacuation Capacity refers to the portion of the approved or available electrical power transmission capacity from a project to the grid or end consumer that has been obtained but not yet commissioned.

Overloading at the evacuation point, inadequacy of transformer availability or use of old relay equipment may cause periodic failure of grid leading to grid curtailment or load shedding from our projects. Since the transmission infrastructure is largely state owned, replacement of such old equipment is not in our control and has to be done by the state transmission and distribution companies. This requires time and liaising with government officials in order to get such equipment repaired and/or replaced. The absence of availability and access to as well as the operational failure of existing evacuation infrastructure or transmission facilities may have a material adverse effect on our ability to deliver electricity to our various customers, which could materially and adversely affect our assets, liabilities, business, cash flows, financial condition and results of operations.

43. Operational problems may reduce energy production below our expectations. We perform O&M periodically across all our plants. Any significant increase in our operation maintenance expenses or any failure to repair operational problems could require us to expend significant amounts of capital and disrupt our operations, which could have a material adverse effect on our business, cash flows, financial condition and results of operations.

Our power generation assets may not continue to perform as they have in the past or as expected and are subject to risk that wear and tear, latent defects, design or operator errors, early obsolescence or force majeure events, among other things, could impair their effectiveness, reduce their output below their rated capacity or require shutdown of key equipment. As a result, we may not achieve the performance thresholds required by our PPAs, which could have a material adverse effect on our assets, liabilities, business, prospects, financial condition, results of operations and cash flows. Our failure to properly operate and maintain our projects could decrease their performance, reduce their useful life or require shutdowns and make us liable for any resulting damages to third parties. For our solar projects, we perform O&M in-house and for our wind/hybrid projects we engage with the OEMs to provide O&M services. The table below sets forth our operating and maintenance expenses of owned assets in absolute amount and as a percentage of the revenue from renewable energy power sales segment for the periods indicated.

Particulars	For the six months ended September 30,		Fiscal		
	2025	2024	2025	2024	2023
	<i>(₹ million, unless otherwise indicated)</i>				
Operating and maintenance expenses (A)	567.96	401.11	823.99	575.20	309.69
Revenue from Renewable Energy Power Sales (B)	7,192.15	5,736.14	11,072.48	8,663.33	4,748.15
Operating and maintenance expenses as a % of Revenue from Renewable Energy Power Sales (C=(A)/(B))	7.90%	6.99%	7.44%	6.64 %	6.52%

If we or our O&M contractors were to experience a shortage of, or an inability to acquire, critical spare parts, we could incur significant delays in returning our facilities to full operation. Although we have long-term O&M contracts with our suppliers and other third-party contracts for maintenance of wind turbines, spare parts for wind turbines and key pieces of electrical equipment, such as gear boxes or control panels, may be difficult to acquire, and if acquired, may be damaged, or may have significant sourcing lead times. Sources for some critical spare parts and other equipment are located outside of India. This could affect our generating ability and cause us to breach our minimum supply guarantees under our PPAs. Repairing wind turbines may also require mobilizing cranes, which could take significant lead time, especially if cranes are required during busy periods, such as end of the financial year, or during monsoon seasons which pose logistical difficulties. Such delays could have a significant impact on our operations, as our wind turbines may be inoperable or performing below maximum capacity while the crane is being mobilized.

Our solar modules are generally covered by manufacturers product warranties for approximately 10 years and performance warranties of 25 to 30 years. Similarly, our solar inverters, and other system components are generally covered by manufacturers' warranties, which are typically for 1 to 5 years, and while we may make claims against such manufacturers, there is no guarantee that such costs will be covered under the warranties in part or at all. In addition, there can be no assurance that our O&M expenses will not increase significantly in the future or that we will be able to pass on such increases to our customers. If we are unable to manage our costs effectively or to operate our projects at optimal levels, our profit margins, and therefore our business, cash flows, financial condition and results of operations may be adversely affected.

44. Our assets and operations are subject to certain risks and hazards. Our insurance coverage may not be adequate, and we may become subject to higher insurance premiums or less favourable terms under our insurance policies.

Our assets and operations are exposed to various operational risks and safety-related hazards that may adversely affect our operations, including equipment failures, natural disasters, environmental hazards and industrial accidents. These and other hazards can cause or result in significant personal injury or death, severe damage to and destruction of property, plant and equipment and suspension of operations. The occurrence of such an event may subject us to lawsuits asserting claims for substantial damages, including environmental clean-up costs, death or personal injury and property damage. While we are committed to safe working practices at our project sites and monitor various safety metric, there is no assurance that such measures will be effective in preventing accidents on site. Our assets are subject to lighting damage, flooding, theft, major equipment failure and fire which result in material damage or business interruption. We may also face contractual or civil liabilities or fines in the ordinary course of business as a result of damages suffered by PPA counterparties or third parties, which may require us to make indemnification or other damage payments under contract or otherwise in accordance with applicable law, and our contracts may not have adequate limitations of liability for direct or indirect damage. We typically have force majeure clauses covered in our PPAs which protect us for situations like lightning damage, floods, among others.

We have availed, among others, industrial all risk policy, fire, cybercrime insurance policy, professional indemnity policy, commercial general liability insurance, erection all risk policy and burglary insurance, marine policy which covers all transit insurance, director & officer liability insurance policy, workmen compensation policy, professional indemnity policy, but our insurance coverage may not be adequate to cover our losses. There is no assurance that our insurance coverage will cover any losses incurred as a result of any such adverse developments that occur in the future, in full or at all. For instance, in our

Kiriyana project in Gujarat, there were blade damages due to lightening which resulted in business interruption. Out of 111 days, insurance claim was allowed only for 91 days in business interruption due to coverage restrictions. In our Babra project in Gujarat, in May 2024 due to cyclone internal 33 kV transmission line was damaged. In this instance we received approximately 60% payout of our claim due to policy's term and conditions. In our Saraipalli project in Chhattisgarh which was in under construction stage, in May 2025, due to storm, our key equipment like modules and structures got damaged. In this instance we received approximately 80% payout of our claim.

The table below provides details of our insurance cover as of and for the relevant periods:

Particulars	For the six months ended September 30,		As of / For Fiscal Ended March 31,		
	2025	2024	2025	2024	2023
	(₹ million, except as stated otherwise)				
Sum insured for property, plant and equipment, and capital work-in-progress (excluding freehold land and right to use leasehold land and buildings)	217,895.30	129,589.53	174,741.39	106,762.46	63,778.71
Gross block of property, plant and equipment, and capital work-in-progress (excluding freehold land and right to use leasehold land and buildings)	131,921.93	80,965.57	100,779.32	74,495.37	56,572.04
Insurance cover (%)	165.17%	160.06%	173.39%	143.31%	112.74%

In addition, these insurance policies are subject to annual review by insurers, and they might not be renewed on similar or otherwise acceptable terms or at all. We might not be able to maintain adequate insurance at rates we consider reasonable. If we were to incur a serious uninsured loss or a loss that significantly exceeded the limits of these insurance policies, we may become subject to higher insurance premiums or less favourable terms under our insurance policies, which would adversely affect our business, cash flows, financial condition and results of operations.

45. We operate in a highly competitive industry. Our failure to continue managing competition could have a material adverse impact on our business, financial condition and results of operations.

Our primary competitors include C&I and other renewable energy project developers. We compete with renewable energy project developers in India on many factors including, access to high quality customers, evacuation approvals, access to project land, access to vendors and contractors as well as access to quality talent across functions. As the competitive intensity increases, we may face a downward trend in market tariffs. Some of our competitors may have greater financial, marketing, personnel and other resources than we do and may be in a position to acquire/develop renewable energy projects by paying a significant premium or otherwise seek to grow their business more aggressively. A reduction in C&I demand for energy from renewable energy sources or our failure to successfully acquire/develop new renewable energy projects may adversely affect our business and financial condition.

Further, certain of our competitors may also grow through corporate reorganizations or alliances with other competitors. According to the CRISIL Report, the Indian renewable sector is experiencing increased consolidation, primarily through M&As. This trend is driven by the sector's growth potential, strong investor interest and the desire to create diversified and substantial asset bases. Large players are expanding their portfolios, both organically and inorganically, leading to the transfer of ownership of significant renewable energy assets. Any growth in the scale of our competitors may result in the establishment of advanced in-house development, EPC, and asset management capabilities, which may offset any current advantage we may have over them.

46. Our operations are distinct from utility-scale renewable energy developers as we do not participate in competitive tenders with state owned distribution companies. As a result, we are exposed to risks related to contract negotiations and demand for our services.

Our business model is distinct from utility-scale renewable energy developers, according to the CRISIL Report, as we do not participate in competitive tenders with state-owned distribution companies or central government utilities, which typically award projects solely based on the lowest tariff bids. Instead, we pursue customer-specific contracting by tailoring projects to corporate consumers' needs and selling energy generated from our solar, wind, and hybrid renewable energy farms. As a result, we are exposed to risks associated with contract negotiations, including delays, renegotiations, or cancellations, which could impact our ability to secure long-term revenue visibility. Our success significantly depends on our ability to acquire new customers and retain our existing customers. Any failure to do so, could impact our ability to grow our business, increase the demand for our services and adversely impact our revenue, business and financial condition.

47. Our success depends on continued service and performance of our Key Managerial Personnel, Members of the Senior Management and other qualified personnel. If we fail to hire, retain or motivate such individuals, our business could suffer.

Our success substantially depends on the continued service and performance of our key managerial personnel ("KMP"), members of the Senior Management ("SMP") and other qualified personnel such as our technology team. See "Our

Management” on page 522 for more details. The following table summarizes our overall employee attrition rate as of the dates indicated.

Particulars	For the six months ended September 30,						As at and for the Fiscal year ended March 31,								
	2025			2024			2025			2024			2023		
	Headcount	Attrition rate ⁽²⁾ (%)	Average tenure ⁽³⁾ (years)	Headcount	Attrition rate ⁽²⁾ (%)	Average tenure ⁽³⁾ (years)	Headcount	Attrition rate ⁽²⁾ (%)	Average tenure ⁽³⁾ (years)	Headcount	Attrition rate ⁽²⁾ (%)	Average tenure ⁽³⁾ (years)	Headcount	Attrition rate ⁽²⁾ (%)	Average tenure ⁽³⁾ (years)
KMPs and SMPs	11	0.00%	7.4	10	0.00%	7.0	11	0.00%	6.9	11	8.70%	6.7	11	9.52%	6.4
Top 20% employees ⁽¹⁾	105	1.91%	4.1	59	13.22%	4.2	98	14.97%	4.3	71	14.39%	5.4	61	9.09%	6.2
All employees	565	5.48%	2.5	397	10.01%	2.9	491	16.65%	2.6	337	14.43%	4.0	273	12.37%	5.0

(1) Attrition rate refers to the number of employees that left during the year divided by the average number of employees during year

(2) Average tenure refers to the tenure for employees as of end of a year.

Our total employee attrition rate has increased year on year primarily in line with an increase in the number of employees during the same period. Some of the reasons employees have left our organization including to pursue new opportunities, higher studies, or personal goals – consistent with natural workforce trends. Further, if any of our KMPs, SMP or other qualified personnel suffer death, disability or leave due to other reasons, or if their reputation is harmed, our business may be disrupted and our financial condition and cash flows adversely affected. We may incur additional costs to recruit, train and retain qualified personnel or may face difficulties in finding qualified replacements. If any of our KMP, SMP or other qualified personnel joins a competitor or forms a competing business, we may lose customers, know-how and key professionals and staff members. Our ability to staff and train new employees in our operations may not meet the growing demands of our business. This may materially and adversely affect our ability to grow our business and our cash flows and results of operations.

48. We may need to offer attractive compensation and other benefits packages, including share-based compensation, to attract and retain our employees. If we are unable to attract employees, we may need to continue to incur additional expenses which could impact our financial condition and results of operations.

Our rapid growth also requires us to hire, train and retain a wide range of employees that can adapt to a dynamic, competitive and challenging business environment and that help us enhance business growth, innovate new offerings and develop technological capabilities. The following table sets forth our employee benefits expense as a percentage of total expenses for the years indicated.

Particulars	For the six months ended September 30,		Fiscal		
	2025	2024	2025	2024	2023
	(₹ million, unless otherwise indicated)				
Employee benefit expenses - Cash	399.93	323.03	587.33	1,299.55	505.25
Employee benefit expenses - Non Cash ESOP, gratuity Charges	205.75	225.30	459.49	284.92	169.81
Employee benefits expense	605.68	548.33	1,046.82	1,584.47	675.06
Total expenses before interest, tax, depreciation, impairment and amortisation	3,314.87	2,171.05	5,952.70	6,837.36	5,550.60
Revenue from operations	9,329.53	6,764.66	14,957.01	13,898.37	9,295.82
Employee benefits expense as % of Revenue from operations (%)	6.49%	8.11%	7.00%	11.40%	7.26%

We offer employee stock options to our employees. We incurred employee share-based payment expenses of ₹196.48 million, ₹219.81 million, ₹445.54 million, ₹273.55 million and ₹157.47 million for six months period ended September 2025 and 2024, in Fiscal 2025, 2024 and 2023 respectively. These are equity settled share-based payments and hence do not entail any cash outflow for the company. We may need to continue to invest significant amounts in salaries and stock options to attract and retain new employees and expend significant time and resources to identify, recruit, train and integrate such employees. For this purpose, we have two pools under the Clean Max ESOP Scheme, i.e. ESOP Pool I and ESOP Pool II, for 1,085,500 options and 2,264,872 options, which upon exercise, would result in 2,171,000 Equity Shares and 2,264,872 Equity Shares, respectively. If we are unable to effectively manage our hiring needs or successfully integrate and retain new hires, our efficiency, ability to meet forecasts and employee morale, productivity and engagement could suffer, which could adversely affect our business, financial condition, cash flows and results of operations.

49. Our cash flows from operating activities have fluctuated year-on-year. If such fluctuations continue, it could have an adverse impact on our cash flows and financial condition.

The table below provides our net cash flows generated from operating activities, for the periods indicated:

Particulars	For the six months ended September 30	Fiscal
-------------	---------------------------------------	--------

	2025	2024	2025	2024	2023
	<i>(in ₹ million)</i>				
Net cash flows generated from operating activities	13,756.82	1,600.77	14,041.96	862.76	9,276.49
Operating profit before working capital changes	6,324.21	4,991.80	9,633.70	7,419.26	4,061.43

Our cash flows and working capital are significantly impacted by the Company's strategy around reinvestment in the business. We are in an investment phase where a significant amount of our cash is being put back into the business in the form of capital improvements and expansion which we expect will generate future revenue/profit. However, if those expectations are not realized, there could be an adverse impact on the Company's ability to repay its liabilities and generate profit for investors.

The Company has had fluctuating cashflows and negative net working capital which is primarily due to trade payables and payments made towards projects constructed or under construction. These have been primarily met through sanctioned debt, pending disbursement, operating cashflows and equity infusions. Additionally, the Company and its subsidiaries have also incurred losses, for more information, see “ – In Fiscals 2024 and 2023, we incurred restated loss for the year of ₹376.43 million and ₹594.73 million respectively and generated profits in Fiscal 2025 and during the six months ended September 30, 2025 and September 30, 2024. Further, some of our Subsidiaries have incurred losses in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023. If we are unable to generate adequate cash profits and make scheduled loan repayments, we may not be able to maintain our profitability.” on page 45.

50. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. We may have limited experience in operating new technology, such as new wind turbines of 5 MW.

As part of our business, we leverage technology to improve efficiency, plant availability and output. Although we attempt to maintain the latest international technology standards, the technology requirements for businesses in the wind sectors are subject to continuing change and development. For example, we will be using Envision's 5 MW turbine for the first time in India, and do not have experience in operating it. Further, some of our existing technologies and processes in the wind and solar business may become obsolete, performing less efficiently compared to newer and better technologies and processes in the future. While we have not had any instances of projects being shut down due to material technology becoming obsolete in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, the cost of upgrading or implementing new technologies, upgrading our existing equipment or expanding capacity could be significant and could adversely affect our business, cash flows, financial condition and results of operations. Failure to respond to current and future technological changes in the wind farm industry in an effective and timely manner may have a material adverse effect on our business, cash flows, financial condition and results of operations. While there have been no instances in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023 where we had to make substantial investments on new technologies to replace our existing technology which has become obsolete, we cannot assure you that such instances will not occur going forward, which could adversely affect our business, cash flows, financial condition and results of operations.

51. Our operations are subject to environmental, health and safety laws and regulations. Additionally, we are also subject to foreign exchange laws. If we do not comply with such laws, regulations or permit requirements, we may be required to pay penalties or fines or curtail or cease the operation of our projects. Violations of environmental and other laws, regulations and permit requirements may also result in criminal sanctions or injunctions.

We are subject to various environmental, health and safety laws and regulations in India at the national and regional level. These laws and regulations require us to obtain and maintain permits and approvals, undergo environmental impact assessments and review processes, and implement environmental, health and safety programs and procedures to control risks associated with the ownership, construction, operation and decommissioning of projects. For details regarding environmental regulations applicable to us, see “Key Regulations and Policies in India” on page 344. If we do not comply with applicable laws, regulations or permit requirements, we may be required to pay penalties or fines or curtail or cease operations of such projects. Violations of environmental and other laws, regulations and permit requirements may also result in criminal sanctions or injunctions.

Environmental, health and safety laws, regulations and permit requirements may change or become more stringent. Any such changes of these laws may result in increased liabilities, compliance costs and capital expenditures or difficulty in our ability to comply with applicable laws, regulations and requirements. Our business could be adversely affected by significant changes in existing laws, regulations or requirements imposing additional permits and regulatory requirements on the projects or by the interpretation of those laws, regulations or requirements or more stringent enforcement by governmental authorities. While we were in compliance with applicable environmental, health and safety laws and regulation in India, Thailand and the Middle East, where we have business operations, and there has been no past violations of the environmental, health and safety laws and regulations by the Company, in the six month period ended September 30, 2025, Fiscals 2025, 2024 and 2023, there is no assurance that we will be able to remain in compliance with such laws and regulations. If we do not comply with applicable laws, regulations or requirements, including permit requirements, we may be obliged to pay penalties or fines or curtail or cease operations of the projects, among other sanctions. Moreover, environmental laws and regulations may allow governmental authorities to bring enforcement actions including search and seizure, requiring us to remediate any damages caused to the environment and private parties may bring lawsuits based upon damages to property and injury to persons resulting from the environmental, health and safety impacts of our past and current operations and natural resources. Any non-compliances with applicable environmental, health and safety laws and regulations could also subject us to opposition from affected stakeholders,

including local residents, environmental groups and social welfare organizations, and subject us to negative publicity. Any such changes could require us to incur materially higher costs than we currently have. Our costs of complying with current and future environmental, health and safety laws, regulations and permit requirements, and any liabilities, fines or other sanctions resulting from violations of them, could adversely affect our business, cash flows, financial condition and results of operations. For instance, during from Fiscal 2023 until September 30, 2025, there have been 18 instances where the Company paid late submission fees as it was unable to make the filing of Form DI within the stipulated timeline in relation to downstream investments undertaken by it as a foreign-owned or controlled company, due to reasons such as technical issues, delay in compilation of necessary documents to be submitted as part of such filings. The Company has incurred ₹0.19 million as late submission fees in relation to delayed filings during such period.

Further, we are also subject to laws governing foreign exchange and foreign investment such as Foreign Exchange Management Act, 1999, along with the rules, regulations and notifications made by the Reserve Bank of India thereunder, and the consolidated FDI Policy, effective from October 15, 2020, issued by the DPIIT, the Foreign Trade (Development and Regulation) Act, 1992. For details, see “*Key Regulations and Policies in India - Foreign investment and trade regulations*” on page 351. Additionally, as a foreign-owned or controlled company, we may be subject to increased compliance and reporting requirements under such foreign exchange laws including in relation to downstream investments undertaken by us in our Subsidiaries or otherwise. If we are unable to comply with such requirements, we may be restricted in our ability to undertake downstream investments in the future which could adversely affect our business, cash flows, financial condition and results of operations.

52. We track certain operational and financial metrics which have not been disclosed by our peers, and investors may not be able to compare our performance with that of our peers.

In evaluating our performance and strategic positioning, we rely on peer company metrics to benchmark and assess relative performance within the industry. However, there may be instances where such peer company metrics are unavailable or insufficient for meaningful comparison. For example, we have not disclosed (i) C&I metrics of our peer companies (such as C&I Operational Capacity and number of C&I customers) as peers either don’t track or disclose these metrics, (ii) onsite related metrics, such as Plant Load Factor (trailing 12 months) Solar Onsite (DC PLF), as this business is different from our peer companies, (iii) EPC related metrics that are represented in our segmental reporting of Renewable Energy Services, such as Revenue from Operations, Gross Margin%, EBITDA by Segment, as some peers may not have in-house EPC services, and (iv) certain other metrics for which different computation methods are followed in the industry. The reasons for this could be for various reasons, including but not limited to, unique business model, rapidly evolving industry, or some of our peers are private companies. The absence of peer company metrics may impede your ability to fully assess our competitive position, operational efficiency, and market potential.

53. Our international operations subject us to various risks, including unfavourable regulatory, political, currency, tax and labour conditions, which could harm our business, prospects, financial condition, results of operations and cash flows.

We offer STU-Connected farms in eleven states in India and Onsite Solar across 21 states and union territories in India, and in Dubai, Bahrain and Thailand, as of July 31, 2025. The following table sets forth a breakdown of revenue from our operations in India and our international operations for the periods indicated.

Particulars	For the six months ended September 30,				Fiscal					
	2025		2024		2025		2024		2023	
	Amount (₹ million)	(% of revenue from operatio ns)	Amount (₹ million)	(% of revenue from operatio ns)	Amount (₹ million)	(% of revenue from operatio ns)	Amount (₹ million)	(% of revenue from operatio ns)	Amount (₹ million)	(% of revenue from operatio ns)
Within India	8,796.95	94.39%	6,423.67	94.96%	14,175.54	94.78%	12,705.84	91.42%	8,428.51	90.67%
Outside India ⁽¹⁾	532.58	5.71%	340.99	5.04%	781.47	5.22%	1,192.53	8.58%	867.31	9.33%
Revenue from operations	9,329.53	100.00%	6,764.66	100.00%	14,957.01	100.00%	13,898.37	100.00%	9,295.82	100.00%

Note:

(1) Comprises Dubai, Thailand and Bahrain.

As part of our business strategy, we may expand our operations in the international markets to better serve our customers’ demands for our services with respect to their international operations. Expanding our operations in international markets or expanding into new ones require close coordination of activities across multiple jurisdictions and time zones and consumes significant management resources. We will be subject to a number of risks associated with international business activities that may increase our costs and require significant management attention, which, if not properly managed, may adversely affect our business, results of operations, cash flows, profitability and reputation. These risks include:

- compliance with local business, environmental, safety, health and other labour laws and regulations, which can be onerous and costly as the magnitude and complexity of, and continual amendments to, those laws and regulations are difficult to predict, and the liabilities, costs, obligations and requirements associated with these

laws and regulations can be substantial;

- dependence on governments, utility companies and other entities for electricity, water, telecommunications, transportation and other utilities or infrastructure needs;
- difficulties with local operating and market conditions, particularly regarding customs, taxation and labour;
- difficulties in organizing a skilled workforce for efficient execution of our business including processing visas or entry permits quickly and repeatedly for our personnel;
- economic and financial conditions, including the stability of credit markets, foreign currency fluctuations and controls, particularly the ability to repatriate funds to India and other countries;
- expenditures related to foreign lawsuits and liability;
- changes in government regulations, policies, tax, subsidies and incentives, including transfer pricing rules; and
- United States and foreign government trade restrictions, tariffs and price or exchange controls;
- difficulties protecting or procuring intellectual property rights; and
- political risks, risks of expropriation and nationalization of assets, potential losses due to civil unrest, acts of terrorism and war, regional and global political or military tensions, natural disasters, strained or altered foreign relations and protectionism.

If we fail to successfully address these risks, our business, results of operations, cash flows, profitability and reputation could be materially harmed.

54. If we are unsuccessful in implementing our growth strategies, which include strategic co-investments, and future collaborations, our business, cash flows, financial condition, and results of operations may be adversely affected.

The success of our business depends greatly on our ability to effectively implement our strategies, including our strategic co-investments. Please refer to “*Our Business – Our Strategies*” on page 312. Even if we have successfully executed our business strategies in the past, we cannot assure you that we will be able to execute our strategies on time and within the estimated budget, or that we will achieve expected results. We expect our strategies to place significant demands on our management and other resources and require us to continue developing and improving our operational, financial and other internal controls as well as technology systems. We may be unable to sustain such growth in revenues and profits or maintain a similar rate of growth in the future. If we are unable to implement our growth strategy effectively, our business, cash flows, financial condition and results of operations may be adversely affected. We have pursued, and may continue to pursue, acquisitions, collaborations as part of our growth strategy. Any future acquisition, co-investment partnership or joint venture may result in liabilities from the acquired companies and significant transaction costs or involve internal restructuring within our Group, and may also present new risks associated with entering additional markets or offering new products or services and integrating the acquired companies or newly established partnerships or joint ventures. Moreover, we may not have sufficient management, financial, and other resources to integrate companies we acquire or to successfully operate partnerships or joint ventures, and we may be unable to profitably operate our expanded company structure. Additionally, any new business that we may acquire or partnerships or joint ventures we may form, once integrated with our existing operations, may not produce the expected or intended results.

55. We are subject to credit and performance risks from third party suppliers and contractors.

We enter into contracts with third-party suppliers of equipment, land aggregators, materials and other goods and services for the development, construction and operation of our projects as well as for other business operations. While we maintain a diversified set of vendors, we remain subject to the risk that vendors will not perform their obligations. If our vendors do not perform their obligations, or if they deliver any components that have a manufacturing defect or do not comply with the specified quality standards and technical specifications, it may result in a material breach of the relevant supply agreement. While we may be able to make a claim against the applicable warranty to cover all or a portion of the expense of losses associated with the defective product, such claims may not be sufficient to cover all of our expenses and losses. In addition, these suppliers could cease operations and no longer honour the warranties, which would leave us to cover the expense and losses associated with the defective products. If our third-party providers are unable to perform their obligations, including due to bankruptcy, winding up or any injunction, we may incur additional costs in finding a replacement service provider or experience significant delays in performing our related obligations.

Contractors and suppliers in our projects are generally subject to liquidated damages for failure to achieve timely completion or for performance shortfalls. Our O&M contractors may fail to plan their operational strategy for the complete lifecycle of a given project, which could potentially create problems such as an inability to service turbines or solar modules over the project lifecycle, or failure to maintain the required site infrastructure or adequate resources at project sites. If our O&M contractors

fail to perform as required under O&M agreements, affected projects may experience decreased performance, reduced useful life or shutdowns, any of which may adversely affect our operational performance, financial condition and results of operations. In addition, we outsource certain EPC services to third party service providers, while the rest is done in-house. Liquidated damages payable under third-party EPC services and O&M contracts are generally limited to a specified amount or a percentage of the contract price of the annual fees payable. As a result, the damages recovered from defaulting vendors may not be sufficient to cover our losses.

While we have not experienced any failure by our third party suppliers or contractors to perform their contractual obligations so as to materially and adversely affect our business or results of operations in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, there is no assurance that such issues will not arise in the future.

56. *Our inability to protect or use our intellectual property rights may adversely affect our business.*

Our Company has 35 registered trademarks under the Trademarks Act, 1999 under class 4, 6, 7, 9, 11, 35, 37, 39, 40, 42, and 45. In addition to the domain name “www.cleanmax.com”, we own ten internet domain names which we use in the operation of our business. The use of our name “CleanMax” and logo is vital to our competitiveness and success and for us to attract and retain our clients and business partners. Any improper use or infringement by any party could adversely affect our business, cash flows, financial condition and results of operations. We cannot assure you that the measures we have taken will be sufficient to prevent any misappropriation of our intellectual property. Enforcement of any intellectual property rights could be time consuming and costly. For instance, the application for one of our trademarks was objected by the Registry of Trademarks, Mumbai, to which our Company has submitted a reply. The Registrar of Trade Marks was not satisfied with our reply and has set our application for hearing. While we have not been subject to any material intellectual property claims or unauthorized usage of our intellectual property by third parties in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, there is no assurance that such issues will not arise in the future.

57. *We may be subject to labour unrest or stoppages or increased labour costs, and any disputes with our workforce could adversely affect our business, cash flows, financial condition and results of operations.*

The success of our operations depends on the availability of labour and our ability to maintain a good relationship with our workforce. Any labour unrest including labour disputes, strikes and lockouts or industrial accidents experienced by us could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. In the event of any prolonged delay or disruption, our business, cash flows, financial condition and results of operations could be materially and adversely affected. Efforts by our employees to modify compensation and other terms of employment may also divert management’s attention and increase operating expenses or lead to production delays. While none of our employees were members of labour unions, as of March 31, 2025, if our workers join labour unions in the future, we may face higher employee costs, operational restrictions and increased disruptions to operations. While we have not experienced any disruptions in our operations due to disputes or other problems with our workforce in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, there is no assurance that such problems will not arise. The occurrence of such events could materially and adversely affect our business, financial condition and results of operations.

We also depend on our third party suppliers and contractors for the operation of our business. Any work stoppages or strikes experienced by them could also cause disruptions to our business. In particular, our onsite projects comprise majorly of solar panels installed on rooftops as well as ground mounted. During operations, such projects require constant module cleaning on a periodic basis. This is a labour-intensive activity and inability to arrange for suitable manpower for cleaning due to labour unrest or other results could result in reduced power generation. In addition, while we do not engage third-party workforces directly, it is possible under Indian law that we may incur principal employer obligations and be held responsible for statutory compliances including timely wage payments to labourers engaged by contractors should the contractors default on wage payments. While we have not been held responsible for any material non-compliances by our contractors in the six months ended September 30, 2025 and Fiscals 2025, 2024, and 2023, any such instances including requirements to fund wage payments may adversely affect our results of operations.

58. *We rely on our technology infrastructure and any disruptions to our technology infrastructure could have a material adverse effect on our business operations, reputation and prospects.*

We rely on our technology infrastructure to operate our projects and manage or support a variety of business processes and activities. For instance, we use O&M technologies such as central monitoring systems, global operations centre/ remote monitoring through SCADAs. We also use O&M technologies such as thermal imaging, dust detection systems, string monitoring, wind turbine generator (“WTG”) vibration and real time power curve monitoring. We plan to invest in digital tools and analytics to enhance real-time asset monitoring, including Supervisory Control and Data Acquisition (“SCADA”) based control systems, predictive maintenance platforms, and our centralized global operations centre. We seek to achieve industry-leading levels of availability, performance ratio, and PLF across technologies. We also plan to further strengthen our in-house capabilities in wind turbine generator monitoring, O&M integration, and lifecycle performance optimization for long-term asset reliability. Our technology infrastructure is susceptible to damage, disruptions or shutdowns due to failures of various components, power outages, hardware failures, computer viruses, cybersecurity attacks, security breaches or other

catastrophic events. While we have not faced instances of technology failures in the six months ended September 30, 2025 and Fiscals 2023, 2024 and 2025, any material disruption to or malfunction of our technology infrastructure may result in data loss and adversely affect our business operations, prospects, reputation, results of operations and financial conditions.

59. We had contingent liabilities as of September 30, 2025 and March 31, 2025. If our contingent liabilities materialize, it may affect our results of operations, financial condition and cash flows.

The following table sets forth details of our contingent liabilities as of September 30, 2025 and March 31, 2025:

Particulars	As of September 30, 2025	As of March 31, 2025
	(in ₹ million)	(in ₹ million)
Claims against the group not acknowledged as debt		
Income tax	903.66	903.65
Goods and service tax	1,063.75	852.47

The following table provides our net worth and contingent liability as a percentage of our total net worth for the periods indicated:

Particulars	As at September 30,		Fiscal		
	2025	2024	2025	2024	2023
Contingent liability (₹ million)	1,967.41	1,014.48	1,756.12	1,034.74	835.37
Net worth (₹ million)	25,983.38	22,983.31	25,454.39	18,179.62	12,099.33
% of Net worth (%)	7.57%	4.41%	6.90%	5.69%	6.90%

See note 39 of Restated Consolidated Financial Information on page 642. If a significant portion of these liabilities materialize, it could have an adverse effect on our business, cash flows, financial condition and results of operations. Moreover, our future contingent liabilities (if any) may crystallize and become actual liabilities. In the event that any of our future contingent liabilities become actual liabilities, our business, financial condition, cash flows and results of operations may be adversely affected.

60. Our Promoters, will continue to exercise significant influence on account of its shareholding over our Company even after completion of the Offer and its interests may differ from those of the other shareholders.

As on the date of this Prospectus, our Promoters, hold in aggregate 59,322,718 Equity Shares of face value of ₹1 each, which constitutes 55.78% on a fully diluted basis of the issued, subscribed and paid-up Equity Share capital of our Company. For further details of the shareholding of our Promoters in our Company, see “Capital Structure - History of the share capital held by our Promoters” on page 140. After the completion of the Offer, our Promoters will exercise influence over our business policies and affairs and all matters requiring shareholders’ approval, through its shareholding. Subject to receipt of shareholders’ approval, the Promoters may exercise influence over the affairs of the Company after the Offer including by way of the inter-se agreement dated July 30, 2025 entered into by and between Kuldeep Jain, Nidhi Jain, KEMPINC LLP, Pratap Jain, Rikhab Investments B.V., BGTF One Holdings (DIFC) Limited, Augment India I Holdings, LLC and DSDG HOLDING APS. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of these shareholders. The interests of our Promoters as our controlling shareholders could conflict with our interests or the interests of our other shareholders. Any conflicts of interest or inability to resolve such conflict in our favour may adversely affect our ability to execute our business strategy or to operate our business smoothly. For further information in relation to the interests of our Promoters in our Company, please see “Our Promoters and Promoter Group” and “History and Certain Corporate Matters – Shareholders’ agreements and other material agreements - Key terms of all subsisting shareholders agreements and investment agreements - Inter-se agreement dated July 30, 2025 entered into by and between Kuldeep Jain, Nidhi Jain, KEMPINC LLP, Pratap Jain, Rikhab Investments B.V., BGTF One Holdings (DIFC) Limited, Augment India I Holdings, LLC and DSDG HOLDING APS” on pages 543 and 371, respectively. See also “—Conflicts of interest may arise among us and other affiliates of Brookfield in course of the growth of our business” on page 61.

61. We track certain operational and non-GAAP metrics with internal systems and tools that are not independently verified by third parties. Certain of our operational metrics are subject to inherent challenges in measurement and any real or perceived inaccuracies in such metrics may adversely affect our business and reputation.

Certain of our operational metrics, including C&I Operational Capacity, Contracted yet to be executed Capacity and Plant Load Factor (trailing 12 months), as well as other non-GAAP metrics are prepared with internal systems and tools that are not independently verified by any third party and which may differ from estimates or similar metrics published by third parties due to differences in sources, methodologies, or the assumptions on which we rely. Our internal systems and tools may prove to have limitations and our methodologies for tracking these metrics may change over time, which could result in unexpected changes to our metrics, including the metrics we publicly disclose. If the internal systems and tools we use to track these metrics under count or over count performance or contain algorithmic or other technical errors, the data we report may not be accurate. While these numbers are based on what we determine to be reasonable estimates of our metrics for the applicable period of

measurement, there are inherent challenges in measuring how our platform is used across large populations. Limitations or errors with respect to how we measure data or with respect to the data that we measure may affect our understanding of certain details of our business, which could affect our long-term strategies. If our operating metrics are not accurate representations of our business, if investors do not perceive our operating metrics to be accurate or if we discover material inaccuracies with respect to these figures, we expect that our business, reputation, financial condition, cash flows and results of operations would be adversely affected.

Further, these operational measures and other non-GAAP measures presented in this Prospectus, such as Gross Margin, Adjusted EBITDA of the Segment (%), Debt (net off liquid assets), Cash ROIC, Net Worth, among others as listed in “*Management’s Discussion and Analysis of Financial Condition and Results of Operations –Non-GAAP Measures*” on page 838, are supplemental measures of our performance and liquidity that is not required by, or presented in accordance with, Indian accounting standard (“**Ind AS**”), Indian GAAP, international financial reporting standards (“**IFRS**”) or U.S. GAAP. Further, these measures and non-GAAP measures are not a measurement of our financial performance or liquidity under Ind AS, Indian GAAP, IFRS or U.S. GAAP and should not be considered in isolation or construed as an alternative to cash flows, profit/(loss) for the period/year or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Ind AS, Indian GAAP, IFRS or U.S. GAAP. In addition, these non-GAAP measures are not standardised terms, hence a direct comparison of these non-GAAP measures between companies may not be possible. Other companies may calculate these non-GAAP measures differently from us, limiting its usefulness as a comparative measure. Although these non-GAAP measures are not a measure of performance calculated in accordance with applicable accounting standards, our management believes that they are useful to an investor in evaluating us, as these measures are widely used to evaluate an entity’s operating performance.

62. *We cannot assure payment of dividends on the Equity Shares in the future.*

Our Company has not declared dividends on the Equity Shares or Preference Shares since incorporation. While the declaration of dividends is at the discretion of our Board and subject to Shareholder approval as set out in the section “*Dividend Policy*” beginning on page 549, the amount of future dividend payments by our Company, if any, will depend on a number of internal factors, including but not limited to, our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and any other factor which is deemed fit by our Board, and external factors, including but not limited to applicable laws and regulations, regulatory changes and prevalent market practices or any other external factors which may be deemed fit by our Board. We may decide to retain all of our earnings to finance the development and expansion of our business, or for any other purposes which may be considered by the Board subject to compliance with the provisions of the Companies Act, and therefore, we may not declare dividends on the Equity Shares. Additionally, we may, in the future, be restricted by the terms of our loan agreements to make any dividend payments unless otherwise agreed with our lenders. We cannot assure you that we will be able to pay dividends on the Equity Shares at any point in the future. Further, our Subsidiaries are separate and distinct legal entities, having no obligation to pay dividends and may be restricted from doing so by law or contract, including applicable laws, charter provisions and the terms of their financing arrangements. We cannot assure you that our Subsidiaries will generate sufficient profits and cash flows or otherwise be able to pay dividends to us in the future.

63. *Certain sections of this Prospectus contain information from the CRISIL Report which has been exclusively commissioned and paid for by us in relation to the Offer and any reliance on such information for making an investment decision in this offering is subject to inherent risks.*

For industry related data in this Prospectus, we have derived the information from the report titled “*Assessment of Indian Corporate Renewable Power Market*” dated December 2025, (the “**CRISIL Report**”) prepared and issued by Crisil Intelligence, which we commissioned and paid for, exclusively for the purpose of this Offer. The data included herein includes excerpts from the CRISIL Report and such excerpts may have been re-ordered by us for the purposes of presentation. There are no parts, data or information which may be relevant for the proposed Offer, that has been left out or changed in any manner. The information is subject to various limitations, highlights certain industry and market data relating to us and our competitors which may not be based on any standard methodology and is based upon certain assumptions that are subjective in nature. CRISIL is an independent agency and not, in any manner, related to the Company, its directors, its key managerial personnel, members of the senior management or the book running lead managers appointed in relation to the Offer. Accordingly, investors should read the industry related disclosures in this Prospectus in this context. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. Further, the CRISIL Report is not a recommendation to invest/disinvest in any company covered in the CRISIL Report. Accordingly, investors should not place undue reliance on or base their investment decision solely on this information. Investors may not be able to seek legal recourse for any losses resulting from undertaking any investment in this offering pursuant to reliance on the information in this Prospectus based on, or derived from, the CRISIL Report. Investors should consult your own advisors and undertake an independent assessment of information in this Prospectus based on, or derived from, the CRISIL Report before making any investment decision regarding this offering. For further details, see “*Certain Conventions, Use of Financial Information and Market Data and Currency of Presentation – Industry and Market Data*” on page 42.

64. Our Company has issued Specified Securities during the preceding twelve months at a price that may be below the Offer Price.

Our Company has in the 12 months preceding the filing of this Prospectus, issued Equity Shares at prices that may be lower than the Offer Price. Please see “*Capital Structure – Issue of specified securities at a price lower than the Offer Price in the last year*” on page 136. Specifically, on February 6, 2026, our Company allotted 2,819,548 Equity Shares of face value ₹1 each at a price of ₹1,053 per Equity Share (including a premium of ₹1,052 per Equity Share), aggregating to ₹2,968.98 million by way of a Pre-IPO Placement. The price at which Equity Shares have been issued by our Company in the preceding one year, including the issuance through the Pre-IPO Placement, could be higher/lower/equal to the Offer Price and the prices at which Equity Shares were issued by us in the past should not be taken to be indicative of the price at which they will be issued or traded after listing.

65. Certain of our Promoters, Directors, Key Managerial Personnel members of Senior Management have interests in our Company in addition to their remuneration and reimbursement of expenses.

Certain of our Directors, KMPs and members of Senior Management are interested in our Company to the extent of their respective shareholding in our Company by way of Equity Shares and/or ESOPs, as applicable held by them, loans availed by certain KMPs and the transactions mentioned in “*Summary of the Offer Document – Summary of related party transactions*” on page 26, directorships in our subsidiaries, bonus or other similar distributions, including Equity Shares. See “*Our Management – Interest of Directors*”, and “*Our Management – Interests of Key Managerial Personnel and Senior Management*” on pages 528 and 541, respectively. For details on the interests of our Directors and Key Managerial Personnel, other than reimbursement of expenses incurred or normal remuneration or benefits, see “*Our Management – Interest of Directors*” and “*Our Management – Interests of Key Managerial Personnel and Senior Management*” on pages 528 and 541, respectively. Our Promoters are interested in our Company to the extent: (i) that they have promoted our Company; (ii) of their direct and indirect shareholding in our Company and to the extent of the shareholding held by their relatives in our Company, directly and indirectly; (iii) of the dividend payable, if any and any other distributions in respect of the Equity Shares held by them in our Company, directly or indirectly, from time to time; and (iv) directorships held by them in our Company or our Subsidiary, and remuneration payable to them in this regard. See “*Our Promoters and Promoter Group – Interest of our Promoters*” on page 545. If any conflict of interests arise, such situations may adversely affect our business, financial condition and results of operations.

66. Fluctuations in foreign currency exchange rates may negatively affect our obligation to foreign current indebtedness and could result in exchange losses.

Our functional currency is the Indian rupee and our revenue and operating expenses are denominated primarily in Indian rupees. However, some of our other obligations, including repatriating returns to India from our offshore onsite operations in Thailand, Dubai and Bahrain. Certain under-construction projects, particularly ISTS-connected projects with international customers, involve USD-denominated revenues and borrowings, including interest payments. However, a portion of our costs - especially those related to project development and construction, such as EPC costs and O&M expenses - are denominated in Indian Rupees (INR). Although the Group enters into derivative contracts to hedge foreign currency transactions, such hedges may not be perfect and would typically provide protection only up to specific INR/USD exchange rates and over defined repayment periods. Further, our foreign exchange risk also arises on account of repatriating returns to India from our offshore onsite projects, which could be impacted by currency depreciation or changes in capital controls. Majority of our cash flows are generated in Indian rupees and in spite of hedging our foreign currency exposure, any significant depreciation of the Indian rupee relative to foreign currencies could substantially increase our foreign exchange loss and adversely affect our profitability. Accordingly, our currency hedge arrangements may not be adequate if the INR/USD exchange rates move beyond these hedge limits. We cannot assure you that we will be able to reduce our foreign currency risk exposure, through the hedging transactions we have already entered into or will enter into, in an effective manner, at reasonable costs, or at all. In addition, we may incur additional costs when rolling over hedges after the expiry of our hedging contracts due to illiquidity for long tenor hedges which could significantly affect our business, cash flows, financial condition and results of operations. Although, as of September 30, 2025, the Group’s transactions in other foreign currencies are not significant, there is no assurance that this will continue in the future. The following table details the Group’s sensitivity to a 5% increase and decrease in the Rupee against US Dollar and Euro.

Particulars	% of change in exchange rates	Effect on Profit / (Loss) before tax	Effect on Pre-tax Equity
September 30, 2025			
Increase in Rupee against the foreign currencies	5%	1.20	1.20
Decrease in Rupee against the foreign currencies	5%	(1.20)	(1.20)

EXTERNAL RISKS

67. Any downturn in the macroeconomic environment in India, including increasing inflation, could adversely affect our business, results of operations, cash flows, financial condition and profitability.

Our Company is incorporated in India, and we derive the majority of our revenue from operations in India and our assets are primarily located in India. As such, our financial performance depends significantly on the condition of the Indian economy, which can impact our customers' ability to offtake energy and make timely payments. Factors that may adversely impact the Indian economy, and hence our results of operations, include:

- any exchange rate fluctuations, imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian companies and customers;
- changes in political environment on account of elections;
- changes in laws or regulatory environment;
- political instability, terrorism or military conflict in India or in countries in the region or globally;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements, which may in turn adversely impact our access to capital, fund raising avenues and increase our borrowing costs;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges; and
- any decline in India's foreign exchange reserves which may affect liquidity in the Indian economy.

Additionally, increasing inflation in India could cause a rise in the costs of rent, wages, raw materials and other expenses. As of September 30, 2025 majority of our project borrowings is at floating interest rates. If the interest rates of our existing or future project borrowings, availed by our Company or our Subsidiaries, increases significantly, our cost of funds will increase. The GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our users, whether entirely or in part, and may adversely affect our business and financial condition. If we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows. Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could reduce demand for our services and generally adversely affect our business, results of operations, cash flows and financial condition as well as price of the Equity Shares. Any future downturn in the macroeconomic environment in India could have a material and adverse impact on our business, results of operation, cash flows and financial condition.

68. Changing laws, rules and regulations in India and legal uncertainties including any adverse application of corporate and tax laws, may adversely affect our business, cash flows, prospects and results of operations.

The regulatory and policy environment in which we operate is evolving and is subject to change. The Government of India ("GoI") may implement new laws or other regulations and policies that could affect the renewable energy industry, which could impose additional compliance requirements, require new approvals or licenses or otherwise increase our costs.

For example, the Government of India has introduced the Occupational Safety, Health and Working Conditions Code, 2020, the Industrial Relations Code, 2020, the Code on Wages, 2019, the Code on Social Security, 2020 ("**Labour Codes**") which consolidate, subsume, amend and replace numerous existing central labour legislations. These Labour Codes (*barring certain provisions*) have been brought into effect, through a notification, from November 21, 2025. For further details, see "*Key Regulations and Policies in India – Labour related Regulations*" on page 352. We are yet to determine the impact of all or some such laws on our business and operations which may restrict our ability to grow our business in the future. Further, Parliament passed the Digital Personal Data Protection Act on August 9, 2023 ("**DPDP Act**") to replace the existing data protection provision, as contained in Section 43A of the IT Act. Further, the Government of India has also recently notified the Digital Personal Data Protection Rules, 2025, under the DPDP Act, vide a notification dated November 13, 2025. The implementation of such laws can increase our employee and labour costs and data security and compliance related costs thereby adversely impacting our results of operations, cash flows, business, and financial performance.

Unfavourable changes in the applicability, implementation, or interpretations of existing, or new laws, rules and regulations — including foreign investment laws — could result in us being deemed non-compliant, require us to obtain additional approvals,

or otherwise increase our compliance burden. The uncertainty and complexity of new or amended laws, as well as the lack of administrative or judicial precedent, may require significant management time and resources to address and could materially and adversely affect our business, results of operations, financial condition, cash flows and prospects.

69. *Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business, financial condition, and results of operations.*

Natural disasters, such as typhoons, droughts, flooding and earthquakes, as well as fires, epidemics, pandemics such as COVID-19, highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and man-made disasters such as acts of war, terrorist attacks, civil unrest, geopolitical uncertainty, such as the Russia-Ukraine war and the Israel-Gaza conflict, and other events, many of which are beyond our control, may lead to economic instability, including in India, Thailand, the Middle East or globally, which may in turn materially and adversely affect our business, results of operations, cash flows and financial condition. Our operations and employees are located in India, Thailand and the Middle East and there can be no assurance that we will not be affected by natural disasters in such countries in the future. Further, our operations may be adversely affected by fires, natural disasters and/ or severe weather, which can result in damage to our projects, and generally reduce our productivity and may require us to evacuate personnel and suspend operations. For example, the transmission lines connecting our wind and solar farms may get damaged due to excessive rainfall, floods, cyclones, etc. which may lead to a disruption in generation. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could also have a negative effect on us. Such incidents could create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

70. *Land is subject to compulsory acquisition or eminent domain by governments and regulatory authorities and compensation in lieu of such acquisition may be inadequate.*

The right to own property in India is subject to restrictions that may be imposed by the Government. In particular, the Government under the provisions of the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 (“**Land Acquisition Act**”) has the right to compulsorily acquire any land if such acquisition is for a “public purpose,” after providing compensation to the owner. While we have not experienced any instances of compulsory land acquisition or eminent domain by any governmental or regulatory authorities in the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, there is no assurance that such occurrences will not occur in the future. In the event that our land or properties are subject to compulsory land acquisition or eminent domain, in the future, the compensation paid pursuant to such acquisition may not be adequate to compensate the owner for the loss of such property. The likelihood of such acquisitions may increase as central and state governments seek to acquire land for the development of infrastructure projects such as roads, railways, airports and townships. Additionally, we may face difficulties in interpreting and complying with such legislative provisions due to limited jurisprudence on them or if our interpretation differs from or contradicts any judicial pronouncements or clarifications issued by governments or regulatory authorities. In the future, we may face regulatory actions, or we may be required to undertake remedial steps. Any such action in respect of any of the projects in which we are investing or may invest in the future may adversely affect our business, financial condition, results of operations or cash flows.

71. *A downgrade of the debt ratings of India by a domestic or international rating agency may affect the trading price of the Equity Shares.*

India’s sovereign debt rating could be downgraded due to several factors, including changes in tax or fiscal policy or a decline in India’s foreign exchange reserves, all which are outside the control of our Company. Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional external financing, and the interest rates and other commercial terms at which such additional financing is available. Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. India’s sovereign rating improved from Baa3 with a “negative” outlook to Baa3 with a “stable” outlook by Moody’s in October 2021 and improved from BBB- with a “negative” outlook to BBB- with a “stable” outlook by Fitch in June 2022; and DBRS confirmed India’s rating as BBB “low” in May 2023. India’s sovereign rating from S&P is BBB with a “stable” outlook in 2010, and the outlook was revised by S&P to “positive” in August 2025. As of May 2025, India gets upgraded to “BBB” with a “stable” trend in rating by DBRS. Any further adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any overseas additional financing. A downgrading of India’s credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business, cash flows and financial performance and the price of our Equity Shares.

72. *International actions including trade sanctions could materially and adversely affect our supply chain and business.*

Our business partners and major suppliers may be affected by significant geopolitical events, changes in laws or regulations, public health issues, and export and re-export restrictions, which in turn may reduce their ability to procure the necessary components for the production and delivery of their goods and services for us. For example, in May 2019, the U.S. government added several Chinese companies, including one of our major solar inverter suppliers, to the “Entity List” under the Export

Administration Regulations. The Export Administration Regulations prohibit or impose licensing requirements on companies in relation to directly or indirectly exporting, re-exporting or transferring certain U.S.-origin goods and technologies, and goods and services containing a significant portion of such U.S.-origin goods and technologies, to companies within the Entity List. The U.S. Department of Commerce is actively adding new companies to the Entity List. While our projects have been operational, prolonged restrictions against any of our business partners and suppliers could disrupt our supply chain and affect our ability to continue obtaining products and services required to continue our operations and businesses. If we are unable to obtain adequate alternative supplies of equipment or services in a timely manner or at acceptable commercial and pricing terms, the operation of our projects and business may be materially and adversely affected. Similar or more expansive restrictions that may be imposed on our business partners and suppliers by the U.S. or other jurisdictions in the future may also adversely affect our business partners and suppliers, which in turn may materially and adversely affect our business.

73. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Currencies of a few Asian countries have in the past suffered depreciation against the U.S. Dollar owing to various factors. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. These developments, or the perception that any related developments could occur, have had and may continue to have a material adverse effect on global economic conditions and financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operations and reduce the price of the Equity Shares.

74. *Significant differences exist between Ind AS and other accounting principles, such as IFRS and U.S. GAAP, which may be material to investors' assessments of our financial condition, result of operations and cash flows.*

Our Restated Consolidated Financial Information for the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023, included in this Prospectus, have been derived from the audited financial statements of the Group for the six months ended September 30, 2025 and Fiscals 2025, 2024 and 2023 prepared in accordance with Ind AS and the relevant provisions of the Companies Act, 2013 and other accounting principles generally accepted in India. These financial statements have been restated in accordance with the Companies Act, SEBI ICDR Regulations and the Guidance Note on Reports in Company's Prospectuses (Revised 2019) issued by the ICAI. Ind AS differs from accounting principles with which prospective investors may be familiar, such as Indian GAAP, IFRS and U.S. GAAP. We have not attempted to quantify the impact of U.S. GAAP or IFRS on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial information to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Ind AS financial statements, which are restated as per the Companies Act, SEBI ICDR Regulations and the Guidance Note on Reports in Company's Prospectuses (Revised 2019) issued by the ICAI, included in this Prospectus, will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should be limited accordingly.

75. *Non-resident investors are subject to investment restrictions under Indian laws which limit our ability to attract foreign investors, which may adversely impact the market price of our Equity Shares.*

Under foreign exchange regulations currently in force in India, the transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other restrictions), if they comply with the pricing guidelines and reporting requirements specified by the Reserve Bank of India ("RBI"). If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to in the Foreign Exchange Management Act, 1999 ("FEMA") and the FEMA (Non-debt Instruments) Rules, 2019, then a prior regulatory approval will be required.

In addition, pursuant to the Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the Department for Promotion of Industry and Internal Trade ("DPIIT"), the Consolidated FDI Policy Circular dated October 15, 2020, with effect from October 15, 2020 and the FEMA (Non-debt Instruments) Rules have introduced additional restrictions, particularly for investments where the beneficial owner is from a country sharing a land border with India, which now require government approval. Further, in certain emergency situations, the Government of India may impose additional foreign exchange restrictions, potentially requiring prior approval for acquisition, transfer, or repatriation of securities or related proceeds. For further information, see "*Restrictions on Foreign Ownership of Indian Securities*" beginning on page 948.

There can be no assurance that any approval required from the RBI, or any other governmental agency can be obtained on any

particular terms or at all. Therefore, our ability to raise foreign capital through foreign direct investment could be constrained by Indian law, which may adversely affect our business, financial conditions, result of operations and cash flows.

76. Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.

SEBI and the Stock Exchanges have introduced various pre-emptive surveillance measures in order to enhance market integrity and safeguard the interests of investors, including ASM and GSM. ASM and GSM are imposed on securities of companies based on various objective criteria such as significant variations in price and volume, concentration of certain client accounts as a percentage of combined trading volume, average delivery, securities which witness abnormal price rise not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net worth, price / earnings multiple, market capitalisation, etc.

Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, low trading volumes, and a large concentration of client accounts as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchanges for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchanges. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company.

77. Our ability to raise foreign capital may be constrained by Indian law.

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that any required regulatory approvals for borrowing in foreign currencies will be granted to us without onerous conditions, or at all. Limitations on foreign debt may have an adverse effect on our business growth, financial condition and results of operations.

RISKS RELATED TO THIS OFFER

78. The Offer Price of our Equity Shares, our price-to-earnings ratio and our enterprise value to EBITDA/revenue ratio may not be indicative of the trading price of our Equity Shares upon listing on the Stock Exchanges subsequent to the Offer and, as a result, you may lose a significant part or all of your investment.

Our market capitalisation has been determined based on the Offer Price which has been determined by our Company and Selling Shareholders, in consultation with the BRLMs, through the book building process, enterprise value to EBITDA (calculated as Revenue from operations minus Cost of materials consumed and cost of services minus Purchase of traded goods minus Employee benefits expense minus other expenses). The EV/EBITDA for the Fiscal 2025 is set out below.

Particulars	EV/ EBITDA Ratio at the lower end of the Price Band (number of times)	EV/ EBITDA Ratio at the higher end of the Price Band (number of times)
	<i>(In multiples, unless otherwise specified)</i>	
Based on EBITDA for Fiscal 2025	16.97	17.49

The table below provides the details of our price to earnings ratio and market capitalization to revenue from our operations at the Offer Price for the Fiscal 2025.

Particulars	Price to earnings ratio based on FY 2025 diluted EPS*	Market capitalization to revenue from our operations based on FY 2025*
	<i>(In multiples, unless otherwise specified)</i>	
Our Company	377.42*	7.14*

* Considering the Offer Price.

Further, our Offer Price, the multiples and ratio specified above may not be comparable to the market price, market capitalisation and price-to-earnings ratios of our peers and would be dependent on the various factors included under “Basis for Offer Price” beginning on page 189. Accordingly, any valuation exercise undertaken for the purposes of the Offer by our Company, in consultation with the BRLMs, would not be based on a benchmark with our industry peers. The relevant financial parameters on the basis of which Price Band will be determined, have been disclosed under “Basis for Offer Price” on page 189 and shall be disclosed in the price band advertisement. For details of comparison with listed peers, please see “Basis for Offer Price” on page 189.

79. Our Equity Shares have never been publicly traded, and after the Offer, the Equity Shares may experience price and volume fluctuations and an active trading market for the Equity Shares may not develop. Further, the Offer Price may not be indicative of the market price of the Equity Shares after the Offer.

Prior to the Offer, there has been no public market for the Equity Shares, and while our Equity Shares are expected to trade on NSE and BSE after the Offer, an active trading market on the Stock Exchanges may not develop, be sustained or be liquid after the Offer, or if such trading or liquidity develops, there can be no assurance that it will continue. If an active trading market does not develop, you may have difficulty selling any of our Equity Shares that you buy. The determination of the Offer Price will be based on various factors and assumptions and will be determined by our Company, in consultation with the BRLMs through the Book Building Process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The Offer Price will be based on numerous factors, as described in the section “Basis for Offer Price” on page 189. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, announcements by us or our competitors of new products, significant acquisitions, strategic alliances, joint operations or capital commitments, announcements by third parties or governmental entities of significant claims or proceedings against us, new laws and governmental regulations or changes in laws and governmental regulations applicable to our industry, including market conditions specific to the industry we operate in, additions or departures of key management and changes in economic and legal and other regulatory factors. Consequently, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Offer Price, or at all, and may as a result lose all or a part of your investment.

80. Investors may be subject to Indian taxes arising out of income arising on the sale of and dividend on our Equity Shares.

Capital gains arising from the sale of our Equity Shares are generally taxable in India. Any gain realized on the sale of our Equity Shares on a stock exchange held for more than 12 months is subject to long term capital gains tax in India. A securities transaction tax (“STT”) will be levied on and collected by an Indian stock exchange on which our Equity Shares are sold. Any gain realized on the sale of our Equity Shares held for more than 12 months by an Indian resident, which are sold other than on a recognized stock exchange and as a result of which no STT has been paid, will be subject to long-term capital gains tax in India. Further, any gain realized on the sale of our Equity Shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less that are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to short-term capital gains tax at a higher rate compared to the transaction where STT has been paid in India. Further, long term capital gains arising from sale of listed equity shares on which STT has been paid on transfer and at the time of acquisition (unless such acquisition was through a notified transaction) will be exempt up to ₹125,000. Capital gains arising from the sale of our Equity Shares will be exempt from taxation in India in cases where an exemption is provided under a treaty between India and the country of which the seller is a resident.

As a result, subject to any relief available under an applicable tax treaty or under the laws of their own jurisdictions, residents of other countries may be liable for tax in India, as well as in their own jurisdictions on gains arising from a sale of our Equity Shares.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while, in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015%, and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, inter alia, amended the tax regime, including a simplified alternate direct tax regime, and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and, accordingly, that such dividends are not exempt in the hands of the shareholders, and that such dividends are likely to be subject to tax deduction at source. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

India’s Union Budget for Fiscal 2025 (“**Budget**”) has amended the capital gains tax rates and amounts mentioned above, with effect from the date of announcement of the Budget. A new Income Tax Act, 2025, has also been passed by the Indian parliament to replace the Income Tax Act, 1961, which will be effective from April 1, 2026, with an aim to consolidate and amend the law relating to income tax. The Government of India announced the union budget for Fiscal 2027, following which the Finance Bill, 2026 (“**Finance Bill**”) was introduced in the Lok Sabha on February 1, 2026. The Finance Bill will be enacted once it is passed by the Indian Parliament and receives the President’s assent. The investors are advised to consult their own tax advisors to understand their tax liability as per the laws prevailing on the date of disposal of Equity Shares. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning, investing or trading in our Equity Shares. Unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations, governing our business and operations could result in us being deemed to be in contravention of such laws requiring us to apply for additional approvals.

81. *Qualified institutional buyers (“QIBs”) and Non-Institutional Bidders are not permitted to withdraw or lower the size of their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Retail Individual Investors and Eligible Employees Bidding in the Employee Reservation Portion are not permitted to withdraw their Bids after the Bid/ Issue Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower the size of their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Bidders and Eligible Employees Bidding in the Employee Reservation Portion can revise their Bids during the Bid/ Offer Period and withdraw their Bids until the Bid/ Offer Closing Date. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Offer within three Working Days from the Bid/ Offer Closing Date or such other timeline as may be prescribed under applicable law, events affecting the Bidders’ decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, any changes in our business, our results of operation or the financial condition of our Company, which may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders’ ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

82. *Fluctuation in the exchange rate of the Rupee and other currencies could have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors or to our Company, as applicable. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares, may reduce the proceeds received by Shareholders. We currently do not have any hedging agreements or similar arrangements with any counterparty to cover our exposure to any fluctuations in foreign exchange rates. The exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

83. *We cannot assure that prospective investors will be able to sell immediately on an Indian stock exchange any of our Equity Shares they purchase in the Offer.*

In accordance with Indian law and practice, final approval for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to the Offer and until our Equity Shares have been issued and allotted. Such approval will require the submission of all other relevant documents authorizing the issuance of our Equity Shares. In accordance with current regulations and circulars issued by SEBI, the Allotment of Equity Shares in this Offer and the credit of such Equity Shares to the applicant’s demat account with depository participant and listing is expected to commence within a prescribed time. Accordingly, we cannot assure you that the Equity Shares will be credited to investors’ demat accounts, or the trading in our Equity Shares will commence in a timely manner or at all and there could be a failure or delay in listing our Equity Shares on the Stock Exchanges, which would adversely affect your ability to sell our Equity Shares.

84. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, a company having share capital and incorporated in India must offer holders of its equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares who have voted on such resolutions. However, if the laws of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, you may suffer future dilution of your ownership position and your proportional interests in us would be reduced.

85. *Any future issuance of Equity Shares or securities linked to Equity Shares may dilute your shareholding, and sale of our Equity Shares by our major shareholders may also adversely affect the trading price of our Equity Shares.*

We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including to comply with minimum public shareholding requirements under the Securities Contracts (Regulation) Rules, 1957, or issuance of convertible securities or securities linked to Equity Shares by us, including through exercise of employee stock options, may lead to the dilution of investors’ shareholdings in us. There can be no assurance that we will not issue further Equity Shares or

that the Shareholders will not dispose of our Equity Shares. Any future issuances could also dilute the value of your investment in our Equity Shares. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares.

Any sales (or pledge or encumbrance) of substantial amounts of our Equity Shares in the public market after the completion of the Offer by our major shareholders, including our Promoters (subject to compliance with the lock-in provisions under the SEBI ICDR Regulations), or the perception that such sales could occur, could adversely affect the market price of our Equity Shares and materially impair our future ability to raise capital through offerings of our Equity Shares.

86. *The current market price of some securities listed pursuant to certain previous issues managed by the BRLMs is below their respective offer prices.*

The current market price of securities listed pursuant to certain previous initial public offerings managed by the BRLMs is below their respective offer prices. For further information, see “*Other Regulatory and Statutory Disclosures – Price information of past issues handled by the Book Running Lead Managers during the current Financial Year and two Financial Years preceding the current Financial Year*” on page 901. The factors that could affect the market price of our Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. We cannot assure you that an active market will develop, or that sustained trading will take place in our Equity Shares or provide any assurance regarding the price at which our Equity Shares will be traded after listing.

87. *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.*

There are provisions in Indian law that may delay, deter, or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

88. *Investors may have difficulty enforcing foreign judgments against us or our management.*

Our Company is a limited liability company incorporated under the laws of India. All of our Directors and executive officers are citizens of India. A substantial portion of our Company’s assets and the assets of our Directors and executive officers are located in India. Where investors wish to enforce foreign judgments in India, where our assets are or will be located, they may face difficulties in enforcing such judgments. While India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments, India exercises reciprocal recognition and enforcement of judgments in civil and commercial matters with a limited number of jurisdictions, including the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgment obtained in a jurisdiction which India recognizes as a reciprocating territory must meet certain requirements of the Code of Civil Procedure, 1908 (“**Civil Code**”). The Civil Code only permits the enforcement and execution of monetary decrees in the reciprocating jurisdiction, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions that do not have reciprocal recognition with India, including the United States, cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be directly enforceable in India.

The party in whose favour a final foreign judgment in a non-reciprocating territory is rendered may bring a fresh suit in a competent court in India based on the final judgment within three years of obtaining such final judgment. However, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or that an Indian court would enforce foreign judgments if it viewed the amount of damages as excessive or inconsistent with the public policy in India. In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered, and we cannot assure that such approval will be forthcoming within a reasonable period, or at all, or that conditions of such approval would be acceptable. Such amount may also be subject to income tax in accordance with applicable law.

89. *If we are classified as a passive foreign investment company for U.S. federal income tax purposes, U.S. investors in Equity Shares may be subject to adverse U.S. federal income tax consequences.*

A non-U.S. corporation will be classified as a passive foreign investment company (a “**PFIC**”) for any taxable year if either: (a) at least 75% of its gross income for such year is “passive income” for purposes of the PFIC rules or (b) at least 50% of the

value of its assets (determined on the basis of a quarterly average) during such year is attributable to assets that produce or are held for the production of passive income. For this purpose, passive income includes interest, dividends, rents, royalties and other investment income, with certain exceptions. The PFIC rules also contain a look-through rule whereby we will be treated as owning our proportionate share of the assets and earning our proportionate share of the income of any other corporation in which we own, directly or indirectly, 25 percent or more (by value) of the stock. Based on the current and anticipated composition of our income, assets (including their expected value) and operations, although not free from doubt, we do not expect to be treated as a PFIC for the current taxable year. However, our PFIC status depends, in part, on the expected value of our goodwill, which could fluctuate significantly. Whether we are treated as a PFIC is a factual determination that is made on an annual basis after the close of each taxable year. This determination will depend on, among other things, the ownership and the composition of our income and assets, as well as the value of our assets (which may fluctuate with our market capitalization), from time to time. Moreover, the application of the PFIC rules is unclear in certain respects. The IRS or a court may disagree with our determinations, including the manner in which we determine the value of our assets and the percentage of our assets that are passive assets under the PFIC rules. Therefore, there can be no assurance that the Company will not be classified as a PFIC for the current taxable year or for any future taxable year. If we are treated as a PFIC for any taxable year during which a U.S. investor held Equity Shares, such U.S. investor could be subject to adverse U.S. federal income tax consequences.

SECTION III: INTRODUCTION

THE OFFER

The following table summarizes the Offer details:

Offer of Equity Shares of face value of ₹ 1 each ^{#(1)(2)}	29,315,993 [^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 30,838.26 million ^{^*}
<i>of which:</i>	
(i) Fresh Issue ⁽¹⁾	11,425,906 [^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 12,000.00 million ^{^*}
(ii) Offer for Sale ⁽²⁾	17,890,087 [^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 18,838.26 million [^]
<i>Including</i>	
Employee Reservation Portion ⁽³⁾	314,795 [^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 300.00 million ^{^*}
<i>Accordingly</i>	
Net Offer	29,001,198 [^] Equity Shares of face value of ₹ 1 each aggregating to ₹ 30,538.26 million ^{^*}
<i>The Net Offer consists of:</i>	
A) QIB Portion⁽⁴⁾⁽⁵⁾	14,500,598 [^] Equity Shares of face value of ₹ 1 each aggregating to ₹15,269.13 million ^{^*}
<i>of which:</i>	
Anchor Investor Portion	8,746,437 [^] Equity Shares of face value of ₹ 1 each
<i>of which:</i>	
(i) Available for allocation to Mutual funds only (33.33% of the Anchor Investor Portion)	2,915,187 [^] Equity Shares of face value of ₹ 1 each
(ii) Available for allocation to Life Insurance Companies and Pension Funds only (6.67% of the Anchor Investor Portion)	583,387 [^] Equity Shares of face value of ₹ 1 each
(iii) Balance Anchor Investor Portion	5,247,862 [^] Equity Shares of face value of ₹ 1 each
- Net QIB Portion (assuming Anchor Investor Portion is fully subscribed)	5,754,161 [^] Equity Shares of face value of ₹ 1 each
<i>of which:</i>	
(i) Available for allocation to Mutual Funds only (5% of the Net QIB Portion)	287,708 [^] Equity Shares of face value of ₹ 1 each
(ii) Balance of QIB Portion for all QIBs including Mutual Funds	5,466,453 [^] Equity Shares of face value of ₹ 1 each
B) Non-Institutional Portion⁽⁷⁾	4,350,180 [^] Equity Shares of face value of ₹ 1 each aggregating to ₹4,580.74 million ^{^*}
<i>of which:</i>	
One-third of the Non-Institutional Portion available for allocation to Bidders with an application size of more than ₹ 200,000 and up to ₹1,000,000	1,450,060 [^] Equity Shares of face value of ₹ 1 each
Two-thirds of the Non-Institutional Portion available for allocation to Bidders with an application size of more than ₹1,000,000	2,900,120 [^] Equity Shares of face value of ₹ 1 each
C) Retail Portion⁽⁷⁾	10,150,420 [^] Equity Shares of face value of ₹ 1 each aggregating to ₹10,688.39 million ^{^*}
Pre-Offer and post-Offer Equity Shares	
Equity Shares outstanding prior to the Offer	105,653,268 Equity Shares of face value of ₹ 1 each
Equity Shares outstanding after the Offer	117,079,174 [^] Equity Shares of face value of ₹ 1 each
Use of Net Proceeds of the Offer	See “ <i>Objects of the Offer</i> ” beginning on page 160 for details regarding the use of Net Proceeds. Our Company will not receive any proceeds from the Offer for Sale.

[^] Subject to finalisation of rejection of Bids and Basis of Allotment.

^{*} An Employee Discount of ₹ 100 per Equity Share was offered to Eligible Employees Bidding in the Employee Reservation Portion.

[#] Our Company, in consultation with the Book Running Lead Managers, undertook a Pre-IPO Placement of Equity Shares, aggregating to ₹ 2,968.98 million, as permitted under the applicable law. The Pre-IPO Placement was at a price decided by our Company, in consultation with the Book Running Lead Managers and was completed prior to filing of the Red Herring Prospectus with the RoC. The amount raised pursuant to the Pre-IPO Placement was reduced from the Fresh Issue, subject to compliance with Rule 19(2)(b) of the SCRR and the size of the Fresh Issue has been revised to ₹ 12,000.00 million. The Pre-IPO Placement did not exceed 20% of the original size of the Fresh Issue as disclosed in the Draft Red Herring Prospectus. Our Company had appropriately intimated the subscribers to the Pre-IPO Placement, prior to allotment pursuant to the Pre-IPO Placement, that there is no guarantee that our Company may proceed with the Offer or the Offer may be successful and will result into listing of the Equity Shares on the Stock Exchanges. Further, relevant disclosures in relation to such intimation to the subscribers to the Pre-IPO Placement has been appropriately made in the relevant sections of the Red Herring Prospectus and this Prospectus.

⁽¹⁾ The Offer has been authorized by resolution of our Board of Directors at their meeting held on August 14, 2025 read with their resolutions passed at their meetings held on December 4, 2025 and February 9, 2026 and the Fresh Issue has been authorised by a special resolution passed by our Shareholders

on August 14, 2025. Our Board of Directors has taken on record the respective consent letters of each of the Selling Shareholders to, severally and not jointly, participate in the Offer for Sale pursuant to its resolution dated February 9, 2026.

- (2) Each of the Selling Shareholders, severally and not jointly, specifically confirmed that its respective portion of the Offered Shares has been offered for sale, in compliance with Regulation 8 of the SEBI ICDR Regulations. Each of the Selling Shareholders has, severally and not jointly, consented to its respective participation in the Offer for Sale to the extent of its respective portion of the Offered Shares as set out below:

Name of the Selling Shareholder	Aggregate proceeds from Offer for Sale	Number of Offered Shares	Date of board resolution/ authorization	Date of consent letter
Promoter Selling Shareholders				
Kuldeep Jain	₹ 2,149.53 million [^]	2,041,341 [^] Equity Shares of face value of ₹ 1 each	-	February 7, 2026
BGTF One Holdings (DIFC) Limited	₹ 8,962.04 million [^]	8,510,959 ^o Equity Shares of face value of ₹ 1 each	August 15, 2025	February 8, 2026
KEMPINC LLP	₹ 723.79 million [^]	687,357 [^] Equity Shares of face value of ₹ 1 each	August 14, 2025	February 7, 2026
Investor Selling Shareholders				
Augment India I Holdings, LLC	₹ 5,373.08 million [^]	5,102,639 ^o Equity Shares of face value of ₹ 1 each	August 13, 2025	February 8, 2026
DSDG HOLDING APS	₹ 1,629.82 million [^]	1,547,791 [^] Equity Shares of face value of ₹ 1 each	August 12, 2025	February 7, 2026

[^] Subject to finalisation of rejection of Bids and Basis of Allotment.

- (3) The Employee Reservation Portion did not exceed 5% of the post-Offer paid up Equity Share capital and the value of Allotment to any Eligible Employee did not exceed ₹ 200,000 (net of Employee Discount, if any). Provided that, in the event of an under-subscription in the Employee Reservation Portion post the initial Allotment, such unsubscribed portion could have been allotted on a proportionate basis to Eligible Employees Bidding in the Employee Reservation Portion, for a value in excess of ₹ 200,000 (net of Employee Discount, if any), subject to the total Allotment to an Eligible Employee not exceeding ₹ 500,000 (net of Employee Discount, if any). Eligible Employees bidding in the Employee Reservation Portion were requested to ensure that the maximum Bid Amount did not exceed ₹ 500,000 (net of Employee Discount, if any). For further details, see "Offer Procedure" and "Offer Structure" beginning on pages 928 and 923, respectively.
- (4) Subject to valid Bid having been received at or above the Offer Price, under-subscription, if any, in any category, except in the QIB Portion would be allowed to be met with spill over from any other category or combination of categories of Bidders at the discretion of our Company, in consultation with the Book Running Lead Managers, and the Designated Stock Exchange, subject to applicable laws. In the event of under-subscription in the Offer, Equity Shares would be allotted in the manner specified in the section "Terms of the Offer" beginning on page 917.
- (5) Our Company, in consultation with the BRLMs allocated 60% of the QIB Portion to Anchor Investors on a discretionary basis in accordance with the SEBI ICDR Regulations. 40% of the Anchor Investor Portion was reserved for domestic Mutual Funds, Life Insurance Companies and Pension Funds, in the following manner (i) 33.33% of the Anchor Investor Portion was reserved for domestic Mutual Funds, and (ii) 6.67% of the Anchor Investor Portion was reserved for Life Insurance Companies and Pension Funds, subject to valid Bids having been received from domestic Mutual Funds, Life Insurance Companies and Pension Funds at or above the Anchor Investor Allocation Price. In the event of under-subscription in the Anchor Investor Portion reserved for Life Insurance Companies and Pension Funds, the remaining Equity Shares would be available for allocation to domestic Mutual Funds. In the event of under-subscription or non-Allotment in the Anchor Investor Portion, the remaining Equity Shares would be added to the Net QIB Portion. Further, 5% of the Net QIB Portion was made available for allocation on a proportionate basis to Mutual Funds only, and the remainder of the QIB Portion was made available for allocation on a proportionate basis to all QIB Bidders (other than Anchor Investors), including Mutual Funds, subject to valid Bids having been received at or above the Offer Price. However, if the aggregate demand from Mutual Funds would be less than 287,708 Equity Shares of face value of ₹ 1 each, the balance Equity Shares available for allotment in the Mutual Fund Portion will be added to the QIB Portion and allocated proportionately to the QIB Bidders (other than Anchor Investors) in proportion to their Bids. For details, see "Offer Procedure" beginning on page 928. Allocation to all categories shall be made in accordance with the SEBI ICDR Regulations.
- (6) Allocation to Bidders in all categories except the Anchor Investor Portion, the Non-Institutional Portion and the Retail Portion, if any, was made on a proportionate basis subject to valid Bids having been received at or above the Offer Price, as applicable. The allocation to each RIB was not less than the minimum Bid Lot, subject to availability of Equity Shares in the Retail Portion, and the remaining available Equity Shares, if any, could have been allocated on a proportionate basis. For further details, see "Offer Procedure" beginning on page 928.
- (7) The Equity Shares available for allocation to Non-Institutional Bidders under the Non-Institutional Portion, was subject to the following: (i) one-third of the portion available to Non-Institutional Bidders was reserved for applicants with an application size of more than ₹ 200,000 and up to ₹ 1,000,000, and (ii) two-third of the portion available to Non-Institutional Bidders was reserved for applicants with application size of more than ₹ 1,000,000 provided that the unsubscribed portion in either of the aforementioned sub-categories could have been allocated to applicants in the other sub-category of Non-Institutional Bidders. The allotment to each Non-Institutional Bidder was not less than the minimum application size, subject to the availability of Equity Shares in the Non- Institutional Portion, and the remaining Equity Shares, if any, could have been allotted on a proportionate basis in accordance with the conditions specified in this regard in Schedule XIII of the SEBI ICDR Regulations.

In terms of Rule 19(2)(b) of the SCRR, the Offer was made through the Book Building Process, in compliance with Regulation 31 of the SEBI ICDR Regulations. Allocation to all categories, except the Anchor Investor Portion, Non-Institutional Portion and the Retail Portion, were made on a proportionate basis subject to valid Bids having been received at or above the Offer Price, as applicable. The allocation to each RIB and NIB was not less than the minimum Bid Lot, subject to availability of Equity Shares in the Retail Portion and the Non-Institutional Portion, respectively, and the remaining available Equity Shares, if any, could have been allocated on a proportionate basis in accordance with the conditions specified in the SEBI ICDR Regulations. Allocation to Anchor Investors was on a discretionary basis in accordance with the SEBI ICDR Regulations. For further details, see "Offer Procedure" and "Offer Structure" beginning on pages 928 and 923, respectively. For details of the terms of the Offer, see "Terms of the Offer" beginning on page 917.

SUMMARY OF RESTATED CONSOLIDATED FINANCIAL INFORMATION

The following tables provide the summary of Restated Consolidated Financial Information of the Group derived from the Restated Consolidated Financial Information as at and for the six months period ended September 30, 2025 and September 30, 2024 and Financial Years ended March 31, 2025, March 31, 2024 and March 31, 2023. The summary of financial information presented below should be read in conjunction with the “*Restated Consolidated Financial Information*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on pages 550 and 829, respectively.

(The remainder of this page has been left intentionally blank)

Experts to the Offer

Except as disclosed below, our Company has not obtained any expert opinions:

Our Company has received written consent dated February 16, 2026 from B S R & Co. LLP, Chartered Accountants, to include their name as required under section 26(5) of the Companies Act, 2013 read with the SEBI ICDR Regulations in this Prospectus, and as an "expert" as defined under section 2(38) of the Companies Act, 2013 to the extent and in their capacity as our independent statutory auditors, and in respect of (i) their examination report dated November 19, 2025, on our Restated Consolidated Financial Information; and (ii) their report dated December 4, 2025, on the statement of possible special tax benefits available to our Company and its Shareholders included in this Prospectus and such consent has not been withdrawn as on the date of this Prospectus. However, the term "expert" and "consent" does not represent an "expert" or "consent" within the meaning under the U.S. Securities Act.

Our Company has received a written consent dated February 6, 2026, from S A E Tax and Accounting Services LLC, to include their name as required under Section 26 (5) of the Companies Act, 2013 read with SEBI ICDR Regulations, in this Prospectus, and as an "expert" as defined under Section 2(38) of the Companies Act, 2013 (and not under the U.S. Securities Act) in respect of the statement of special tax benefits available to our Material Subsidiary, under direct and indirect tax in this Prospectus, and such consents have not been withdrawn as on the date of this Prospectus.

Our Company has received a written consent dated February 25, 2026, from V. Singhi & Associates, Chartered Accountants, holding a valid peer review certificate from the ICAI, to include their name as required under Section 26(5) of the Companies Act, 2013 read with SEBI ICDR Regulations in this Prospectus and as an 'expert' as defined under Section 2(38) of Companies Act, 2013 in respect of the certificates issued by them in their capacity as an independent chartered accountant to our Company, and such consent has not been withdrawn as on the date of this Prospectus.

Our Company has received a written consent dated August 16, 2025 from Multi Engineers Private Limited, Chartered Engineers, to include their name as required under Section 26(5) of the Companies Act, 2013 read with SEBI ICDR

Regulations, in this Prospectus and as an 'expert' as defined under Section 2(38) of Companies Act, 2013 in respect of the certificates issued by them in their capacity as an independent chartered engineer to our Company, and such consent has not been withdrawn as on the date of this Prospectus.

Our Company has received a written consent dated August 16, 2025 from N Kothari & Associates, Practicing Company Secretary, to include their name as required under Section 26(5) of the Companies Act, 2013 read with SEBI ICDR Regulations, in this Prospectus and as an 'expert' as defined under Section 2(38) of Companies Act, 2013 in respect of the certificates issued by them in their capacity as a practicing company secretary to our Company, and such consent has not been withdrawn as on the date of this Prospectus.

Book Building Process

Book building, in the context of the Offer, refers to the process of collection of Bids from Bidders on the basis of the Red Herring Prospectus and the Bid Cum Application Forms and the Revision Forms within the Price Band and minimum Bid Lot, which was decided by our Company in consultation with the Book Running Lead Managers, and which was notified in all editions of Financial Express, a widely circulated English national daily newspaper, all editions of Jansatta, a Hindi national daily newspaper, and Mumbai edition of Navshakti, a widely circulated Marathi daily newspaper (Marathi being the regional language of Maharashtra, where our Registered and Corporate Office is located) each with wide circulation, at least two Working Days prior to the Bid/Offer Opening Date and was made available to the Stock Exchanges for the purpose of uploading on their respective websites. The Offer Price was determined by our Company in consultation with the Book Running Lead Managers after the Bid/Offer Closing Date. For details, see "*Offer Procedure*" beginning on page 928.

All Bidders (other than Anchor Investors) were required to participate in this Offer mandatorily through the ASBA process by providing the details of their respective bank accounts in which the corresponding Bid Amount was blocked by the SCSBs. In addition to this, the UPI Bidders could have participated through the ASBA process by either (a) providing the details of their respective ASBA Account in which the corresponding Bid Amount was required to be blocked by the SCSBs; or (b) through the UPI Mechanism. Non-Institutional Investors with an application size of up to ₹ 500,000 could have used the UPI Mechanism and also provided their UPI ID in the Bid cum Application Form submitted with Syndicate Members, Registered Brokers, Collecting Depository Participants and Registrar and Share Transfer Agents. Anchor Investors were not permitted to participate in the Offer through the ASBA process. Pursuant to SEBI ICDR Master Circular, all individual bidders in initial public offerings whose application sizes are up to ₹ 500,000 have used the UPI Mechanism.

In terms of the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders were not permitted to withdraw their Bid(s) or lower the size of their Bid(s) (in terms of the number of Equity Shares or the Bid Amount) at any stage. RIBs and Eligible Employees Bidding in the Employee Reservation Portion in the Shareholder Reservation Portion could have revised their Bid(s) during the Bid/ Offer Period and withdraw their Bid(s) until the Bid/ Offer Closing Date. Anchor Investors were not allowed to withdraw their Bids after the Anchor Investor Bid/Offer Period. Except for Allocation to RIBs, Non-Institutional Bidders and the Anchor Investors, allocation in the Offer was done on a proportionate basis. Further, allocation to Anchor Investors was done on a discretionary basis.

Each Bidder by submitting a Bid in the Offer, was deemed to have acknowledged the above restrictions and the terms of the Offer.

For further details, see "*Terms of the Offer*", "*Offer Structure*" and "*Offer Procedure*" beginning on and pages 917, 923 and 928, respectively.

The process of Book Building under the SEBI ICDR Regulations and the Bidding Process are subject to change from time to time and the investors were advised to make their own judgment about investment through this process prior to submitting a Bid in the Offer.

Bidders should note that, the Offer is also subject to obtaining final listing and trading approvals of the Stock Exchanges, which our Company shall apply for after the Allotment as per the prescribed timelines in compliance with the SEBI ICDR Regulations.

For further details on the method and procedure for Bidding, see "*Offer Procedure*" beginning on page 928.

Underwriting Agreement

Our Company and each of the Selling Shareholders have entered into an Underwriting Agreement with the Underwriters and the Registrar to the Offer for the Equity Shares offered through the Offer. The Underwriting Agreement is dated February 25, 2026. Pursuant to the terms of the Underwriting Agreement, the obligations of each of the Underwriters are several and subject to certain conditions specified therein.

The Underwriters have indicated their intention to underwrite the following number of Equity Shares which they shall subscribe to on account of rejection of bids, either by themselves or by procuring subscription, at a price which shall not be less than the Offer Price, pursuant to the Underwriting Agreement:

The aforementioned underwriting commitments are indicative and will be finalised after the actual allocation in accordance with provisions of the SEBI ICDR Regulations.

In the opinion of our Board, the resources of the aforementioned Underwriters are sufficient to enable them to discharge their respective underwriting obligations in full. The aforementioned Underwriters are registered with SEBI under Section 12(1) of the SEBI Act or registered as brokers with the Stock Exchanges. Our Board, at its meeting held on February 25, 2026, approved the acceptance and entering into the Underwriting Agreement mentioned above on behalf of our Company.

Allocation among the Underwriters may not necessarily be in proportion to their underwriting commitment set forth in the table above.

Notwithstanding the above table, the Underwriters are severally responsible for ensuring payment with respect to the Equity Shares allocated to investors respectively procured by them in accordance with the Underwriting Agreement. In the event of any default in payment, the respective Underwriter, in addition to other obligations defined in the Underwriting Agreement, will also be required to procure purchasers for or purchase the Equity Shares to the extent of the defaulted amount in accordance with the Underwriting Agreement. The Underwriting Agreement had not been executed as on the date of the Red Herring Prospectus and was executed in accordance with applicable laws, after the determination of the Offer Price and allocation of Equity Shares, prior to the filing of this Prospectus with the RoC. The extent of underwriting obligations and the Bids to be underwritten in the Offer shall be as per the Underwriting Agreement.

- (1) For details in relation to the changes in the authorised share capital of our Company in the last 10 years, see "History and Certain Corporate Matters – Amendments to the Memorandum of Association" on page 364.
- (2) Our Company, in consultation with the Book Running Lead Managers, undertook a Pre-IPO Placement of Equity Shares, aggregating to ₹ 2,968.98 million, as permitted under the applicable law. The Pre-IPO Placement was at a price decided by our Company, in consultation with the Book Running Lead Managers and was completed prior to filing of the Red Herring Prospectus with the RoC. The amount raised pursuant to the Pre-IPO Placement was reduced from the Fresh Issue, subject to compliance with Rule 19(2)(b) of the SCRR and the size of the Fresh Issue has been revised to ₹ 12,000.00 million. The Pre-IPO Placement did not exceed 20% of the original size of the Fresh Issue as disclosed in the Draft Red Herring Prospectus. Our Company had appropriately intimated the subscribers to the Pre-IPO Placement, prior to allotment pursuant to the Pre-IPO Placement, that there is no guarantee that our Company may proceed with the Offer or the Offer may be successful and will result into listing of the Equity Shares on the Stock Exchanges. Further, relevant disclosures in relation to such intimation to the subscribers to the Pre-IPO Placement has been appropriately made in the relevant sections of the Red Herring Prospectus and this Prospectus.
- (3) The Offer has been authorized by resolution of our Board of Directors at their meeting held on August 14, 2025 read with their resolutions passed at their meetings held on December 4, 2025 and February 9, 2026 and the Fresh Issue has been authorised by a special resolution passed by our Shareholders on August 14, 2025. Our Board of Directors has taken on record the respective consent letters of each of the Selling Shareholders to, severally and not jointly, participate in the Offer for Sale pursuant to its resolution dated February 9, 2026. For further details, see "Other Regulatory and Statutory Disclosures" beginning on page 893.
- (4) Each of the Selling Shareholders, severally and not jointly, specifically confirmed that its respective portion of the Offered Shares were offered for sale, in compliance with Regulation 8 of the SEBI ICDR Regulations. Each of the Selling Shareholders has, severally and not jointly, consented to its respective participation in the Offer for Sale to the extent of its respective portion of the Offered Shares as set out below:

Name of the Selling Shareholder	Aggregate proceeds from Offer for Sale	Number of Offered Shares	Date of board resolution/ authorization	Date of consent letter
Promoter Selling Shareholders				

Name of the Selling Shareholder	Aggregate proceeds from Offer for Sale	Number of Offered Shares	Date of board resolution/ authorization	Date of consent letter

<i>Augment India I Holdings, LLC</i>	₹ 5,373.08 million [^]	5,102,639 [^] Equity Shares of face value of ₹ 1 each	August 13, 2025	February 8, 2026
<i>DSDG HOLDING APS</i>	₹ 1,629.82 million [^]	1,547,791 [^] Equity Shares of face value of ₹ 1 each	August 12, 2025	February 7, 2026

[^] Subject to finalisation of rejection of Bids and Basis of Allotment.

- (5) The Employee Reservation Portion did not exceed 5% of the post-Offer paid up equity share capital and the value of Allotment to any Eligible Employee did not exceed ₹ 200,000 (net of Employee Discount, if any). Provided that, in the event of an under-subscription in the Employee Reservation Portion post the initial Allotment, such unsubscribed portion could have been allotted on a proportionate basis to Eligible Employees Bidding in the Employee Reservation Portion, for a value in excess of ₹ 200,000 (net of Employee Discount, if any), subject to the total Allotment to an Eligible Employee not exceeding ₹ 500,000 (net of Employee Discount, if any). Eligible Employees Bidding in the Employee Reservation Portion were requested to ensure that the maximum Bid Amount did not exceed ₹ 500,000 (net of Employee Discount, if any). The unsubscribed portion, if any, in the Employee Reservation Portion (after allocation of up to ₹500,000), was to be added to the Net Offer. For further details, see "Offer Procedure" and "Offer Structure" beginning on pages 928 and 923, respectively.

* Our Company was incorporated on September 29, 2010. The date of subscription to the Memorandum of Association was September 24, 2010, and the allotment of equity shares of face value ₹ 10 each pursuant to such subscription was taken on record by our Board on October 3, 2010.

[^] The cash consideration for such allotments of equity shares was paid at the time of allotment of the relevant Preference Shares. Accordingly, no consideration was received at the time of such conversion.

[#] Pursuant to Board resolution and shareholder's resolution each dated July 13, 2015, Class A equity shares of face value of ₹ 10 each and Class B equity shares of face value of ₹10 were reclassified into equity shares of face value of ₹10 each. For further details, see "History and Certain Corporate Matters – Amendments to the Memorandum of Association" on page 364.

⁶ Our Company has been unable to trace certain form filings and challans for certain allotments. For further details, see, “Risk Factors – We are unable to trace certain of our historical corporate filings with respect to certain corporate records and secretarial forms filled by us with the Registrar of Companies. We cannot assure you that no legal proceedings or regulatory actions will be initiated against our Company in the future in relation to such matters, which may adversely impact our financial condition and reputation.” on page 64.

⁵ Pursuant to a certificate dated May 10, 2011, issued by Chandratre & Co., Chartered Accountants in relation to the valuation of the equity shares of face value of ₹10 each of the Company allotted to Bessemer Venture Partners Trust at an issue price of ₹531.14 per equity share.

^{**} Out of 1,391,900 Equity Shares allotted cumulatively on November 10, 2025 and November 12, 2025, pursuant to the exercise of vested options under the Clean Max ESOP Scheme, 626,460 Equity Shares, held by 11 employees has been pledged with 360 One Prime Limited pursuant to the sanction letter dated November 6, 2025. However, the Equity Shares allotted pursuant to the exercise of the vested option under the Clean Max ESOP Scheme, is not subject to a lock-in of six months in terms of Regulation 17 (a) of the SEBI ICDR Regulations.

^{***} BGTF One Holdings (DIFC) Limited and Kuldeep Jain are the Promoters of our Company.

^{ss} Our Company, in consultation with the Book Running Lead Managers, undertook a Pre-IPO Placement of Equity Shares, aggregating to ₹ 2,968.98 million, as permitted under the applicable law. The Pre-IPO Placement was at a price decided by our Company, in consultation with the Book Running Lead Managers and was completed prior to filing of the Red Herring Prospectus with the RoC. The amount raised pursuant to the Pre-IPO Placement was reduced from the Fresh Issue, subject to compliance with Rule 19(2)(b) of the SCRR and the size of the Fresh Issue has been revised to ₹ 12,000.00 million. The Pre-IPO Placement did not exceed 20% of the original size of the Fresh Issue as disclosed in the Draft Red Herring Prospectus. Our Company had appropriately intimated the subscribers to the Pre-IPO Placement, prior to allotment pursuant to the Pre-IPO Placement, that there is no guarantee that our Company may proceed with the Offer or the Offer may be successful and will result into listing of the Equity Shares on the Stock Exchanges. Further, relevant disclosures in relation to such intimation to the subscribers to the Pre-IPO Placement has been appropriately made in the relevant sections of the Red Herring Prospectus and this Prospectus.

^{##} On the date of this Prospectus, our Company has filed the FCGPR form with the RBI in relation to this allotment and is awaiting approval from the RBI.

(b) **Preference share capital**

As on the date of this Prospectus, our Company does not have any outstanding preference shares. The history of the preference share capital of our Company is set forth below:

Notes:

(1) Pursuant to a resolution passed by our Board on June 25, 2025, and by our Shareholders in their meeting held on June 27, 2025, the then issued, subscribed and paid-up capital of our Company was sub-divided from 5,072,091 equity shares of face value of ₹10 each to 50,720,910 equity shares of face value ₹ 1 each.

(2) Our Board of Directors pursuant to a resolution dated August 7, 2025, have approved the issuance of 50,720,910 bonus Equity Shares in the ratio of 1 Equity Share for every 1 Equity Share held.

1. **Issue of shares through bonus issue or for consideration other than cash or out of revaluation reserves**

Our Company has not issued any Equity Shares or Preference Shares for consideration other than cash or out of revaluation reserves or through bonus issue since incorporation. The details of the Equity Shares issued through bonus issue is as follows:

Date of allotment	Name(s) of allottee(s)	Reason/nature of allotment	No. of equity shares allotted	Face value per equity share (₹)	Issue price per equity share (₹)	Benefits accrued
August 8, 2025	25,317,800 Equity Shares to BGTF One Holdings (DIFC) Limited, 10,271,020 Equity Shares to Augment India I Holdings, LLC, 5,837,820 Equity Shares to Kuldeep Jain, 4,389,969 Equity Shares to KEMPINC LLP, 2,754,550 Equity Shares to DSDG HOLDING APS, 1,379,391 Equity Shares to Rikhab Investments B.V., 250,650 Equity Shares to Nidhi Jain, 25,000 Equity Shares to Pratap Jain, 78,110 Equity Shares to Nidhi Arora, 30,930 Equity Shares to Godrej Industries Limited, 30,930 Equity Shares to Nadir B Godrej, 18,550 Equity Shares to Rajat Gupta, 10,820 Equity Shares to Ramesh Mangaleshwaran, 15,460 Equity Shares to Jamil Ahmed Khatri, 15,460 Equity Shares to Dr. Jatin Pankaj Shah, 7,750 Equity Shares to Anish Puspasen Jhaveri, 30,930 Equity Shares to VAMM Ventures Limited, 15,460 Equity Shares to Balram Singh Yadav, 114,770 Equity Shares to Mamta Gautam Ashra, 300 Equity Shares to Priyesh, 35,050 Equity Shares to Homi Katgara, 59,260 Equity Shares to Natasha Shailesh Dalmia and 30,930 Equity Shares to Zehra Hakim Tinwala	Bonus issue in the ratio of 1:1 (i.e. 1 Equity Share for every 1 equity share held)	50,720,910	1.00	NA	NA

Please note that the above-mentioned bonus issuance has been made through the internal accruals of the Company and has not been made out of revaluation reserves.

2. **Issue of shares pursuant to schemes of arrangement**

As of the date of this Prospectus, our Company has not allotted any equity shares or preference shares pursuant to any scheme of arrangement approved under Sections 230 to 234 of the Companies Act, 2013 or Sections 391 to 394 of the Companies Act, 1956.

3. **Issue of equity shares under employee stock option schemes**

Except as disclosed under “- Notes to the Capital Structure – Share Capital History of our Company – (a) Equity share capital” on page 120, our Company has not issued any equity shares pursuant to exercise of stock options granted pursuant to the Clean Max ESOP Scheme. For details of outstanding options granted pursuant to the Clean Max ESOP Scheme, see “- Employee Stock Option Scheme” on page 151.

4. **Issue of specified securities at a price lower than the Offer Price in the last year**

The Offer Price is 1,053. For further details in relation to the issuances of equity shares in the preceding one year, see “- Notes to the Capital Structure – Share Capital History of our Company – (a) Equity share capital” on page 120. Our Company has not issued any Preference Shares in the preceding one year.

5. Shareholding pattern of our Company

The table below presents the shareholding pattern of our Company as on the date of this Prospectus.

Category (I)	Category of shareholder (II)	Number of shareholders (III)	Number of fully paid up equity shares held (IV)	Number of Partly paid-up equity shares held (V)	Number of shares underlying Depository Receipts (VI)	Total number of shares held (VII) = (IV)+(V)+(VI)	Shareholding as a % of total number of shares (calculated as per SCRR, 1957) (VIII) As a % of (A+B+C)	Number of Voting Rights held in each class of securities (IX)				Number of shares Underlying Outstanding convertible securities (including Warrants, ESOP) (X)	Shareholding, as a % assuming full conversion of convertible securities (as a percentage of diluted share capital) (XI) = (VII)+(X) As a % of diluted share capital	Number of Locked in shares (XII)		Number of Shares pledged or otherwise encumbered (XIII) ^{*A§}		Number of equity shares held in dematerialized form (XIV)
								Number of Voting Rights			Total as a % of (A+B+C)			Number (a)	As a % of total Shares held (b)	Number (a)	As a % of total Shares held (b)	
								Class eg: equity shares	Class eg: Others	Total								
(A)	Promoters and Promoter Group	6	69,118,618	-	-	69,118,618	65.42	69,118,618	-	69,118,618	65.42	-	64.99	-	-	-	-	69,118,618
(B)	Public	197	36,534,650	-	-	36,534,650	34.58	36,534,650	-	36,534,650	34.58	692,540 [#]	35.01	-	626,460	1.71	36,534,650

(C1)	Shares underlying DRs	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
(C2)	Shares held by Employee Trusts	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
	Total	203	105,653,268	-	-	105,653,268	100.00	105,653,268	-	105,653,268	100.00	692,540[#]	100.00	-	626,460	1.71	105,653,268	

[#]These relate to the number of Equity Shares upon exercise of vested options under the Clean Max ESOP Scheme.

[§]Kuldeep Jain, Nidhi Jain and KEMPINC LLP ("Pledgor") had pledged in aggregate, 10,731,094 Equity Shares (aggregating to 10.09% of the pre-Offer equity share capital of our Company on a fully diluted basis) ("Pledged Shares") held by them in favour of 360 One Prime Limited ("Pledgee"), in accordance with the terms of the pledge agreement dated July 22, 2025 entered into by the Pledgors with 360 One Prime Limited, in relation to certain borrowings availed by KEMPINC LLP. In accordance with the terms of the pledge agreement dated July 22, 2025, the Pledged Shares had been released prior to filing of the Red Herring Prospectus. Except for the Offered Shares of the Promoter

Selling Shareholders which will be transferred and allotted to Allottees in the Offer for Sale, all or a portion of the remaining Pledged Shares will be re-pledged post creation of statutory lock-in in accordance with Regulation 16(1)(b) of the SEBI ICDR Regulations. For details, see “- Encumbrance on Equity Shares held by our Promoters” and “Risk Factors – Some of our Promoters had encumbered certain Equity Shares of our Company held by them in favour of 360 One Prime Limited pursuant to loans availed by one of our Promoters, KEMPINC LLP, from 360 One Prime Limited by way of pledge. Such encumbrance may be created in the future as well. Further, one of our Promoter Group, BGTF Four Holdings (DIFC) Limited, has pledged its entire shareholding in one of our Promoters, BGTF One Holdings (DIFC) Limited. Any exercise of such encumbrance by such pledgee could dilute the shareholding of such persons and consequently dilute the aggregate shareholding of some of our Promoters, which may also result in change in control and adversely affect our business and financial condition.” on pages 146 and 50, respectively.

** 9,795,900 Equity Shares held by Rikhab Investments B.V., comprising 9.21% of the pre-Offer share capital of our Company, on a fully diluted basis, were subject to a contractual non-disposal undertaking, dated July 30, 2025 entered into between Rikhab Investments B.V. and Catalyst Trusteeship Limited (“NDU”). Pursuant to the NDU, which has been entered into in relation to borrowings availed by Rikhab Investments B.V. from BGTF Loans Aggregator LP to finance acquisition of Equity Shares of our Company, Rikhab Investments B.V. has undertaken to inter alia not sell, transfer or dispose of such Equity Shares other than as permitted under the facility agreement dated July 30, 2025 entered into between Rikhab Investments B.V., Dheer Jain, BGTF Loans Aggregator LP, GLAS SAS Frankfurt Branch and Global Loan Agency Services GmbH. In accordance with the terms of the NDU, the ‘hold’ on these Equity Shares have been released prior to the filing of the Red Herring Prospectus. However, the ‘hold’ on these Equity Shares will be re-created, post creation of the statutory lock-in in accordance with Regulation 17 of the SEBI ICDR Regulations, in accordance with the NDU.*

⁵Out of 1,391,900 Equity Shares allotted pursuant to the exercise of vested options under the Clean Max ESOP Scheme, 626,460 Equity Shares held by 11 employees, has been pledged with 360 One Prime Limited pursuant to the sanction letter dated November 6, 2025. However, the Equity Shares allotted pursuant to the exercise of the vested option under the Clean Max ESOP Scheme, is not subject to a lock-in of six months in terms of Regulation 17 (a) of the SEBI ICDR Regulations.

[#] The holding company and promoter of BGTF One Holdings (DIFC) Limited is BGTF Four Holdings (DIFC) Limited (“BGTF Four”). Presently, no natural person holds 10% or more of the voting rights in BGTF Four. BGTF Four is owned and controlled by certain pooling vehicles which are ultimately controlled by the affiliates of Brookfield.

^{**} Kuldeep Jain is the ultimate beneficial owner, in accordance with the applicable laws.

d. *Encumbrance on Equity Shares held by our Promoters*

Prior to the date of the Red Herring Prospectus, out of a total of 25,855,617 Equity Shares held by Kuldeep Jain, Nidhi Jain and KEMPINC LLP, 10,731,094 Equity Shares (amounting to 10.09% of the pre-Offer equity share capital of our Company on a fully diluted basis) (“Pledged Shares”) were pledged in favour of 360 One Prime Limited pursuant to an unattested deed of pledge dated July 22, 2025 between KEMPINC LLP, Kuldeep Jain, Nidhi Jain and 360 One Prime Limited. The pledge was created in relation to a loan availed by KEMPINC LLP from 360 One Prime Limited, pursuant to the master facility agreement dated July 22, 2025 between KEMPINC LLP, Kuldeep Jain, Nidhi Jain and 360 One Prime Limited, read with sanction letter dated July 22, 2025 between KEMPINC LLP, Kuldeep Jain, Nidhi Jain and 360 One Prime Limited. The Pledged Shares had been released prior to filing of the Red Herring Prospectus.

Details of the pledged Equity Shares held by our Promoters that had been released in entirety prior to filing of the Red Herring Prospectus, are as follows:

[Remainder of the page intentionally left blank]

Name of the pledgor	Number of Equity Shares held	% of pre- Offer share capital of the Company on a fully diluted basis*	Number of Equity Shares that were pledged	% of pre- Offer share capital of the Company on a fully diluted basis*	Number of Equity Shares released from pledge	Name of the lender	Date of encumbrance	Amount secured pursuant to the encumbrance (in million)	Top-up/cover covenants	Events of Default
Kuldeep Jain	11,675,640	10.98	2,384,118	2.24	2,384,118	360 One Prime Limited	July 22, 2025	NA	NA	NA
Nidhi Jain	501,300	0.47	198,916	0.19	198,916			NA	NA	NA
KEMPINC LLP	13,678,677	12.86	8,148,060	7.66	8,148,060			6,700.00	A minimum-security cover of 2.25x of the outstanding amount In the event the cover falls below 2.25x, a margin call/top-up shall be triggered, and the cover must be restored within 7 (seven) business days from receipt of notice from the lender.	The events of default include, inter alia: (i) payment default; (ii) any restraint on enforcement/sale of pledged shares; (iii) breach of mandatory prepayment events; (iv) breach of minimum security cover; (v) misrepresentation of warranties.
Total	25,855,617	24.31	10,731,094	10.09	10,731,094			6,700.00		

* The percentage of the Equity Share capital on a fully diluted basis has been calculated on the basis of total Equity Shares held by a Shareholder and assuming 692,540 Equity Shares which will result upon exercise of vested options under the Clean Max ESOP Scheme as on date of this Prospectus.

[Remainder of the page intentionally left blank]

Please note that the Pledged Shares had been released from pledge prior to creation of statutory lock-in. Except for the Offered Shares of the Promoter Selling Shareholders which will be transferred and allotted to Allottees in the Offer for Sale, all or a portion of the remaining Pledged Shares will be re-pledged post creation of statutory lock-in in accordance with Regulation 16(1)(b) of the SEBI ICDR Regulations.

Further, 33,417,101 Equity Shares (amounting to 31.42% of the pre-Offer share capital of our Company) held by BGTF One Holdings (DIFC) Limited and 50,000 Equity Shares (amounting to 0.05% of the pre-Offer share capital of our Company) held by Pratap Jain, as on the date of this Prospectus, are not subject to any pledge or encumbrance.

Further, one of the members of our Promoter Group, BGTF Four Holdings (DIFC) Limited, has pledged its entire shareholding in one of our Promoters, BGTF One Holdings (DIFC) Limited, under the terms of one of its borrowings.

For risks in relation to the pledge of Equity Shares by certain of our Promoters, see “*Risk Factors – Some of our Promoters had encumbered certain Equity Shares of our Company held by them in favour of 360 One Prime Limited pursuant to loans availed by one of our Promoters, KEMPINC LLP, from 360 One Prime Limited by way of pledge. Such encumbrance may be created in the future as well. Further, one of our Promoter Group, BGTF Four Holdings (DIFC) Limited, has pledged its entire shareholding in one of our Promoters, BGTF One Holdings (DIFC) Limited. Any exercise of such encumbrance by such pledgee could dilute the shareholding of such persons and consequently dilute the aggregate shareholding of some of our Promoters, which may also result in change in control and adversely affect our business and financial condition.*” on page 50.

e. **Details of Promoters’ contribution and lock-in**

- i. Pursuant to Regulations 14 and 16 of the SEBI ICDR Regulations, as amended, an aggregate of 20% of the fully diluted post-Offer equity share capital of our Company held by the Promoters, shall be locked in for a period of three years, or any other period as prescribed under the SEBI ICDR Regulations, as minimum Promoters’ contribution (“**Minimum Promoters’ Contribution**”) from the date of Allotment and the shareholding of the Promoters in excess of 20% of the fully diluted post-Offer equity share capital shall be locked in for a period of one year from the date of Allotment.
- ii. Details of the Equity Shares held by our Promoters, which shall be to be locked-in for a period of three years or such other period as prescribed under the SEBI ICDR Regulations from the date of Allotment as Minimum Promoters’ Contribution are set forth in the table below:

[^] The cash consideration for such allotments of equity shares was paid at the time of allotment of the relevant Preference Shares. Accordingly, no consideration was received at the time of such conversion.

[§] The percentage of the Equity Share capital on a fully diluted basis has been calculated taking into account 692,540 Equity Shares which will result upon exercise of vested options under the Clean Max ESOP Scheme as on the date of this Prospectus.

* Subject to finalisation of rejection of Bids and Basis of Allotment.

(1) For a period of three years from the date of allotment.

(2) All Equity Shares were fully paid-up at the time of on the respective dates of the allotment or acquisition, as the case may be, of such Equity Shares.

Our Promoters have given their consent to include such number of Equity Shares held by our Promoters as disclosed above, constituting 20% of the fully diluted post-Offer equity share capital of our Company as Minimum Promoter's Contribution. Our Promoters have agreed not to dispose, sell, transfer, charge, pledge or otherwise encumber in any manner the Minimum Promoter's Contribution from the date of filing this Prospectus, until the expiry of the lock-in period specified above, or for such other time as required under SEBI ICDR Regulations, except as may be permitted, in accordance with SEBI ICDR Regulations. For details of the inter-se agreement dated July 30, 2025 entered into by and between Kuldeep Jain, Nidhi Jain, KEMPINC LLP, Pratap Jain, Rikhab Investments B.V., BGTF One Holdings (DIFC) Limited, Augment India I Holdings, LLC and DSDG HOLDING APS, pursuant to which Kuldeep Jain, Nidhi Jain and KEMPINC LLP shall collectively contribute 9.80% and BGTF One Holdings (DIFC) Limited shall contribute 10.20%, of the post-Offer equity share capital of our Company, towards such minimum promoters' contribution, see, "History and Certain Corporate Matters – Inter-se agreement dated July 30, 2025 entered into by and between Kuldeep Jain, Nidhi Jain, KEMPINC LLP, Pratap Jain, Rikhab Investments B.V., BGTF One Holdings (DIFC) Limited, Augment India I Holdings, LLC and DSDG HOLDING APS" on page 371.

Our Company undertakes that the Equity Shares that are being locked-in are not in-eligible for computation of Promoters' contribution in terms of Regulation 15 of the SEBI ICDR Regulations. For details of build-up of shareholding of our Promoters, see "- Build-up of the equity shareholding of our Promoters in our Company" on page 140.

iii. In this connection, we confirm the following:

- a. The Equity Shares offered for Minimum Promoters' Contribution do not include (i) Equity Shares acquired in the three immediately preceding years for consideration other than cash

and revaluation of assets or capitalisation of intangible assets not involved in such transactions, or (ii) Equity Shares that have resulted from bonus issue by utilization of revaluation reserves or unrealised profits of our Company or resulted from bonus shares issued against Equity Shares, which are otherwise ineligible for computation of Minimum Promoters' Contribution.

- b. The Minimum Promoters' Contribution does not include any Equity Shares acquired during the immediately preceding one year at a price lower than the price at which the Equity Shares are being offered to the public in the Offer.
- c. Our Company has not been formed by the conversion of one or more partnership firms or a limited liability partnership firm into a Company and hence, no Equity Shares have been issued in the one year immediately preceding the date of this Prospectus pursuant to conversion from a partnership firm.
- d. All the Equity Shares held by our Promoters, Promoter Group, Directors, Key Managerial Personnel, Senior Management, Selling Shareholders, employees of our Company, QIBs, entities regulated by financial sector regulators (as defined in the SEBI ICDR Regulations), to the extent applicable, are in dematerialised form.
- e. The Equity Shares held by our Promoters and offered for Minimum Promoters' Contribution are not subject to pledge or any other encumbrance.

f. ***Other lock-in requirements:***

- i. In addition to the 20% of the post-Offer shareholding of our Company held by our Promoters and locked in for 3 years as specified above and the remaining post-Offer shareholding by our Promoters in our Company which is locked in for one year, in terms of Regulation 16(1)(b) of the SEBI ICDR Regulations, the entire pre-Offer equity share capital of our Company will be locked-in for a period of six months from the date of Allotment or such other period as may be prescribed under the SEBI ICDR Regulations, except for (i) the Equity Shares offered pursuant to the Offer for Sale; (ii) the Equity Shares held by Shareholders who are VCFs, Category I AIFs, Category II AIFs or FVCIs, subject to the conditions set out in Regulation 17 of the SEBI ICDR Regulations, provided that such Equity Shares will be locked-in for a period of at least six months from the date of purchase/allotment by such VCFs or Category I AIFs or Category II AIFs or FVCI Shareholders respectively, and (iii) any Equity Shares transferred to and held by eligible employees (whether currently employees or not and including the legal heirs or nominees of any deceased employees or ex-employees) of our Company in accordance with the Clean Max ESOP Scheme. Further, any unsubscribed portion of the Offered Shares, in excess of the minimum subscription requirement under regulation 45 of the SEBI ICDR Regulations will also be locked in, as required under the SEBI ICDR Regulations. Please note that the 'hold' created on the Equity Shares held by Rikhab Investments B.V., has been removed prior to creation of the statutory lock-in. However, the 'hold' on these Equity Shares will be re-created, post creation of the statutory lock-in in accordance with Regulation 17 of the SEBI ICDR Regulations, and in accordance with the non-disposal undertaking dated July 30, 2025. Further, 626,460 Equity Shares held by 11 employees, has been pledged with 360 One Prime Limited pursuant to the sanction letter dated November 6, 2025. However, the Equity Shares allotted pursuant to the exercise of the vested option under the Clean Max ESOP Scheme, is not subject to a lock-in of six months in terms of Regulation 17 (a) of the SEBI ICDR Regulations.
- ii. As required under Regulation 20 of the SEBI ICDR Regulations, our Company shall ensure that the details of the Equity Shares locked-in are recorded by the relevant Depository.
- iii. In terms of Regulation 22 of the SEBI ICDR Regulations, the Equity Shares held by our Promoters, which are locked-in pursuant to Regulation 16 of the SEBI ICDR Regulations, may be transferred to and among the members of our Promoter Group or to any new promoter of our Company, subject to continuation of the lock-in in the hands of the transferees for the remaining period (and such transferees shall not be eligible to transfer until the expiry of the lock-in period) and compliance with the Takeover Regulations, as applicable.
- iv. Pursuant to Regulation 21(a) of the SEBI ICDR Regulations, the Equity Shares held by our Promoters, which are locked-in for a period of 3 years from the date of Allotment (as mentioned above) may be pledged as collateral security for loans granted by scheduled commercial banks, public financial institutions, NBFC-SI or housing finance companies, provided that such loans have been granted by such bank or institution for the purpose of financing one or more of the objects of the Offer and pledge of the Equity Shares is a term of sanction of such loans.

v. Pursuant to Regulation 21(b) of the SEBI ICDR Regulations, the Equity Shares held by our Promoters which are locked-in for a period of 1 year from the date of Allotment may be pledged only with scheduled commercial banks, public financial institutions, NBFC-SI or housing finance companies as collateral security for loans granted by such banks or public financial institutions, provided that such pledge of the Equity Shares is one of the terms of the sanction of such loans. For details of Equity Shares pledged by some of our Promoters which have been released from pledge prior to the filing of the Red Herring Prospectus, see “- *History of the share capital held by our Promoters – Encumbrance on Equity Shares held by our Promoters*” on page 146.

vi. Pursuant to Regulation 22 of the SEBI ICDR Regulations, (a) the Equity Shares held by our Promoters, which are locked-in may be transferred to and among the members of our Promoter Group or to any new promoter of our Company and (b) the Equity Shares held by any person other than our Promoters and locked-in for a period of six months from the date of Allotment in the Offer may be transferred to any other person holding the Equity Shares which are locked-in, subject to continuation of the lock-in in the hands of transferees for the remaining period (and such transferees shall not be eligible to transfer such Equity Shares until the expiry of the lock-in period) and compliance with the Takeover Regulations.

g. *Lock-in of the Equity Shares to be allotted, if any, to the Anchor Investors*

50% of the Equity Shares allotted to Anchor Investors under the Anchor Investor Portion shall be locked-in for a period of 90 days from the date of Allotment and the remaining Equity Shares allotted to Anchor Investors under the Anchor Investor Portion shall be locked-in for a period of 30 days from the date of Allotment.

8. As on the date of the filing of this Prospectus, our Company has 203 Shareholders of Equity Shares. Further, as on the date of this Prospectus, our Company does not have any outstanding preference shares
9. Except as disclosed in “- *Notes to the Capital Structure – Share capital history of our Company – Secondary transactions of equity shares*” and “- *History of the share capital held by our Promoters*” on pages 133 and 140, respectively, none of our Promoters, members of the Promoter Group, directors and designated partners of our Corporate Promoters, Directors of our Company or their relatives have purchased, acquired or sold any securities of our Company during a period of six months preceding the date of this Prospectus.
10. Except for Equity Shares to be allotted pursuant to the Fresh Issue and exercise of options granted under the Clean Max ESOP Scheme, our Company presently does not intend or propose to alter its capital structure for a period of six months from the Bid/Offer Opening Date, by way of split or consolidation of the denomination of Equity Shares, or by way of further issue of Equity Shares (including issue of securities convertible into or exchangeable, directly or indirectly for Equity Shares), whether on a preferential basis, or by way of issue of bonus shares, or on a rights basis, or by way of further public issue of Equity Shares, or otherwise.
11. Neither our Company, nor the Directors have entered into any buy-back arrangements for purchase of specified securities from any person. Further, the Book Running Lead Managers have not entered into any buy-back arrangements for purchase of specified securities from any person.
12. Except as disclosed in “*Our Management – Shareholding of Directors in our Company*” on page 528, none of our Directors or Key Managerial Personnel or Senior Management hold any Equity Shares of our Company.
13. Except for employee stock options issued pursuant to the Clean Max ESOP Scheme, our Company has no outstanding warrants, options to be issued or rights to convert debentures, loans or other convertible instruments into Equity Shares as on the date of this Prospectus.
14. As certified by N Kothari & Associates, Practicing Company Secretary through their certificate dated February 25, 2026, our Company is in compliance with the Companies Act, 1956 and Companies Act, 2013, to the extent applicable, with respect to issuance of securities from the date of incorporation of our Company till the date of filing of this Prospectus.
15. All Equity Shares Allotted pursuant to the Offer shall be fully paid-up at the time of Allotment.
16. None of the Book Running Lead Managers or their associates (as defined under the SEBI Merchant Bankers Regulations) hold any Equity Shares of our Company, as on the date of this Prospectus. The BRLMs and their affiliates may engage in the transactions with and perform services for our Company in the ordinary course of business or may in the future engage in commercial banking and investment banking transactions with our Company for which they may in the future receive customary compensation.
17. There have been no financing arrangements whereby our Promoters, members of our Promoter Group, directors and designated partners of our Corporate Promoters, our Directors and their relatives have financed the purchase by any

other person of securities of our Company other than in the normal course of business of the relevant financing entity, during a period of six months immediately preceding the date of filing of this Prospectus.

18. No person connected with the Offer, including, but not limited to, the Book Running Lead Managers, the Syndicate Members, our Company, Directors, Promoters, and member of our Promoter Group shall offer any incentive, whether direct or indirect, in the nature of discount, commission and allowance, except for fees or commission for services rendered in relation to the Offer, in any manner, whether in cash or kind or services or otherwise to any Bidder for making a Bid.
19. Our Promoters and the members of our Promoter Group have not participated in the Offer, except to the extent of the sale of Offered Shares by the Promoter Selling Shareholders by way of the Offer for Sale.
20. Our Company shall ensure that there shall be only one denomination of the Equity Shares.
21. Except for any issue of Equity Shares pursuant to Fresh Issue and the exercise of employee stock options granted pursuant to the Clean Max ESOP Scheme, there will be no further issue of Equity Shares whether by way of issue of bonus shares, preferential allotment, rights issue or in any other manner during the period commencing from filing of this Prospectus with SEBI until the Equity Shares have been listed on the Stock Exchanges or all application monies have been refunded, as the case may be.
22. Our Company has ensured that transactions in Equity Shares by our Promoters and our Promoter Group and the Pre-IPO Placement, during the period between the date of filing of the Draft Red Herring Prospectus and the date of Bid/Offer Closing Date has been reported to the Stock Exchanges within 24 hours of such transaction and transactions of such nature shall continue to be reported to the Stock Exchanges within 24 hours of such transactions. Further, our Company has intimated the Stock Exchanges and published a public announcement within twenty-four hours and forty-eight hours of the Pre-IPO Placement, respectively, in compliance with the Association of Investment Bankers of India guidance on “*Disclosure of Information pertaining to Pre-IPO placement and transactions of shares by promoters and promoter group(s) in the public Announcement and Price Band Advertisement*” dated July 4, 2023.
23. There are no outstanding stock appreciation rights granted to employees pursuant to a stock appreciation right scheme by our Company as on the date of this Prospectus.
24. **Employee Stock Option Scheme**

Clean Max ESOP Scheme

ESOP Pool I

Our Company adopted the Clean Max ESOP Scheme pursuant to the resolutions passed by our shareholders on August 5, 2015, and subsequently amended pursuant to shareholders’ resolution dated August 5, 2021, and the shareholders’ resolution dated October 26, 2023. Pursuant to such amendments, a total number of 2,435,200 options could be granted pursuant to the Clean Max ESOP Scheme (“**ESOP Pool I**”). Under the terms of the Clean Max ESOP Scheme, any lapsed options could be re-granted to eligible employees as defined therein.

As on the date of this Prospectus, an aggregate of 2,932,060 options have been granted under ESOP Pool I, pursuant to the Clean Max ESOP Scheme, of which an aggregate of 565,790 options have lapsed and been added back to the ESOP Pool I in accordance with terms of the Clean Max ESOP Scheme. Out of the net granted 2,366,270 options (adjusted for lapsed options), 840,230 options have been exercised, and 509,470 options have been encashed. A total of 1,016,570 options are currently outstanding, of which 346,270 options are vested and 670,300 options are unvested. A total of 68,930 options remain to be granted from ESOP Pool I.

Under the terms of the Clean Max ESOP Scheme, the 1,016,570 options outstanding as on the date of this Prospectus shall result in a maximum of 2,033,140 Equity Shares. A total of 68,930 options remain to be granted from ESOP Pool I, which shall result in a maximum of 137,860 Equity Shares.

The number of options forming part of the ESOP Pool I, including those granted, vested, exercised, encashed and lapsed, as indicated above have been adjusted to present the impact of the sub-division of the equity shares of face value of ₹ 10 each into equity shares of face value of ₹ 1 each, as approved by the shareholders of our Company and June 27, 2025. The resultant Equity Shares have been adjusted to give impact to the bonus issue approved by our Shareholders, pursuant to their resolution dated August 8, 2025. For details of the sub-division and bonus issue, see “*– Share capital history of our Company – Equity share capital*” on page 120.

The Clean Max ESOP Scheme is in compliance with the Companies Act and SEBI (Share Based Employee Benefits and Sweat Equity) Regulations, 2021. The details of ESOP Pool I, as certified by V. Singhi & Associates, Chartered Accountants through their certificate dated February 25, 2026, are as follows:

ESOP Pool II

The Clean Max ESOP Scheme was last amended pursuant to the board resolution dated August 14, 2025 and the shareholder's resolution dated August 14, 2025, in order to create a pool of 2,264,872 options, which upon exercise, would result in 2,264,872 Equity Shares ("**ESOP Pool II**"). Under the terms of the Clean Max ESOP Scheme, the exercise price for each to be option granted from ESOP Pool II shall be ₹ 1 per option.

As on the date of this Prospectus, an aggregate of 1,294,110 options have been granted under ESOP Pool II, pursuant to the Clean Max ESOP Scheme, of which 4,905 options have lapsed and been added back to the ESOP Pool II in accordance with terms of the Clean Max ESOP Scheme. Out of the net granted 1,289,205 options (adjusted for lapsed options), no options have been exercised, and no options have been encashed. A total of 1,289,205 options are currently outstanding, of which no options are vested and 1,289,205 options are unvested. A total of 975,667 options remain to be granted from ESOP Pool II.

Under the terms of the Clean Max ESOP Scheme, the 1,289,205 options outstanding as on the date of this Prospectus shall result in a maximum of 1,289,205 Equity Shares. A total of 975,667 options remain to be granted from ESOP Pool II, which shall result in a maximum of 975,667 Equity Shares.

The details of ESOP Pool II, as certified by V. Singhi & Associates, Chartered Accountants through their certificate dated February 25, 2026, are as follows:

OBJECTS OF THE OFFER

The Offer comprises the Fresh Issue and the Offer for Sale. For details, see “*The Offer*” beginning on page 100. Our Company, in consultation with the Book Running Lead Managers, undertook the Pre-IPO Placement, as permitted under applicable law, aggregating to ₹2,968.98 million. The size of the Fresh Issue has been revised to ₹ 12,000.00 million.

Offer for Sale

Each of the Selling Shareholders will be entitled to their respective portion of the proceeds from the Offer for Sale, in proportion to the Equity Shares offered by the respective Selling Shareholders as part of the Offer for Sale, after deducting their proportion of Offer related expenses and relevant taxes thereon. Our Company will not receive any proceeds from the Offer for Sale and the proceeds received from the Offer for Sale will not form part of the Net Proceeds. For further details of the Offer for Sale, see “*Other Regulatory and Statutory Disclosures – Authority for the Offer*” on page 893.

The Fresh Issue

The net proceeds of the Fresh Issue, *i.e.*, Gross Proceeds of the Fresh Issue less the Company’s share of the Offer related expenses (“**Net Proceeds**”) are proposed to be utilised in the following manner:

1. Repayment and/or pre-payment, in part or full, of all or certain outstanding borrowings of our Company and/or certain of our Subsidiaries; and
2. General corporate purposes.

(collectively, the “**Objects**”).

The main objects and objects incidental and ancillary to the main objects as set out in our Memorandum of Association enable us to (i) undertake our existing business activities; and (ii) undertake the activities for which the funds are being raised by us through the Fresh Issue and are proposed to be funded from the Net Proceeds. The objects clause and matters in furtherance of the objects set out in their memorandum of association and partnership agreement, as applicable, of our Subsidiaries, enables each of them to undertake: (i) their existing business activities; (ii) the activities for which the funds are being raised by us through the Fresh Issue and are proposed to be funded from the Net Proceeds. Further, our Company expects to receive the benefits of listing of our Equity Shares on the Stock Exchanges, including enhancement of our Company’s brand name amongst our existing and potential customers and creation of a public market for our Equity Shares in India.

Net Proceeds

The details of the proceeds from the Fresh Issue (excluding expenses for the Offer for Sale) are summarized in the following table:

Particulars	Estimated amount (₹ in million)
Gross proceeds of the Fresh Issue ⁽¹⁾⁽²⁾	12,000.00 [^]
(Less) Fresh Issue expenses	535.37 [*]
Net Proceeds⁽²⁾	11,464.63

[^] An Employee Discount of ₹ 100 per Equity Share was offered to Eligible Employees Bidding in the Employee Reservation Portion.

^{*} For details, see “- Offer Expenses” below.

⁽¹⁾ Our Company, in consultation with the Book Running Lead Managers, undertook a Pre-IPO Placement of Equity Shares, aggregating to ₹ 2,968.98 million, as permitted under the applicable law. The Pre-IPO Placement was at a price decided by our Company, in consultation with the Book Running Lead Managers and was completed prior to filing of the Red Herring Prospectus with the RoC. The amount raised pursuant to the Pre-IPO Placement was reduced from the Fresh Issue, subject to compliance with Rule 19(2)(b) of the SCRR and the size of the Fresh Issue has been revised to ₹ 12,000.00 million. The Pre-IPO Placement did not exceed 20% of the original size of the Fresh Issue as disclosed in the Draft Red Herring Prospectus. Our Company had appropriately intimated the subscribers to the Pre-IPO Placement, prior to allotment pursuant to the Pre-IPO Placement, that there is no guarantee that our Company may proceed with the Offer or the Offer may be successful and will result into listing of the Equity Shares on the Stock Exchanges. Further, relevant disclosures in relation to such intimation to the subscribers to the Pre-IPO Placement has been appropriately made in the relevant sections of the Red Herring Prospectus and this Prospectus.

⁽²⁾ Subject to full subscription to the Fresh Issue.

Requirement of Funds and Utilization of Net Proceeds:

The proposed utilization of the Net Proceeds is set forth in the table below:

S. No.	Particulars	Estimated amount to be funded from Net Proceeds ⁽²⁾ (in ₹ million)
1.	Repayment and/or pre-payment, in part or full, of all or certain outstanding borrowings of our Company and/or certain of our Subsidiaries	11,226.74
2.	General corporate purposes ⁽¹⁾⁽²⁾	237.89
	Total ⁽²⁾	11,464.63

⁽¹⁾ The amount to be utilised towards general corporate purposes does not exceed 25% of the Gross Proceeds.

- (2) Our Company, in consultation with the Book Running Lead Managers, undertook a Pre-IPO Placement of Equity Shares, aggregating to ₹ 2,968.98 million, as permitted under the applicable law. The Pre-IPO Placement was at a price decided by our Company, in consultation with the Book Running Lead Managers and was completed prior to filing of the Red Herring Prospectus with the RoC. The amount raised pursuant to the Pre-IPO Placement was reduced from the Fresh Issue, subject to compliance with Rule 19(2)(b) of the SCRR and the size of the Fresh Issue has been revised to ₹ 12,000.00 million. The Pre-IPO Placement did not exceed 20% of the original size of the Fresh Issue as disclosed in the Draft Red Herring Prospectus. Our Company had appropriately intimated the subscribers to the Pre-IPO Placement, prior to allotment pursuant to the Pre-IPO Placement, that there is no guarantee that our Company may proceed with the Offer or the Offer may be successful and will result into listing of the Equity Shares on the Stock Exchanges. Further, relevant disclosures in relation to such intimation to the subscribers to the Pre-IPO Placement has been appropriately made in the relevant sections of the Red Herring Prospectus and this Prospectus. Further, the proceeds from the Pre-IPO Placement, shall be completely utilised towards the general corporate purposes portion of the Objects of the Offer.

Proposed Schedule of Implementation and Deployment of Funds

The Net Proceeds are proposed to be deployed in accordance with the details provided hereunder:

S. No.	Particulars	Total amount to be funded from the Net Proceeds (in ₹ million)	Amount to be deployed from the Net Proceeds in Fiscal 2026 (in ₹ million)	Percentage of Net Proceeds (%)
1.	Repayment and/or pre-payment, in part or full, of all or certain outstanding borrowings of our Company and/or certain of our Subsidiaries	11,226.74	11,226.74	97.93
2.	General corporate purposes ⁽¹⁾	237.89	237.89	2.07
	Net Proceeds ⁽²⁾	11,464.63	11,464.63	100.00

(1) The amount utilised for general corporate purposes does not exceed 25% of the Gross Proceeds.

- (2) Our Company, in consultation with the Book Running Lead Managers, undertook a Pre-IPO Placement of Equity Shares, aggregating to ₹ 2,968.98 million, as permitted under the applicable law. The Pre-IPO Placement was at a price decided by our Company, in consultation with the Book Running Lead Managers and was completed prior to filing of the Red Herring Prospectus with the RoC. The amount raised pursuant to the Pre-IPO Placement was reduced from the Fresh Issue, subject to compliance with Rule 19(2)(b) of the SCRR and the size of the Fresh Issue has been revised to ₹ 12,000.00 million. The Pre-IPO Placement did not exceed 20% of the original size of the Fresh Issue as disclosed in the Draft Red Herring Prospectus. Our Company had appropriately intimated the subscribers to the Pre-IPO Placement, prior to allotment pursuant to the Pre-IPO Placement, that there is no guarantee that our Company may proceed with the Offer or the Offer may be successful and will result into listing of the Equity Shares on the Stock Exchanges. Further, relevant disclosures in relation to such intimation to the subscribers to the Pre-IPO Placement has been appropriately made in the relevant sections of the Red Herring Prospectus and this Prospectus. Further, the proceeds from the Pre-IPO Placement, shall be completely utilised towards the general corporate purposes portion of the Objects of the Offer.

Our fund requirements and deployment of the Net Proceeds with regard to the aforesaid object are based on internal management estimates and on current market conditions and have not been appraised by any bank or financial institution or other independent agency. They are based on current conditions of our business which are subject to change in the future. Our Company operates in a highly competitive and dynamic industry and may have to revise our estimates from time to time on account of changes in external circumstances or costs, which may not be within the control of our management or changes in financial and market conditions, business or strategy. Our historical funding requirements may not be reflective of our future funding plans. In case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements may be financed through our internal accruals and/or incremental debt from existing or future lenders, as required. If the actual utilization towards any of the objects is lower than the proposed deployment, such balance will be used towards general corporate purposes, to the extent that the total amount to be utilized towards the general corporate purposes will not exceed 25% of the Gross Proceeds in compliance with the SEBI ICDR Regulations.

In the event that the estimated utilization of the Net Proceeds in a scheduled Financial Year is not completely met, due to the reasons stated above, the same shall be utilised in the next Financial Year, as may be determined by our Company, in accordance with applicable laws. For details on risks involved, see “Risk Factors – Management judgement is used when ascertaining our funding requirements and the proposed deployment of Net Proceeds. Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency, and our management and Board will have broad discretion over the use of the Net Proceeds. We have not entered into any definitive arrangements to utilize certain portions of the Net Proceeds of the Offer. We may incur certain pre-payment penalties for the pre-payment of outstanding borrowings from the Net Proceeds.” on page 67.

Details of the Objects of the Fresh Issue

1. Repayment and/or pre-payment, in part or full, of all or certain outstanding borrowings of our Company and/or certain of our Subsidiaries

Our Company and/or our Subsidiaries have entered into various financial arrangements with banks and financial institutions. The loan facilities availed by our Company and/or our Subsidiaries includes borrowings in the form of, *inter alia*, term loans, working capital loans and cash credit. Further, our Company has also issued non-convertible debentures to various financial institutions. As of September 30, 2025, we had total outstanding borrowings of ₹ 102,611.28 million on a consolidated basis. For further details, see “Financial Indebtedness” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Non-GAAP Measures” on pages 825 and 838, respectively.

We propose to utilise an estimated amount of ₹ 11,226.74 million from the Net Proceeds towards prepayment and/or

repayment of certain existing outstanding borrowings availed by our Company and/or our Subsidiaries, which constitutes 10.94% of our total outstanding borrowings, on a consolidated basis, as of September 30, 2025. We intend to utilise the entire amount earmarked for this object during Fiscal 2026, basis our Company's borrowing repayment timelines, in relation to prepayment and/or repayment of the existing borrowings availed by our Company and/ or our Subsidiaries.

We believe that such repayment or prepayment will help reduce our outstanding indebtedness on a consolidated basis, assist us in maintaining a favourable debt-equity ratio and reduce our debt servicing costs and enable utilization of the internal accruals for further investment towards business growth and expansion. In addition, we believe that this would improve our ability to raise further resources in the future to fund potential business development opportunities. The selection of borrowings proposed to be prepaid or repaid amongst our borrowing arrangements is based on various factors, including (i) maturity profile and the remaining tenor of the loan, (ii) cost of the borrowing, including applicable interest rates, (iii) any conditions attached to the borrowings, restricting our ability to prepay/ repay the borrowings and time taken to fulfil, or obtain waivers for fulfilment of such conditions, or relating to the terms of repayment, (iv) levy of any prepayment penalties, fees, charges, applicable taxes, if any, and the quantum thereof, (v) provisions of any laws, rules and regulations governing such borrowings, (vi) receipt of consents for prepayment from the respective lenders and terms and conditions of such consents and waivers, and (vii) other commercial considerations including, among others, the amount of the loan outstanding.

Payment of interest, prepayment penalty or premium, if any, and other related costs shall be made by us out of the Net Proceeds. Given the nature of these borrowings and the terms of repayment/prepayment, the aggregate outstanding borrowing amounts may vary from time to time. However, the aggregate amount to be utilised from the Net Proceeds towards such object shall not exceed ₹ 11,226.74 million.

The following table set forth details of certain borrowings availed by our Company and/or our Subsidiaries, which are outstanding as on September 30, 2025, out of which we propose to pre-pay or repay, in full or in part, up to an amount aggregating to ₹ 11,226.74 million from the Net Proceeds:

Notes:

(1) For details on borrowings, see "Financial Indebtedness" beginning on page 825.

(2) In accordance with Clause 9(A)(2)(b) of Part A of Schedule VI of the SEBI ICDR Regulations read with its proviso which requires a certificate from the statutory auditor or a chartered accountant holding a valid certificate issued by the Peer Review Board of the ICAI, certifying the utilisation of loans for the purposes availed by our Company, our Company has obtained the requisite certificate dated February 25, 2026, from V. Singhi & Associates, Chartered Accountants in relation to the loans availed by our Company which are proposed to be repaid/prepaid from the Net Proceeds and have been drawdown prior to March 31, 2025. Further, in case of loans availed by our Company which are proposed to be repaid/prepaid from the Net Proceeds and have been drawdown, in part or full, after to March 31, 2025, our Company has obtained the requisite certificate dated February 16, 2026, from B S R & Co. LLP, Chartered Accountants.

(3) Our Company has entered into a debenture trust deed dated October 27, 2025, for issuance of additional non-convertible debentures amounting to ₹4,000.00 million ("Additional NCDs"), pursuant to which our Company is required to utilize at least ₹ 7,500.00 million of the Net Proceeds for redeeming/repaying the listed debentures of ₹ 4,990.00 million (disclosed as serial no. 1 in the table above) and unlisted debentures amounting to ₹ 1,000.00 million (disclosed as serial no. 2 in the table above) and/or the mezzanine debt from Tata Capital Limited aggregating to ₹ 4,000.00 million (disclosed as serial no. 3 in the table above). The Additional NCDs are not proposed to be repaid or prepaid, in full or in part from the Net Proceeds. For details of the Additional NCDs, see "Financial Indebtedness – Key terms of the Additional NCDs" on page 827.

Notes:

⁽¹⁾ For details on borrowings, see "Financial Indebtedness" beginning on page 825.

⁽²⁾ In accordance with Clause 9(A)(2)(b) of Part A of Schedule VI of the SEBI ICDR Regulations read with its proviso which requires a certificate from the statutory auditor or a chartered accountant, holding a valid certificate issued by the Peer Review Board of the ICAI, certifying the utilisation of loans for the purposes availed in relation to the loans availed by each of the aforementioned Subsidiaries which are proposed to be repaid/prepaid from the Net Proceeds, we have obtained a certificate dated February 25, 2026, from V. Singh & Associates, Chartered Accountants.

** The facility has been refinanced and the drawdown date refers to date on which the refinancing arrangement was completed.

*** Interest rates refers to the interest rate as on September 30, 2025.

[^] In the event that such credit facility is refinanced through a new lender, the sanctioned amount will be reflected against the sanction given by the new lender.

[§] The purpose mentioned below are as per the sanction letter / debenture trust deed, as applicable, for the respective loans.

[®] Information provided under this column are based on the books of accounts, power purchase agreements, supply agreements and other accounting records used for the purpose of preparation of the respective audited financial statements.

Pursuant to the resolution dated November 10, 2025, passed by our Board, our Company shall undertake investments in certain Subsidiaries, for the purpose of repayment/prepayment of their borrowings identified in the following manner:

- a) deploy a portion of the Net Proceeds aggregating up to ₹ 4,397.78 million, in one or more tranches, by way of extending loan facilities in the form of inter-corporate loans given to certain Subsidiaries, the terms of which are set out below:

Sr. No.	Term	Particulars
1.	Name of Subsidiary: Clean Max Charge LLP	
	Interest	11% p.a. simple interest
	Security	Unsecured
	Tenor	5 years, with option for pre-payment without penalty
	Repayment schedule	In one or more tranches as per mutual agreement
2.	Name of Subsidiary: Clean Max Hybrid Power LLP	
	Interest	11% p.a. simple interest
	Security	Unsecured
	Tenor	5 years, with option for pre-payment without penalty
	Repayment schedule	In one or more tranches as per mutual agreement
3.	Name of Subsidiary: Clean Max Kratos Private Limited	
	Interest	11% p.a. simple interest

	Security	Unsecured
	Tenor	5 years, with option for pre-payment without penalty
	Repayment schedule	In one or more tranches as per mutual agreement
4.	Name of Subsidiary: Clean Max Light Power LLP	
	Interest	11% p.a. simple interest
	Security	Unsecured
	Tenor	5 years, with option for pre-payment without penalty
	Repayment schedule	In one or more tranches as per mutual agreement
5.	Name of Subsidiary: Clean Max Terra Private Limited	
	Interest	11% p.a. simple interest
	Security	Unsecured
	Tenor	5 years, with option for pre-payment without penalty
	Repayment schedule	In one or more tranches as per mutual agreement

Further, these loans will be subordinated to borrowings from other lenders of the Company. For details regarding the terms of the other loans availed by our Subsidiaries, see “*Financial Indebtedness*” beginning on page 825.

In relation to the above-mentioned investments to be made in these Subsidiaries, our Company may receive the principal amount of the inter-corporate loans after the maturity period of 5 years along with the interest amount at the rate of 11% payable per annum, which it intends to utilise for its day-to-day business operations and investments in various projects of our Company depending upon our fund requirement at that time and for other operational expenses, in the ordinary course of business and in accordance with applicable laws (“**Operational Expenses**”) and will not be utilised for any non-operational expenses* including but not limited to granting of any loans or advances to Promoters, members of the Promoter Group, Directors, Key Managerial Personnel or members of the Senior Management.

* *Non-operational expenses means expenses other than Operational Expenses.*

Please see below the nature of business of the Subsidiaries whose borrowings are proposed to be repaid from the Net Proceeds:

Sr. No.	Name of Subsidiary	Nature of business
1.	Clean Max Terra Private Limited	Business of developing, generating, supplying renewable energy from solar, wind or wind solar hybrid and any other renewable energy sources to end consumers as authorized by its memorandum of association.
2.	Clean Max Kratos Private Limited	
3.	Clean Max Light Power LLP	
4.	Clean Max Charge LLP	
5.	Clean Max Hybrid Power LLP	

For further details, see “*History and Certain Corporate Matters – Our Subsidiaries and Joint Ventures*” beginning on page 377.

Further, please see below the details of revenue contribution of the Subsidiaries whose borrowings are proposed to be repaid from the Net Proceeds:

NABFID	Swavalamban Bhavan, C -11, G-Block, Bandra-Kurla Complex, Bandra (East), Mumbai - 400051	NA - All-India Financial Institution (AIFI)

2. General corporate purposes

Our Company proposes to deploy the balance Net Proceeds aggregating to ₹ 237.89 million towards general corporate purposes, as approved by our management, from time to time, subject to such utilization for general corporate purposes not exceeding 25% of the Gross Proceeds, in compliance with the SEBI ICDR Regulations.

The general corporate purposes for which our Company proposes to utilise Net Proceeds include payment of project costs and related expenses incurred by the Company or Subsidiaries, funding of growth opportunities, including funding strategic initiatives, partnerships, joint ventures and acquisitions, interest payment and other finance costs, business development initiatives, rent, administration costs, insurance premiums, repairs and maintenance, employee and other personnel expenses, payment of taxes and, duties and other similar expenses incurred in the ordinary course of our business or towards any exigencies, subject to compliance with applicable laws. The quantum of utilisation of funds towards each of the above purposes will be determined by our Board or a duly appointed committee, based on the amount actually available under this head and the business requirements of our Company, from time to time, subject to compliance with applicable law.

Our management, in accordance with the policies of the Board, shall have the flexibility in utilizing surplus amounts, if any. However, usage of funds will be as disclosed in the Objects of the Offer and any spill over from the intended Objects of the Offer to the general corporate purposes will not be carried out by the Company. In the event that we are unable to utilize the entire amount that we have currently estimated for use out of Net Proceeds in a Fiscal, we will utilize such unutilized amount in the subsequent Fiscals, subject to compliance with applicable law.

Further, the proceeds from the Pre-IPO Placement, shall be completely utilised towards the general corporate purposes portion of the Objects of the Offer.

Other Confirmations

Except as stated above and apart from the portion of the proceeds from the Offer for Sale which shall be paid to the Promoter Selling Shareholders, in proportion to their respective Offered Shares, no part of the Net Proceeds will be paid to the Promoters, members of the Promoter Group, the Directors, the Group Companies, Key Managerial Personnel or Senior Management.

Our Company has not entered into or is not planning to enter into any arrangement/ agreements with our Promoter, the Directors, Key Managerial Personnel, Senior Management, Group Companies or members of the Promoter Group in relation to the utilisation of the Net Proceeds of the Offer. Further, except as disclosed above, there is no existing or anticipated interest of such individuals and entities in the objects of the Offer.

None of the borrowings which are being repaid and/or pre-paid through the Net Proceeds were raised from related parties of our Company.

Offer Expenses

The total expenses of the Offer are estimated to be approximately ₹ 1,346.34 million.

The Offer related expenses primarily include listing fees, fees payable to the BRLMs and legal counsel, fees payable to the Statutory Auditor and our other advisors and consultants, brokerage and selling commission, underwriting commission, commission payable to Registered Brokers, RTAs, CDPs, SCSBs' fees, Registrar's fees, printing and stationery expenses, advertising and marketing expenses and all other incidental and miscellaneous expenses for listing the Equity Shares on the Stock Exchanges. Other than (i) the listing fees, annual audit fees payable to the statutory auditors (to the extent not specifically undertaken for the purposes of this Offer) and corporate advertisement undertaken in ordinary course (other than Offer related advertisement) which shall be solely borne by our Company; and (ii) fees for counsel to the Selling Shareholders, if any, which shall be solely borne by the respective Selling Shareholders; all costs, fees and expenses with respect to the Offer shall be shared by our Company and the Selling Shareholders, on a *pro rata* basis, in proportion to the number of Equity Shares issued and allotted by our Company through the Fresh Issue and sold by each of the Selling Shareholders respectively through the Offer for Sale in accordance with Applicable Law. All the expenses relating to the Offer shall be paid by our Company in the first instance. Each Selling Shareholder agrees that it shall, severally and not jointly, reimburse our Company for any expenses in relation to the Offer paid by our Company on behalf of the respective Selling Shareholders. The Selling Shareholders will not bear any costs and expenses associated with any further issue of Equity Shares by the Company including by way of private placement of Equity Shares, post filing of the Draft Red Herring Prospectus with SEBI and prior to registering of the Red Herring Prospectus with the Registrar of Companies, and such costs shall be borne solely by the Company. Further, in the event that the Offer is postponed, withdrawn or abandoned for any reason or in the event that the Offer is not successfully completed, all expenses in relation to the Offer including the fees of the Book Running Lead Managers and legal counsels and their respective reimbursement for expenses which may have accrued up to the date of such postponement, withdrawal, abandonment, failure, return or rejection of the Red Herring Prospectus, as set out in their respective Fee Letters/ the Offer Agreement shall be, in accordance with, and subject to, Applicable Laws, shared between our Company and each of the Selling Shareholder, on a *pro rata* basis, in proportion to the number of Equity Shares proposed to be issued and allotted by our Company pursuant to the Fresh Issue and proposed to be sold by each of the Selling Shareholders through the Offer for Sale.

The estimated Offer related expenses are as under:

Activity	Estimated expenses ⁽¹⁾ (₹ in million)	As a % of the total estimated Offer expenses ⁽¹⁾	As a % of the total Offer size ⁽¹⁾
BRLMs fees and commissions (including underwriting commission)	669.56	49.73	2.17
Commission/processing fee for SCSBs and Bankers to the Offer and fee payable to the Sponsor Banks for Bids made by RIBs using UPI ⁽²⁾	3.89	0.29	0.01
Brokerage and selling commission and bidding charges for Members of the Syndicate, Registered Brokers, RTAs and CDPs ⁽³⁾	13.81	1.03	0.04
Fees payable to the Registrar to the Offer	1.36	0.10	0.00
Fees payable to others	183.51	13.63	0.60
Others			
- Listing fees, SEBI filing fees, upload fees, BSE and NSE processing fees, book building software fees and other regulatory expenses	127.96	9.50	0.41
- Printing and stationery	7.52	0.56	0.02
- Advertising and marketing expenses for the Offer	90.21	6.70	0.29
- Fee payable to legal counsels	146.49	10.88	0.48
- Miscellaneous	102.02	7.58	0.33
Total estimated Offer expenses	1,346.34	100.00	4.37

⁽¹⁾ Offer expenses include Goods and Service Tax aggregating to ₹ 205.37 million, where applicable. Offer expenses are estimates and are subject to change.

⁽²⁾ Selling commission payable to the SCSBs on the portion for RIBs, Non-Institutional Bidders, Eligible Employee Bidders and which are directly procured and uploaded by the SCSBs, would be as follows:

Portion for RIBs*	0.35% of the Amount Allotted (plus applicable taxes)
Portion for Non-Institutional Bidders*	0.20% of the Amount Allotted (plus applicable taxes)
Portion for Eligible Employees*	0.20% of the Amount Allotted (plus applicable taxes)

* Amount Allotted is the product of the number of Equity Shares Allotted and the Offer Price.

Selling commission payable to the SCSBs will be determined on the basis of the bidding terminal id as captured in the Bid book of BSE or NSE.

No processing fees shall be payable by our Company and the Selling Shareholders to the SCSBs on the applications directly procured by them.

Processing fees payable to the SCSBs for capturing Syndicate Member/Sub-syndicate (broker)/Sub-broker code on the ASBA Form for Non-Institutional Bidders and Qualified Institutional Bidders with bids above ₹ 0.5 million would be ₹10 plus applicable taxes, per valid application.

The total processing fees payable to SCSBs as mentioned above will be subject to a maximum cap of ₹1.50 million (exclusive of applicable taxes). In case the total uploading charges/processing fees payable exceeds ₹1.50 million (exclusive of applicable taxes), then the amount payable to SCSBs, would be proportionately distributed based on the number of valid applications such that the total uploading charges /processing fees payable do not exceed ₹ 1.50 million (exclusive of applicable taxes).

⁽³⁾ Brokerage, selling commission and processing/uploading charges on the portion for RIBs (using the UPI mechanism), Eligible Employee Bidders, and Non-Institutional Bidders which are procured by members of the Syndicate (including their Sub-Syndicate Members), RTAs and CDPs or for using 3-in-1 type accounts- linked online trading, demat & bank account provided by some of the brokers which are members of Syndicate (including their Sub-Syndicate Members) would be as follows:

Portion for RIBs*	0.35% of the Amount Allotted (plus applicable taxes)
Portion for Non-Institutional Bidders*	0.20% of the Amount Allotted (plus applicable taxes)
Portion for Eligible Employees*	0.20% of the Amount Allotted (plus applicable taxes)

* Amount Allotted is the product of the number of Equity Shares Allotted and the Offer Price.

The selling commission payable to the Syndicate / Sub-Syndicate Members (RII up to ₹ 0.2 million), and Non-Institutional Bidders (from ₹ 0.2 - ₹ 0.5 million) will be determined on the basis of the application form number / series, provided that the application is also bid by the respective Syndicate / Sub-Syndicate Members. For clarification, if a Syndicate ASBA application on the application form number / series of a Syndicate / Sub-Syndicate Members, is bid by an SCSB, the selling commission will be payable to the SCSB and not the Syndicate / Sub-Syndicate Members.

For Non-Institutional Bidders (above ₹ 0.5 million), Syndicate ASBA Form bearing SM code & Sub-Syndicate code of the application form submitted to SCSBs for blocking of the fund and uploading on the exchanges platform by SCSBs. For clarification, if a Syndicate ASBA application on the application form number / series of a Syndicate / Sub-Syndicate Member, is bid by an SCSB, the selling commission will be payable to the Syndicate / Sub-Syndicate members and not the SCSB.

Uploading charges payable to members of the Syndicate (including their Sub-Syndicate Members), RTAs and CDPs on the applications made by RIBs, Eligible Employee Bidders and using 3-in-1 accounts/Syndicate ASBA mechanism and Non-Institutional Bidders which are procured by them and submitted to SCSB for blocking or using 3-in-1 accounts/Syndicate ASBA mechanism, would be as follows: ₹ 10 plus applicable taxes, per valid application bid by the Syndicate (including their Sub-Syndicate Members), RTAs and CDPs.

Bidding charges payable on the application made using 3-in-1 accounts will be subject to a maximum cap of ₹ 2.00 million (plus applicable taxes), in case the total processing fees exceeds ₹ 2.00 million (plus applicable taxes) then processing fees will be paid on a pro-rata basis for portion of (i) RIB's (ii) NIB's (iii) Eligible Employee, as applicable,

The selling commission and bidding charges payable to Registered Brokers, the RTAs and CDPs will be determined on the basis of the bidding terminal id as captured in the bid book of BSE or NSE.

Selling commission/ uploading charges payable to the Registered Brokers on the portion for RIBs, Eligible Employee Bidders, and Non-Institutional Bidders which are directly procured by the Registered Broker and submitted to SCSB for processing, would be as follows:

Portion for RIBs*	₹ 10 per valid application (plus applicable taxes)
Portion for Non-Institutional Bidders*	₹ 10 per valid application (plus applicable taxes)
Portion for Eligible Employees*	₹ 10 per valid application (plus applicable taxes)

Uploading charges/ processing fees for applications made by RIBs using the UPI Mechanism (up to ₹ 0.2 million) and Non-Institutional Bidders (from ₹ 0.2 - ₹ 0.5 million) would be as under:

Members of the Syndicate / RTAs / CDPs /Registered Brokers	₹ 30 per valid application (plus applicable taxes) subject to a maximum cap of ₹ 10.50 million (plus applicable taxes)
------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------

* Based on valid applications.

The total uploading charges / processing fees payable to Members of the Syndicate, RTAs, CDPs, Registered Brokers will be subject to a maximum cap of ₹ 10.50 million (plus applicable taxes). In case the total uploading charges/processing fees payable exceeded 10.50 million, then the amount payable to Members of the Syndicate, RTAs, CDPs, Registered Brokers would be proportionately distributed based on the number of valid applications such that the total uploading charges / processing fees payable does not exceed ₹ 10.50 million.

All such commissions and processing fees set out above shall be paid as per the timelines in terms of the Syndicate Agreement and Cash Escrow and Sponsor Bank Agreement.

Axis Bank Limited	₹ Nil for per applications made by UPI Bidders using the UPI mechanism (plus applicable taxes)*. The Sponsor Bank(s) shall be responsible for making payments to third parties such as remitter bank, NPCI and such other parties as required in connection with the performance of its duties under the SEBI circulars, the Syndicate Agreement and other applicable laws.
Kotak Mahindra Bank Limited	₹ Nil for per applications made by UPI Bidders using the UPI mechanism (plus applicable taxes)*. The Sponsor Bank(s) shall be responsible for making payments to third parties such as remitter bank, NPCI and such other parties as required in connection with the performance of its duties under the SEBI circulars, the Syndicate Agreement and other applicable laws.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI RTA Master Circular, in a format as prescribed by SEBI, from time to time and in accordance with SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022.

Means of finance

The fund requirements set out for the aforesaid objects of the Offer are proposed to be met entirely from the Net Proceeds. Accordingly, our Company confirms that there is no requirement to make firm arrangements of finance through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised from the Fresh Issue and existing identifiable accruals as required under Regulation 7(1) of the SEBI ICDR Regulations. In case of a shortfall in the Net Proceeds or any increase in the actual utilization of funds earmarked for the aforesaid objects, our Company may explore a range of options including utilizing our internal accruals and/ or seeking additional debt from existing and/ or other lenders.

Interim use of Net Proceeds

The Net Proceeds shall be retained in the Public Offer Account until receipt of the listing and trading approvals from the Stock Exchanges by our Company. Pending utilization of the Net Proceeds for the purposes described above, our Company will deposit the Net Proceeds only with one or more scheduled commercial banks included in the second schedule of the RBI Act as may be approved by our Board or IPO Committee.

In accordance with Section 27 of the Companies Act, 2013, our Company confirms that it shall not use the Net Proceeds for buying, trading or otherwise dealing in the equity shares of any other listed company or for any investment in equity markets.

Bridge Financing Facilities

Our Company has not raised any bridge loans from any bank or financial institution as on the date of this Prospectus, which are proposed to be repaid from the Net Proceeds.

Monitoring of Utilization of Funds

In accordance with Regulation 41 of the SEBI ICDR Regulations, our Company has appointed a Monitoring Agency for monitoring the utilisation of Gross Proceeds prior to the filing of the Red Herring Prospectus with the RoC, as the proposed Fresh Issue exceeds ₹ 1,000.00 million.

Our Audit Committee and the Monitoring Agency will monitor the utilisation of the Gross Proceeds and the Monitoring Agency shall submit the report required under Regulation 41(2) of the SEBI ICDR Regulations, on a quarterly basis, until such time as the Gross Proceeds have been utilised in full. Our Company shall for the purposes of the quarterly report to be prepared by the Monitoring Agency, provide item by item description for all the expense heads under the objects of the Offer. Our Company undertakes to place the report(s) of the Monitoring Agency on receipt before the Audit Committee without any delay.

Our Company will disclose and continue to disclose, the utilisation of the Gross Proceeds, including interim use under a separate head in our balance sheet for such Fiscal periods as required under the SEBI ICDR Regulations, the SEBI Listing Regulations and any other applicable laws or regulations, clearly specifying the purposes for which the Gross Proceeds have been utilised, till the time any part of the Gross Proceeds remains unutilised. Our Company will also, in its balance sheet for the applicable Fiscal periods, provide details, if any, in relation to all such Gross Proceeds that have not been utilised, if any, of such currently unutilised Gross Proceeds. Further, our Company, on a quarterly basis, shall include the deployment of Gross Proceeds under various heads, as applicable, in the notes to our quarterly results. Our Company will indicate investments, if any, of unutilised Gross Proceeds in the balance sheet of our Company for the relevant Fiscal periods subsequent to receipt of listing and trading approvals from the Stock Exchanges.

Pursuant to Regulation 18(3), Regulation 32(3) and Part C of Schedule II, of the SEBI Listing Regulations, our Company shall, on a quarterly basis, disclose to the Audit Committee the uses and applications of the Gross Proceeds. The Audit Committee shall make recommendations to our Board for further action, if appropriate. On an annual basis, our Company shall prepare a statement of funds utilised for purposes other than those stated in this Prospectus and place it before the Audit Committee and make other disclosures as may be required until such time as the Gross Proceeds remain unutilised. Such disclosure shall be made only until such time that all the Net Proceeds have been utilised in full. The statement shall be certified by the Statutory Auditor of our Company. Furthermore, in accordance with Regulation 32(1) of the SEBI Listing Regulations, our Company shall furnish to the Stock Exchanges on a quarterly basis, a statement indicating (i) deviations, if any, in the actual utilisation of the proceeds of the Fresh Issue from the objects of the Fresh Issue as stated above; and (ii) details of category wise variations in the actual utilisation of the proceeds of Gross Proceeds. This information will also be published in newspapers, one in English, one in Hindi and one in Marathi, the regional language of the jurisdiction where the Registered Office is situated, simultaneously with the interim or annual financial results and explanation for such variation (if any) will be included in our Director's report, after placing the same before the Audit Committee.

Variation in Objects

In accordance with Sections 13(8) and 27 of the Companies Act, 2013 and applicable rules, and Regulation 59 and Schedule XX of the SEBI ICDR Regulations, our Company shall not vary the objects of the Fresh Issue without our Company being authorised to do so by the Shareholders by way of a special resolution. In addition, the notice issued to the Shareholders in relation to the passing of such special resolution shall specify the prescribed details as required under the Companies Act, 2013 and applicable rules. In addition, the notice shall simultaneously be published in the newspapers, one in English, one in Hindi and one in Marathi, the regional language of the jurisdiction where the Registered Office is situated, in accordance with the Companies Act, 2013 and applicable rules. Further, the dissenting Shareholders shall be provided an exit opportunity at a price and in such manner as prescribed under Regulation 59 and Schedule XX of the SEBI ICDR Regulations.

Appraising entity

None of the objects of the Offer for which the Net Proceeds will be utilised have been appraised by any bank/ financial institution or any other independent agency.

BASIS FOR OFFER PRICE

The Price Band and Offer Price of ₹ 1,053 was determined by our Company, in consultation with the BRLMs, on the basis of assessment of market demand for the Equity Shares offered through the Book Building Process and on the basis of quantitative and qualitative factors as described below. The face value of the Equity Shares is ₹ 1 each and the Offer Price is 1.05 times the Floor Price and 1.00 times the Cap Price, and the Floor Price is 1,000 times the face value and the Cap Price is 1,053 times the face value. Investors were advised to see “Risk Factors”, “Summary of Restated Consolidated Financial Information”, “Our Business”, “Restated Consolidated Financial Information”, and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 45, 102, 293, 550 and 829, respectively, to have an informed view before making an investment decision.

Qualitative Factors

We believe that some of the qualitative factors and our strengths which form the basis for computing the Offer Price are as follows:

- Comprehensive Suite of Customer-Centric Capabilities Leading to C&I Market Leadership and Strong Customer Relationships;
- Timely and Cost-Effective Project Development, Execution and Management Capabilities;
- Efficient capital allocation and risk management; and
- Our People and Culture.

For details, see “Our Business – Our Competitive Strengths” on page 303.

Quantitative Factors

Some of the information presented below relating to our Company is derived from the Restated Consolidated Financial Information. For details, see “Restated Consolidated Financial Information” and “Other Financial Information” beginning on pages 550 and 823, respectively.

Some of the quantitative factors which may form the basis for computing the Offer Price are as follows:

A. Basic and Diluted Earnings Per Equity Share (“EPS”), adjusted for changes in capital:

Financial Year/Period Ended	Basic EPS (in ₹)	Diluted EPS (in ₹)	Weight
March 31, 2025	2.88	2.79	3
March 31, 2024	(3.94)	(3.94)	2
March 31, 2023	(9.01)	(9.01)	1
Weighted Average[#]	(1.38)	(1.42)	
September 30, 2025*	1.09	1.05	
September 30, 2024*	0.36	0.35	

[#] As certified by V. Singhi & Associates, Chartered Accountants, pursuant to their certificate dated February 25, 2026.

*Not annualised.

Notes:

⁽¹⁾ Basic EPS is calculated as Restated (Loss)/Profit for the year attributable to owners of the Company divided by the number of weighted average Equity Shares outstanding during the year.

⁽²⁾ Diluted EPS is calculated as Restated (Loss)/Profit for the year attributable to owners of the Company divided by number of weighted average Equity Shares outstanding during the year adjusted for the effects of all dilutive potential Equity Shares.

⁽³⁾ Weighted average number of equity shares is the number of Equity Shares outstanding at the beginning of the period/year adjusted by the number of equity shares issued during the period/year multiplied by the time weighting factor. The time weighting factor is the number of days for which the specific shares are outstanding as a proportion of the total number of days during the period/year.

⁽⁴⁾ Subsequent to the year ended March 31, 2025, the Company in extra-ordinary general meeting dated June 27, 2025, have approved split of each equity share of face value of ₹ 10 each into 10 shares of face value of ₹ 1 each (the 'Split'). Further, pursuant to a resolution passed in extra-ordinary general meeting dated August 8, 2025, shareholders have approved the issuance of bonus shares to the equity shareholders in the ratio of 1:1 (the 'Bonus').

⁽⁵⁾ Earnings per Share calculations are in accordance with the notified Indian Accounting Standard 33 'Earnings per share'.

⁽⁶⁾ Weighted average = Aggregate of year-wise weighted EPS divided by the aggregate of weights i.e. (EPS x Weight) for each year/Total of weights.

⁽⁷⁾ The figures disclosed above are based on the Restated Consolidated Financial Information of our Company.

B. Price/Earning (“P/E”) ratio in relation to Price Band of ₹ 1,000 to ₹ 1,053 per Equity Share:

Particulars	P/E at the Floor Price (number of times)	P/E at the Cap Price (number of times)
Based on basic EPS for Financial Year ended March 31, 2025	347.22	365.63
Based on diluted EPS for Financial Year ended March 31, 2025	358.42	377.42

[#] As certified by V. Singhi & Associates, Chartered Accountants, pursuant to their certificate dated February 25, 2026.

C. Industry Peer Group P/E ratio

Particulars	P/E Ratio
Highest (NTPC Green Energy Ltd)	134.13
Lowest (ReNew Energy Global Plc)*	47.08
Average	87.40

*ReNew Energy Global Plc is listed on NASDAQ and not on BSE and NSE in India.

Notes:

- The industry high and low has been considered from the industry peer set. The industry composite has been calculated as the arithmetic average P/E of the industry peer set disclosed in this section.
- P/E Ratio for the listed industry peer has been computed based on the closing market price of equity shares, on BSE for Indian peers and NASDAQ for foreign peers, as of February 24, 2026, divided by the diluted EPS for the year ended March 31, 2025.
- All the financial information for listed industry peer is on a consolidated basis is sourced from the financial information of such listed industry peer available on the website of the stock exchange (BSE/NSE/NASDAQ), as of and for the fiscal ended March 31, 2025.

D. Enterprise Value (EV)/ EBITDA Ratio in relation to the Price Band of ₹ 1,000 to ₹ 1,053 per Equity Shares:

Particulars	EV/ EBITDA Ratio at the lower end of the Price Band (number of times)	EV/ EBITDA Ratio at the higher end of the Price Band (number of times)
Based on EBITDA for Fiscal 2025	16.97	17.49

E. Industry Peer Group Enterprise Value / Earnings Before Interest, Taxes, Depreciation and Amortisation (“EV/EBITDA”) ratio

Particulars	EV/EBITDA Ratio
Highest (NTPC Green Energy Ltd)	42.22x
Lowest (ReNew Energy Global Plc)*	9.96x
Average	22.85x

*ReNew Energy Global Plc is listed on NASDAQ and not on BSE and NSE in India.

Notes:

- The industry high and low has been considered from the industry peer set. The industry composite has been calculated as the arithmetic average EV/EBITDA of the industry peer set disclosed in this section.
- EV/EBITDA for the listed industry peers has been computed based on the Enterprise Value (calculated as closing market price of equity shares, on BSE for Indian peers and NASDAQ for Renew Energy Global PLC, as of February 24, 2026 multiplied by outstanding shares, as of March 31, 2025 add debt borrowings including lease liabilities less cash and cash equivalents less margin money, adding minority interest) divided by the EBITDA for the year ended March 31, 2025.
- All the financial information for listed industry peer is on a consolidated basis is sourced from the financial information of such listed industry peer available on the website of the stock exchange (BSE/NSE/NASDAQ), as of and for the fiscal ended March 31, 2025.

F. Return on Net Worth (“RoNW”)

Financial Year/Period Ended	RoNW (%)	Weight
March 31, 2025	1.09	3
March 31, 2024	(1.70)	2
March 31, 2023	(5.39)	1
Weighted Average[#]	(0.92)	
September 30, 2025*	0.43	
September 30, 2024*	0.15	

[#] As certified by V. Singhi & Associates, Chartered Accountants, pursuant to their certificate dated February 25, 2026.

* Not annualised

Notes:

- Return on Net Worth (%) = Return on Net Worth is calculated as Restated Profit/loss for the year/period attributable to owners of the company as per the Restated Consolidated Statement of Profit and Loss divided by Net Worth.
- Net worth is calculated as the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account, after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, as per the Restated Consolidated Financial Information, but does not include reserves created out of revaluation of assets, write-back of depreciation, amalgamation and foreign currency translation reserve.
- Weighted average = Aggregate of year-wise weighted RoNW divided by the aggregate of weights i.e. (RoNW x Weight) for each year/Total of weights
- The figures disclosed above are based on the Restated Consolidated Financial Information of the Company.

G. Net Asset Value (“NAV”) per Equity Share

Particulars	Amount (in ₹) ⁵
As at March 31, 2025	5,018.52
As at March 31, 2025 (Post Split & Bonus)- Refer Note 2	250.93
As at September 30, 2025	256.14
As at September 30, 2024 (Post Split & Bonus)- Refer Note 2	236.29
After the completion of the Offer	
- At Floor Price	348.09
- At Cap Price	349.88
- At Offer Price	349.88

⁵ As certified by V. Singhi & Associates, Chartered Accountants, pursuant to their certificate dated February 25, 2026.

Notes:

1. Net Asset Value per Equity Share represents Net Worth divided by number of Equity Shares outstanding at the end of the fiscal year or six month period.
2. Net Asset value per equity share (bonus and split adjusted) is calculated as Net worth divided by Number of equity shares outstanding at the end of the fiscal year (post split and bonus issue) or six months period.
3. Net worth is calculated as the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account, after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, as per the Restated Consolidated Financial Information, but does not include reserves created out of revaluation of assets, write-back of depreciation, amalgamation and foreign currency translation reserve.

H. Key Performance Indicators (“KPIs”)

The table below sets forth the details of our KPIs that our Company considers have a bearing for arriving at the basis for Offer Price. All the KPIs disclosed below have been approved by resolutions of our Audit Committee dated February 16, 2026, copy made available under “*Material Contracts and Documents for Inspection*” as disclosed on page 966), certified by Nikunj Ghodawat, our Chief Financial Officer, on behalf of the management of our Company by way of certificate dated February 16, 2026 and the Audit Committee has confirmed that the KPIs pertaining to our Company that have been disclosed to earlier investors at any point of time during the three years period prior to the date of filing of this Prospectus have been disclosed in this section and have been subject to verification and certification by V. Singhi & Associates, Chartered Accountants, pursuant to certificate dated February 25, 2026, which has been included in the list of material documents for inspection, in compliance with the SEBI ICDR Regulations. For details, see “*Material Contracts and Documents for Inspection*” beginning on page 966. The KPIs that have been consistently used by the management to analyse, track and monitor the operational and financial performance of our Company and were presented in the past meetings of our Board or shared with the Shareholders during the three years preceding the date of this Prospectus, which have been consequently identified as relevant and material KPIs and are disclosed in this “*Basis for Offer Price*” section.

In addition to the above, the Audit Committee also noted that other than the below mentioned KPIs there are certain items which have not been disclosed in this section as these items are either used for internal analysis, sensitive to the business and operations, not critical or relevant for analysis of our financial and operational performance or such items do not convey any meaningful information to determine performance/ valuation of our Company.

Our Company confirms that it shall continue to disclose all the KPIs included in this section on a periodic basis, at least once a year (or any lesser period as may be determined by our Board), for a duration of one year after the date of listing of the Equity Shares on the Stock Exchanges or until the utilisation of the proceeds from the Offer as per the disclosure made in the section “*Objects of the Offer*” beginning on page 160 of this Prospectus, whichever is later, or for such other duration as required under the SEBI ICDR Regulations.

Particulars	Units	As at and six months period ended September 30, 2025	As at and six months period ended September 30, 2024	As at March 31/ For Fiscal		
				2025	2024	2023

Notes:

- 1 **Generation exported:** Electricity unit generated in million kWh
- 2 **C&I Operational Capacity (Opex + Capex):** Operational Capacity means capacity of a project for which a commissioning certificate or CEIG charging approval has been issued. The solar (offsite) includes being solar component of hybrid projects, and being includes the wind component of hybrid projects. This KPI refers to operational capacity that has been contracted with C&I customers
- 3 **Contracted yet to be executed capacity:** Total renewable energy capacity (in MW) for which power purchase agreements (PPAs)/ Letter of Intent (LOI) have been signed with customers but project commissioning is still underway as at end of period
- 4 **Commissioned during trailing 12 months:** Total renewable energy capacity (in MW) that was successfully commissioned in the 12-month period immediately preceding the reporting date.
- 5 **Evacuation Capacity Available at end of year:** Maximum amount of electrical power that can be transmitted from a project to the grid or end consumer through the available transmission infrastructure, including substations, transmission lines, and associated grid connectivity/evacuation approval.
- 6 **Plant Load Factor:** Plant Load Factor is calculated as total generation by fully operational project capacity divided by maximum generation from fully operational project capacity during the period of operation in the portfolio during the period/year.
- **Solar Onsite (DC PLF):** Solar onsite mean solar projects that are located within the premises or in the immediate vicinity of the end consumer's facility. These projects are typically installed on rooftops, building structures, carports, or unused land within or adjacent to the consumer's premises, and supply power directly to the consumer without using the distribution network."
- **Solar Offsite (AC(DC PLF):** Solar Off-Site means solar projects that are located away from the premises of the end consumer and supply electricity through the grid under open access regulatory mechanisms. These projects are connected to the distribution network, allowing energy to be wheeled to customers located at different geographic locations.
- **Wind:** Wind projects that are located away from the premises of the end consumer and supply electricity through the grid under open access regulatory mechanisms. These projects are connected to the distribution network, allowing energy to be wheeled to customers located at different geographic locations.
- **Hybrid:** Hybrid is defined as wind-solar hybrid project that combines wind turbines and solar photovoltaic (PV) panels to generate electricity.
- 7 **Average plant availability (Portfolio level):** Weighted average of plant availability by fully operational project capacity in the portfolio during the period/year (trailing 12 months).
- 8 **Average grid availability (Offsite):** Weighted average of grid availability by fully operational project capacity in the portfolio during the period/year (trailing 12 months).
- 9 **Number of C&I customers:** Total number of distinct corporate customers contracted with active PPAs/capex contracts/LOI's as on the end of the fiscal year. Group companies have been considered as one customer for the purpose of calculating distinct customers
- 10 **Number of PPAs and contracts:** Represents the total number of signed power purchase agreements, letter of intent (LOI) and capex contracts as of the end of the fiscal year/period.
- 11 **Share of repeat orders in new contracted volume:** Share of capacities across PPA's/capex contracts/LOI's contracted during the year with existing customers who have previously contracted with Clean Max at any point of time.
- 12 **Weighted Average PPA Tenor:** Weighted Average tenor of PPA's/LOIs contracted till the relevant fiscal year/period.
- 13 **% Customers with credit rating AA and above:** Proportion of customers (by contracted capacity) having a long-term credit rating of AA/AAA or are MNC subsidiaries or others
- 14 **% Customers with credit rating A- and above:** Proportion of customers (by contracted capacity) having a long-term credit rating of A/ AA/AAA or are MNC subsidiaries or others
- 15 **Weighted average realised tariff:** Represents the average tariff earned from energy sales during the year, calculated as the ratio of total revenue from power sales to total energy generated (Revenue ÷ Energy Generated).
- 16 **Weighted average tariff for PPAs commissioned during year:** Weighted average tariff of all projects that were commissioned during the fiscal year/period (trailing 12 months), calculated based on tariff contracted in Power Purchase Agreements and/or LOIs.
- 17 **Revenue from Operations:** Revenue from operations is as per the Restated Consolidated Statement of Profit and Loss. It includes revenue from sale of power, revenue from sale of goods, revenue from projects, revenue from operation and maintenance services, revenue from common infra services and other operating income
 - o Renewable Energy Power Sales Segment includes sale of electricity generated at our renewable energy plants to customers through long-term Power Purchase Agreements ("PPAs"), Energy Supply Agreement ("ESAs") and Energy Attribute Purchase Agreements ("EAPAs")
 - o Renewable Energy Services Segment includes Capital Expenditure Services and Carbon Services

- 18 **Total Income:** Total Income is as per the Restated Consolidated Statement of Profit and Loss and includes Revenue from Operation and other income.
- 19 **Gross margin:** is calculated as revenue from operations minus cost of materials consumed and cost of services minus purchase of traded goods.
- 20 **Gross margin %:** Gross Margin % is calculated as Gross Margin of the segment as a percentage of Revenue from Operations of the respective segment
- 21 **EBITDA:** EBITDA is calculated as Revenue from operations minus Cost of materials consumed and cost of services minus Purchase of traded goods minus Employee benefits expense minus other expenses. The cost of services and other expenses include any maintenance expense towards our renewable energy plants.
- 22 **3 Year EBITDA CAGR:** Calculated as EBITDA growth from Fiscal 2023 to Fiscal 2025.
- 23 **Adjusted EBITDA Margin of the Segment (%):** Adjusted EBITDA Margin of the Segment is calculated as Adjusted EBITDA of the Segment as a percentage of Total income for the respective segment; Adjusted EBITDA of the Segment for Renewable Energy Power and Renewable Energy services segment is computed as segment result plus finance cost less share of profit of joint ventures and associate (net of taxes). Depreciation and amortisation expenses and Total tax expense are not included in Segment result.
- 24 **Cash SG&A/ Adjusted EBITDA:** Calculated as Cash SG&A as a percentage of Adjusted EBITDA.
- 25 **Cash SG&A** is calculated as Employee Benefit expenses plus other expenses, adjusted for non-cash expenses.
- 26 **PAT Attributable to owners:** PAT attributable to owners is Restated (Loss)/Profit for the year attributable to Owners of the company as per Restated Consolidated Statement of Profit and Loss.
- 27 **Adjusted EBITDA:** Adjusted EBITDA is calculated as Restated profit/(loss) for the period/year plus Total tax expenses, Exceptional items, Depreciation, impairment and amortisation expenses, Finance costs and Non-Cash/One-time expenses Less Share of profit of joint ventures and associate (net of taxes) and Non-Cash/One-time incomes.
- 28 **Adjusted EBITDA of the Segment:** Adjusted EBITDA of the Segment for Renewable Energy Power and Renewable Energy services segment is computed as segment result plus finance cost less share of profit of joint ventures and associate (net of taxes). Depreciation and amortisation expenses and Total tax expense are not included in Segment result.
- 29 **Cash PAT:** Cash PAT is calculated as Restated Profit/(Loss) before share of profit of joint venture and associate minus Restated (Loss)/Profit for the year attributable to Non-controlling interests plus Exceptional items plus Depreciation, amortisation and impairment expenses plus Non-cash finance cost plus Non-cash expenses minus Deferred tax credit minus Non-cash incomes. For break-down of Non-cash expenses, Non cash finance cost and Non-cash incomes refer "Management's Discussion and Analysis of Financial Conditions and Results" on page 829.
- 30 **Cash ROE (based on average equity):** Cash ROE (based on average equity) is calculated as Cash PAT as a percentage of Average equity. Figures have not been annualised for the period ended September 30, 2025 and September 30, 2024.
- 31 **Cash ROE (based on opening equity):** Cash ROE (based on opening equity) is calculated as Cash PAT as a percentage of Opening equity. Opening equity is Total equity attributable to the owners of the Company as at the end of previous fiscal/period.
- 32 **Reported ROE (based on average equity):** Reported ROE (based on average equity) is calculated as Restated (Loss)/Profit for the year attributable to Owners of the company divided by Average equity. Figures have not been annualised for the period ended September 30, 2025 and September 30, 2024.
- 33 **Reported ROE (based on opening equity):** Reported ROE (based on opening equity) is calculated as Restated (Loss)/Profit for the year attributable to Owners of the company divided by Opening equity. Opening equity is Total equity attributable to the owners of the Company as at the end of previous fiscal/period.
- 34 **Cash ROIC (based on average funds invested):** Cash ROIC (based on average funds invested) is calculated as Adjusted EBITDA as a percentage of Average funds invested in business. Figures have not been annualised for the period ended September 30, 2025 and September 30, 2024.
- 35 **Cash ROIC (based on opening funds invested):** Cash ROIC (based on opening funds invested) is calculated as Adjusted EBITDA as a percentage of Opening funds invested in business. Opening funds invested in business is Funds invested in the business at the end of previous fiscal/period.
- 36 **Reported ROIC (based on average funds invested):** Reported ROIC (based on average funds invested) is calculated as EBITDA as a percentage of Average funds invested in business. Figures have not been annualised for the period ended September 30, 2025 and September 30, 2024.
- 37 **Reported ROIC (based on opening funds invested):** Reported ROIC (based on opening funds invested) is calculated as EBITDA as a percentage of Opening funds invested in business. Opening funds invested in business is Funds invested in the business at the end of previous fiscal/period..
- 38 **Average equity:** Average equity is calculated as an average of Total equity attributable to the owners of the Company as at the end the fiscal and Total equity attributable to the owners of the Company at the end of the previous fiscal as per Restated Consolidated Statement of Assets and Liabilities.
- 39 **Average funds invested in business:** Average funds invested in business is calculated as an average of Funds invested in business at the end of the fiscal and Funds invested in business at the end of previous fiscal.
- 40 **Funds invested in business** is calculated as Total Equity and Total Borrowings (non-current borrowings and current borrowings. Funds invested in business at the beginning of the year is Funds invested in the business at the end of previous fiscal.
- 41 **3 Year average Cash ROIC (based on opening funds invested):** 3 Year average Cash ROIC (based on opening funds invested) is calculated as Average Adjusted EBITDA of last 3 fiscal years as a percentage of Average of Funds invested in business at the beginning of the year for last three fiscal years.
- 42 **3 Year average Cash ROE (based on opening equity):** 3 Year average Cash ROE (based on opening equity) is calculated as average Cash PAT for last 3 fiscal years as a percentage of average opening equity attributable to the owners for the last three fiscals
- 43 **Cost of project debt:** Cost of Project Debt calculated as the weighted average interest rate on project loans outstanding as a the end of the respective Fiscals or six month period.
- 44 **Debt (net off liquid assets) / Adjusted EBITDA:** Debt (net off liquid assets) / Adjusted EBITDA is calculated as Debt (net off liquid assets) divided by Adjusted EBITDA. Opening Debt (net off liquid assets) for the fiscal is Debt (net off liquid assets) at the end of previous fiscal/period.
- 45 **Debt (net off liquid assets)** is calculated as Total Borrowings minus cash and cash equivalents, other balances with bank, balances with bank held as margin money, Lien marked mutual funds - Quoted (measured at FVTPL) and current investments.
- 46 **Receivables (days sales outstanding):**
- DSO (days) or Trade receivable turnover of Renewable Energy Power Sales Segment is calculated as average trade receivables of the Renewable Energy Power Sales Segment divided by the Revenue from Operations of that segment for the year multiplied by 365 days (in the case of fiscal), or 182 days (in case of six month period).
 - DSO (days) or Trade receivable turnover of Renewable Energy Services Segment is calculated as average trade receivables of the Renewable Energy Services Segment divided by the Revenue from Operations of that segment for the year multiplied by 365 days (in the case of fiscal), or 182 days (in case of six month period).
- 47 **3-year average Gross Block/ Adjusted EBITDA:** 3-year average Gross Block/ Adjusted EBITDA is calculated as Average Gross Block of last 3 fiscal years divided by Adjusted EBITDA.
- 48 **Debt (net off liquid assets) to Equity Ratio:** Debt (net off liquid assets) to Equity is calculated as Debt (net off liquid assets) divided by Total Equity.

For details of our other operating metrics disclosed elsewhere in this Prospectus, see “Definitions and Abbreviations”, “Certain Conventions, Presentation of Financial, Industry and Market Data and Currency of Presentation” “Our Business”, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 2, 40, 293 and 829, respectively.

I. Description on the historic use of the KPIs by our Company to analyze, track or monitor the operational and/or financial performance of our Company

In evaluating our business, we consider and use certain KPIs, as presented above, as a supplemental measure to review and assess our financial and operating performance. The presentation of these KPIs are not intended to be considered in isolation or as a substitute for the Restated Consolidated Financial Information. We use these KPIs to evaluate our financial and operating performance. Some of these KPIs are not defined under Ind AS and are not presented in accordance with Ind AS. These KPIs have limitations as analytical tools. Further, these KPIs may differ from the similar information used by other companies and hence their comparability may be limited. Therefore, these metrics should not be considered in isolation or construed as an alternative to Ind AS measures of performance or as an indicator of our operating performance, liquidity, profitability or results of operation. Although these KPIs are not a measure of performance calculated in accordance with applicable accounting standards, our Company’s management believes that it provides an additional tool for investors to use in evaluating our ongoing operating results and trends and in comparing our financial results with other companies in our industry because it provides consistency and comparability with past financial performance, when taken collectively with financial measures prepared in accordance with Ind AS.

Investors are encouraged to review the Ind AS financial measures and to not rely on any single financial or operational metric to evaluate our business. See “Risk Factors – We track certain operational and non-GAAP metrics with internal systems and tools that are not independently verified by third parties. Certain of our operational metrics are subject to inherent challenges in measurement and any real or perceived inaccuracies in such metrics may adversely affect our business and reputation.” on page 89.

Our Company confirms that it shall continue to disclose all the KPIs included in this section on a periodic basis, at least once a year (or any lesser period as may be determined by our Board), for a duration of one year after the date of listing of the Equity Shares on the Stock Exchanges or till the utilisation of the Offer Proceeds as per the disclosure made in the section “Objects of the Offer” starting on page 160 of this Prospectus, whichever is later, or for such other duration as required under the SEBI ICDR Regulations.

Explanation for the KPIs

S. No.	Metrics	Description	Relevance
1.	Generation exported	Electricity unit generated in million kWh	Company is a net zero partners to corporates and is in the business of Renewable energy sale of power & services. Generation exported reflects a company's ability to convert renewable energy resources into sellable electricity and directly measures how effectively a company utilizes its installed capacity. This operational measure directly impacts the financial performance and contributes to the overall revenue of the company.
2.	C&I Operational Capacity (Opex + Capex)	Operational Capacity means capacity of a project for which a commissioning certificate or CEIG charging approval has been issued. This KPI refers to operational capacity that has been contracted with C&I customers	Operational capacity reflects the maximum potential power generation capability of a company's renewable energy facilities.
3.	Contracted yet to be executed capacity	Contracted yet-to-be-executed capacity refers to the total renewable energy capacity (in MW) for which power purchase agreements (PPAs)/ Letter of Intent (LOI) have been signed with customers but project commissioning is still underway as at end of period	This capacity indicates the future revenue and growth potential of a company's renewable energy facilities.
4.	Commissioned during trailing 12 months	Commissioned during the trailing 12 months refers to the total renewable energy capacity (in MW) that was successfully commissioned in the 12-month period immediately preceding the	This reflects the company's recent growth and demonstrates execution capabilities which directly impacts revenue and growth.

S. No.	Metrics	Description	Relevance
		reporting date.	
5.	Evacuation Capacity Available at end of year	Evacuation Capacity refers to the maximum amount of electrical power that can be transmitted from a project to the grid or end consumer through the available transmission infrastructure, including substations, transmission lines, and associated grid connectivity/evacuation approval.	It determines how much electricity can be transmitted from the renewable energy source (like solar or wind farms) to the power grid for sale to consumers. This is a key factor for investors when evaluating renewable energy projects as it helps them assess and underwrite the company's potential growth for profitability and long-term viability.
6.	Plant Load Factor (trailing 12 Months)	Plant Load Factor is calculated as total generation by fully operational project capacity divided by maximum generation from fully operational project capacity during the period of operation in the portfolio during the period/year.	This demonstrates how well a plant is performing compared to its maximum possible output. This metrics indicate how efficiently a plant converts its potential energy output into actual electricity generation over a period, making it essential for assessing a company's operational efficiency and financial viability.
7.	Average plant availability (Portfolio level)	"Average Plant Availability" is calculated as weighted average of plant availability by fully operational projects capacity in the portfolio during the period/year (trailing 12 months).	This reflects a plant's operational reliability and efficiency, impacting its revenue generation and overall performance. High availability ensures a steady stream of electricity generation, which translates to predictable revenue for the company. It is often a requirement in power purchase agreements signed with customers and high availability ensures these obligations are met.
8.	Average grid availability (Offsite)	Grid Availability is calculated as weighted average of grid availability by fully operational project capacity in the portfolio during the period/year (trailing 12 months).	A reliable power supply is crucial for customers. High grid availability translates to fewer power outages and a more consistent experience, leading to higher customer satisfaction. Investors and stakeholders often use grid availability as a key metric to evaluate the long-term viability and profitability of renewable energy projects. A company with high grid availability is generally seen as a more attractive investment.
9.	Number of C&I customers	Total number of distinct corporate customers contracted with active PPAs/capex contracts/LOI's as on the end of the fiscal year. Group companies have been considered as one customer for the purpose of calculating distinct customers.	The Company serves multiple customers across industries. The company's solutions are relatively unique for each of its customers based on their needs. Moreover the company has a very diversified customer base. Hence the Company is using this as a KPI for Basis of Offer Price purposes.
10.	Number of PPAs and contracts	Represents the total number of signed power purchase agreements, letter of intent (LOI) and capex contracts as of the end of the fiscal year/period.	The company is a net zero partner to corporates. 100% of its business is to commercial and industrial (C&I) customers. Accordingly, company has large number of PPAs and contracts with average capacities smaller compared to utility scale/government contracts of power sales. This metrics is important for investors to determine that the companies operations and financial effectiveness is not concentrated towards a few large contracts and instead it is well diversified and its associated to less risks.
11.	Share of repeat orders in new contracted volumes	Share of capacities across PPA's/capex contracts/LOI's contracted during the year with existing customers who have previously contracted with CleanMax at any point of time.	This indicates customer satisfaction, loyalty, and the long-term health of a business. A high repeat purchase rate suggests customers are finding value in the offerings and services of the company and are likely to continue contracting which will help with growth in revenue. It also serves as a validation of the business's offerings.
12.	Weighted Average PPA Tenor	Weighted Average tenor of PPA's/LOIs contracted till the relevant fiscal year/period	it directly impacts the project's financial viability and risk profile. Longer contract durations provide greater revenue certainty
13.	% Customers with	Proportion of customers (by contracted capacity)	It determines the credit worthiness of

S. No.	Metrics	Description	Relevance
	credit rating AA and above	having a long-term credit rating of AA/AAA or are MNC subsidiaries or others	customers and helps ascertain the associated risk profile. Customers with better credit rating tend to pay their bills on time thus ensuring a financial efficiency of the company's timely revenue collection and minimising bad debts.
14.	% Customers with credit rating A- and above	Proportion of customers (by contracted capacity) having a long-term credit rating of A/ AA/AAA or are MNC subsidiaries or others	It determines the credit worthiness of customers and helps ascertain the associated risk profile. Customers with better credit rating tend to pay their bills on time thus ensuring a financial efficiency of the company's timely revenue collection and minimising bad debts.
15.	Weighted average realised tariff	the average tariff earned from energy sales during the year, calculated as the ratio of total revenue from power sales to total energy generated (Revenue ÷ Energy Generated)	Tariff is the rate at which energy is supplied to a consumer. This directly impacts the revenue of the customer and hence becomes a key metric for investors to evaluate the revenue generating ability of the company which helps in determining the project returns.
16.	Weighted average tariff for PPAs commissioned during year	Weighted average tariff of all projects that were commissioned during the fiscal year/period (trailing 12 months), calculated based on tariff contracted in Power Purchase Agreements and/or LOIs.	Tariff is the rate at which energy is supplied to a consumer. This directly impacts the revenue of the customer and hence becomes a key metric for investors to evaluate the revenue generating ability of the company which helps in determining the project returns.
17.	Revenue from Operations	Revenue from operations is as per the Restated Consolidated Statement of Profit and Loss. It includes revenue from sale of power, revenue from sale of goods, revenue from projects, revenue from operation and maintenance services, revenue from common infra services and other operating income	Revenue from operations is used to assess the overall financial performance of our Company and size of our business.
18.	Total Income	Total Income is as per the Restated Consolidated Statement of Profit and Loss and includes Revenue from Operation and other income.	Total income is used to assess the overall financial performance of our Company and size of our business.
19.	Gross margin %	Gross Margin % is calculated as Gross Margin of the segment as a percentage of Revenue from Operations of the respective segment. Gross margin is calculated as revenue from operations minus cost of materials consumed and cost of services minus purchase of traded goods.	Gross margin measures business efficiency and tracking it helps assess overall efficiencies and hence is an important metric for the company
20.	EBITDA	EBITDA is calculated as Revenue from operations minus Cost of materials consumed and cost of services minus Purchase of traded goods minus Employee benefits expense minus other expenses. The cost of services and other expenses include any maintenance expense towards our renewable energy plants	EBITDA is crucial because it provides potential investors with a metric that is reflection of our company's profitability before interest, depreciation, amortisation and taxes. This is a key KPI for valuation.
21.	3 Year EBITDA CAGR	3 Year EBITDA CAGR calculated as EBITDA growth from Fiscal 2023 to Fiscal 2025	EBITDA Growth is presented to investor every quarter and investor do work out the CAGR - as the existing investors are invested in the company for a longer period and they already they track the growth CAGR. Hence, this is an important growth matrix and historically the average hold period has been approximately 3 years for each investors of the company so 3 year CAGR from investor & Co perspective is very important KPI.
22.	Adjusted EBITDA Margin of the Segment (%)	Adjusted EBITDA Margin of the Segment is calculated as Adjusted EBITDA of the Segment as a percentage of Total income for the respective segment. Adjusted EBITDA of the Segment for Renewable Energy Power and Renewable Energy services segment is computed as segment result plus finance cost less share of profit of joint ventures and associate (net of taxes). Depreciation and amortisation expenses and Total tax expense are	Adjusted EBITDA Margin of the Segment is crucial because it provides potential investors with a metric that is reflection of our company's profitability before interest, depreciation, amortisation and taxes. This is a key KPI for valuation.

S. No.	Metrics	Description	Relevance
		not included in Segment result	
23.	Cash SG&A/ Adjusted EBITDA	Calculated as Cash SG&A as a percentage of Adjusted EBITDA. Cash SG&A is calculated as Employee Benefit expenses plus other expenses, adjusted for non-cash expenses.	This helps determine the efficiency of business towards the corporate overheads incurred.
24.	PAT Attributable to owners	PAT attributable to owners is Restated (Loss)/Profit for the year attributable to Owners of the company as per Restated Consolidated Statement of Profit and Loss	It reflects a company's overall financial health and performance over a specific period. It indicates how well a company manages its revenue and expenses to generate earnings, which is essential for its survival and growth.
25.	Adjusted EBITDA	Adjusted EBITDA is calculated as Restated profit/(loss) for the period/year plus Total tax expenses, Exceptional items, Depreciation, impairment and amortisation expenses, Finance costs and Non-Cash/One-time expenses Less Share of profit of joint ventures and associate (net of taxes) and Non-Cash/One-time incomes	In asset heavy business like ours, we have a high depreciation which is a non-cash expense; coupled with low maintenance capex. This KPI strips away non-cash accounting impacts to offer a clearer view of profitability and earnings of the company.
26.	Cash PAT	Cash PAT is calculated as Restated Profit/(Loss) before share of profit of joint venture and associate minus Restated (Loss)/Profit for the year attributable to Non-controlling interests plus Exceptional items plus Depreciation, amortisation and impairment expenses plus Non-cash finance cost plus Non-cash expenses minus Deferred tax credit minus Non-cash incomes. For break-down of Non-cash expenses, Non cash finance cost and Non-cash incomes refer " <i>Management's Discussion and Analysis of Financial Conditions and Results</i> " on page 829.	It shows how much money the company has earned in the business or distribute to its shareholders. It's a useful metric for understanding a company's profitability on cash basis.
27.	Cash ROE (based on average equity)	Cash ROE (based on average equity) is calculated as Cash PAT as a percentage of Average equity.	It is vital as it shows how efficiently a company converts shareholders' equity into cash profits.
28.	Cash ROE (based on opening equity)	Cash ROE (based on opening equity) is calculated as Cash PAT as a percentage of Opening equity. Opening equity is Total equity attributable to the owners of the Company as at the end of previous fiscal/period.	It is vital as it shows how efficiently a company converts shareholders' equity into cash profits.
29.	Reported ROE (based on average equity)	Reported ROE (based on average equity) is calculated as Restated (Loss)/Profit for the year attributable to Owners of the company divided by Average equity.	It is vital as it shows how efficiently a company converts shareholders' equity into cash profits.
30.	Reported ROE (based on opening equity)	Reported ROE (based on opening equity) is calculated as Restated (Loss)/Profit for the year attributable to Owners of the company divided by Opening equity. Opening equity is Total equity attributable to the owners of the Company as at the end of previous fiscal/period.	It is vital as it shows how efficiently a company converts shareholders' equity into cash profits.
31.	Cash ROIC (based on average funds invested)	Cash ROIC (based on average funds invested) is calculated as Adjusted EBITDA as a percentage of Average funds invested in business.	This metric is especially useful when comparing companies within the same industry, as it highlights which organisations are maximising their returns. By understanding Cash ROIC, investors can gauge the financial health and potential growth trajectory of a business.
32.	Cash ROIC (based on opening funds invested)	Cash ROIC (based on opening funds invested) is calculated as Adjusted EBITDA as a percentage of Opening funds invested in business. Opening funds invested in business is Funds invested in the business at the end of previous fiscal/period.	This metric is especially useful when comparing companies within the same industry, as it highlights which organisations are maximising their returns. By understanding Cash ROIC, investors can gauge the financial health and potential growth trajectory of a business.
33.	Reported ROIC (based on average funds invested)	Reported ROIC (based on average funds invested) is calculated as EBITDA as a percentage of Average funds invested in business.	This metric is especially useful when comparing companies within the same industry, as it highlights which organisations are maximising their returns. By understanding ROIC, investors can gauge the financial health and potential growth trajectory of a business.
34.	Reported ROIC	Reported ROIC (based on opening funds	This metric is especially useful when

S. No.	Metrics	Description	Relevance
	(based on opening funds invested)	invested) is calculated as EBITDA as a percentage of Opening funds invested in business. Opening funds invested in business is Funds invested in the business at the end of previous fiscal/period.	comparing companies within the same industry, as it highlights which organisations are maximising their returns. By understanding ROIC, investors can gauge the financial health and potential growth trajectory of a business.
35.	3 Year average Cash ROIC (based on opening funds invested)	3 Year average Cash ROIC (based on opening funds invested) is calculated as Average Adjusted EBITDA of last 3 fiscal years as a percentage of Average of Funds invested in business at the beginning of the year for last three fiscal years	This metric is especially useful when comparing companies within the same industry, as it highlights which organisations are maximising their returns. By understanding Cash ROIC, investors can gauge the financial health and potential growth trajectory of a business.
36.	3 Year average Cash ROE (based on opening equity)	3 Year average Cash ROE (based on opening equity) is calculated as average Cash PAT for last 3 fiscal years as a percentage of average opening equity attributable to the owners for the last three fiscals	It is vital as it shows how efficiently a company converts shareholders' equity into cash profits.
37.	Cost of project debt	Cost of Project Debt calculated as the weighted average interest rate on project loans outstanding as a the end of the respective Fiscals or six month period.	The cost of project debt is the effective interest rate a company pays on its borrowed funds. This KPI helps to understand financial obligations and ensure that liabilities are managed efficiently.
38.	Debt (net off liquid assets) / Adjusted EBITDA	Debt (net off liquid assets) / Adjusted EBITDA is calculated as Opening Debt (net off liquid assets) divided by Adjusted EBITDA. Debt (net off liquid assets) is calculated as Total Borrowings minus cash and cash equivalents, other balances with bank, balances with bank held as margin money, Lien marked mutual funds - Quoted (measured at FVTPL) and current investments. Opening Debt (net off liquid assets) for the fiscal is Debt (net off liquid assets) at the end of previous fiscal/period.	It is a leverage ratio used to determine if a borrower generates sufficient cash to meet its mandatory interest & debt obligations.
39.	Receivables (days sales outstanding)	DSO (days) or Trade receivable as average trade receivables divided by the Revenue from Operations for the year multiplied by 365 days (in the case of fiscal), or 182 days (in the case of six month period)	To determine the counterparty credit risk and maintain healthy working capital. It is very important to ensure the company contracts with quality customers that fulfil their financial obligations on time.
40.	3-year average Gross Block/ Adjusted EBITDA	EBITDA efficiency is calculated as Average Gross Block of last 3 fiscal years divided by Adjusted EBITDA	It shows our EBITDA efficiency on the amount actually invested in the underlying asset.
41.	Debt (net off liquid assets) to Equity Ratio (times)	Debt (net off liquid assets) to Equity is calculated as Debt (net off liquid assets) divided by Total Equity	The debt-to-equity ratio (D/E) measures how much debt a company uses to finance its assets compared to shareholder equity.

Listed industry peers

Rationale of selecting listed peers disclosed in the DRHP, the RHP and this Prospectus

The selected listed peer set comprising Acme Solar Holdings Ltd, NTPC Green Energy Ltd, Adani Green Energy Limited, and ReNew Energy Green PLC, represents the only pure-play renewable IPPs in India with business models that are similar to the business model of CleanMax. These companies are primarily engaged in the development, ownership, and operation of utility-scale solar, wind, and hybrid renewable projects under long-term PPAs, which ensures predictable revenue streams and comparable risk-return profiles to CleanMax. Importantly, these players are not involved in conventional power (e.g. thermal) generation, transmission or retail distribution businesses, ensuring that their financial and operating metrics purely reflect the dynamics of CleanMax. Hence, they serve as the most appropriate and representative peer group.

Rationale of selecting other listed companies in power sector

The listed entities such as NTPC, JSW Energy, Tata Power, SJVN, NHPC, and Torrent Power have been excluded from the benchmarking as their operations are diversified across multiple sources of energy, including thermal, gas-based, hydro, and other conventional segments. Many of these companies also have significant exposure to regulated transmission and distribution

businesses, which result in fundamentally different revenue drivers, risk profiles, and return characteristics compared to renewable-only IPPs.

Comparison with listed industry peers

a. Comparison of accounting ratios:

Following is a comparison of our accounting ratios with the listed peers:

Name of Company	Face Value	Closing price on February 24, 2026 (₹)	Revenue from Operations (in ₹ million)	EPS (₹)		NAV (₹ per share)	P/E	EV/EBITDA	RoNW (%)
	(₹ Per Share)			Basic	Diluted				
Clean Max Enviro Energy Solutions Limited (Refer note: 8)	1	1,053 [^]	14,957.01	2.88	2.79	250.93 [#]	377.42 [^]	17.49 [^]	1.09
Listed Peers									
ACME Solar Holdings Ltd	2	231.65	14,051.31	4.55	4.53	74.54	51.14	15.71	5.59
NTPC Green Energy Ltd	10	89.87	22,096.40	0.67	0.67	21.88	134.13	42.22	2.58
Adani Green Energy Limited	10	981.35	112,120.00	8.37	8.37	58.63	117.25	23.51	13.48

* Financial information of our Company has been derived from the Restated Consolidated Financial Information as of or for the financial year ended March 31, 2025.

⁵ ReNew Energy Global Plc is listed on NASDAQ and not on BSE and NSE in India.

Ordinary Equity Shares of ReNew Energy Global PLC are listed on NASDAQ. Closing market price of ReNew Energy Global PLC as on February 24, 2026 is converted into INR using conversion ratio of 1USD=90.97 INR

**Source for listed peers information included above:

1. All the financial information for listed industry peer is on a consolidated basis and is sourced from the financial information of such listed industry peer available on the website of the stock exchanges (BSE/NSE/NASDAQ), as of and for year ended March 31, 2025. Further financial information for FY 2025 for Renew Energy Global PLC is on a consolidated basis and is sourced from the FORM 20-F filed with US SEC and NASDAQ
2. NAV of listed peers has been computed as Total Equity attributable to owners of the Company.
3. P/E Ratio for the listed industry peer has been computed based on the closing market price of equity shares, on BSE for Indian peers, as of February 24, 2026 divided by the diluted EPS for the year ended March 31, 2025. Except for ReNew Energy Global PLC, where closing market price of equity shares, on NASDAQ as of February 24, 2026 divided by the diluted EPS for the year ended March 31, 2025.
4. Return on Net Worth (%) = Profit After Tax attributable to owners of the Company for the year ended March 31, 2025/ Net Worth as on March 31, 2025.
5. Net Asset Value per Equity Share represents Net Worth as at the end of the year divided by number of Equity Shares outstanding at the end of the year/period.
6. Net Worth = Net Worth means Total Equity attributable to owners of the Company excluding any debt instruments in the nature of Equity.
7. EV/EBITDA for the listed industry peers has been computed based on the Enterprise Value (calculated as closing market price of equity shares, on BSE for Indian peers and NASDAQ for Renew Energy Global PLC, as of February 24, 2026 multiplied by outstanding shares, as of March 31, 2025 add debt borrowings including lease liabilities less cash and cash equivalents less margin money, adding minority interest) divided by the EBITDA for the year ended March 31, 2025.
8. For definitions of EPS, NAV and RoNW of Clean Max refer pages 189 to 191.

b. Comparison of our KPIs with listed industry peers

While our Company considers the following companies as listed peers, the definitions and explanation considered for the below KPIs by such peer companies may not be the same as our Company. Accordingly, certain KPIs of our Company stated below, should be read in the context of the explanation and definitions provided in this section, and shall not be considered as comparable with below mentioned peer companies. Following is a comparison of our KPIs with the listed peer:

Particulars	Units	Our Company					ACME Solar Holdings Ltd					NTPC Green Energy Ltd					ReNew Energy Global PLC					Adani Green Energy Limited				
		As at and six months period ended September 30, 2025	As at and six months period ended September 30, 2024	As at March 31/ For Fiscal			As at and six months period ended September 30, 2025	As at and six months period ended September 30, 2024	As at March 31/ For Fiscal			As at and six months period ended September 30, 2025	As at and six months period ended September 30, 2024	As at March 31/ For Fiscal			As at and six months period ended September 30, 2025	As at and six months period ended September 30, 2024	As at March 31/ For Fiscal			As at and six months period ended September 30, 2025	As at and six months period ended September 30, 2024	As at March 31/ For Fiscal

Notes:

- 1 **Generation exported:** Electricity unit generated in million kWh
- 2 **C&I Operational Capacity (Opex + Capex):** Operational Capacity means capacity of a project for which a commissioning certificate or CEIG charging approval has been issued. The solar (offsite) includes being solar component of hybrid projects, and being includes the wind component of hybrid projects. This KPI refers to operational capacity that has been contracted with C&I customers
- 3 **Contracted yet to be executed capacity:** Total renewable energy capacity (in MW) for which power purchase agreements (PPAs)/ Letter of Intent (LOI) have been signed with customers but project commissioning is still underway as at end of period
- 4 **Commissioned during trailing 12 months:** Total renewable energy capacity (in MW) that was successfully commissioned in the 12-month period immediately preceding the reporting date.
- 5 **Evacuation Capacity Available at end of year:** Maximum amount of electrical power that can be transmitted from a project to the grid or end consumer through the available transmission infrastructure, including substations, transmission lines, and associated grid connectivity/evacuation approval.
- 6 **Plant Load Factor:** Plant Load Factor is calculated as total generation by fully operational project capacity divided by maximum generation from fully operational project capacity during the period of operation in the portfolio during the period/year.
 - **Solar Onsite (DC PLF):** Solar onsite mean solar projects that are located within the premises or in the immediate vicinity of the end consumer's facility. These projects are typically installed on rooftops, building structures, carparks, or unused land within or adjacent to the consumer's premises, and supply power directly to the consumer without using the distribution network."
 - **Solar Offsite (AC/DC PLF):** Solar Off-Site means solar projects that are located away from the premises of the end consumer and supply electricity through the grid under open access regulatory mechanisms. These projects are connected to the distribution network, allowing energy to be wheeled to customers located at different geographic locations.
 - **Wind:** Wind projects that are located away from the premises of the end consumer and supply electricity through the grid under open access regulatory mechanisms. These projects are connected to the distribution network, allowing energy to be wheeled to customers located at different geographic locations.
 - **Hybrid:** Hybrid is defined as wind-solar hybrid project that combines wind turbines and solar photovoltaic (PV) panels to generate electricity.
- 7 **Average plant availability (Portfolio level):** Weighted average of plant availability of the fully operational project capacity in the portfolio during the period/year (trailing 12 months).
- 8 **Average grid availability (Offsite):** Weighted average of grid availability of the fully operational project capacity in the portfolio during the period/year (trailing 12 months).
- 9 **Number of C&I customers:** Total number of distinct corporate customers contracted with active PPAs/capex contracts/LOI's as on the end of the fiscal year. Group companies have been considered as one customer for the purpose

of calculating distinct customers

- 10 **Number of PPAs and contracts:** Represents the total number of signed power purchase agreements, letter of intent (LOI) and capex contracts as of the end of the fiscal year/period.
- 11 **Share of repeat orders in new contracted volume:** Share of capacities across PPA's/capex contracts/LOI's contracted during the year with existing customers who have previously contracted with CleanMax at any point of time.
- 12 **Weighted Average PPA Tenor:** Weighted Average tenor of PPA's/LOIs contracted till the relevant fiscal year/period
- 13 **% Customers with credit rating AA and above:** Long-term credit rating of AA/AAA or are MNC subsidiaries or others
- 14 **% Customers with credit rating A- and above:** Proportion of customers (by contracted capacity) having a long-term credit rating of A/ AA/AAA or are MNC subsidiaries or others
- 15 **Weighted average realised tariff:** earned from energy sales during the year, calculated as the ratio of total revenue from power sales to total energy generated (Revenue ÷ Energy Generated).
- 16 **Weighted average tariff for PPAs commissioned during year:** Weighted average tariff of all projects that were commissioned during the fiscal year/period (trailing 12 months), calculated based on tariff contracted in Power Purchase Agreements and/or LOIs.
- 17 **Revenue from Operations:** Revenue from operations is as per the Restated Consolidated Statement of Profit and Loss. It includes revenue from sale of power, revenue from sale of goods, revenue from projects, revenue from operation and maintenance services, revenue from common infra services and other operating income
- o Renewable Energy Power Sales Segment includes sale of electricity generated at our renewable energy plants to customers through long-term Power Purchase Agreements (“PPAs”), Energy Supply Agreement (“ESAs”) and Energy Attribute Purchase Agreements (“EAPAs”)
 - o Renewable Energy Services Segment includes Capital Expenditure Services and Carbon Services
- 18 **Total Income:** Total Income is as per the Restated Consolidated Statement of Profit and Loss and includes Revenue from Operation and other income.
- 19 **Gross margin:** is calculated as revenue from operations minus cost of materials consumed and cost of services minus purchase of traded goods.
- 20 **Gross margin %:** Gross Margin % is calculated as Gross Margin of the segment as a percentage of Revenue from Operations of the respective segment
- 21 **EBITDA:** EBITDA is calculated as Revenue from operations minus Cost of materials consumed and cost of services minus Purchase of traded goods minus Employee benefits expense minus other expenses. The cost of services and other expenses include any maintenance expense towards our renewable energy plants.
- 22 **3 Year EBITDA CAGR:** Calculated as EBITDA growth from Fiscal 2023 to Fiscal 2025.
- 23 **Adjusted EBITDA Margin of the Segment (%):** Adjusted EBITDA Margin of the Segment is calculated as Adjusted EBITDA of the Segment as a percentage of Total income for the respective segment; **Adjusted EBITDA of the Segment:** Adjusted EBITDA of the Segment for Renewable Energy Power and Renewable Energy services segment is computed as segment result plus finance cost less share of profit of joint ventures and associate (net of taxes). Depreciation and amortisation expenses and Total tax expense are not included in Segment result.
- 24 **Cash SG&A/ Adjusted EBITDA:** Calculated as Cash SG&A as a percentage of Adjusted EBITDA.
- 25 **Cash SG&A** is calculated as Employee Benefit expenses plus other expenses, adjusted for non-cash expenses.
- 26 **PAT Attributable to owners:** PAT attributable to owners is Restated (Loss)/Profit for the year attributable to Owners of the company as per Restated Consolidated Statement of Profit and Loss.
- 27 **Adjusted EBITDA:** Adjusted EBITDA is calculated as Restated profit/(loss) for the period/year plus Total tax expenses, Exceptional items, Depreciation, impairment and amortisation expenses, Finance costs and Non-Cash/One-time expenses Less Share of profit of joint ventures and associate (net of taxes) and Non-Cash/One-time incomes.
- 28 **Cash PAT:** Cash PAT is calculated as Restated Profit/(Loss) before share of profit of joint venture and associate minus Restated (Loss)/Profit for the year attributable to Non-controlling interests plus Exceptional items plus Depreciation, amortisation and impairment expenses plus Non-cash finance cost plus Non-cash expenses minus Deferred tax credit minus Non-cash incomes. For break-down of Non-cash expenses, Non cash finance cost and Non-cash incomes refer “Management’s Discussion and Analysis of Financial Conditions and Results” on page 829.
- 29 **Cash ROE (based on average equity):** Cash ROE (based on average equity) is calculated as Cash PAT as a percentage of Average equity. Figures have not been annualised for the period ended September 30, 2025 and September 30, 2024.
- 30 **Cash ROE (based on opening equity):** Cash ROE (based on opening equity) is calculated as Cash PAT as a percentage of Opening equity. Opening equity is Total equity attributable to the owners of the Company as at the end of previous fiscal/period..
- 31 **Reported ROE (based on average equity):** Reported ROE (based on average equity) is calculated as Restated (Loss)/Profit for the year attributable to Owners of the company divided by Average equity. Figures have not been annualised for the period ended September 30, 2025 and September 30, 2024.
- 32 **Reported ROE (based on opening equity):** Reported ROE (based on opening equity) is calculated as Restated (Loss)/Profit for the year attributable to Owners of the company divided by Opening equity. Opening equity is Total equity attributable to the owners of the Company as at the end of previous fiscal/period.
- 33 **Cash ROIC (based on average funds invested):** Cash ROIC (based on average funds invested) is calculated as Adjusted EBITDA as a percentage of Average funds invested in business. Figures have not been annualised for the period ended September 30, 2025 and September 30, 2024.
- 34 **Cash ROIC (based on opening funds invested):** Cash ROIC (based on opening funds invested) is calculated as Adjusted EBITDA as a percentage of Opening funds invested in business. Opening funds invested in business is Funds invested in the business at the end of previous fiscal/period.
- 35 **Reported ROIC (based on average funds invested):** Reported ROIC (based on average funds invested) is calculated as EBITDA as a percentage of Average funds invested in business. Figures have not been annualised for the period ended September 30, 2025 and September 30, 2024.

- 36 **Reported ROIC (based on opening funds invested):** Reported ROIC (based on opening funds invested) is calculated as EBITDA as a percentage of Opening funds invested in business. Opening funds invested in business is Funds invested in the business at the end of previous fiscal/period.
- 37 **Average equity:** Average equity is calculated as an average of Total equity attributable to the owners of the Company as at the end the fiscal and Total equity attributable to the owners of the Company at the end of the previous fiscal as per Restated Consolidated Statement of Assets and Liabilities.
- 38 **Average funds invested in business:** Average funds invested in business is calculated as an average of Funds invested in business at the end of the fiscal and Funds invested in business at the end of previous fiscal.
- 39 **Funds invested in business** is calculated as Total Equity and Total Borrowings (non-current borrowings and current borrowings). Funds invested in business at the beginning of the year is Funds invested in the business at the end of previous fiscal.
- 40 **3 Year average Cash ROIC (based on opening funds invested):** 3 Year average Cash ROIC (based on opening funds invested) is calculated as Average Adjusted EBITDA of last 3 fiscal years as a percentage of Average of Funds invested in business at the beginning of the year for last three fiscal years
- 41 **3 Year average Cash ROE (based on opening equity):** 3 Year average Cash ROE (based on opening equity) is calculated as average Cash PAT for last 3 fiscal years as a percentage of average opening equity attributable to the owners for the last three fiscals
- 42 **Cost of project debt:** Cost of Project Debt calculated as the weighted average interest rate on project loans outstanding as a the end of the respective Fiscals or six month period.
- 43 **Debt (net off liquid assets) / Adjusted EBITDA:** Debt (net off liquid assets) / Adjusted EBITDA is calculated as Debt (net off liquid assets) divided by Adjusted EBITDA. Opening Debt (net off liquid assets) for the fiscal is Debt (net off liquid assets) at the end of previous fiscal/period.
- 44 **Debt (net off liquid assets)** is calculated as Total Borrowings minus cash and cash equivalents, other balances with bank, balances with bank held as margin money, Lien marked mutual funds - Quoted (measured at FVTPL) and current investments.
- 45 **Receivables (days sales outstanding):**
- o DSO (days) or Trade receivable turnover of Renewable Energy Power Sales Segment is calculated as average trade receivables of the Renewable Energy Power Sales Segment divided by the Revenue from Operations of that segment for the year multiplied by 365 days (in the case of fiscal), or 182 days (in case of six month period).
 - o DSO (days) or Trade receivable turnover of Renewable Energy Services Segment is calculated as average trade receivables of the Renewable Energy Services Segment divided by the Revenue from Operations of that segment for the year multiplied by 365 days (in the case of fiscal), or 182 days (in case of six month period).
- 46 **3-year average Gross Block/ Adjusted EBITDA:** 3-year average Gross Block/ Adjusted EBITDA is calculated as Average Gross Block of last 3 fiscal years divided by Adjusted EBITDA.
- 47 **Debt (net off liquid assets) to Equity Ratio:** Debt (net off liquid assets) to Equity is calculated as Debt (net off liquid assets) divided by Total Equity.

Weighted average cost of acquisition (“WACA”), Floor Price and Cap Price

- J. Price per share of our Company (as adjusted for corporate actions, including bonus issuances) based on primary issuances of Equity Shares or convertible securities (excluding Equity Shares issued under the Clean Max ESOP Scheme and issuance of Equity Shares pursuant to a bonus issue) during the 18 months preceding the date of this Prospectus, where such issuance is equal to or more than 5% of the fully diluted paid-up share capital of our Company (calculated based on the pre-Offer capital before such transaction(s) and excluding ESOPs granted but not vested), in a single transaction or multiple transactions combined together over a span of rolling 30 days (“Primary Issuances”)**

Our Company has not issued any equity shares, excluding Equity Shares issued under the Clean Max ESOP Scheme and issuance of Equity Shares pursuant to a bonus issue, during the 18 months preceding the date of this Prospectus, where such issuance is equal to or more than 5% of the fully diluted paid-up share capital of our Company (calculated based on the pre-Offer capital before such transaction(s) and excluding ESOPs granted but not vested), in a single transaction or multiple transactions combined together over a span of rolling 30 days.

- K. Price per share of our Company (as adjusted for corporate actions, including bonus issuances) based on secondary sale or acquisition of equity shares or convertible securities (excluding gifts) involving our Promoters, members of Promoter Group, Selling Shareholders or other shareholders with the right to nominate directors on our Board during the 18 months preceding the date of filing of this Prospectus, where the acquisition or sale is equal to or more than 5% of the fully diluted paid-up share capital of our Company (calculated based on the pre-Offer capital before such transaction/s and excluding ESOPs granted but not vested), in a single transaction or multiple transactions combined together over a span of rolling 30 days (“Secondary Transactions”)**

Weighted average cost of acquisition							678.35

* As per the KEMPINC-BGTF SPA, KEMPINC-Augment SPA II and KEMPINC-DSDG HOLDING SPA II, the total transfer price was ₹1.00. Note: Pursuant to the resolution of the Board dated June 25, 2025, and the resolution of Shareholders dated June 27, 2025, each equity share of the Company of face value of ₹ 10 each was subdivided into 10 Equity Shares of face value of ₹ 1 each. Further, pursuant to shareholders resolution dated August 8, 2025, 50,720,910 Equity Shares were allotted to the existing shareholders pursuant to a bonus issue. Accordingly, the number of equity shares held an average cost of acquisition per equity share has been adjusted to give effect to such sub-division and bonus issuance. The effective number of equity shares issued would be 9,280,700 and the effective cost of acquisition would be ₹ 431.00 post such adjustments.

Since there have been Secondary Issuances by our Company during the 18 months preceding the date of filing of this Prospectus (as disclosed above), the requirement to disclose information based on the last five primary or secondary transactions, irrespective of the size of such transactions, involving our Promoters, members of the Promoter Group, Selling Shareholders, or shareholders having the right to nominate director(s) on the Board of the Company, within three years prior to the date of filing of this Prospectus, is not applicable.

- L. The Floor Price is 1,000 times and the Cap Price is 1,053 times the weighted average cost of acquisition at which the Equity Shares were issued by our Company, or acquired or sold by our Promoters, members of Promoter Group, Selling Shareholders or other shareholders with the right to nominate directors on our Board are disclosed below:**

Past Transactions	WACA [#]	Floor Price (in times) [#]	Cap Price (in times) [#]
Weighted average cost of acquisition (adjusted for split and bonus issue)	NA	NA	NA
Weighted average cost of acquisition of Secondary Transactions	678.35	1.47	1.55

[#] As certified by V. Singhi & Associates, Chartered Accountants, pursuant to their certificate dated February 25, 2026.

Note: Pursuant to a resolution passed by our Board on June 25, 2025, and by our Shareholders in their meeting held on June 27, 2025, each equity share of the Company of face value of ₹ 10 each was subdivided into 10 Equity Shares of face value of ₹ 1 each. Further, pursuant to shareholders resolution dated August 8, 2025, 50,720,910 Equity Shares were allotted to the existing shareholders pursuant to a bonus issue. Accordingly, the number of equity shares held and average cost of acquisition per equity share has been adjusted to give effect to such sub-division and bonus issuance.

- M. Detailed explanation for Offer Price/ Cap Price along with our Company's KPIs and financial ratios for the periods presented in the Restated Consolidated Financial Information and in view of the external factors which may have influenced the pricing of the issue, if any**

- We are India's largest commercial and industrial ("C&I") renewable energy provider with 2.80 GW of operational, owned and managed capacity, and 3.17 GW of contracted, yet to be executed capacity, as of October 31, 2025, according to the CRISIL Report.
- We specialize in delivering Net Zero and decarbonization solutions, including supplying renewable power and offering

energy services and carbon credit solutions to customers across Technology customers, Conventional C&I customers.

3. Our weighted average tariff for capacity commissioned in the six month period ended September 30,2025 was ₹3.66 and Fiscal 2025 was ₹3.76 respectively, whereas industry average for listed utility scale renewable energy players was ₹2.44-2.46 as per CRISIL Report.
4. According to the CRISIL Report, as of March 31, 2025, we had the largest geographic coverage for Onsite Solar and STU-Connected farms amongst C&I renewable energy players in India. We offer STU-Connected farms in 10 states in India, have upcoming CTU-connected farms in 4 states for Pan-India supply and offer Onsite Solar across 23 states and union territories in India, and in United Arab Emirates, Bahrain and Thailand, as of September 30, 2025.
5. As of September 30, 2025, 94.72% of our customers have a credit rating of “A-” or above by rating agencies in India, such as CARE, India Ratings and CRISIL, or are subsidiaries of multinational corporations with such credit ratings, which enables us to minimize counterparty risk.
6. According to CRISIL Report, we had one of the widest geographical coverages for Onsite Solar, with 1,330 plants with an aggregate 368.06 MWp across 23 states and union territories in India and internationally across Thailand, the United Arab Emirates, and Bahrain.
7. According to the CRISIL Report, as of March 31, 2025, we had one of the widest geographical coverages and we offer Offsite farms to customers across 10 states in India. Our Offsite farms can be connected to State Transmission Utility (“STU”) or Central Transmission Utility (“CTU”) networks.

The Offer Price of ₹ 1,053 has been determined by our Company, in consultation with the BRLMs, on the basis of the demand from investors for the Equity Shares through the Book Building process. Investors should read the abovementioned information along with “*Risk Factors*”, “*Our Business*” and “*Financial Information*” beginning on pages 45, 293 and 550, respectively, to have a more informed view.

The trading price of the Equity Shares could decline due to the factors mentioned in the section “*Risk Factors*” beginning on page 45 and any other factors that may arise in the future and you may lose all or part of your investments.

STATEMENT OF POSSIBLE SPECIAL TAX BENEFITS

REPORT ON STATEMENT OF POSSIBLE SPECIAL TAX BENEFITS

The Board of Directors
Clean Max Enviro Energy Solutions Limited

(Formerly known as Clean Max Enviro Energy Solutions Private Limited)

4th Floor, The International,

16 Maharshi Karve Road,

New Marine Lines Cross Road No.1,

Churchgate, Mumbai 400 020

4 December 2025

Subject: Statement of possible special tax benefits (“the Statement”) available to Clean Max Enviro Energy Solutions Limited (Formerly known as Clean Max Enviro Energy Solutions Private Limited) (“the Company”) and its shareholders, prepared in accordance with the requirement under Schedule VI – Part A - Clause (9) (L) of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended (“the ICDR Regulations”)

This report is issued in accordance with the Engagement Letter dated 14 October 2025 and subsequent addendum dated 6 November 2025.

We hereby report that the enclosed Annexure I prepared by the Company, initialed by us for identification purpose, states the possible special tax benefits available to the Company and its shareholders under direct and indirect taxes (together the “Tax Laws”), presently in force in India as on the signing date, which are defined in Annexure II (List of Direct and Indirect Tax Laws (‘Tax Laws’)) prepared by the Company, initialed by us for identification purpose. These possible special tax benefits are dependent on the Company and its shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws. Hence, the ability of the Company and its shareholders to derive these possible special tax benefits is dependent upon their fulfilling such conditions, which is based on business imperatives the Company may face in the future and accordingly, the Company and its shareholders may or may not choose to fulfill.

The benefits discussed in the enclosed Annexure I cover the possible special tax benefits available to the Company and its shareholders and do not cover any general tax benefits available to the Company and its shareholders. Further, the preparation of the enclosed Annexure I and its contents is the responsibility of the management of the Company. We were informed that the Statement is only intended to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of the tax consequences and the changing Tax Laws, each investor is advised to consult his or her own tax consultant with respect to the specific tax implications arising out of their participation in the proposed initial public offering of equity shares of the Company (the “Proposed Offer”) particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the possible special tax benefits, which an investor can avail. Neither we are suggesting nor advising the investors to invest money based on the Statement.

We conducted our examination in accordance with the Guidance Note on Reports or Certificates for Special Purposes (Revised 2016) (“Guidance Note”) issued by the Institute of Chartered Accountants of India. The Guidance Note requires that we comply with ethical requirements of the Code of Ethics issued by the Institute of Chartered Accountants of India. Our scope of work did not involve performance of any audit test in this context of our examination. Accordingly, we do not express an audit opinion.

We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial information, and Other Assurance and Related Services Engagements.

We do not express any opinion or provide any assurance as to whether:

- i) the Company and its shareholders will continue to obtain these possible special tax benefits in future; or
- ii) the conditions prescribed for availing the possible special tax benefits where applicable, have been/would be met with.

The contents of the enclosed Annexures are based on the information, explanation and representations obtained from the Company, and on the basis of our understanding of the business activities and operations of the Company.

Our views expressed herein are based on the facts and assumptions indicated to us. No assurance is given that the revenue

authorities/ courts will concur with the views expressed herein. Our views are based on the existing provisions of the Tax Laws and its interpretation, which are subject to change from time to time. We do not assume responsibility to update the views consequent to such changes. We shall not be liable to the Company for any claims, liabilities or expenses relating to this assignment except to the extent of fees relating to this assignment, as finally judicially determined to have resulted primarily from bad faith or intentional misconduct. We will not be liable to the Company and any other person in respect of this report, except as per applicable law.

We hereby give consent to include this report in the Red Herring Prospectus, the Prospectus and in any other material used in connection with the Proposed Offer, and it is not to be used, referred to or distributed for any other purpose without our prior written consent.

ANNEXURE I

STATEMENT OF POSSIBLE SPECIAL TAX BENEFITS AVAILABLE TO CLEAN MAX ENVIRO ENERGY SOLUTIONS LIMITED (FORMERLY KNOWN AS CLEAN MAX ENVIRO ENERGY SOLUTIONS PRIVATE LIMITED) (“THE COMPANY”) AND ITS SHAREHOLDERS UNDER THE APPLICABLE DIRECT AND INDIRECT TAXES (“TAX LAWS”)

Outlined below are the Possible Special Tax Benefits available to the Company and its shareholders under the Tax Laws. These Possible Special Tax Benefits are dependent on the Company and its shareholders fulfilling the conditions prescribed under the Tax Laws. Hence, the ability of the Company and its shareholders to derive the Possible Special Tax Benefits is dependent upon fulfilling such conditions, which are based on business imperatives it faces in the future, it may or may not choose to fulfill.

UNDER THE TAX LAWS

A. Possible Special tax benefits available to the Company

CERTAIN DIRECT TAX BENEFITS AVAILABLE TO THE COMPANY UNDER THE INCOME TAX ACT, 1961 :

The statement of tax benefits outlined below is as per the Income-tax Act, 1961 read with Income Tax Rules, circulars, notifications (“Income Tax Law”), as amended from time to time and applicable for financial year (‘FY’) 2025-26 relevant to assessment year (‘AY’) 2026-27. These direct tax benefits are dependent on the Company fulfilling the conditions prescribed under the Income Tax Law. Hence, the ability of the Company to derive the direct tax benefits is dependent upon fulfilling such conditions, which are based on business imperatives it faces in the future, it may or may not choose to fulfill.

1. Lower corporate tax rate under Section 115BAA of the Income-tax Act, 1961 (“the Act”):

As per Section 115BAA of the Income-tax Act, 1961 (‘the Act’), with effect from Financial Year 2019-20 (i.e. AY 2020-21), a domestic company has an option to pay income tax in respect of its total income at a concessional tax rate of 22% (plus surcharge of 10% and 4% cess) provided the company does not avail any specified exemptions/ incentives/ deductions or set-off of losses/ unabsorbed depreciation etc., claims depreciation in the prescribed manner and complies with the other conditions specified in Section 115BAA of the Act.

In case a company opts for Section 115BAA of the Act, provisions of Minimum Alternate Tax (‘MAT’) under Section 115JB of the Act would not be applicable and MAT credit of the earlier year(s) will not be available.

The option needs to be exercised in a particular AY/FY in the prescribed manner on or before the due date of filing the tax return. The option once exercised, shall apply to subsequent AYs and cannot be subsequently withdrawn for the same or any other AY. Further, if the conditions mentioned in Section 115BAA of the Act are not satisfied in any AY, the option exercised shall become invalid in respect of such AY and subsequent AYs, and the other provisions of the Act shall apply as if the option under Section 115BAA had not been exercised.

The Company has opted to pay tax as per rates prescribed under Section 115BAA of the Act for AY 2026-27.

2. Deduction from Gross Total Income

Deduction in respect of inter-corporate dividends – Section 80M of the Act:

With respect to a shareholder which is a domestic company as defined in Section 2(22A) of the Act, Section 80M of the Act inter alia provides that where the gross total income of a domestic company in any FY includes any income by way of dividends from any other domestic company or a foreign company or a business trust, there shall, in accordance with and subject to the provisions of the said section, be allowed in computing the total income of such domestic company, a deduction of an amount equal to so much of the amount of income by way of dividends received from such other domestic company or foreign company or business trust as does not exceed the amount of dividend distributed by it on or before the “due date”. For the purposes of the section, “due date” means the date one month prior to the date for furnishing the income-tax return under Section 139(1) of the Act.

The Company is entitled to claim such deduction subject to fulfilment of conditions specified under Section 80M of the Act even if it has opted under the concessional regime under Section 115BAA of the Act.

Deduction in respect of employment of new employees – Section 80JJAA of the Act:

As per Section 80JJAA of the Act, while computing income under the head business and profession in case of an assessee to whom Section 44AB (i.e., tax audit) applies, a deduction of an amount equal to 30% of additional employee cost incurred in the course of such business in the FY, shall be allowed for three AYs including the AY relevant to the

FY in which such employment is provided. The Company is entitled to claim such deduction subject to fulfilment of conditions specified under Section 80JJAA of the Act even under the concessional regime under Section 115BAA of the Act. We have been given to understand that the Company has not availed this deduction for FY 2024-25.

SPECIAL INDIRECT TAX BENEFITS AVAILABLE TO THE COMPANY

1. Exemption from Goods and Services Tax on Renewable Energy Supply:

We understand that Company is engaged in generation of power using renewable energy sources such as solar and wind. As per Entry no. 104 of Notification No. 2/2017 - Central Tax (Rate) dated June 28, 2017, Company is availing GST exemption on supply of electrical energy.

B. Possible Special tax benefits available to Shareholders

SPECIAL DIRECT TAX BENEFITS AVAILABLE TO THE SHAREHOLDERS OF THE COMPANY :

Section 2(42A) of the Act provides that securities listed in a recognized stock exchange in India that are held for not more than 12 months immediately preceding the date of its transfer, shall constitute short-term capital assets.

As per Section 111A of the Act, short term capital gains arising from the transfer of an equity share in a company transacted through a recognized stock exchange and chargeable to Securities Transaction Tax ("STT") shall be taxed at 20% (plus applicable surcharge and cess) (provided the short-term capital gains exceed the basic threshold limit of exemption, where applicable) subject to fulfilment of prescribed conditions under the Act.

Further, as per Section 112A of the Act, long-term capital gains exceeding INR 1,25,000 arising from the transfer of equity shares in a company transacted through a recognized stock exchange on which STT has been paid on acquisition (except in certain situations) and on transfer, shall be chargeable to tax at the rate of 12.5% (plus applicable surcharge and cess) without applying the benefit under the first and second provisos to Section 48 of the Act.

The condition of STT shall not apply to a transfer undertaken on a recognized stock exchange located in any IFSC and where the consideration for such transaction is received or receivable in foreign currency.

Dividend income earned by the shareholders would be taxable in their hands at the applicable rates. However, in case of domestic corporate shareholder, deduction under Section 80M of the Act would be available on fulfilling the conditions specified under the provision of the Act.

Further, as per Section 194 of the Act, the Company is required to deduct tax at source from the amount of dividend paid to resident shareholders, except in the case of certain categories of shareholders as specified in the said section which inter alia include individual shareholders receiving dividend not exceeding INR 10,000 (in aggregate during a FY) by any mode other than cash. The shareholders would be entitled to take credit of the Tax Deducted at Source by the Company against the taxes payable by them on dividend income.

Section 195 of the Act would be applicable for taxability of non-resident shareholders in respect of receipt of dividend income in India.

Finance Act, 2023 has amended Section 115BAC of the Act to provide that with effect from FY 2023-24 relevant to AY 2024-25, Individuals, HUF, Association of Persons (other than a co-operative society), Body of Individuals and Artificial Juridical Person will be taxed on its total income at the reduced tax rates ('New Tax Regime'). The income would however have to be computed without claiming prescribed deductions or exemptions. Such person will however have the option to be taxed on its total income as per the tax rates under the old tax regime. The option 189 is required to be exercised – (i) on or before the due date specified under Section 139(1) of the Act for furnishing the income-tax return for such AY, in case of a person having income from business or profession and such option once exercised shall apply to subsequent AYs; or (ii) along with the income-tax return to be furnished under Section 139(1) of the Act for every AY in case of a person not having income from business or profession.

A person having income from business or profession who has exercised the option of shifting out of the New Tax Regime shall not be able to exercise the option of opting back to the New Tax Regime till he has business income. However, a person not having income from business or profession shall be able to exercise this option every year.

SPECIAL INDIRECT TAX BENEFITS AVAILABLE TO THE SHAREHOLDERS OF THE COMPANY

Shareholders of the Company are not eligible to special indirect tax benefits under the provisions of the Central Goods and Services Act 2017 (read with Central Goods and Services Tax rules, circulars, notifications), respective State Goods and Services Tax Act, 2017 (read with respective State Goods and Services Tax rules, circulars, notifications) Union Territory Goods and Services Tax Act, 2017 (read with Union Territory Goods and Services Tax rules, circulars, notifications), Integrated Goods and Services Tax Act, 2017 (read with Integrated Goods and Services Tax rules, circulars, notifications), The Foreign Trade (Development and Regulation) Act, 1992 (read with Foreign Trade Policy

2015-20), Customs Act, 1962 (read with Custom Rules, circulars, notifications), Customs Tariff Act, 1975 (read with Custom Tariff Rules, circulars, notifications), Special Economic Zones Act, 2005, and State Incentive Scheme to promote setting up of Renewable plants under the State Departments.

NOTES:

1. The above is as per the current Tax Laws in force in India.
2. The above Statement of possible special tax benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all the existing and potential tax consequences of the purchase, ownership and disposal of equity shares of the Company.
3. In respect of non-resident shareholders, the taxation and tax rates discussed above may be further subject to any benefit available under the applicable Double Taxation Avoidance Agreement, if any, between India and the country in which the non-resident has fiscal domicile. Applicability of DTAA benefit shall be subject to furnishing of relevant documents/declarations viz. tax residency certificate, Form 10F, etc. by the non-resident shareholders.
4. This Statement does not discuss any tax consequences in any country outside India of an investment in the equity shares of the Company. The shareholders / investors in any country outside India are advised to consult their own professional advisors regarding possible income tax consequences that apply to them under the laws of such jurisdiction.

Morgan India Private Limited, Nomura Financial Advisory and Securities (India) Private Limited, SBI Capital Markets Limited and any other book running lead managers appointed by the Company are collectively referred to as the "Lead Managers")

Dear Sir,

Sub: Statement of possible Special Tax Benefits available to the CLEANMAX SOLAR MENA FZCO and its equity shareholders under the direct and indirect tax laws

Re: Proposed initial public offering of equity shares (the "Equity Shares") of Clean Max Enviro Energy Solutions Limited (formerly Known as Clean Max Enviro Energy Solutions Private Limited) (the "Company", and such initial public offering, the "offer")

We, S A E Tax and Accounting Services LLC, Dubai – U.A.E., hereby confirm that the enclosed **Annexure 1** provide the possible special tax benefits available to CLEANMAX SOLAR MENA FZCO, DIEZ, Dubai, U.A.E. (the “**Statement**”), under direct and indirect tax laws respectively, presently in force Federal Decree-Law No. (8) of 2017 on Value Added Tax, Customs Regulations U.A.E and the Federal Decree Law No (47) of 2022 on the Taxation of Corporation and Businesses (the “**Tax Law**”), as on the signing date. These possible special tax benefits are dependent on CLEANMAX SOLAR MENA FZCO, DIEZ, Dubai, U.A.E. (“**the Subsidiary**”) fulfilling the conditions prescribed under the relevant provisions of the Tax Laws. Hence, the ability of the Subsidiary to derive these possible special tax benefits is dependent upon it fulfilling such conditions, which is based on business imperatives the Subsidiary may face in the future and accordingly, the Subsidiary may or may not choose to fulfill such conditions.

The benefits discussed in the enclosed in **Annexure I** are not exhaustive and cover the possible special tax benefits available to the Subsidiary and do not cover any general tax benefits available to it. The Statement is only intended to provide general information to investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of the tax consequences and the changing tax laws, each investors is advised to consult his or her or its own tax consultant with respect to the specific tax implications arising out of their participation in the proposed Offer, particularly in view of the fact the certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the possible special tax benefits, which an investor can avail. Neither do we suggest, nor do we advise the investors to invest money based on this statement.

We do not express any opinion or provide any assurance as to whether:

- i. the Subsidiary will continue to obtain these possible special tax benefits in future; or
- ii. the conditions prescribed for availing the possible special tax benefits where applicable, have been/would be met with, or
- iii. the revenue authorities will concur with the views expressed herein.

The contents of the enclosed **Annexure I** are based on the information, explanation and representations obtained from the Subsidiary and based on our understanding of the business activities and operations of the Subsidiary.

All capitalized terms used but not defined herein shall have the meanings assigned to them in the Offer Documents (as defined below).

We confirm that we will immediately inform the Company and the book running lead managers appointed by the Company in relation to the Offer (“**Lead Managers**”) of any changes to the above information in writing until the date when the Equity Share commence trading on the stock exchange(s) where the Equity Shares are proposed to be listed (the “**Stock Exchange**”). In the absence of any such communication from us, the Lead Managers, and the legal counsel to each of the Company and Lead Managers can assume that there is no changes to above information until the date when the Equity Shares list and commence on the Stock Exchanges pursuant to the Offer.

This Certificate is for the information of and for inclusion (in part or full) in the red herring prospectus and the prospectus to be filed in relation to the Offer or any other Offer-related material (the “**Offer Documents**”) and may be relied upon by the Company, the Lead Managers and their respective affiliates and the legal advisors to each of the Company and the Lead Managers. We hereby consent to the submission of this certificate as may be necessary to the Securities and Exchange Board of India, the Stock Exchanges, the Registrar of Companies, Maharashtra at Mumbai, and any other regulatory authorities as may be required and/or for the records to maintained by the Lead Managers and in accordance with applicable law and for the purpose of any defense the Lead Managers may wish to advance in any claim or proceeding in connection with the contents of the Offer Documents. This certificate can also be uploaded on the repository portal of the stock exchanges/ SEBI as required pursuant to the SEBI circular dated December 5, 2024, and the subsequent requirements of the Stock Exchanges/ SEBI, as applicable.

Yours faithfully,

For and on behalf of S A E Tax and Accounting Services LLC
Dubai- U.A.E

Annexure 1

List of Direct and Indirect tax laws

1. Federal Decree Law No (8) of 2017 on Value Added Tax
2. Customs Regulations in the UAE
3. The Federal Decree Law No (47) of 2022 on the Taxation of Corporation and Businesses issued on December 9, 2022 and it is effective for financial years starting on or after June 1, 2023.

The details of the tax benefits that Company have under the above mentioned laws is explained below:

- a) AED 375,000 (three hundred and seventy-five thousand UAE dirhams) from the total taxable income is subject to a tax rate of 0%:**

Taxation of Corporates and Individuals

On 31 January 2022 the UAE Ministry of Finance announced the introduction of the CT Law. The CT Law was published on 9 December 2022 and came into effect for financial years beginning on or after 1 June 2023. Although, Article 61 of the CT Law provides for transitional rules, which require a Taxable Persons opening balances for corporate tax purposes to be their closing balances sheets, as prepared for financial reporting purposes on the last day of the financial year that ends immediately before the Taxable Persons first taxable period, where such opening balances should take into consideration the arm's length principle and reflect any arm's length adjustments arising from related party transactions in accordance with the CT Law. In addition, the General Anti Abuse Rules should apply to all transactions or arrangements which were entered into from 15 days after the CT Law was published in the Official Gazette (i.e. which was published on 10 October 2022 and therefore came into force on 25 October 2022).

Corporate Tax Rate

In terms of the CT Law, corporate tax is imposed on the taxable income of a Taxable Person (who is not a qualifying free zone person) ("QFZP") at the standard rate of 9%, provided that the first AED 375,000 (three hundred and seventy-five thousand UAE dirhams) is subject to a tax rate of 0%. Broadly, income of a revenue nature and capital gains are taxed at the same rate of 9%. Where the Taxable Person constitutes a QFZP, its qualifying income may be subject to corporate tax at a rate of 0%. The CT Law also provides specific relief for small businesses with an annual revenue below AED 3,000,000 (three million UAE dirhams), which, if applicable, would allow such Taxable Person to be treated as not having derived any taxable income during the relevant tax period. The standard 9% corporate tax rate, which is referred to in the remainder of this section, should increase to 15% for certain Taxable Persons from 1 January 2025 onwards pursuant to amendments to the CT Law (Federal Decree-Law No. 47 of 2022 on the Taxation of Corporations and Businesses) announced on 9 December 2024 by the UAE Ministry of Finance, which included the implementation of the DMTT (the DMTT being part of the wider BEPS Pillar 2 rules). Such rules should apply from 1 January 2025 to provide for a tax rate of 15%, however further guidance on the application of such rules is yet to be released.

Taxable Persons

The CT Law applies to all Taxable Persons, which includes a Resident Person and Non-Resident Person as defined in the CT Law. A Resident Person will be taxed on its worldwide income, while a Non-Resident Person will only be taxed on its UAE sourced income.

Taxation of natural persons

A natural person will only constitute a Taxable Person where the person conducts a "Business" or "Business Activity" (as defined in the CT Law) in the UAE and the person's total turnover derived from such Business or Business Activities exceeds AED 1,000,000 (one million Dirhams) within a calendar year. This is subject thereto that revenue derived from wages, personal investments and real estate investments shall not be considered as derived from Business or Business Activities, regardless of the quantum of the revenue derived from such activities. Insofar as a natural person receives income from any of these three sources, such income will not be subject to Corporate Tax. These amounts can be excluded from the AED 1,000,000 (one million UAE dirhams) threshold contemplated above. A natural person that is not conducting a Business or Business Activity subject to Corporate Tax in accordance with the guidelines set out above shall not be required to register for Corporate Tax in the UAE.

- b) Exemption of the dividend income subject to certain conditions:**

Taxation of dividends

A dividend is defined in Ministerial Decision No. 116 of 2023 as: "Any payments or distributions that are declared or paid on or in respect of shares or other rights participating in the profits of the issuer of such shares or rights which do not constitute a return on capital or a return on debt claims, whether such payments or distributions are in cash, securities, or other properties, and whether payable out of profits or retained earnings or from any account or legal reserve or from capital reserve or revenue. This will include any payment or benefit which in substance or effect constitutes a distribution of profits made in connection with the acquisition or redemption or cancellation of shares or termination of other ownership interests or rights or any transaction or arrangement with a Related Party or Connected Person which does not comply with Article (34) of the Corporate Tax Law". Dividends as contemplated above, received by a UAE Taxable Person from a UAE resident juridical person will be exempt from corporate income tax under the CT Law. Furthermore, UAE sourced dividends paid to a nonresident person are currently subject to withholding tax at a rate of 0%. Shareholders who are a tax resident outside the UAE (both corporate and individual), should consult their tax advisors as to the taxation of dividend income derived from the Shares under the applicable local laws in those jurisdictions.

Taxation on subscription for Offer Shares

There are no taxes that arise in the UAE on the subscription for Offer Shares by the investors in the Offering. Accordingly, the subscription for Offer Shares should not in itself result in any UAE tax liabilities for the investors in the Offering. Investors in the Offering who are tax resident outside the UAE should consult their tax advisers in such foreign jurisdiction as to any possible tax consequences that might result from the subscription for Offer Shares.

Disposal of Shares

The future disposal of Shares by a shareholder that is a Taxable Person may give rise to a gain for corporate tax purposes where the proceeds exceed the tax cost base in respect of such shares. As indicated above, the UAE taxes both capital gains and revenue receipts at the same 9% rate subject to possible reliefs and exemptions as might be applicable to the particular shareholder concerned. A Resident Taxable Person will be subject to corporate tax at a rate of 9% on gains derived from the disposal of the Shares subject to possible reliefs and exemptions that might be applicable, for example small business relief, qualifying free zone relief or the participation exemption. A Taxable Person that is a natural person may be exempt from tax on gains derived from the future disposal of Shares where such gains constitute personal investment income of such person or falls below the AED 1 million threshold discussed earlier. As mentioned, a Non Resident Person should be subject to UAE tax on State Sourced Income. State Sourced Income includes income derived from shares in a Resident Person, and therefore any gains derived by a Non Resident Person on a sale of the Shares should be taxable in the UAE. However, as per Article 45 of the CT Law, certain categories of State Sourced Income realised by a Non Resident Person are expected to be subject to withholding tax, and the current wording of the CT Law states that the current withholding tax rate is 0% (although the CT Law mentions that it is possible that the rate could be changed in the future, therefore any updates in relation to these rules should be continuously monitored). In case a Non Resident Person would have a permanent establishment for UAE CT purposes, in the UAE, and income from the Shares would be attributable to such a permanent establishment, then the standard UAE corporate tax rules (including a 9% corporate tax rate) may need to be considered, as opposed to withholding tax. Depending on the nature of the shareholder concerned, such shareholder might also be eligible for particular entity-based exemptions as contained in the CT Law, for example government entities, government controlled entities, pension funds etc. The participation exemption mentioned above would also be available to all Taxable Persons, except for QFZPs, provided the requirements in respect thereof are met. Shareholders who are tax residents outside the UAE (both corporate and individual), should consult their tax advisers as to the taxation of gains on the future sale of the Shares under the applicable local laws in those jurisdictions.

c) Corporate tax – basic deductions:

- i) The net interest expense (NIE) (i.e. interest expense less interest income) up to 30% of tax adjusted earnings before interest, taxes, depreciation, and amortisation (EBITDA) will be deductible. However, this should not apply if the NIE for the relevant tax period does not exceed the threshold of AED 12 million.

If this threshold is exceeded, the taxable person may deduct the higher of the threshold or 30% of tax adjusted Earning before Interest, tax, depreciation and amortisation (EBITDA).

- ii) Donations paid to qualifying public benefit entities will be considered as deductible expenses.

Securities transfer tax

The UAE does not currently impose any stamp duty or securities transfer tax on the issuance or transfer of shares.

d) VAT - Exempt income or zero rated income related to financial services (interest on loan to group companies):

Value-added tax (VAT) and other indirect tax

From a UAE VAT perspective the issue, allotment or transfer of ownership of an equity security (which includes the Offer Shares) will constitute a supply of financial services which is exempt in terms of article 46(1) of the VAT Law as read with article 42(3)(b) of the Executive Regulations to the VAT Regulations. Accordingly, there would be no VAT charge on the issue or transfer of the Offer Shares. This VAT exempt treatment will only apply if the Offer Shares are issued to a recipient within the UAE. Where the Offer Shares are issued to a non-UAE resident, VAT at zero-rate may apply.

The UAE has adopted an Excise tax on selected goods, which was effective on 1 October 2017, and implemented VAT, which was effective on 1 January 2018. The Excise Tax Laws and Regulations impose a 50% tax on carbonated beverages and a 100% tax on tobacco products and energy drinks. On 27 August 2017, the VAT Law was published on the website of the Federal Tax Authority. The executive regulations of the VAT Law were issued on 28 November 2017 under Cabinet decision No. 52 of Federal Decree Law No. (8). The Executive Regulations of VAT Law provide more details about the supply of products and services are subject to VAT and which are zero-rated or exempted; the Executive Regulations of the VAT Law outline the conditions and parameters of such VAT treatment.

The GCC VAT Framework Agreement, which is a country level agreement between all the GCC states, sets out broad principles that should be followed by all the GCC countries in their VAT Laws while providing individual member states some discretion to adopt a different VAT treatment in respect of certain matters. Each GCC country will enact its own domestic VAT legislation based on the underlying principles in this common framework. VAT applies on the sale of goods and services in the UAE and on imports into the UAE. VAT will apply at the standard rate. The standard VAT rate in the UAE is 5%. Unless the supply of goods and services falls within a category that is specifically exempt or is subject to the zero rate of VAT.

The mandatory registration threshold is AED 375,000 and the voluntary registration threshold is AED 187,500. Businesses must register for VAT if they have annual turnover that exceeds the mandatory registration threshold (or if it is anticipated that total value of supplies will exceed it in the next thirty days) and an option to register for VAT is available if the taxable supply and imports are below the mandatory registration threshold but exceed the voluntary registration threshold.

The supply of goods or services by VAT registered businesses will be subject to VAT at either the standard rate or zero rate. Businesses are entitled to claim a credit for VAT paid on their purchases if they relate to a supply that is standard rated or zero-rated. However, any VAT incurred in connection with a supply that is exempt from VAT cannot be reclaimed.

Article 42 of the Executive Regulations outlines the scope of financial services classified as exempt and, on this basis, no VAT would be applied on any transfer of Offer Shares. However, it should be noted that fees relating to the transfer of ownership of Offer Shares would be standard rated at 5%.

THE ABOVE IS THE GENERAL SUMMARY. THE INVESTORS ARE ADVISED TO CONSULT THEIR OWN TAX CONSULTANT WITH RESPECT TO THE TAX IMPLICATIONS OF AN INVESTMENT AND CONSEQUENCES OF PURCHASING, OWNING AND DISPOSING OF EQUITY SHARES IN THE SECURITIES, PARTICULARLY IN VIEW OF THE FACT THAT CERTAIN RECENTLY ENACTED LEGISLATION MAY NOT HAVE A DIRECT LEGAL PRECEDENT OR MAY HAVE A DIFFERENT INTERPRETATION ON THE BENEFITS, WHICH AN INVESTOR CAN AVAIL IN THEIR PARTICULAR SITUATION.

Dear Sir/Madam,

Re: Proposed initial public offering of equity shares (the "Equity Shares") of Clean Max Enviro Energy Solutions Limited (formerly, Clean Max Enviro Energy Solutions Private Limited) (the "Company"), the holding company of Clean Max Solar MENA FZCO (the "Subsidiary") and such offering, (the "Offer")

In relation to the Company and its affiliates, we, **V. Singhi & Associates**, Chartered Accountants, are an independent firm of chartered accountants. We have received a request from the Company to provide a certificate on possible special tax benefits available to Clean Max Solar MENA FZCO ("**Subsidiary**") under the direct and indirect tax laws in India ("**Tax Laws**") as presently in force and applicable for the assessment year 2026-2027 and relevant to the financial year 2025-2026. We understand that the said Subsidiary is a free zone company with limited liability incorporated in Dubai, United Arab Emirates. The separate financial statements of the Subsidiary for the financial years ended March 31, 2025, March 31, 2024, & March 31, 2023, have been prepared in accordance with the International Financial Reporting Standards (IFRS) and have been audited by PKF - Chartered Accountants, Dubai.

Basis our review of the legal status and business activities referred in the separate financial statements, we hereby certify and confirm that:

1. the enclosed **Annexure "A"** provides the possible special tax benefits available to Clean Max Solar MENA FZCO ("the Subsidiary") which is subsidiary of *Clean Max Enviro Energy Solutions Limited (formerly, Clean Max Enviro Energy Solutions Private Limited)* ("the Company") under the Income Tax Act, 1961 as amended by the Finance Act, 2025 read with rules, circulars and notifications thereunder, each as amended and indirect tax laws including Union, state and integrated GST, Customs Act 1962, and Tariff Act, 1975, collectively defined as "Tax Laws", presently in force in India.
2. Several of these benefits are dependent on the Subsidiary fulfilling the conditions prescribed under the relevant provisions of the Tax Laws. Hence, the ability of the Subsidiary to derive the possible special tax benefits is dependent upon its fulfilling such conditions which, based on business imperatives that the Subsidiary faces in the future, the Subsidiary may or may not choose to fulfil.
3. We are informed that this statement is only intended to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of the tax consequences and the changing tax laws, each investor is advised to consult their own tax consultant with respect to the specific tax implications arising out of their participation in the proposed Offer.
4. We do not express any opinion or provide any assurance as to whether:
 - i. the Subsidiary will continue to obtain these benefits in the future;
 - ii. the conditions prescribed for availing the benefits have been / would be met with; and
 - iii. the revenue authorities/courts in India will concur with the views expressed herein.
5. The views expressed in the enclosed **Annexure "A"** are not exhaustive and the preparation of the contents stated in **Annexure "A"** is the responsibility of the management of the Subsidiary.

This certificate is issued for the purpose of the Offer, and can be used, in full or part, for inclusion in the red herring prospectus, prospectus and any other material used in connection with the Offer (together, the "**Offer Documents**") which may be filed by the Company with Securities and Exchange Board of India ("**SEBI**"), the BSE Limited and National Stock Exchange of India Limited (collectively, the "**Stock Exchanges**"), Registrar of Companies, Maharashtra at Mumbai (the "**RoC**") and/or any other regulatory or statutory authority.

We hereby consent (i) to our name **V. Singhi & Associates**, Chartered Accountants and the aforementioned details being included in the Offer Documents; and (ii) to the submission of this certificate to any regulatory/statutory/ governmental authority, stock exchanges, any other authority as may be required and/or for any other litigation purposes and/or for the records

to be maintained by the BRLMs in connection with the Offer and in accordance with applicable law. We also consent to the inclusion of this certificate as a part of '*Material Contracts and Documents for Inspection*' in connection with the Offer, which will be available for public for inspection from the date of filing of the red herring prospectus until the Bid/Offer Closing Date. This statement can also be uploaded on the repository portal of the stock exchanges/ SEBI as required pursuant to the SEBI circular dated December 5, 2024, and the subsequent requirements of the Stock Exchanges/ SEBI, as applicable.

All capitalized terms used but not defined herein shall have the meaning assigned to them in the Offer Documents.

Yours sincerely,

STATEMENT OF POSSIBLE SPECIAL TAX BENEFITS AVAILABLE TO CLEAN MAX SOLAR MENA FZCO ("SUBSIDIARY") UNDER TAX LAWS

Double Taxation Relief:

In respect of a non-resident assessee, in accordance with the provisions of section 90 of the Income Tax Act, 1961, the tax rates and the consequent taxation shall be subject to any benefits available under the agreement with foreign countries. Accordingly, subject to fulfilment of the conditions prescribed, the taxes on income and on capital of the subsidiary are subject to any double taxation relief available as per the "Agreement between the Government of the Republic of India and the Government of the United Arab Emirates" as notified vide notification No. GSR 710(E) No.9409(F.No.501/3/89-FTD)], dated 18-11-1993, as amended by, Notification No. SO 2001(E), dated 28-11-2007 & Notification No.29/2013 [F.No.503/5/2004-FTD-II], dated 12-4-2013.

NOTES:

1. The above statement of tax benefits sets out any special tax benefits available to the Subsidiary under the current direct and indirect tax laws presently in force in India and does not discuss any tax consequences in any country other than India.
2. Our views expressed in this statement are based on the facts and assumptions as we understand them. Our views are based on the existing provisions of the law and its interpretation, which are subject to change from time to time. We do not assume responsibility to update the views consequent to such changes.

SECTION IV: ABOUT OUR COMPANY

INDUSTRY OVERVIEW

The information in this section is derived from the report titled “Assessment of Indian Corporate Renewable Power Market”, dated December 2025 (the “**CRISIL Report**”), prepared by CRISIL Limited (“**CRISIL**”). We commissioned the CRISIL Report for the purpose of confirming our understanding of the industry in connection with the Offer. Neither we, nor any of the BRLMs, nor any other person connected with the Offer has verified the information in the CRISIL Report. Further, the CRISIL Report was prepared based on publicly available information, data and statistics as of specific dates and may no longer be current or reflect current trends. CRISIL has used various primary and secondary sources including government sources as well as international agencies to prepare the report. The CRISIL Report may also be based on sources that base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. CRISIL has advised that it does not guarantee the accuracy, adequacy or completeness of the CRISIL Report or the data therein and is not responsible for any errors or omissions or for the results obtained from the use of CRISIL Report or the data therein. Further, the CRISIL Report is not a recommendation to invest / disinvest in any company covered in the report. CRISIL especially states that it has no liability whatsoever to the subscribers / users / transmitters / distributors of the CRISIL Report. Prospective investors are advised not to unduly rely on the CRISIL Report when making their investment decision. Unless otherwise stated Fiscal refers to the financial year ended March 31 of that year.

Overview of Indian macroeconomic landscape

Real GDP growth

India’s real gross domestic product (GDP) at constant prices (fiscal 2012) was estimated at Rs 188.0 trillion (provisional) last fiscal vis-à-vis Rs 176.5 trillion (first revised estimates) in fiscal 2024, as per data released by the National Statistical Office (NSO) in May 2025. This represents a nominal on-year growth of 6.5%.

This fiscal, too, Crisil Intelligence¹ expects GDP growth at 6.5%, which is close to the pre-pandemic average of 6.6% between fiscals 2011 and 2020 (as per NSO data). This will allow India to retain its tag of the fastest growing large economy.

Even the International Monetary Fund (IMF), in October 2025, upgraded the projection for India’s real GDP to 6.6% on-year in fiscal 2026 from 6.2% in April 2025, the highest among the top 10 economies. In sync, the World Bank has revised its projection for India’s GDP growth at 6.5% in October 2025 from 6.3% with respect to better domestic conditions and reducing the Good and Services Tax (GST) rates and tax brackets under new GST reforms.

The pace of growth is projected to catapult India to become the fourth largest economy in the world this fiscal and the third largest by fiscal 2028, according to the IMF, surpassing Japan and Germany.

Notably, in fiscal 2024, India’s GDP growth surged to 9.2%, which was the highest in 12 years, thanks to an abnormal surge in government spending and a rebound in private consumption.

Figure 1: India vs other major nations

* India GDP data as per NSO for fiscal 2025

Source: World Economic Outlook Database (April 2025) by IMF, International Energy Agency (IEA), Central Electricity

¹ Based on Crisil Centre for Economic Research (CCER) projections
Projections of key economic indicators for India in this chapter are as per CCER

In the past decade (fiscals 2014-2024), India’s GDP at constant prices (fiscal 2012) increased at a CAGR of ~5.3%, driven by government policies, focus on the manufacturing sector, exports, increased digitalisation, implementation of the GST, and strong consumption and investment.

Given the current inflation trajectory, Crisil Intelligence expects inflation to average 3.2% in fiscal 2026 vs 4.6% last fiscal. Lower inflation keeps the window open for one more repo rate cut by the Reserve Bank of India (RBI) apart from the 100 basis points (bps) cut announced so far.

The surplus in services trade and a robust flow of remittances provide a cushion and should keep the current account in the safe zone. Crisil Intelligence expects the current account deficit (CAD) at 1.3% of GDP in fiscal 2026 compared with 0.6% last fiscal.

While the CAD is expected to remain manageable, there could be some risks, especially to capital flow because of disruptions in global economic growth and geopolitical uncertainties. However, India’s healthy macroeconomic parameters do provide some cushion to the rupee against these shocks, although it is not entirely immune. Crisil Intelligence expects the rupee to remain volatile in the near term, settling at ~88/\$ by March 2026.

Table 1: Key economic indicators and our projections

Parameters	FY19	FY20	FY21	FY22	FY23	FY24	FY25	FY26P
GDP growth (%)	6.5%	3.9%	-5.8%	9.7%	7.0%	9.2%	6.5%	6.5%
Per capita GDP growth	5.3%	2.8%	-6.7%	8.8%	6.9%	8.3%	5.5%	5.3%
CPI (% , average)	3.4%	4.8%	6.2%	5.5%	6.7%	5.4%	4.6%	3.2%
CAD/GDP (%)	-2.1%	-0.9%	0.9%	-1.2%	-2.0%	-0.7%	-1.0%	-1.3%

Effect of macroeconomic factors on growth

In the current age, emerging segments such as data centres, artificial intelligence (AI), financial technology (fintech), education technology (edtech), renewable energy (RE), global capability centres are the new triggers of macroeconomic growth. Additionally, while the role of regulations and policies cannot be underplayed, the focus is on innovation. Advances in technologies such as cloud computing, AI and IoT drive the demand for digital services.

Easy access to capital at low interest rates fuels investment and growth. High energy costs impact operating costs, especially for energy-intensive facilities. These factors interact and influence each other, shaping industrial growth.

Crisil Intelligence has detailed below how policies, infrastructure development, digitalisation and the need for sustainability are driving overall growth.

Union Budget 2025-26: The budget allocated Rs 0.6 trillion to the Ministry of New and Renewable Energy (MNRE) and Rs 1.07 trillion to the Ministry of Power (MoP). The allocation to key schemes under MNRE increased 25.0% from the budget for fiscal 2025 owing to 12.0% and 80.0%, higher allocation to the Indian Renewable Energy Development Agency (IREDA) and Pradhan Mantri Surya Ghar Muft Bijli Yojana, respectively. The budget proposes to develop atleast 100 GW of nuclear energy by 2047 to support country’s energy transition efforts. Further, it highlighted to incentivise states to reform electricity distribution and augment intra-state transmission capacity.

Monetary policy: In its monetary policy statement dated June 6, 2025, the Monetary Policy Committee (MPC) of the RBI reduced the policy repo rate by 50 bps to 5.50%. Consequently, the standing deposit facility (SDF) rate under the liquidity adjustment facility (LAF) was adjusted to 5.25% and the marginal standing facility (MSF) rate and the bank rate to 5.75% each. This decision is in consonance with the objective of achieving the medium-term target for CPI inflation of 4.0% within a band of +/- 2.0%, while supporting growth.

Boost infrastructure: Capital expenditure (capex) and effective capex, which are budgeted at Rs 11.2 trillion and Rs 15.5

trillion will account for 3.1% and 4.3% of GDP, respectively. Budget 2025 also enumerated measures to be undertaken by the Government of India (GoI) to support the states and the private sector in boosting investments in infrastructure. This is expected to boost power demand.

Thrust on manufacturing: The government has made some progress in improving labour market efficiency through various programmes such as Skill India, Make in India and Production Linked Incentive (PLI) scheme. Further, the Budget 2025-26 announced to setup National Manufacturing Mission with an aim to improve domestic value addition and build an ecosystem for solar PV cells, EV batteries, electrolyzers, wind turbines, high voltage transmission equipment and grid scale batteries.

Digitalisation: The Indian government's Digital India programme aims to boost financial inclusion and deliver services electronically through increased internet connectivity. Key initiatives include digital public infrastructure for agriculture, national digital library for children and adolescents, fintech services, Skill India digital platform, data embassy, fiscal support for digital public infrastructure and Unified Payments Interface (UPI) for real-time payments. These initiatives will drive efficiency-led growth and digitalisation.

Sustainability: Focusing on sustainability and reducing carbon footprint of businesses can positively influence operations and costs. While initial investments in sustainable practices are costly, long-term benefits include reduced energy consumption and lower operating costs, leading to increased profitability.

Carbon reduction emission measures

The 2021 United Nations Climate Change Conference (COP26) was a landmark event, as it laid down the commitment to phase down coal power, accelerate the transition to clean energy, reduce methane emissions by 30% by 2030 and provide \$100 billion per year in climate finance to developing countries.

India has submitted its Nationally Determined Contributions (NDCs) after COP26, which include reduction in emissions intensity of its GDP by 45% by 2030 from 2005 level, achieve ~50% cumulative electric power installed capacity from non-fossil fuel-based energy resources by 2030, with the help of transfer of technology and low-cost international finance including from Green Climate Fund (GCF), and create an additional carbon sink of 2.5-3 billion tCO_{2e} through additional forest and tree cover by 2030. Initially, India had set a target of 450 GW renewable energy (RE) installed capacity by 2030, which was revised to 500 GW non-fossil fuel-based capacity by 2030. This underscores India's recognition of the urgent need to accelerate the transition towards RE to mitigate the impacts of climate change and achieve sustainable development.

The Supreme Court judgment in March 2024, in Writ Petition (Civil) No. 838 of 2019), has established the duty of the states to maintain ecological balance and hygienic environment. Even though the right to a clean environment has been acknowledged, the right against climate change will force the states to give preference to environmental protection and sustainable development.

The Indian government has introduced amendments to the Energy Conservation Act 2001, aiming to accelerate the country's transition to a low-carbon economy. The designated industries have been assigned mandates to reduce their carbon footprint by 2030, with the Bureau of Energy Efficiency (BEE) tasked with monitoring their progress.

Overview of global solar and wind segments

Robust growth in RE installations

As per International Energy Agency (IEA), global RE capacity was 4,924 GW in 2024, accounting for 46% of total installed power capacity. Global installed solar capacity expanded to 2,168 GW in 2024 from 327 GW in 2016, clocking a CAGR of 26.7%. Wind capacity increased to 1,131 GW in 2024 from 468 GW in 2016, at a CAGR of 11.7%. Solar accounts for 44% and wind accounts for 23% of the total RE capacity installed globally. Robust growth has been led by fall in costs, favourable government policies and strong thrust on avoiding carbon emissions.

Figure 2: Source-wise installed RE capacity globally

Notes: Other RE include hydro power, ocean energy, bio energy and geothermal energy

Solar includes utility scale solar photovoltaic (PV), distributed as well as concentrated solar. Wind includes offshore and onshore

Source: IEA: Renewable energy progress tracker, Crisil Intelligence

Continuing the trend reported in recent years, 2024 saw the largest increase in RE capacity to date – with 683 GW addition – expanding the stock of renewable power by 16.1%. Renewables accounted for a record 92.5% of global power additions, largely due to significant growth in solar and wind power.

Solar power alone accounted for over three-fourths of RE additions, with a record 438 GW added during the year, while 115 GW of wind energy was added. China and the United States (US) collectively account for 474 GW (or 69.4%) of RE capacity installed in 2024, while India ranks third in annual RE installation with 35 GW (5.2%) added in 2024.

Figure 3: RE capacity additions in key countries

Source: IEA, Crisil Intelligence

India third-largest consumer of electricity

India has emerged as a key player in the global electricity and RE market. It is the third-largest electricity consumer and the third largest in terms of installed RE capacity globally as per IEA. India has significantly increased its non-fossil fuel-based generation capacity, with its share rising from 30.2% in 2015 to 47.1% in 2024. As of 2024, the combined solar and wind capacities comprise 31.6% of the country’s total installed capacity. Solar energy recorded a meteoric rise from just 2.6 GW in fiscal 2014 to 82 GW in fiscal 2024 and 106 GW in fiscal 2025, driven by ambitious policy targets, declining technology costs, falling solar tariffs, improved grid infrastructure, rising domestic manufacturing base for solar modules and large-scale solar

parks. Wind capacity increased to 50 GW in fiscal 2025 from 21 GW in fiscal 2014.

The domestic RE market has expanded faster than most leading global economies, positioning India just behind China and the US in annual additions. As per IEA, the total RE installed capacity in India was 238 GW in 2024, positioning it third in global RE installed capacity, third in solar power and fourth in wind power capacity.

Figure 4: India’s share in global RE market in 2024

Source: IRENA, Crisil Intelligence

India’s energy security is a critical issue, necessitating a balance between energy availability, affordability and sustainability. Furthermore, the current geopolitical landscape and economic fragmentation have heightened the importance of energy security, with increasing risks associated with energy supply disruptions.

India’s energy transition policies, such as the National Green Hydrogen Mission, Ethanol Blending Program (EBP), PM-KUSUM Scheme, PLI Scheme for Batteries, Solar PV module manufacturing and Ultra Mega Renewable Energy Parks aim to create a diversified and resilient energy landscape. These policies and schemes are expected to not only enhance energy security but also contribute to sustainable development, economic growth and environmental protection. As India continues towards a cleaner and more secure energy future, the successful implementation of these policies will be crucial in addressing the challenges of energy availability, affordability and sustainability.

According to IEA, total investment in clean technologies crossed \$2 trillion in 2024. In India, clean energy investment in India reached \$68 billion. The total FDI inflow into the Indian RE segment jumped 10 times from \$414 million in fiscal 2014 to \$4,012 million in fiscal 2025. During Q1 of fiscal 2026, the sector attracted \$1,148 million in FDI, bringing the cumulative FDI inflow to \$23.05 billion as of June 2025, starting from April 2000.

India's green ambitions are also supported by international partnerships, including the International Solar Alliance and its One Sun One World One Grid (OSOWOG) initiative launched by the Indian prime minister in 2018. This globally interconnected power grid project aims to share RE resources among countries for mutual benefits and global sustainability. The OSOWOG initiative, supported by MNRE and the World Bank, will reduce carbon footprint, energy costs and storage needs, while enhancing the viability of solar projects. It will also open new avenues for international cooperation, helping to meet Paris Agreement targets and create a global ecosystem of shared renewable energy resources.

Levelised cost of solar and wind energy continues to spiral downwards

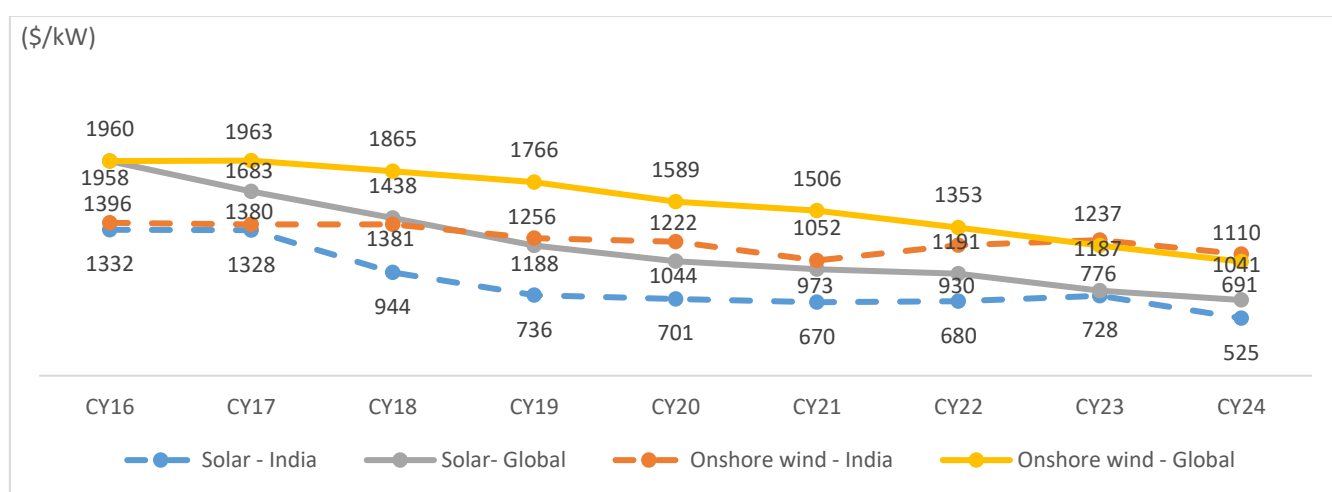

The cost of RE has plummeted over the past decade, driven by declining equipment costs, large-scale deployment and supportive government policies. The global weighted average levelised cost of energy (LCOE) for solar and wind power has seen a significant reduction, making them increasingly competitive with fossil fuels.

For utility-scale solar PV, the global weighted average LCOE of projects commissioned in 2024 fell 15.7% to \$0.043/kWh from 2022. This was led by a 25.7% decline in the global weighted average total installation cost to \$691/kW (from \$ 930/kW in 2022) as solar module prices as well as balance of system costs fell. This was higher than the 4.4% decline experienced in 2022, as rising PV module and commodity prices at the end of 2021 and into 2022 had an impact on installation costs.

Onshore wind power projects commissioned in 2024 witnessed 0.5% lower global weighted average LCOE at \$ 0.034/kWh. The drop in LCOE was led by large scale deployment in China, where costs witnessed a drop led by higher hub heights and turbines size.

India witnessed a substantial decline in solar PV installation cost between fiscals 2016 and 2024, with overall cost falling 60.6%. Wind installations experienced a relatively modest reduction of 20.4% over the same period. Cost reductions have been witnessed in LCOE as well. Solar LCOE decreased 54.8% (\$0.084/kWh in 2016 to \$0.038/kWh in 2024), while onshore wind LCOE declined 33.9% (\$0.073/kWh in 2016 to \$0.048/kWh in 2024), driven by technology advancements and improved project economics.

Figure 5: Solar and wind energy installation costs – Global and India

Source: IRENA, Crisil Intelligence

Figure 6: Global weighted average LCOE of wind, solar and fossil fuel energy

Source: IRENA, Crisil Intelligence

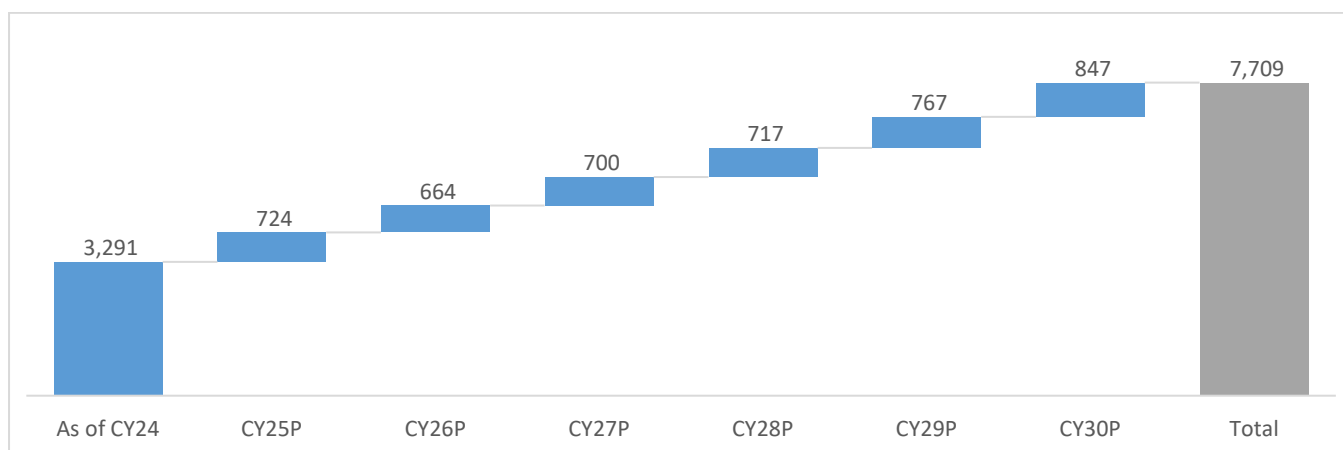

With the continuous drop in installation costs and improving efficiencies, the competitiveness of solar and onshore wind energy against fossil fuels improved further. In 2024, the global weighted average LCOE of utility-scale solar PV and wind power become 66.9% and 73.8% lower, respectively, than the average cost of fossil fuel. This coupled with other benefits, including

significantly shorter commissioning timeline as well as potential for carbon footprint reduction, makes a compelling case for further build-out of RE capacity. The capital cost for setting up a solar project is expected to range \$380-430/kW, while the cost for wind project is expected to be \$850-900/kW in 2030. Moreover, it is estimated that the LCOE for utility scale PV could reach \$0.02-0.03/kWh in 2030, whereas onshore wind LCOE is expected to range \$0.03-0.04/kWh in 2030.

About 4,400 GW solar and wind energy capacity additions expected globally over 2025 to 2030; India’s share to increase further

As per the IEA, the total RE capacity is expected to cross 9,500 GW by 2030 from 4,924 GW in 2024. This would result in net capacity addition of over 4,600 GW between 2025-2030. Utility scale solar PV and onshore wind power are expected to dominate this growth, accounting for over 85% of all new renewable capacity additions by 2030. This would be driven by their competitive pricing compared with fossil and non-fossil alternatives, as well as supportive government policies. China and the US would dominate capacity additions globally by contributing 60-65% of the total capacity addition over the next five years. Other countries such as Brazil, Germany and Japan would collectively add about 300-310 GW over the same period. As shown in the figure below, global annual wind and solar energy capacity additions are projected to continue their upward trend.

Figure 7: Global projections for annual wind and solar capacity addition (GW)

P: Projected; includes utility scale PV, distributed PV, onshore and offshore wind capacities

Source: IEA, Crisil Intelligence

According to the IEA, India is expected to log rapid growth, with its annual solar and wind capacity additions increasing from 35 GW in 2024 to 61 GW in 2030, translating into a total RE capacity addition of ~345 GW between 2025 and 2030. Over 90% of the RE capacity (~315 GW) is expected to come from solar and wind projects. This would be driven by large-scale government procurement programmes, attractive tariffs and a strong commitment to addressing the effects of climate change. As a result, India's share of global solar and wind energy additions is expected to go up from 5.2% in 2024 to 7-7.5% by 2030. Moreover, RE auctions, corporate power purchase agreements (PPAs) and incentives stimulating installation of distributed solar PV will continue to spur overall RE capacity growth.

While global RE capacity is expected to triple by 2030, India is projected to add over 53-55 GW on average annually by then, making it the third largest market. Challenges such as grid bottlenecks, discoms’ financial health and land acquisition remain, but the country's trajectory points toward becoming a global RE powerhouse with a diversified and rapidly growing clean energy ecosystem.

Wind-solar hybrid power, an emerging solution; favourable generation profile leads to higher offset of grid power and greater savings

The intermittent nature of solar and wind energy can pose challenges in meeting constant power demand. Solar energy, for instance, is only generated during the daylight hours, with peak production typically occurring between 10 AM and 2 PM. Wind energy, on the other hand, is more variable and can be generated throughout the day, with peaks often occurring at night and in the early morning hours, depending on local wind patterns. However, by combining solar and wind power in the wind-solar hybrid (WSH) projects, the complementary nature of these two energy sources can provide a more stable and predictable energy supply throughout the day.

Figure 8: Indicative hourly power output profile of solar, wind and WSH power projects

Source: Crisil Intelligence

There are two primary types of hybrid projects: co-located and non-co-located. Co-located hybrid projects integrate wind and solar generation at a single site, sharing infrastructure such as land, transmission lines and grid interconnection facilities, which help to reduce capital and operational costs. In contrast, non-co-located hybrid projects involve wind and solar components situated at different locations but operated in a coordinated manner to meet combined energy delivery commitments or grid requirements, often through centralised control systems.

Benefits of WSH projects outweigh challenges

- + Higher capacity utilisation factor (CUF) of up to about 50% (vs 26% for standalone solar and 35% for standalone wind)
- + Increased power availability for consumers over extended periods — nearly round-the-clock supply
- + Ideal for consumers aiming to reduce their total energy costs or carbon emissions
- + Lower transmission cost per unit of electricity due to more efficient use of transmission infrastructure
- Limited number of sites with true hybrid potential, but other project variations can be developed
- Complex and costly land acquisition process - specific land parcels are required for each wind turbine depending on the overall project design

Source: Crisil Intelligence

The typical energy requirement met by standalone solar, wind and WSH systems depends on resource availability, type of industrial load and use of energy banking. Standalone solar and wind projects can offset only up to 40-60% of the energy requirement with banking provisions. WSH power projects are particularly advantageous for corporate PPAs as they align better with a company’s round-the-clock power needs and can replace up to 80-90% of the energy requirement with RE when a banking facility is opted for. This not only translates into greater cost savings over the PPA tenure but also maximises the share of clean energy in the corporate energy mix – leading to substantial reductions in carbon emissions and helping companies meet their sustainability and Net Zero² commitments more effectively.

Global corporate RE procurement

Global Renewable Energy Power procurement models

The way corporations procure power has undergone a significant shift in recent years, driven by a combination of environmental, regulatory and economic factors. As companies increasingly prioritise sustainability and commit to carbon neutrality and net zero emissions targets, the demand for clean energy has surged. This trend is further fuelled by the growing

² Net zero refers to the balance between the amount of GHG emissions produced and the amount removed from the atmosphere. Achieving net zero means that any emissions released are offset by equivalent amounts of emissions being removed, typically through natural processes or technological solutions. This concept is central to efforts aimed at mitigating climate change, as it involves reducing emissions to as close to zero as possible and compensating for any remaining emissions through carbon offsetting or sequestration.

pressure from investors, customers and regulators to improve sustainability. Environmental, social and governance (ESG) compliance has become a key metric for business evaluation, with companies demonstrating sustainability leadership gaining a competitive edge in the market. In fact, over 400 companies worldwide have joined the RE100 initiative, pledging to power 100% of their operations with renewable electricity, with many aiming to achieve this goal by 2030. The declining cost of solar PV and onshore wind has also made renewables a more economically attractive option compared with fossil fuels.

As governments promote greater adoption of RE companies are leveraging innovative procurement models to secure long-term cost savings and improve energy security.

One of the most convenient models is on-site RE generation, where a project developer installs a RE project on their premises. On-site electricity production not only reduces dependence on grid electricity but also helps reduce energy costs in the long run. However, high upfront investment costs and space constraints can pose challenges. Another model is off-site RE projects which allow large consumers to procure RE from large-scale, grid-connected utility RE projects.

Global corporate PPA market witnessed ~65 GW deals in 2024; to continue to surge, led by attractive economics and emission reduction targets

Global corporate RE procurement deals have clocked a robust growth of 27-28% CAGR between 2020 and 2024, rising to 65-68 GW of annual addition in 2024. The Asia Pacific region, followed by Europe, has led growth in the global corporate PPA market, particularly post 2021, driven by favourable policies and economics. In fact, the Asia Pacific region and Europe together accounted for 70% of the global corporate RE procurement deals in 2024.

Demand for RE by corporates has been led by the data centre industry globally. In 2024, data centres are estimated to have accounted for about one-fourth of the total corporate RE deals. Most of these deals have been led by Amazon, Google, Microsoft, Meta and Apple across geographies. With rapid adoption of artificial intelligence, cloud computing and Internet of Things (IoT), the demand for clean energy from data centres is expected to witness a surge. Similarly, RE deals in the manufacturing sector are also expected to grow at a healthy pace (as demand rises in line with GDP growth) amid rising electrification of industrial processes.

Solar PV has been the preferred option by corporations looking at procuring RE. However, as corporates reap economic and sustainability-linked benefits of RE, they are increasingly adopting WSH projects. In fact, as Battery Energy Storage System (BESS) costs fall, corporates are evaluating the integration of such systems, too. In the US, in particular, corporations have also executed deals to source nuclear energy, especially given its reliable and steady generation profile.

Further, the structure of electricity markets varies across regions, influencing the types of PPAs that prevail. It is observed that direct PPAs are dominant in regulated electricity markets, whereas liberalised markets tend to favour virtual and retail PPAs, which offer greater flexibility and provide accessibility to a wider range of buyers. E.g., it has been noticed that in the Asia Pacific region, onsite renewable contracts have been the preferred choice for many corporates. This is complemented by direct PPAs, which together form the majority of corporate PPAs in the region.

As the energy landscape continues to evolve, it is likely that the mix of PPA structures and RE sources will remain dynamic, with regional differences and technological advancements shaping the market.

Figure 9: Estimated global RE-based corporate PPA annual capacity addition (GW)

Source: Industry, Crisil Intelligence

Leading corporations in clean power procurement are now setting their sights on a more ambitious goal — achieving hourly and locational matching of clean electricity supply and demand through a 24/7 carbon-free energy procurement. This shift is expected to further accelerate the growth of RE capacity, driving the transition towards a low-carbon economy. It is estimated that if all the 400+ RE100 members meet their clean electricity shortfall entirely through RE PPAs, it will catalyse an additional 105-110 GW capacity between 2026 and 2030.

About 16-18% of the total global annual RE capacity additions is estimated to be added for corporates. The global corporate PPA market is projected to log a rapid CAGR of 25-28% between 2024 and 2030. This would result in a total RE capacity addition of 960–970 GW for corporates globally by 2030.

Indian corporate PPA market to flourish; share in the global landscape to rise to 11-12% by 2030

India's corporate PPA market is growing rapidly due to government support, waiver in interstate transmission charges, exemption in cross subsidy surcharge (CSS) and additional surcharge (AS) for captive and group captive consumers. The Electricity (Promoting Renewable Energy Through Green Energy Open Access) Rules, 2022, have created a user-friendly framework, driving momentum in India's RE open access sector. As a result, about 14 GW of open access capacity (including rooftop solar) was installed in the last two years, with about 8 GW added in 2024 alone. Moreover, about 4.5 GW of renewable open access capacity was added during calendar year 2025 (upto June 2025).

India's share in global corporate PPA was estimated at 4-5% in 2020, which increased to 8-9% in 2024. The growth was driven by the high tariffs of coal-based electricity in the country and increasing accessibility and affordability of RE sources, particularly solar energy.

The cumulative corporate open access renewable capacity, including solar rooftop installation was ~47 GW as of June 2025, with solar holding ~73% share (including rooftop solar). Crisil Intelligence expects an installed capacity of 120-122 GW of corporate-driven RE capacity by fiscal 2030 under the base case scenario, with 75-77 GW expected to be added between fiscals 2026 and 2030.

VPPA and cross-border sourcing of I-RECs

Globally, virtual power purchase agreements (VPPAs) including energy attribute purchase agreement (EAPA) are increasingly recognised as a mature and widely adopted tool for corporate RE procurement. In a virtual PPA, the seller and the buyer enter into a contract for difference or other financial derivative contract where they agree a strike price (fixed price) for the RE provided by the buyer. The seller and the buyer settle the difference between the strike price and the variable market price (spot price) at which the seller sells the power it produces to the utility supplier. The seller transfers the associated energy attribute certificate (EAC), commonly known as International Renewable Energy Certificates (I-RECs) or RECs in the Indian market.

The global landscape of corporate RE procurement is led by North America, which has emerged as the most prominent region for corporate renewables procurement, with over 45 GW of deals secured through VPPAs as of 2023, which represents 80-85% of the total corporate PPAs. Major corporations such as Walmart, General Motors, and Meta have all engaged in VPPA deals to secure clean energy and reduce emissions.

In Europe, Spain has been at the forefront of VPPA adoption, with a significant number of deals being executed in the country. Over the past five years, 5-6 GW of VPPAs have been executed in Europe which represents over 10% of the total corporate PPAs executed over the same period. Several cross-border agreements have been executed through VPPA in Europe by multinational corporations (MNCs) who have operations in different regions/countries. Over the next five years, it is expected that VPPA in Europe would account for 40-45% of the total corporate deals.

Other countries such as Japan, Singapore, Malaysia and South Korea are some of the major emerging markets for VPPA. While their existing VPPA capacities are less than 1 GW, over the next five years, 10-20% of corporate PPAs could be through VPPA mode.

Moreover, I-REC, which is a globally accepted RE certificate, certified by the International Tracking Standard Foundation (the founder of I-REC), is designed for businesses to meet their energy targets and support RE generation. The cross-border sourcing of I-REC has emerged as a key enabler for global corporations to meet their decarbonisation³ and sustainability targets. This trend has been seen in data centres, top-tier technology firms and large industrial multinationals that have aggressive Scope 2⁴ emission reduction goals but limited access to RE in certain operational geographies.

India is emerging as a preferred destination for VPPAs and I-REC sourcing owing to its high grid emission intensity (offering meaningful carbon abatement), competitive renewable tariffs, abundant renewable potential, and faster execution timelines. This trend is leading to the set-up of new RE projects owing to the global corporate push for 'additionality', where buyers seek

³ Decarbonisation is the process of reducing or removing GHG emissions from the atmosphere

⁴ Scope 1: Direct emissions that occur from sources that are controlled or owned by a company; Scope 2: indirect emissions from generation of purchased energy and Scope 3: all indirect emissions that occur in the value chain of a company

assurance that their RE procurement is contributing to the creation of new capacity, rather than simply reallocating existing green electrons. International buyers, particularly from the tech and manufacturing sectors, increasingly favour I-REC-linked contracts from new-build or under-construction projects in India. Moreover, such arrangements provide a long-term revenue visibility to developers, thereby catalysing investment in new solar and wind assets.

I-REC redemptions from Indian projects have increased from 1.21 million in 2020 to 8.57 million in 2024. As of December 2024, about 36 million I-RECs had been issued by Indian projects and about 23 million I-RECs had been redeemed, representing ~4% of the global redemptions.

MNCs are not only purchasing I-RECs to meet global sustainability targets but are also exploring bilateral procurement structures, such as VPPAs to enhance traceability, price certainty and impact. These structured deals allow for a more strategic engagement with renewable projects, offering both commercial and reputational benefits while accelerating the energy transition in high growth markets like India.

Going forward, as global corporations approach their carbon neutrality/ net zero goals, stakeholder pressure for real sustainability impact rises, and the need to match the 24/7 clean energy goals, cross-border sourcing of green attributes is expected to accelerate. While many Indian companies have set targets for carbon neutrality beyond 2030, all five major tech companies from the US - Apple, Meta, Google, Amazon and Microsoft - have committed to achieving carbon neutrality by 2030 across their entire value chain, including data centre operations, supply chain, vendors, product and service usage and employee-related emissions.

In India, with the Central Electricity Regulatory Commission (CERC)'s draft guidelines on VPPAs, developers as well as consumers are likely to be more forthcoming and such contracts are expected to proliferate in the market. Also, VPPAs provide developers an opportunity to diversify away from their exposure to utilities.

Based on the regional assessment of the corporate RE PPA market and the existing visibility of VPPA transactions, it can be estimated that by 2030, the VPPA market, including EAPA, will log a significant growth and will account for a substantial share of the global corporate PPA market, potentially reaching up to 45-50%, with India's VPPA penetration of 10-12% expected by 2030 through evolving regulations around the VPPA market. As a result, the global energy attributes market from corporates is expected to be 430-480 GW by 2030 and 10-15 GW in India during the same period, primarily driven by demand from large technology companies, data centres and MNCs.

However, challenges remain – mainly around the lack of standardisation in VPPAs across borders, currency fluctuation risks, and policy and regulatory flip-flops in India. Nevertheless, as the global demand for high-quality, impact-driven carbon-free energy scales up, India is well positioned to become a major hub for I-REC-linked RE projects, provided supportive policy and financing mechanisms continue to evolve.

Overview and outlook on global carbon market

Carbon markets play a crucial role in reducing GHG emissions by providing a mechanism for companies to offset their carbon footprint. By purchasing carbon credits, corporates can invest in projects that reduce or remove GHG emissions, such as renewable energy projects or reforestation initiatives.

The carbon credits denote a quantifiable unit equivalent to one metric tonne of carbon dioxide or other greenhouse gases, which have been either sequestered from the atmosphere or prevented from being emitted. On this basis, emission reduction projects are broadly categorised into avoidance projects and removal projects.

The global carbon markets is divided into two primary categories as given below. Both markets involve buying and selling of carbon credit, but the key difference lies in the regulatory requirements and obligations.

- *Compliance Carbon Markets (CCM)*: Companies are required to meet specific emission reduction targets set by regulatory authorities. These targets are often legally binding, and companies must purchase carbon credits to offset their emissions and comply with regulations
- *Voluntary Carbon Markets (VCM)*: It is driven by organisations and individuals who voluntarily choose to offset their emissions by purchasing carbon credits. These credits are not mandated by regulations but used to demonstrate environmental responsibility and sustainability

Supply of carbon credits is represented by issuances from carbon crediting mechanisms. The demand for carbon credit, as indicated by retirement rates, has remained relatively stable between 2022 and 2024. A breakdown of these credits reveals that ~35% originates from renewable energy projects, primarily large-scale grid-connected electricity projects, while 60-70% come from non-RE based carbon removal projects, such as nature-based activities, encompassing emissions reductions from agriculture, forestry and land-use projects. This shift in focus is expected to play a significant role in shaping the future of carbon credit markets. There has been a notable increase in the proportion of non-RE retirements, rising from 62% in 2022 to 73% as of September 2025. This trend indicates a steady growth in demand for non-RE based projects over the past few years,

especially for nature-based solutions.

Figure 10: Annual issuance and retirement volume of carbon credits in the voluntary carbon market

Note:- *CY25 data as of 30 Sept 2025

Source: Industry, Crisil Intelligence

The carbon credit prices vary based on several factors such as project type, standard issuing credits, credit vintage, and associated co-benefits. Over the past two years, the weighted average price for non-RE based solutions has remained in the range of \$4-5/tonne. However, nature-based removal projects have consistently demonstrated higher prices over the past 3-4 years and have been trading at a price premium of \$13-15/tonne. In 2025, the average price has reached above \$20/tonne indicating a strong demand for high quality nature-based carbon removal projects.

The VCM recorded a CAGR of 23% between calendar years 2019 and 2024. Since 2021, its growth has stagnated, with the market value declining from a peak of \$2.1 billion in 2021 to over \$535 million in 2024, owing to price volatility and low-quality credits. Despite this, the total VCM value is estimated at \$10-12 billion as of 2024.

The global carbon markets present a large and rapidly evolving opportunity. There is a rising demand for non-RE credits, particularly nature-based removal solutions. The issuance of such credits grew from 22 million in the calendar year 2020 to about 42 million in 2024, registering a CAGR of 17.2%. It is estimated that by the calendar year 2030, the carbon removal solutions are projected to account for 35-40% of the global VCM credit supply, up from existing 14-15%, as more companies are increasingly using carbon credits, particularly removals, to offset residual emissions. Moreover, majority of technology customers plan to utilise high-quality carbon removal credits to offset the remaining emissions, in addition to procuring environmental attributes. As a result, the global carbon removal credit market is projected to reach \$8-10 billion between the calendar year 2025-2030.

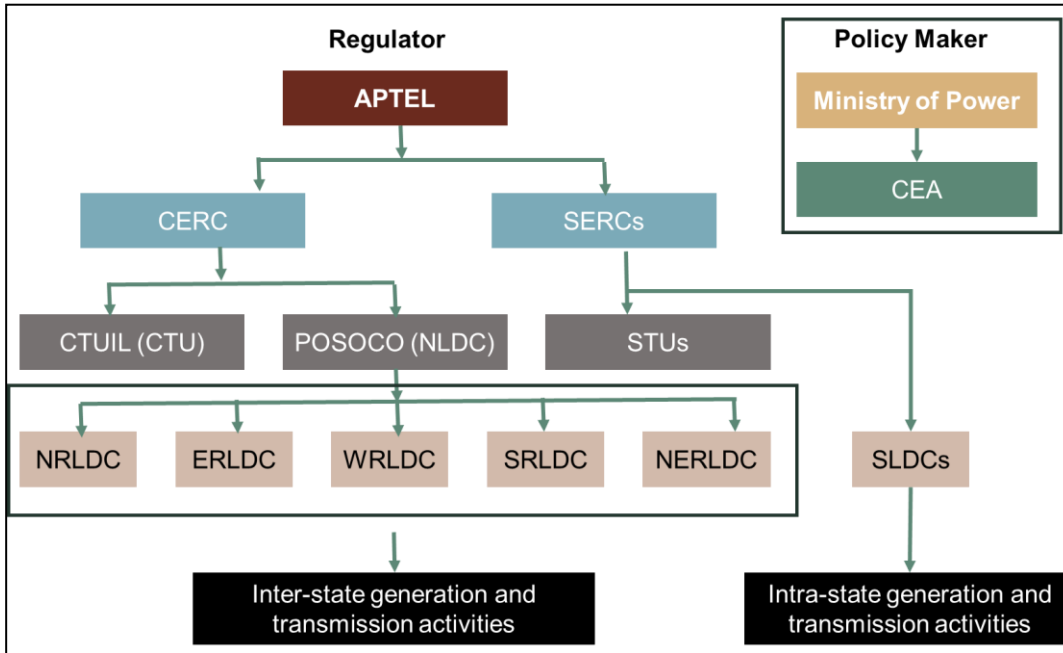

The global carbon markets present a large and rapidly evolving opportunity. The overall VCM is expected to reach \$20-25 billion by 2030 at a CAGR of 14-15%, driven by an increase in global demand for carbon offset solutions as organisations seek to meet their decarbonisation goals. Indian RE sector deep dive

Overview of the Indian power sector

Operating and regulatory structure

The sector is regulated in a structured manner with various functions being distributed between multiple implementing agencies. There are three chief architects of the sector — the Central Electricity Regulatory Commission (CERC), the CEA, and the State Electricity Regulatory Commissions (SERCs).

Figure 11: Institutional and structural framework

Note: APTEL: The Appellate Tribunal for Electricity; WRLDC: Western Regional Load Despatch Centre; ERLDC: Eastern Regional Load Despatch Centre; SRLDC: Southern Regional Load Despatch Centre; NLDC: National Load Despatch Centre (Now called as GRID-INDIA); NRLDC: Northern Regional Load Despatch Centre; NERLDC: North-Eastern Regional Load Despatch Centre; SLDC: State Load Despatch Centre; CTU: Central Transmission Utility; STU: State Transmission Utility.

Source: Crisil Intelligence

Energy requirement grew at a CAGR of 4.7% over the past decade

Over the past decade (fiscals 2015-2025), India’s electricity requirements have experienced a steady growth rate at a CAGR of 4.7%, driven by rising GDP growth, increased power availability, improved electricity access and rapid urbanisation. In addition, government initiatives, such as the Make in India programme, PLI schemes and railway electrification have contributed to this growth.

Although the Covid-19 pandemic led to a temporary slowdown in energy requirement growth due to economic contraction and financial strain on power distribution companies, the sector has since rebounded. In fiscal 2023 and 2024, energy requirements surged 9.7% and 7.4% on-year, respectively, driven by a resurgence in economic activity, a pickup in manufacturing and agricultural production and increased infrastructure spending by the government. Further, erratic weather patterns resulting from climate change have also played a role in driving up energy demand.

Figure 12: Energy requirement in India

P: Projected; Source: CEA, Crisil Intelligence

Crisil Intelligence estimates that power demand will clock a CAGR of 5.8% to reach ~2,250 billion units by fiscal 2030. Demand growth is expected to be driven by a rise in per capita income, build-up in industrial manufacturing capacity and large-scale infrastructure investments. Rising penetration of consumer electronics, railway electrification, metro and dedicated freight

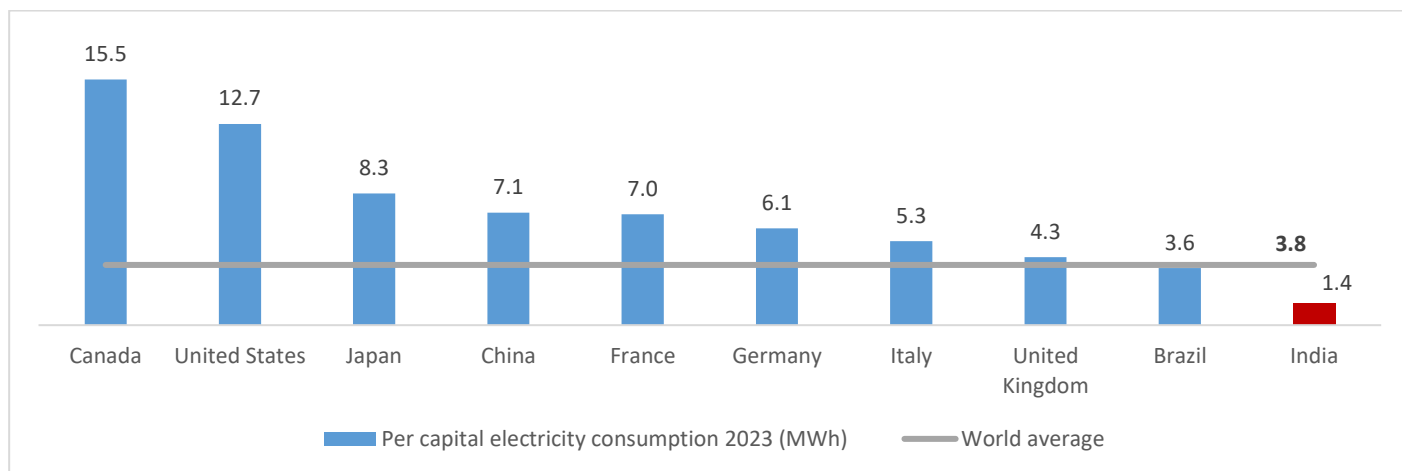

corridor buildout, data centre capacity expansion and EV adoption are also expected to drive the demand upwards. On the other hand, demand growth is expected to be restricted by lower Transmission and Distribution (T&D) losses, improving energy efficiency in industries and large-scale rooftop solar adoption.

Energy demand from C&I consumers in India is expected to clock a CAGR of 5-6% to 1,125-1,170 billion units, representing ~50-52% of the total energy demand in India in fiscal 2030.

India’s per-capita electricity consumption remains significantly lower than the world average, implying strong growth potential

India’s per capita electricity consumption in fiscal 2024 stood at just 1.4 MWh — less than half the global average of 3.8 MWh and significantly lower than that of developed economies, such as Canada (15.7 MWh) and the US (12.7 MWh). This reflects not only India’s lower per capita income but also the early stage of its energy consumption curve.

Figure 13: Per capita electricity consumption 2024, MWh

India’s data is as of fiscal 2024; Source: World Bank, EIA, Crisil Intelligence

As industrialisation deepens, household electrification expands and digital and cooling loads rise, India presents substantial headroom for electricity demand growth. With a young population, rising urbanisation and growing aspirations, electricity consumption is expected to increase steadily, supported by policy focus on 24x7 reliable power and clean energy transitions. This structural under-penetration positions India as one of the most important long-term growth markets for electricity and related infrastructure globally.

C&I consumers account for more than 50% of total power consumption; growth in the segment to be led by strong thrust on manufacturing and infrastructure

The commercial and industrial (C&I) consumer categories account for more than 50% of total power consumption across the country. Power consumption in the C&I segment rose at a healthy pace of 5.0% CAGR over fiscals 2015-24. In fact, the pace of growth in the C&I segment post Covid-19 has been much faster at a CAGR of 8.9% from fiscal 2021 to 2024. C&I consumers are expected to contribute to the rising projected demand and shall continue to be the largest power consuming category. This growth will be led by rising urbanisation, large-scale infrastructure build-out (for example, the National Infrastructure Pipeline) and increasing industrialisation (the Make in India programme coupled with the PLI scheme and favourable corporate taxes). More importantly, among C&I consumers, a significant surge in demand for green energy is expected, particularly from technology companies and export-oriented industries as they strive to expand capacities in a sustainable manner.

Figure 14: Consumer segment-wise share of electricity sales in India

Note: The 'Others' category includes railways, public lighting, public water works, sewage pumping and other miscellaneous consumers.

Overview of the Indian RE sector

Thermal power dominates generation capacity mix; shift to RE to continue over next five years

As of September 2025, renewable energy (including large hydro) forms a significant and growing share of India's energy mix, accounting for 49.4% of the total installed capacity at 247 GW out of 501 GW. Within renewable energy, solar power leads with 127 GW, comprising 52% of the RE portfolio, followed by wind at 53 GW (21%). This strong push toward renewables reflects India's strategic shift toward cleaner sources of energy to enhance energy security, meet its climate goals, and decarbonise its growing economy. Solar and wind, in particular, are expected to drive the next wave of capacity additions, supported by falling costs, favourable policies and strong investor interest.

Figure 15: Installed capacity as of September 2025 (GW, %)

Source: CEA, Crisil Intelligence

India's installed electricity generation capacity has grown steadily from 355 GW in fiscal 2019 to 501 GW in fiscal 2026 (till September 2025), driven by continued expansion across conventional and renewable energy sources. While coal and lignite still form the largest share at 224 GW (44.7%), the most significant trend has been the acceleration of renewable energy (excl. large hydro), now accounting for 39.4% of total capacity. Within this, solar capacity has grown over fourfold, from 28 GW in fiscal 2019 to 127 GW in fiscal 2026 (September 2025), while wind capacity has increased from 36 GW to 53 GW over the same period. Solar and wind have contributed nearly one-third of capacity additions since fiscal 2019, underpinned by falling costs, investor confidence and robust policy support.

India's generation mix is projected to continue its clean energy pivot. By fiscal 2030, total installed capacity is expected to reach 705 GW, with the share of coal and lignite declining to 35%, while solar and wind are projected to rise to ~38% and ~11%, respectively. The growth in renewables will be complemented by capacity additions in storage projects (PSP 5-7 GW and BESS 28.5 GW is expected to be added by fiscal 2030) to ensure system reliability and flexibility. This transition aligns with India's target of achieving 500 GW of non-fossil fuel capacity by 2030 and reflects a strategic shift toward a low carbon,

diversified and resilient power sector.

Figure 16: Growth in India’s electricity installed capacity, GW

P: Projected; Source: CEA, Crisil Intelligence

While RE (excluding large hydro) accounted for 36.3% of total installed capacity in fiscal 2025, its contribution to the energy supply mix was 14.0% due to dependency on natural resources leading to intermittent power generation and thereby lower Plant Load Factor (PLF). However, in terms of absolute numbers, RE generation increased from just 191 BU in fiscal 2015 to 255 billion units in fiscal 2025. As a percentage of total generation, the share of wind and solar energy has increased to 12.5% in fiscal 2025 from 8.3% in fiscal 2020.

While thermal power is expected to garner a substantial share in power supply mix, that of renewable power is expected to increase significantly. The share of thermal power in the country’s generation mix is expected to come down to 58% by fiscal 2030. Renewable energy (solar, wind and other RES) share is expected to more than double to 30% in fiscal 2030.

Figure 17: Power generation mix projections, billion units

The numbers mentioned below the bar are total units generated from all the sources;

Options for power sale

India's power procurement landscape is multifaceted, with IPPs having access to various channels to supply electricity to consumers. The market can be broadly categorised into two primary segments, providing a range of options for power distribution.

- 1) **Utility segment:** This part of the market involves central government-appointed agencies or state-owned distribution companies (discoms) that buy power directly from producers through a competitive bidding process and, in turn, supply power to a wide range of customers, including businesses, industries, farmers and households.

- **Central government-appointed nodal agencies:** IPPs participate in a bidding process, where they offer their best price for supplying electricity. This bidding is conducted by central government-appointed nodal agencies such as Solar Energy Corporation of India (SECI), NRVN, NHPC and SJVN. After securing the contract, the IPP signs a PPA with the respective nodal agency, outlining the terms of the deal. The nodal agency, in turn, signs a power sale agreement (PSA) with various discoms, essentially acting as a strong creditworthy intermediary between the IPP and discoms, thereby providing payment security to investors.
 - **State discoms:** IPPs directly participate in bidding processes initiated by individual state-owned discoms.
- 2) **C&I segment:** C&I consumers may directly procure electricity from IPPs, outside the regulated utility framework. This is enabled under the Open Access and Group Captive mechanisms provided by the Electricity Act, 2003. The IPP and C&I consumer negotiate and sign a bilateral PPA, outlining the terms of electricity supply. The electricity generated by the IPP is transmitted to the consumer through the state's T&D network. The consumer pays open access charges such as wheeling, transmission and scheduling, as well as applicable losses, to the discom to utilise its network. The various options to supply power to the C&I segment are listed below:
- **C&I onsite:** Onsite power generation, where the IPP sets up a power plant within the consumer's premises
 - **STU-connected C&I group captive:** The consumer and IPP form a group captive arrangement, where the IPP generates power and supplies it to the consumer through the STU network
 - **STU-connected C&I third-party open access:** The consumer purchases power from a third-party IPP and uses the STU network to transmit the power to its premises.

CTU-connected energy attribute contracts: The consumer purchases energy attribute certificates (such as renewable energy certificates) from the IPP, which are connected to the central transmission

Table 2: Power sale framework for the utility and corporate renewable markets

Parameter	Utility market	Corporate market
Project development	Set up large renewable power parks for supply of power to discoms and corporate consumers	
Tendering agency	PSUs such as SECI, NTPC and NHPC	Corporate consumer, in case a formal bid process is followed
Power trading intermediary	Typically, same as tendering agency	None
Commission paid to power trading intermediary	Rs 0.02-0.07/kWh (based on applicable regulations)	None
Demand identification	Tendering agencies may or may not identify potential offtakers before issuing tenders	Through business development and direct engagement
Tender issuance	Strictly based on competitive bidding guidelines issued by the MoP and MNRE	Typically, circulated to select a few project developers of high technical and financial reputation
Eligibility criteria for tender participation	Strictly based on competitive bidding guidelines issued by the MoP and MNRE	No specific criteria defined; typically, negotiable with the consumer
Cost of tender participation	Earnest money deposit of about Rs 1 million/MW	Typically, not required or negotiable with the consumer
Shortlisting process	E-reverse auction	Typically, bilaterally negotiated; some consumers may conduct a bidding process
PPA signing and other associated regulatory processes	<ul style="list-style-type: none"> • Tariff adoption petitions filed at the CERC and SERCs of respective offtaker discoms, which can take several months • Transmission connectivity • Other statutory approvals 	<ul style="list-style-type: none"> • Transmission connectivity and wheeling and banking approvals are required from the respective state authorities • Other statutory approvals

Parameter	Utility market	Corporate market
Commissioning timeline	Multi-year timelines, (from award of contract to commissioning) with projects often delayed beyond prescribed timelines	6-10 months for solar and 12-15 months for wind (between PPA signing and project commissioning)

Within solar and wind technologies—Open Access (OA) mode, which enables C&I consumers to procure electricity directly from an Independent Power Producer (IPP) rather than the state utility – is emerging as an attractive option for both consumers given the potential cost savings (refer Section 3.3 for more details). As a result, the share of OA in solar and wind capacity addition has increased to 34% in the calendar year 2024 from just 5% in the calendar year 2019.

Figure 18: Solar and wind capacity addition split by utility scale and OA routes

Advantages for project developers selling power in the corporate market

Wider customer base and tariff premium

India has vast base of medium-to-large C&I consumers with demand of more than 1 MW, creating a huge addressable market. Unlike utility-scale projects⁵ that are tied to discoms of large power-consuming states, developers can spread offtake risk across multiple clients, thereby hedging cash flow risk and enabling portfolio-based scaling.

C&I renewable PPAs are typically in the range of Rs 3.20-4.50/ kWh, compared with Rs 2.50-3.00/kWh in utility-scale auctions. This tariff premium (after adjusting for relatively short PPA tenures versus utility-scale projects) allows developers to secure higher Internal Rate of Returns (IRRs), while still offering considerable savings to C&I consumers over grid tariffs.

Innovative contract structures

Project developers in the corporate renewable market have greater flexibility and the opportunity to offer customised solutions to consumers — business model, tariff structures, tenure, PPA terms, etc. Also, a typical power supply deal in the corporate market can eventually expand to include additional technologies (battery storage, renewable heat, etc.) or business offerings (energy efficiency, sale of environmental attributes, etc.). The highly regulated and rigid nature of tenders and contracts in the utility market does not allow such customisation or upselling of products and services.

Higher probability of securing additional contracts

In the utility-scale market, each tender is a new and isolated opportunity that does not offer existing power suppliers any competitive advantage. In the corporate market, however, it is much easier for an existing supplier to upsell or cross-sell its services and products as and when such a need from the consumer arises. For example, a rooftop solar project developer may eventually enter a PPA for a land-based open access project, conduct emissions or energy audit services, and sell carbon offsets

⁵ Utility-scale RE projects are large-scale projects that supply electricity to state Discoms or government nodal agencies (such as such as SECI, NTPC, SJVN, NHPC, etc), typically through long-term PPAs awarded via competitive bidding

or renewable energy attributes not only to existing consumer but also to its upstream suppliers.

Shorter approval process and quality-based selection process

Tariff adoption for PPAs signed bilaterally between project developers and corporate consumers does not require any regulatory approval. Tariff adoption in the utility market can take several months. There have been many instances of awarded projects scrapped due to delay in adoption of tariff petitions by SERCs.

Unlike PSU tendering agencies and discoms, corporate consumers consider multiple factors, apart from tariff, to choose a project developer. Power procurement is not a core business for most corporate consumers, and value-added services offered by project developers hold significant value to such consumers. Support in liaising with government agencies to meet requirements under open access regulations, reconciliation of monthly bills and energy accounting are some of the key activities that consumers are required to conduct. Consumers view favourably project developers that can and are willing to offer these soft services in addition to physical power supply.

Better receivable profile

State discoms have average payment delay of 6-9 months, or even higher in some cases. In contrast, C&I clients, especially those rated A and above, are usually able to maintain receivable cycles of <60-day.

Deeper consumer insights enable tailored solutions

The corporate market is driven by direct and bilateral negotiations between project developers and consumers, enabling developers to gain a nuanced understanding of the consumer's specific requirements. This collaborative approach allows developers to tailor their offerings, often providing sustainable technology and business structuring solutions that precisely meet the consumer's objectives, thereby delivering enhanced value.

OA power procurement is also attractive for consumers

With the evolution of the corporate renewable power market, consumers now have multiple technologies, market instruments and business models to choose from based on commercial, financial and strategic considerations. Below are a few benefits that accrue to consumers opting for OA power purchase.

Significant financial savings over grid power cost

C&I consumers subsidise other consumer categories and are faced with artificially inflated grid tariffs. Average variable grid tariffs across key industrial states vary from Rs 6.92/kWh to Rs 16.15/kWh. In comparison, solar and wind power tariffs under long-term PPAs are in the range of Rs 3.20-4.50/kWh, offering significant financial savings to consumers. Under the group captive model, C&I consumers across industrialised states stand to save Rs 1.20-5.80/kWh (i.e., 21-62%) over grid tariffs, with average savings of ~35% (refer to Section 4.1 for state-wise analysis). For technology customers, their power demand load is typically round-the-clock, allowing them to benefit from 80-90% renewable penetration with a wind-solar-hybrid combination.

Attractive customer payback periods

The group captive structure is the prevalent business model in the corporate renewable power market, requiring minimum investment equivalent to 26% of project equity, translating to about 7.8% of project cost. At current estimated rates, consumers incur about Rs 25 million/MWp for solar power projects and Rs 80 million/MW for wind power projects. Payback periods vary from 1 to 3 years for solar power projects and 4 to 5 years for wind power projects based on the consumer's variable grid tariff. Payback periods will be marginally longer in the case of 100%-owned power projects.

Flexibility in technology, business model and market instrument

Corporate consumers have multiple options to increase RE procurement and can choose from different technologies based on their requirement, power consumption, investment appetite and electricity meter ownership.

Technology	Relevant consumer categories
Onsite/rooftop solar	Consumers with access to and availability of rooftop space
Ground-mounted solar	Most suited for consumers with high day-time power consumption
Wind	Most suited for consumers with high power consumption during early morning and night
Wind-solar hybrid	Most suited for consumers with stable power consumption across the day
Storage – battery or pumped hydro	Consumers with round-the-clock power consumption
Business model	Typical consumer characteristics
Third-party sale	Consumers unwilling to make long-term capital commitment and operate with very high variable grid tariffs

Group captive	Consumers willing to make some capital investment and looking to reduce power costs
100% captive	Consumers with high cash reserves and, at least, some experience in project execution
Market instrument	Suitability
Long-term PPA, up to 25 years	Consumers willing to commit to long-term procurement
Short-term PPA, up to 11 months, including power exchange	Consumers looking to meet short-term gaps in renewable power procurement target
Virtual PPA	Consumers ineligible for open access or rooftop solar projects
Renewable energy certificates	Consumers ineligible for open access or rooftop solar projects Consumers looking to meet any shortfall in renewable power procurement targets

Meeting renewable power procurement targets

An increasing number of Indian firms and international companies with operations in India are setting voluntary RE procurement targets. The table below shows the voluntary targets set by select companies across multiple sectors.

Table 3: Voluntary targets set by leading C&I consumers with operations in India

Company	Sector	RE/ decarbonisation target	Target year
NTT Data	Data centre	100% renewable energy across all data centres	2030
Google	Technology	24x7 carbon-free energy on every grid	2030
Meta	Technology and social media	Net zero emissions across the value chain	2030
Amazon	Technology and retail	100% RE matched globally (achieved in 2023); Net Zero	2023; 2040
Apple	Technology	Carbon neutral across the entire value chain (Scope 1, 2, 3)	2030
Microsoft	Technology	100% RE; Carbon Negative	2025; 2030
Shell	Energy	Scope 1 and 2 reductions of 50%; Net Zero	2030; 2050
Goldman Sachs	Financial services	Net Zero (operations); Value chain decarbonisation	2030; 2050
Unilever	FMCG	100% RE; Net Zero across the value chain	2030; 2039
Bayer	Pharmaceuticals and chemicals	100% RE globally; India operations already transitioned	2030
H&M	Retail and fashion	100% RE across operations; Net Zero	2030; 2040
Diageo	Beverages	Net Zero across operations; 100% RE electricity already achieved in several markets	2030
Accenture	Consulting and services	100% RE achieved in 2021; Net zero by 2025	Achieved; 2025
ITC	Conglomerate (FMCG, hotels)	100% RE	2030
Cargill	Food and agriculture	30% reduction in supply chain GHG per tonne of product sold	2030
Berry Global	Packaging	>90% reduction in Scope 1-3 emissions	2050

Procurement routes in the C&I renewable market

C&I consumers account for over half of the country's total power consumption, with the bulk of this demand met by discoms. Industries with substantial captive power needs, such as metals, oil and gas, and cement, have been slower to adopt renewable OA, largely due to the availability of low-cost thermal power and heavy legacy investments in captive thermal plants. Nevertheless, the share of captive conventional power in total corporate consumption dropped from 30% in fiscal 2019 to 21% in fiscal 2023. Meanwhile, direct RE procurement by C&I consumers (i.e., renewable energy penetration for C&I) rose sharply from just 4% in fiscal 2019 to about 7.4% in fiscal 2023. The RE consumption in India grew at a CAGR of 12.6% between fiscal 2019 – 2023, whereas RE consumption by C&I saw a significantly higher growth rate of about 24.3% during the same period.

Figure 19: C&I power consumption and split of RE procurement at the national level, fiscal 2023

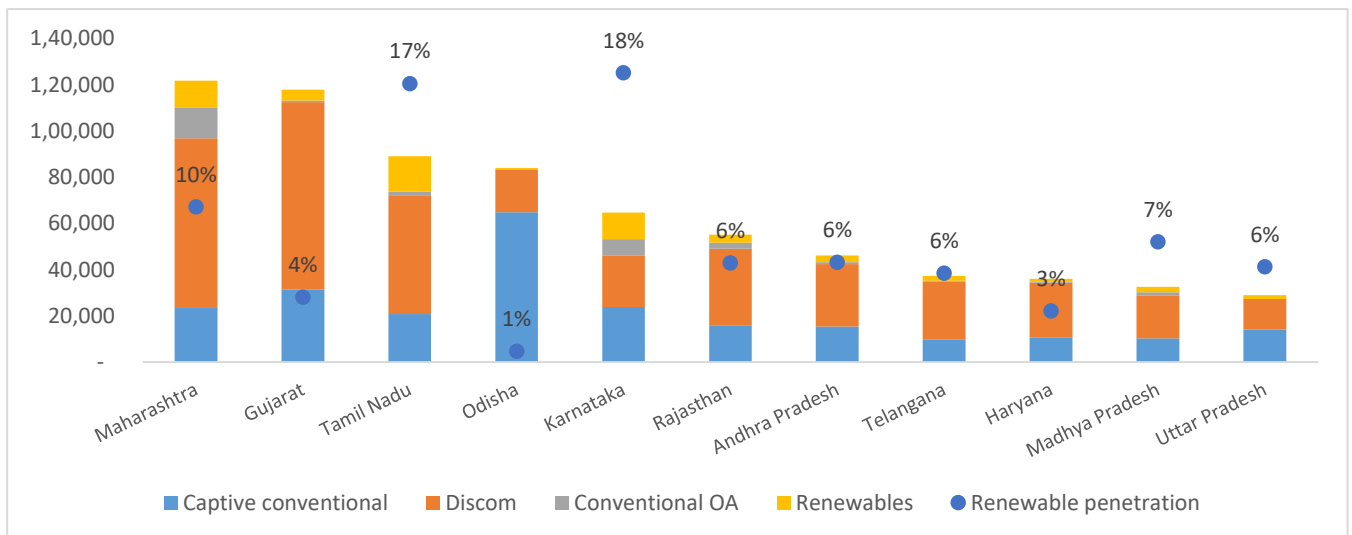

Source: State tariff orders, CEA, Crisil Intelligence

The pace of C&I renewable adoption varies widely across states, reflecting different levels of market maturity. Karnataka and Tamil Nadu, with their well-established OA policies, continue to lead. However, the introduction of Green Open Access Rules (GOAR), coupled with falling renewable costs and improving policy frameworks, is now spurring strong momentum in states such as Maharashtra, Gujarat, Haryana, Rajasthan and Chhattisgarh.

BESS are emerging as a pivotal component in C&I renewable energy strategies. Supported by declining storage costs, policy support and regulatory initiatives such as Rajasthan’s 5% BESS mandate, adoption is rising as businesses seek greater power reliability, operational flexibility and the ability to optimise consumption patterns. Alongside, energy efficiency solutions are an emerging space and is expected to be a key market for C&I customers.

Figure 20: Corporate power consumption by source across leading states (GWh), fiscal 2023

Source: CEA, Crisil Intelligence

OA capacity additions were historically supported by incentives on OA charges. However, the withdrawal of such incentives slowed down growth between fiscals 2019 and 2022 due to volatility in solar module prices as well as policy/ regulatory flip-flops (ALMM, state OA stance, etc.). However, since fiscal 2023, momentum on OA capacity additions has significantly improved, led by strong interest from corporate consumers. OA capacity additions averaged 5.9 GW in the last two fiscals. Total OA renewable capacity as of March 2025 was estimated at 31.2 GW, with robust growth expected in the next five years.

In the rooftop solar market, growth also picked up in the last 1-2 years, with 2.9 GW added in fiscal 2025 alone. As of March 2025, total C&I rooftop solar capacity was estimated at 14.2 GW with the OPEX segment accounting for 19% of total capacity.

Figure 21: C&I renewable capacity addition trend (MW)

Source: State tariff orders, CEA, Crisil Intelligence

Rooftop solar is typically the first RE procurement route considered by corporates due to its low cost, scale and asset control. It is generally followed by the OA route to reduce power procurement cost and/or achieve sustainability goals.

Rooftop or onsite solar

Rooftop and onsite ground-mounted solar installations are a preferred RE option for C&I consumers with adequate space, offering 10-15% RE offset without the need for external land or transmission infrastructure. Adoption is supported by simple regulatory processes and proven implementation models across states, with metering structures such as net metering, gross metering or behind-the-meter systems.

C&I consumers typically choose between two models:

- Capex model (dominant): Consumers invest upfront and benefit from lower tariffs due to GST credits and accelerated depreciation, but bear performance and maintenance risk
- Opex/RESCO model: Popular with large consumers — zero capex, risk transferred to the developer and assured savings, but limited by the need for creditworthy, large-scale offtakers

Open access

OA allows consumers to procure power directly from any power generator across the country. The route is suitable for consumers looking to procure a higher quantum of renewable power as there are no space constraints. Consumers may install renewable power projects themselves on a 100% captive basis, but procurement from IPPs under long-term ‘group captive’ PPAs is the most popular option.

Table 4: Key features of different OA business models

Particulars	100% capex	‘Group’ captive	Third-party sale
Key features	<ul style="list-style-type: none"> • Customer owns 100%, developer builds and operates • Consumer makes the entire upfront capital investment 	<ul style="list-style-type: none"> • Customer owns minimum 26%, developer owning 74% or lower builds and operates • A third-party IPP may own the remaining equity and takes all responsibility for developing and operating the power plant; consumer buys power from IPP as per a mutually agreed PPA 	<ul style="list-style-type: none"> • Owned, built and operated 100% by developer • Consumers buy power from IPPs under a mutually agreed PPA
Benefits	<ul style="list-style-type: none"> • Streamlined project approval process 		<ul style="list-style-type: none"> • No upfront capital

Particulars	100% capex	'Group' captive	Third-party sale

Source: Crisil Intelligence

The MoP issued final green open rules in FY23, which are desirable for consumers, and most of the major states have already adopted these. The new rules allow small consumers with sanctioned load over 100 kW to be eligible for OA with banking provisions subject to an annual cap of 30% of power consumed from the local discom. The rules propose that OA applications be approved within 15 days and that a uniform methodology for calculating OA charges be followed across all states. This is expected to propel capacity additions under this route over the medium to long term.

Inter-state transmission system (ISTS)-connected projects

CTU- or ISTS-connected projects can supply power throughout India by using the national grid network. These projects enable developers to support pan-India operations for corporate customers in multiple ways. Customers with multiple facilities across states can aggregate demand to purchase electricity under a combined PPA; customers with facilities in states where STU-connected projects are not viable or feasible can access power through CTU-connected projects; and customers that wish to contract for energy attributes through EAPAs without purchasing physical electricity. EAPAs are contracts that require developers to unbundle energy attributes and sell them to C&I consumers, often registered as I-RECs/RECs. The electricity generated from these projects is sold either on power exchanges in India or to other brown power PPA consumers.

There are two key categories of C&I customers that benefit from ISTS power:

1. Large manufacturing facilities in states without adequate renewable potential or high intrastate OA costs or policy landscape (e.g., Jharkhand, Odisha, UP, WB and Northeast)
2. Data centre and technology companies are purchasing environmental attributes generated from green power in India to meet RE commitments for their operations in India and the broader Asia-Pacific region

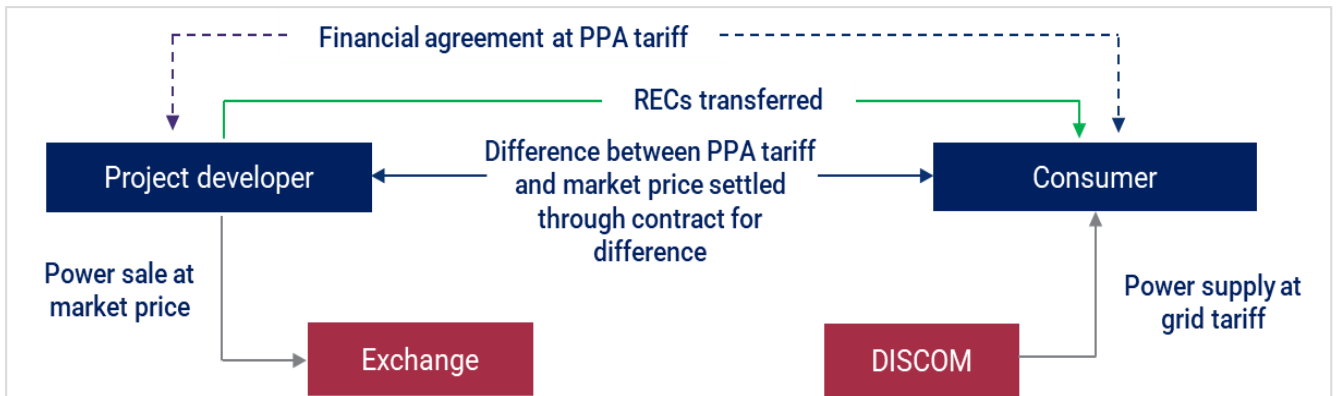

The OA market has historically been limited to intra-state projects, where both the renewable project and the consumer are located within the same state. However, the market is exploring inter-state projects given ISTS waiver (25% reduction starting July 1, 2025, and a full phase-out by fiscal 2028) for OA projects, which is typically Rs 0.50-0.80/kWh for a 25-year period for projects commissioned by June 2025.

ISTS-based OA power continues to offer a cost advantage for large C&I consumers, even after factoring in ISTS charges and losses of Rs 0.20-0.25/kWh (assuming a 75% waiver on ISTS charges). Despite this adjustment, the landed cost of ISTS power is still Rs 0.10-0.20/kWh lower than comparable intra-state OA. Customers already operating under intra-state OA arrangements – particularly in states with favourable banking or OA policies – are likely to continue with existing set-ups due to operational familiarity and policy stability. However, ISTS remains an attractive alternative for new buyers, those looking to diversify procurement across geographies, or entities in states where intra-state OA is constrained by regulatory barriers or higher charges.

Virtual power purchase agreements

In a VPPA, a buyer contracts to purchase Renewable Energy Power at a predetermined price, without physically receiving energy. In a VPPA framework, an agreement is reached for the sale of RECs to the consumer at a mutually agreed price, and brown power is sold on the exchange with a contract for difference. Essentially, through a VPPA including EAPA, corporates support set-up of RE projects and, in turn, retain the green attributes (RECs). It also allows consumers to purchase green attributes such as RECs while continuing to buy power from discoms or other sources. This framework also provides consumers and developers with a hedge against power price volatility to the extent of the strike price or cap/floor. The industry is exploring this option, experimenting with some variants of VPPAs.

Figure 22: VPPA transaction structure

Source: Crisil intelligence

CERC has recently released draft guidelines for VPPAs in India. As per the guidelines, Indian RECs are allowed to be transferred without any cost and without a power trader. CERC has also recognised that both parties may directly settle the difference between market and strike price according to a mutually agreed contract. As per the above framework, parties do not require any derivative contracts to complete a VPPA. Hence, full jurisdiction of such contracts remains with CERC under REC Regulations, Power Market Regulations, and Grant of Trading License Regulations, ending years of uncertainty for the sector. These provisions regarding VPPA have also been incorporated under the draft REC Amendment Regulations, 2025 issued on September 2025.

VPPAs are emerging as a commercially attractive option for C&I consumers, particularly when linked to ISTS-connected RE projects. Unlike green tariffs, which involve a fixed premium over grid power and offer limited pricing transparency, VPPAs allow for greater cost control and potential savings, especially under favourable market conditions.

C&I consumers are also increasingly adopting EAPAs and other green attribute contracting structures to meet their sustainability goals. By combining VPPAs with RECs, corporates can make credible progress towards their 100% RE and Scope 2 reduction goals without relying on physical OA or state-level grid connectivity. While VPPAs are fundamentally structured as cost-plus instruments for acquiring green attributes, they can become cost-neutral or even cost-saving depending on the strike price versus real-time market prices. Since green tariffs often carry premiums of Rs 0.50-1.00/kWh over grid tariff and are subject to regulatory variability, VPPAs offer not just greater flexibility and long-term visibility, but also a more commercially viable route for companies seeking to decarbonise at scale, particularly across multiple states. This makes VPPAs especially attractive for large, creditworthy consumers that may not have access to physical OA but still want to demonstrate credible, reportable RE procurement.

Power exchanges

The power exchange market in India, specifically the Green Term-Ahead Market (G-TAM) and Green Day-Ahead Market (G-DAM), provides consumers with opportunities to buy and sell renewable power on a short-term basis. G-TAM allows bilateral purchase of power for delivery duration up to one week, with options for same-day, next-day, next-week, or next 2-10 days contracts. In contrast, G-DAM enables trading of power through a closed online auction process for delivery on the next day. Green attributes are embedded with traded power to avoid double counting, ensuring the integrity of the market.

The total cleared volume in calendar year 2024 was up 58% on-year due to a sharp increase in demand (up 55% on-quarter) on the back of prolonged warm weather in most parts of the country. Average clearing price on the green exchange in CY2024 was estimated at Rs 4.96/kWh compared with Rs 4.57/kWh on the conventional DAM market, implying a premium of Rs 0.29/kWh for green attributes. Corporate participation in the market remains low at 10-20%, with only large consumers such as ArcelorMittal Nippon Steel and Indian Railways participating.

Green tariffs

A green tariff is a special power tariff determined by state regulators for consumers that want to purchase renewable power. It is a simple procurement route that does not require any changes in physical procurement, metering or infrastructure, making it attractive to consumers that are averse to relatively complex procurement options such as OA. All consumers are eligible to procure power from the local discom at green tariffs, but it entails an extra cost (over and above the respective consumer category grid tariff), which is a deterrent for many. The green tariff premium calculation methodology is arbitrary and lacks visibility, and the green attributes are not transferred to the consumer but rather retained by the discom for non-obligated entities and over renewable purchase obligation (RPO) targets of obligated entities that uses them to meet its RPO targets.

Despite their operational simplicity, the uptake of green tariffs has been poor due to the high cost, which is set at a premium of 5-10% over grid tariffs. Some states, such as Karnataka, transfer green attributes to obligated entities only, but this is not a

standard practice. Overall, the green tariff has remained a non-starter due to its high cost and lack of clarity over green attributes.

Key growth themes driving RE demand among C&I consumers

Growth in manufacturing under Make in India and PLI prompting RE adoption

The Indian government has launched several initiatives to boost domestic manufacturing and reduce dependence on imports. The "Make in India" initiative, launched in 2014, aims to transform India into a global manufacturing hub and attract foreign investment. The government has also introduced policies such as "Aatmanirbhar Bharat" and PLI for products such as electronics, pharmaceuticals and medical devices to encourage domestic production and exports. As per industry estimates, electricity cost accounts for 15-20% of total manufacturing across sectors in India. Thus, to ensure financial viability and competitiveness, manufacturers look for cheaper and cleaner sources of electricity, such as solar and wind power.

Offsetting global and regional emissions through OA projects in India

International companies with operations in India are seeking renewable power and related market instruments not only to meet their electricity requirements within India but also for their international operations. Companies find India an attractive market to invest in due to its comparatively low levelised cost of energy, which enables them to undertake large-scale projects and use I-RECs to offset Scope 2 emissions of their global power operations. Companies such as Amazon and Microsoft have announced such deals. International companies also bring knowledge of new market instruments and frameworks that help power generators develop new products and expand their offerings.

Case study 1: Global consumer tech company offsetting product-use emissions through RE in India

A global consumer electronics major, with one of the largest device user bases worldwide, has been actively working to reduce emissions across its value chain. A key challenge has been addressing Scope 3, Category 11 emissions, i.e., electricity consumed during the lifetime use of its products by customers. These account for more than 20% of the company's total carbon footprint.

Structure and mechanism

To tackle this, the company has launched a programme to match product usage electricity with RE in key markets where its products are sold and used. It has already enabled over 13 GW of clean energy globally, spanning both supplier operations and customer product use.

In countries such as India, where a significant share of its user base resides and the grid is still carbon-intensive, the company is supporting the development of new renewable capacity. These projects are typically executed through long-term procurement arrangements, local partnerships with developers and retirement of I-RECs to ensure credible accounting.

Estimated impact

While project-level disclosures are limited, estimates suggest the company's efforts in India could help offset hundreds of GWh of electricity consumption annually, directly attributable to product usage in the country.

Strategic relevance

This approach represents a shift in how corporates view climate responsibility — not just decarbonising operations but also the use phase of their products. For Indian developers, it unlocks a new demand stream from global corporates seeking to meet voluntary RE targets and Science-Based Targets via high-impact geographies such as India.

Case study 2: VPPA-based RE procurement by a global tech major

Effective 2022, a leading global technology services company has signed up for VPPAs for an estimated 1.2 GW of RE projects in India. The contracted capacity includes multiple solar and wind projects across multiple states, including Rajasthan, Madhya Pradesh and Karnataka.

Structure and mechanism

The VPPAs are structured to provide RECs — specifically I-RECs — without requiring physical delivery of power to the buyer. The developer sells electricity to the grid, while the corporate buyer retains the environmental attributes, enabling them to meet global sustainability targets under Scope 2 emissions accounting.

- As of 2024, the global tech major is estimated to have a total demand of ~2 GW, based on public disclosures. This

demand is expected to increase severalfold in the coming years

- India operations, including data centres and corporate offices, are conservatively estimated to contribute a fraction of the signed-up capacity

Strategic relevance

- India offers among the lowest OA tariffs globally (Rs 2.80-4.00/kWh), making it a cost-effective location for sourcing I-RECs
- The VPPA model decouples power procurement from physical consumption, allowing companies to invest in markets with the best economics while meeting targets across jurisdictions
- This structure is particularly suited for global firms with fragmented or complex power loads, especially in regions where green power is expensive or not easily accessible

Implementation of Carbon Border Adjustment Mechanism

The European Union (EU) is set to implement the Carbon Border Adjustment Mechanism (CBAM) starting October 2026. As part of the CBAM, the EU plans to impose tax on goods imported from countries that do not have a carbon pricing mechanism. Some of the leading industrial sectors expected to face such taxes include cement, iron and steel, aluminium, fertilisers, chemicals and refined petroleum products. Many companies in these sectors are looking to transition to renewable power to reduce their GHG emissions. In fact, several of these companies have also set targets to achieve net-zero GHG emissions or increase the share of RE sources in total power supply to 100%.

These sectors are expected to form a major share of renewable power demand over the near to medium term as companies pursue more ambitious sustainability goals, face growing supply-chain pressures, and adapt to evolving regulations such as CBAM alongside domestic growth in industrial production, infrastructure and electrification.

Infrastructure growth and electrification in sectors such as airports and metro systems

Infrastructure-led electrification is emerging as a significant demand driver for RE in India. Rapid expansion in sectors such as airports, metro rail networks, industrial parks and smart cities is leading to higher power requirements, with a growing emphasis on sourcing this demand sustainably. These sectors often operate under state or central government mandates that increasingly prioritise clean energy adoption, either through direct procurement or via innovative models such as green OA and hybrid PPAs. Given their large and often 24x7 energy needs, such infrastructure projects are actively exploring customised RE solutions, including round-the-clock supply, energy storage integration and location-specific renewable sourcing. As infrastructure modernisation gathers pace, this segment is expected to play a critical role in deepening corporate RE adoption across the country.

Impending launch of a national carbon market

The Government of India has notified the Carbon Credit Trading Scheme (CCTS), 2023, and in October 2025, it notified the GHG Emission Intensity Targets, 2025, under its compliance mechanism. The rules specify baseline GHG emission intensities for fiscal 2024 and binding reduction targets for fiscals 2026 and 2027 for each obligated entity. These entities include large industrial facilities in aluminium production, iron and steel manufacturing, and other high-emission sub-sectors listed in the official schedule. For example, aluminium smelters such as Hindalco's facilities are required to progressively lower their emission intensity by around 2-6% from baseline levels over the two compliance years. In the iron and steel sector, major producers such as SAIL, Tata Steel and JSW Steel have similarly been assigned measurable step-down targets — typically in the range of 2-7% from the baseline — varying by plant and production process.

Non-compliance without surrendering equivalent Carbon Credit Certificates (CCCs) will result in environmental compensation equal to twice the average annual market price of CCCs, payable to the Central Pollution Board. By setting facility-specific targets and linking compliance to a tradable carbon credit framework, the scheme is designed to both incentivise emission reductions and create a transparent market for trading carbon performance across India's most energy- and emission-intensive industries.

Growing demand for green hydrogen

Many states have issued dedicated policies to promote and incentivise construction of green hydrogen production facilities, including associated renewable projects. Many companies in Japan, Korea and Singapore have expressed interest in importing green hydrogen from India. For example, in 2022, Singapore's Keppel Infrastructure inked a deal with Greenko Energy Holdings to set up a green ammonia facility with 250,000 Tonnes Per Annum (TPA) capacity in India. The facility would require an estimated 1.3 GW of solar and wind power capacity. Progressing towards its sustainability goals, India has set a target to produce 5 million tonne of green hydrogen by 2030.

Traditional and emerging industries boost procurement of renewable power

The two types of consumer categories that are driving renewable power procurement comprise the traditional (manufacturing and infrastructure) and emerging (AI, global capability centres or GCCs and cloud computing) industries.

Traditional industries

In fiscal 2023, captive consumers exceeding 0.5 MW contracted demand utilised 311 TWh of power (66% from captive projects and 34% from discoms), accounting for ~40% of total C&I power demand. Thermal power constituted 96%, with renewable power (majorly wind and solar), accounting for only 4%. The iron and steel, aluminium, refineries and cement industries are expected to be the leading adopters of RE owing to their high conventional power consumption and decarbonisation initiatives. Another set of consumers within the traditional sectors include Indian infrastructure companies and GCCs. These companies are steadily increasing their procurement of renewable energy, driven by sustainability targets, reputation pressure, and long-term cost advantages. These large airports, metro networks, and IT campuses are increasingly building new capacities.

Figure 23: Power procurement by captive consumers exceeding 0.5 MW contracted demand (GWh) for FY23

Note: Other industries include jute, mining and quarrying, engineering, collieries, plastic, rubber and miscellaneous
Source: CEA, Crisil Intelligence

Emerging sectors including AI, cloud computing and data centres – new growth theme in the sector

Companies in the emerging industries are steadily increasing their procurement of RE, driven by sustainability targets, reputation pressure and long-term cost advantages. Large airports, metro networks and IT campuses are increasingly building new capacities.

India's data centre industry is witnessing rapid growth, driven by increasing demand for cloud computing, data storage, digital services and GCC. Increasing growth in the AI market has directly translated into higher power demand. To meet this growing demand, data centre operators are likely to opt for renewable power sources, given the potential to save costs as well as reduce carbon footprint. Electricity costs account for 30-40% of a data centre's operating expenses. As the capacity of data centres expands, it is expected to result in significant RE capacity addition.

Over the past few years, AI has emerged as mainstream from being under experimentation. With the development of new AI models, including GPT-4, Gemini 1.5 and DeepSeek, comes a significantly higher appetite for data centre capacity and electricity. The trend is not only technological but has a material infrastructural and more importantly, environmental implication. These infrastructure hubs, which house thousands of high-performance graphic processing units and central processing units, are evolving from back-end utilities to frontline investment priorities.

India is fast emerging as a critical node on the global data centre map. With rising internet penetration, digital payment infrastructure and the localisation of cloud and AI services, the demand for domestic data processing is surging. From an installed capacity of just 1.1 GW in calendar year 2023, the capacity is expected to increase to 5.4 GW by calendar year 2030. Mumbai, Hyderabad, Chennai and NCR are evolving into hyperscale clusters, driven by submarine cable landings, favourable state policies and access to skilled labour. Strategic land banks, strong fibre connectivity and incentives under various state policies are further catalysing this growth.

Key consumer expectations and typical contractual clauses under corporate PPAs

C&I consumers are looking for more than just low tariffs. They value predictability, flexibility and reliability in energy procurement. Key expectations include contracted RE tariffs being lower than grid throughout the PPA tenure, ensuring savings on grid tariffs over time. They prefer developers with a strong financial and execution track record, especially those with local experience as this assures timely delivery and continuity. Minimal operational risk is also essential. Consumers want guaranteed compliance with central and state policies, reliable plant performance and minimal disruption.

Further, buyers now look for developers offering a wide mix of technologies (solar, wind and hybrid) and solutions (on-site, group captive, third party and VPPA), which helps in meeting their decarbonisation goals holistically. Corporates also value flexibility in contracting, whether it is tenure, exit clauses or adjustments due to mergers and acquisitions (M&A) or regulatory changes. Early commencement of power supply (within six to nine months for OA) is preferred, especially from developers with shovel-ready projects and clearances in place.

Building on these expectations, C&I PPAs are evolving to include specific contractual terms that reflect both developers' and consumers' priorities. The table below captures key differences in the tariff structure, commissioning timelines and lock-in periods under typical offsite and onsite contracts.

Table 5: Key contractual clauses

	Offsite contracts	Onsite contracts
Tariff	<ul style="list-style-type: none"> Typically, a fixed tariff is payable over the entire PPA term. In some cases, tariffs may escalate to 0.50-1.0% per annum Some developers also have grid linked tariffs 	Fixed tariffs, no escalation
Commissioning timeline	Commercial date of operation (COD) is typically within six to 10 months for solar and 12-15 months for wind following the PPA signing. For group captive projects, COD may depend on equity infusion by the offtaker. Delays attract liquidated damages based on grid tariff differential and generation shortfall	COD within six months of PPA signing date
Term and lock-in period	PPAs are typically of a fixed term of 25 years with a lock-in period of ~10 years. Within the lock-in period, PPAs may be terminated in case of default by the project developer or any consumer event or force majeure	Fixed locked-in term of 20-25 years
Payment of OA charges	All payment responsibilities and risks associated with OA charges such as CSS, AS, transmission and wheeling charges/ losses are usually borne by the offtaker subject to minimum savings guarantee	No charges are applicable
Minimum generation and offtake guarantee	Offtakers and project developers are obligated to consume and produce majority of contracted energy. In case of a shortfall, developers are liable to pay the difference between grid tariff and landed cost. Similarly, offtakers are liable to pay the shortfall at PPA tariff	

	Offsite contracts	Onsite contracts
Minimum assured savings	Minimum savings of Rs 0.50-1.00/ kWh or up to 20% over consumers' variable grid energy charges. If savings are lower than the specified amount, the PPA tariff is renegotiated downwards subject to floor price. In absence of a consensus between the parties, the PPA may be terminated without penalty by the offtaker	5-10% of variable grid tariffs
Termination payment	<ul style="list-style-type: none"> In the event of default by the offtaker: Offtaker is supposed to pay PPA tariff for minimum guaranteed supply for the remaining PPA term or 100% of project capex in the first year, reducing to 10% of capex by the end of the PPA term or normative revenue for 12 months Project developer event of default: Project developer must provide compensation equivalent to 1 year of savings for guaranteed energy output 	<p>In the event of default by the offtaker before system commissioning: Payment of 5-30% of project cost, if delivery of equipment has not started or 12-75% of project cost, if delivery has started</p> <ul style="list-style-type: none"> Offtaker default after system commissioning: Entire project capex in the first year, reduced to 10% of capex by the end of 20-25 years Default by project developer: Loss on savings for one to two years

C&I grid tariffs and landed cost of OA power

C&I grid tariffs logged a CAGR of 2.5% and 1.7%, respectively, between fiscals 2016 and 2024, led by the need to cross-subsidise agricultural and residential user tariffs. In fiscal 2024, the average cross-subsidisation level for C&I consumers was ~116%.

Figure 25: C&I average billing rate at the national level (Rs/ kWh)

Source: NITI Aayog, Crisil Intelligence

Variable grid tariffs for HT industrial consumers showed an upward trend across target states⁶ between fiscals 2022 and 2025. Between fiscal 2022 and fiscal 2026, states like Tamil Nadu, Uttarakhand and Telangana have seen increases of INR 1.21-1.45/ kWh, with some like Maharashtra rising even more steeply from INR 9.01 to INR 10.36/kWh. Karnataka and is a rare outlier, with tariffs moderating slightly in this period due to surplus conditions and regulatory constraints. Although subject to slightly different tariff structures, HT commercial consumers followed a broadly similar trend. Despite some regional policy variations, this historic movement reflects increasing power procurement costs and persisting cross-subsidies.

Grid tariffs are projected to rise further across most industrial categories, driven by higher cost recovery targets, phasing out of subsidies and elevating capex requirements for discoms. For instance, Tamil Nadu tariffs are expected to touch Rs 9.40/kWh by fiscal 2030. Notably, Karnataka and Maharashtra released Multi-Year Tariff (MYT) orders that signal a decline in tariffs in

⁶ Target states include Andhra Pradesh, Chhattisgarh, Gujarat, Haryana, Karnataka, Maharashtra, Rajasthan, Tamil Nadu, Telangana, Uttar Pradesh and Uttarakhand.

the near term. However, such reductions may be challenged by discoms over time, if financial stress escalates. On balance, grid tariff inflation remains a persistent and structural feature, making renewable power procurement highly lucrative for large C&I consumers.

Table 6: HT C&I variable grid tariff projections (Rs/ kWh)

Note: HT consumers are those who are supplied electricity at high voltage levels, typically 33 kV and above. Grid variable tariff is a sum of energy charge, fuel adjustment cost and electricity duty (ED) based on the respective state regulations. Source: State tariff orders, Crisil Intelligence

C&I tariffs have been rising over the years, and they are likely to be on the rise over the medium term due to several factors:

- India is heavily dependent on thermal power for base load and cost of fuel for thermal plants have been increasing.
- Increasing RE penetration requires additional infrastructure and management costs.
- India's power demand is growing rapidly, leading to peak demand management issues. To manage peak demand, utilities may increase tariffs during peak hours to discourage consumption and prevent grid overload.
- With increasing inflationary pressures, power costs are likely to increase with higher T&D and grid balancing costs.
- Due to legacy issues, cross subsidisation will continue at least for some years, leading to higher tariffs for C&I consumers.
- India's power grid requires modernisation and upgradation to accommodate growing demand and increasing share of RE.

Given the rising trajectory of C&I grid tariffs, coupled with competitive RE tariffs, group captive open access power is attractive for corporate consumers compared with grid power even after accounting for applicable grid charges in states. The financial attractiveness also applies to vanilla wind and wind-solar hybrid OA power under which the applicable grid charges will remain at similar levels. However, in most states, third-party OA is not feasible due to the levy of CSS and AS.

Figure 26: Landed cost of solar power comparison for OA and grid power in FY26

Even going forward, financial attractiveness of OA renewable power is expected to maintain due to tariff inflation.

Figure 27: Landed cost of solar power comparison for OA and grid power in FY30

Note: Base OA tariff has been assumed at Rs. 3.30/ kWh for a vanilla solar project across all states. Actual tariffs in different states may vary due to multiple factors like irradiation, associated developer risks and consumer creditworthiness. Grid power landed cost included applicable Fuel Adjustment Cost (FAC) and Electricity Duty.

Policies and regulations drive growth in the open access market

Captive/ group captive policies

According to the Electricity Rules, 2005 a power plant can qualify as a captive generating plant (CGP), if the captive user holds at least 26% ownership. A group captive mode is where a power plant is developed for collective usage of multiple consumers. A power project is considered captive if the entities consume at least 51% of the power generated and own at least 26% of the equity.

The rules mandate that each user of a CGP must consume electricity annually in proportion to its shareholding in the CGP entity subject to a variation of +/-10%. The Electricity (Third Amendment) Rules, 2023 amended the provisions and allowed power consumption by a subsidiary company or the holding company of a captive user to be considered as captive consumption. The amended rules also appointed the CEA to verify the captive status of CGPs where the projects and their users are located in more than one state. Group captive is the most preferred route by corporate consumers owing to minimal investment requirement and exemption from OA charges such as CSS and AS.

The Supreme Court judgement dated October 2023 reaffirmed that captive users must together hold a minimum 26% of ownership of the CGP and consume at least 51% of the aggregate electricity generated by CGP. It also mentioned that the minimum ownership requirement of 26% must be met and satisfied throughout the year and not at the end of the fiscal. It also clarified the proportionality principle where the owner of every 1% shareholding in CGP should have a minimum consumption of 1.96% with a variation of +/- 10%. The 51% consumption requirement will be tested annually.

As far as benefits for captive users are concerned, as per section 42(2) of the Electricity Act, 2003, captive power plants, set up by end-users for their consumption, are exempted from payment of cross-subsidy and additional surcharges otherwise applicable for open access consumers. Thus, the Centre’s policy support has played a role in promoting the captive/group captive model, especially for C&I consumers.

Introduction of Green Energy Open Access (GEOA) rules

The Electricity (Promoting Renewable Energy through Green Energy Open Access) Rules, 2022, give consumers the option to draw green energy through OA if their contract demand is 100 kW or above, with no limit on supply of power for captive consumers. Multiple consumers with a collective contract load of 100 kW are also eligible for OA, making access easier for smaller consumers. As OA allows bulk procurement at low cost, it has become one of the most popular routes among corporates to procure green energy.

Exemptions and provisions for third-party OA consumers

Consumers opting for open access to procure power from third-party suppliers must pay transmission and distribution utilities various charges to use their networks. These include the cross-subsidy surcharge, transmission and wheeling charges, losses, connectivity charges and load dispatch centre charges. The cross-subsidy surcharge, determined by state regulatory commissions, compensates distribution companies for revenue loss from high-paying commercial and industrial consumers shifting away from discom supply.

The National Tariff Policy (2016) ensures that this surcharge remains manageable to encourage competition. It caps the cross-subsidy surcharge at 20% of the average cost of supply (ACoS) for industrial consumers and exempts captive and group captive sales. Further relief comes under the Electricity (Promoting Renewable Energy through Green Energy Open Access) Rules, 2022, which limit any increase in the cross-subsidy surcharge to 50% for 12 years from the commissioning of the project and waive additional surcharges if fixed charges are paid. Since cross-subsidy and additional surcharges together account for roughly 50% of total grid charges, these measures significantly improve the viability of OA for consumers.

Exemptions and provisions for captive and group captive consumers

Captive and group captive routes remain the most attractive option as projects set up by end users for their own consumption are exempt from paying cross-subsidy and additional surcharges otherwise applicable to third-party consumers. Thus, the central government’s policy support has played a role in promoting the captive/group captive model, especially for C&I consumers.

Banking and procedural clarity

Banking is allowed on a monthly basis on payment of banking charges. The unutilised surplus banked energy lapses at the end of each banking cycle and the RE generating station get RECs to the extent of the lapsed banked energy. Consumers can also purchase green energy by placing a requisition with their discom.

The rules provide stakeholders long-term certainty on open access charges, which will help determine their returns from the project. Further, if an open access application is not approved within 15 days, it will be deemed approved to ensure timely execution of projects by minimising the risk of cost escalation. The demand for green energy open access from C&I consumers is likely to increase after implementation of these rules. However, discom cooperation, regulatory proactiveness in timely tariff orders and green energy tariffs are monitorable.

Adoption of green open access rules by key states

Most of the large industrial and RE-rich states have notified green energy OA regulations, largely in line with the central rules. However, there are a few deviations, which are listed below.

Table 7: Comparison of MoP’s green open access rules with state-notified RE open access regulations

	Eligibility	Banking	CSS and AS waiver	Standby charges	Unused banked power
MoP rules	100 kW or above	Monthly; banked quantum at 30% of monthly consumption for discom; banking charges at 8% of banked energy	100% AS waiver and CSS shall not increase by more than 50% in 12 years Not applicable if fixed charge is being paid	Should not exceed 25% of energy charges	Entitled to get REC for the lapsed banked energy

	Eligibility	Banking	CSS and AS waiver	Standby charges	Unused banked power
Andhra Pradesh	ü	ü	No cap on CSS and no AS exemption	ü (20%)	Paid at 75% of the last discovered SECI tender for given RE source
Chhattisgarh	ü	Monthly; additional withdrawal charges of 30% on power redeemed during peak hours	100% AS waiver and no increase in CSS for 12 years	ü	ü
Gujarat	ü	Banking charges of Rs 1.5/kWh	ü	ü (10%)	ü
Haryana	ü	Banking allowed only for group captive SPVs with single offtaker	ü	ü	ü
Karnataka	ü	2% additional banking charges for drawing off-peak banked energy during peak hours	No cap on CSS but AS exempted	ü	ü
Maharashtra	ü	No cap on banked quantum	No cap on CSS but AS exempted	-	ü
Rajasthan	Minimum 1 MW contracted load	Banking on annual basis; allowed only for captive projects; banked energy at maximum of 25% of RE injected or 30% of total monthly consumption form discom, whichever is higher; banking not applicable after FY30	No cap on CSS and no AS exemption	-	ü
Tamil Nadu	Minimum 1 MW contracted load	Captive/group captive and third-party projects - Monthly banking allowed from higher to lower slots; Banking period of financial year for wind projects commissioned before March 2018 @ 14% banking charge; No banking for third-party OA	Exempted for captive/group captive projects No exemption on AS; CSS waiver of 40% on wind projects and 30% on solar projects for third-party OA	-	Surplus power compensated at 75% of generic/lowest tariff bid
Telangana	ü	ü	ü	-	ü
Uttar Pradesh	ü	Daily banking	No cap on CSS, AS exempted	-	No compensation
Uttarakhand	ü	ü	ü	-	ü

Source: MoP, SERCs, Crisil Intelligence

States are slowly moving away from the benefits/waivers given to RE projects since the industry is now mature. However, due to the inherent exemptions given as a right to Green Energy OA consumers (CSS and AS), the proposition remains competitive

to conventional sources of electricity supply for new projects as well.

Renewable energy is a compelling proposition for C&I customers, typically offering cost savings of 30-45% over grid tariffs, further driven by rising sustainability goals, increasing pressure from global stakeholders (such as investors and customers) and a supportive regulatory environment.

General Network Access regulations

In October 2022, the MoP launched the General Network Access (GNA) initiative, providing non-discriminatory access to the interstate transmission network nationwide for designated customers. The CTU grants GNA for a specified period and maximum megawatt capacity, allowing for more flexible transmission planning and implementation. A key benefit of GNA is that it enables generators and drawees to plan their power requirements without needing to identify a specific source of purchase or sale, thereby streamlining the process for IPPs to access the transmission network without having to specify target beneficiaries.

ISTS charge waiver for CTU-connected projects

The MoP waived the ISTS charges and losses on all solar and wind projects commissioned before June 30, 2023. In 2021, the waiver was extended for projects commissioned up to June 30, 2025, but with only the ISTS charges waived and losses remaining applicable. After June 2025, an annual increase of 25% in the ISTS charges is applicable for solar, wind, hydro PSP and BESS sources, resulting in the applicability of 100% of ISTS charges from July 2028. In February 2023, it was clarified that green hydrogen and green ammonia projects would get a waiver of ISTS charges for 25 years if the projects were commissioned before June 30, 2025.

Significant relief has been given to renewable projects with two six-month SCOD extension beyond June 30, 2025, due to force majeure and unavailability of power evacuation infrastructure. These projects will be eligible for 100% ISTS charges waiver. The MoP further decided to extend the waiver of ISTS charges on BESS projects co-located with renewable power projects at the same substation before June 30, 2028, for 12 years.

Outlook on the Indian C&I renewables sector

Overall market outlook is highly positive with total capacity expected to increase ~3x by fiscal 2030

The C&I segment is poised to play a pivotal role in driving the country's RE growth story over the next few years. With rising electricity demand, increasing emphasis on sustainability and cost efficiency, and a favourably evolving policy and regulatory environment, there has been a fundamental shift in the C&I sector's power sourcing strategy. The growth of the OA market in India is being driven by two key factors: the substitution of conventional power with renewable energy and the rising power demand from the industrial sector.

Firstly, corporates are increasingly replacing conventional grid-supplied power with bilaterally procured renewable energy because of significant cost savings, sustainability goals, pressure from global stakeholders and supportive regulatory frameworks. In fiscal 2023, C&I renewable consumption in the country stood at 59 TWh, just 7.4% of total C&I demand. However, adoption is expected to accelerate, led by rising cost savings up to 40% of the unit cost of electricity and improved bankability of OA structures.

Secondly, power demand is rising steadily in India's industrial sector, especially in high energy consumption segments, such as manufacturing, automotive, cement, and data centres. This is fuelled by increased production activity, economic expansion and digital infrastructure growth. Corporates are not only looking to meet their rising energy needs but are also under increasing pressure from investors, customers and regulators to reduce their carbon footprint. Corporate PPAs offer a reliable and cost-effective way to secure long-term green power while meeting sustainability targets. The dual push of replacing conventional power with renewables and the need to meet growing industrial energy demand has positioned corporate PPAs as a strategic tool for India's energy transition. Industrialised states are witnessing robust growth in power consumption, with C&I demand expected to clock a CAGR of 5.0-6.4% between fiscals 2023 and 2030 depending on the respective state's dynamics. This equates to an increase from 792 TWh to 1,013 TWh by fiscal 2030. As energy strategies of C&I consumers increasingly prioritise cost certainty and decarbonisation, a large share of this incremental demand is expected to be met via renewable energy rather than conventional grid supply or captive thermal power.

In the base case projections, C&I RE consumption is estimated to grow nearly 4x, from 59 TWh in fiscal 2023 to 246 TWh by fiscal 2030. This reflects both organic demand growth and increasing RE share within the overall C&I mix, enabled by policy clarity, better financing options and stronger developer interest in the C&I segment. Evacuation approvals and land acquisition are critical for pipeline development in India, ensuring infrastructure and land access for effective project execution. From that perspective, an accelerated scenario has also been developed to account for potential upsides. In this case, power demand could grow faster than expected with more rapid progress in transmission infrastructure, proactive favourable policy shifts (especially around banking, forecasting and scheduling) and a reduction in regulatory bottlenecks. RE consumption in the accelerated case is expected to increase to 281 TWh. To better assess state-wise opportunities, a structured attractiveness index was developed

to evaluate states on five parameters. Each parameter was assigned a weight, and a benchmark was created to assess its attractiveness.

1. Total C&I power consumption quantum: This metric captures the demand for power from the C&I segment in fiscal 2023. States with higher power consumption, such as Maharashtra (122 BU), Gujarat (118 BU) and Tamil Nadu (90 BU), offer greater potential for RE adoption simply due to their scale, making them inherently attractive. In contrast, Uttarakhand (11 BU) and Telangana (27 BU) represent smaller opportunity sizes. The 11 high-potential states which are Karnataka, Gujarat, Maharashtra, Tamil Nadu, Haryana, Chhattisgarh, Rajasthan, Telangana, Andhra Pradesh, Uttarakhand, and Haryana together account for approximately 80% of India’s C&I energy consumption and are characterized by high solar irradiation and wind speeds.
2. Financial savings over grid tariffs⁷: This refers to the potential cost savings for C&I consumers when switching to RE compared with prevailing grid tariffs. States like Maharashtra (39-61%), Telangana (37-44%) and Uttar Pradesh (36-46%) stand out due to their high differential, making them lucrative markets for open access and behind-the-meter solutions. Andhra Pradesh and Chhattisgarh show relatively lower savings (16-27% and 23–33%, respectively), limiting short-term commercial viability
3. C&I renewable policy and overall ecosystem: Policy stability and ecosystem readiness significantly impact execution certainty. Karnataka and Tamil Nadu have matured, stable policies, while Gujarat is considered supportive barring some constraints, such as banking restrictions. States such as Telangana, Rajasthan and Haryana have shown improvements in recent years, signalling growing intent
4. Physical resource viability: This assesses the quality of solar and wind resources along with land availability. States like Karnataka, Gujarat and Rajasthan benefit from high irradiation and wind potential. However, Maharashtra, despite having excellent solar and wind potential, is rated “moderate” due to high land costs. Andhra Pradesh and Telangana are also rated “high”, making them technically sound markets
5. RE penetration: This is a proxy for headroom available for future growth – lower current penetration indicates higher potential. Gujarat (4%), Rajasthan (6%) and Chhattisgarh (2%) are attractive on this front, with significant room to expand. On the flip side, Karnataka (18%) and Tamil Nadu (17%) already have relatively higher RE shares, slightly limiting their incremental opportunity

Gujarat, Karnataka and Maharashtra are expected to be the top three states for C&I renewable market growth. Gujarat, especially, is estimated to leap from 4% RE penetration in fiscal 2023 to 23% by fiscal 2030, driven by strong demand, favourable policies (excluding banking) and robust resource availability. Pan-India, RE penetration for C&I stood 7.4% on average in fiscal 2023 and is projected to grow to ~20% by fiscal 2030. In the accelerated case, RE penetration is expected to be relatively higher at 23% by fiscal 2030.

Figure 28: State attractiveness index

State	Overall attractiveness	Total C&I power consumption, FY 2023, BU	Financial savings over grid power, %	C&I renewable policy and overall ecosystem	Physical resource viability	RE penetration, %	
						FY 2023	FY 2030
Gujarat	High	118	27-40%	Largely stable and supportive barring banking policy	High	4%	23-25%
Karnataka	High	64	34-42%	Mature and stable policy environment	High	18%	30-32%
Maharashtra	High	122	39-61%	Largely positive with timebound approvals	Moderate	10%	25-27%
Rajasthan	High/Moderate	55	32-40%	Improved stance in recent years	High	6%	20-23%
Tamil Nadu	High/Moderate	90	22-38%	Mature and stable policy environment	Moderate	17%	25-27%
Haryana	Moderate	36	24-32%	Improved stance in recent years	Moderate	3%	16-19%
Telangana	Moderate	27	37-44%	Improved stance in recent years	High	6%	15-17%
Chhattisgarh	Moderate	32	23-33%	Supportive policy stance with additional incentives	Moderate	2%	13-15%
Andhra Pradesh	Moderate	39	16-27%	Improved stance in recent years	High	7%	16-18%
Uttar Pradesh	Moderate/Low	29	36-46%	Supportive policy stance; teething issues on regulatory approvals	Moderate	6%	12-13%
Uttarakhand	Moderate/Low	11	25-40%	Supportive policy stance	Moderate/Low	0%	10-12%

Source: Crisil Intelligence

⁷ Financial savings range is specified for a solar power project under the group captive model.

Based on the above attractiveness framework, Crisil Intelligence expects robust capacity additions from the C&I sector over the next five years. Total corporate renewable installed capacity is expected to grow at a CAGR of 22-24% from an estimated 45 GW as of March 2025 to 121 GW and 134 GW by fiscal 2030 under the base and accelerated cases respectively, requiring 15-18 GW of annual capacity addition by 2030. This demand is expected to be primarily STU-connected due to power banking availability, especially in solar-wind rich states.

Figure 29: Projected C&I renewable capacity, MW

Note: All numbers are shown on an MW AC basis. To convert to DC capacity, a multiplier of 1.4x may be assumed. P: Projected; Source: Crisil Intelligence

Capacity additions to be supported by replacement of conventional power sources and rising power demand

C&I RE growth is underpinned by a twin-engine model: rising demand from a growing economy and new high-consumption sectors, alongside substitution driven by cost advantages, sustainability commitments, and enabling policy frameworks such as GEOA rules. This dual foundation ensures a robust and diversified capacity addition pipeline well into the next decade. Notably, this demand is not dependent solely on aggregate electricity consumption growth, but rather growth is primarily driven by substitution of conventional grid-supplied power with bilaterally procured renewable energy. Historically, around 25–26% of C&I RE capacity catered to new demand, while the majority replaced grid power. By fiscal 2030, the share of capacity serving new demand is expected to rise to 34%, indicating a maturing market where both drivers contribute meaningfully.

India’s industrial and technology sectors are experiencing sustained electricity demand growth, fuelled by:

- Economic expansion and manufacturing growth – Industrial capacity utilisation has increased from 74.7% in Q1 FY2024 to 76.3% in Q1 FY2025, signalling higher operational intensity and scope for greenfield expansion. Policy pushes like *Make in India* and PLI schemes are catalysing growth in sectors such as electronics, logistics, and infrastructure.
- New high-consumption sectors – Data centres, driven by hyperscalers, co-location players, and AI-led workloads, are committing to 100% RE for upcoming facilities, adding large, stable baseload demand.

The shift from grid-supplied electricity to renewable energy is accelerating due to:

- Tariff advantage – C&I RE is typically cheaper compared to conventional grid tariffs, providing a strong economic incentive for industries to switch.
- Sustainability goals – Corporates are committing to net-zero targets, making RE procurement a strategic choice beyond cost optimisation.
- Favourable open access regulations – The GEOA rules, 2022 have standardised and simplified OA processes, reduced approval timelines, and allowed consumers with a contracted demand of 100 kW or more to procure RE. Many states are now aligning their regulations with GEOA, leading to greater policy clarity on charges, banking provisions, and exemption of additional surcharges for RE procurement. This consistency across states is lowering entry barriers and enabling faster, large-scale adoption of C&I renewables.

Figure 30: Projected capacity addition split by power demand and replacement of conventional sources, MW

P: Projected; Source: Crisil Intelligence

OA solar to lead capacity additions; wind power projects to gather pace

Over the next five years, installations are expected to carry out via the OA model, which is estimated to account for nearly 76% of the additions, or 57 GW. The balance is expected to come from the rooftop solar segment, which is likely to witness additions of ~18 GW, growing steadily with annual additions of 3-4 GW. Within OA, solar power is expected to be the dominant technology going forward. However, wind power is increasingly becoming crucial in balancing the intermittent solar power output. Annual OA wind power capacity addition, which has averaged at 973 MW in the last five years, is expected to significantly pick up going forward, rising to about 4 GW by fiscal 2030. Overall, the share of wind power is expected to be 20-30% in total OA capacity addition.

Figure 31: Annual capacity projections (by technology, MW)

Note: All numbers in the chart are shown on MW AC basis, unless stated otherwise. For conversion of solar capacity to DC capacity, an approximate DC:AC factor of 1.4:1.0 may be assumed.

P: Projected; Source: Crisil Intelligence

STU connected projects to dominate; potential cost savings to drive CTU-based projects

In terms of the type of connectivity, Crisil Intelligence believes STU-connected farms are likely to dominate capacity addition, where customers can settle their energy requirements on a monthly net basis, compared with plants connected to the ISTS or CTU networks, which require energy settlement every 15 minutes (or 2,880 settlements in a 30-day month). STU projects are expected to dominate due to ease of power injection, attractive banking policy and higher savings than ISTS projects. Hence, STU-connected projects are well-suited for customers who benefit from monthly banking provisions and lower transmission charges under applicable state policies, especially in solar-wind rich states.

However, CTU-connected projects for consumers located in states with insufficient physical resources and/or unattractive OA policies and I-REC coupled VPPA for large global companies will grow this market in parallel. Growth is expected regardless of reducing waivers as these select set of customers will make savings over other alternative power procurement options. Overall, CTU-connected projects of 18 GW are expected to be added by fiscal 2030.

The base and accelerated capacity addition scenarios point to a substantial opportunity for developers and corporates to scale up renewable energy adoption through the OA route. The adoption of green power is nascent today (only 7.4% of corporate demand is met through bilaterally procured green energy), but is slated to rise to 20-23% on account of its strong value proposition of saving, on an average, 40% of the unit cost of electricity, while also benefiting corporates on their sustainability positioning and making them a better fit into the global value chain.

Beyond STU-connected demand, global corporates operating in India are increasingly exploring VPPAs including EAPAs and other green attribute-based contracting mechanisms to meet their Scope 2 and broader net zero emission targets.

I-REC/EAPA-based OA capacity addition expected to evolve as a key decarbonisation tool for global corporates

The I-REC and broader energy attribute market in India has steadily evolved into a powerful tool for corporates, both domestic and global, to credibly account for RE usage, particularly in regions where physical energy procurement through OA remains a challenge. With over 8.3 million certificates issued and 6.1 million redeemed by Indian beneficiaries in fiscal 2025, the I-REC market is now entering a phase of meaningful scale.

As of December 2024, an estimated 6 GW OA RE capacity in India was registered under the I-REC mechanism. Over the past three fiscal years, annual capacity additions stood at 400–800 MW, reflecting a nascent but steadily growing market. Historically, the projects have been small in terms of scale, but a marked shift is underway. Rising interest in VPPAs, including EAPAs coupled with greater regulatory clarity and stronger RE sourcing mandates from global value chains, is expected to accelerate I-REC-linked capacity additions – to over 2.7 GW annually by fiscal 2030 from 900 MW in fiscal 2025. At this pace, India’s energy attribute market could expand to 12-17 GW by 2030, driven largely by demand from technology companies, hyperscale data centres and multinational corporations.

Figure 32: Projected I-REC/EAPA annual capacity addition (MW)

P: Projected; Source: Crisil Intelligence

These projects are expected to serve two broad categories of demand. First, large Indian corporates, particularly those operating in states with restrictive OA regimes, are using I-RECs as a transitional tool to increase RE share without waiting for regulatory pathways to open. Second, global corporations with operations in India are leveraging I-RECs to align local sourcing with global sustainability targets, especially in sectors such as information technology (IT), retail and manufacturing. As the voluntary RE market matures, I-RECs are expected to complement physical open access and rooftop installations. Key enablers for this market include stronger registry infrastructure, streamlined accreditation and integration of digital monitoring and blockchain-based issuance. In summary, the I-REC market in India is at the cusp of breakout growth. While still relatively small within the total C&I RE capacity, it is poised to become a vital pillar in India’s decarbonisation toolkit, helping corporates

meet RE goals flexibly, credibly and at scale.

Key risks and challenges

The realisation of the I-REC market opportunity is contingent upon addressing a few structural and policy-level challenges. While the policy landscape has improved considerably over the past few years, regulatory bottlenecks in some states still persist. Transmission infrastructure bottlenecks are another key constraint. Timely availability of STU and CTU connectivity, especially for large, multi-site VPPA and I-REC projects, is also a major hurdle. Going forward, bridging these policy and infrastructure gaps is critical to unlocking the full potential of OA-based RE procurement. A stable, investor-friendly OA regime, backed by proactive state-level support, transparent connectivity planning and clear regulatory mechanisms, can drive significant capacity addition in the coming years. Without these enablers, the market may not realise its full potential, particularly with regard to serving global corporates with aggressive RE targets and tight decarbonisation timelines.

Regulatory challenges

- **Variable open access charges:** The open access charges are variable in nature. Most of the state discoms are gradually increasing their OA charges, making it less attractive for the C&I consumers. Increase in OA charges can drive up the cost of Renewable Energy Power for a buyer. However, these charges are regulated and cannot be increased on an ad hoc basis. The transmission and wheeling charges have remained consistent, albeit a few exceptions in most of the states. CSS is capped at 20% of the ACoS rate to industries and waived for group captive customers, full waiver of additional surcharge if fixed charges are paid by the consumer and additional surcharge is not applicable in case of group captive customers. However, for projects offering a fixed discount over discom tariffs, any increase in CSS is advantageous. For a 20 paise per unit increase in CSS, an increase of Rs 1.00 per unit in discom tariff would be required, which results in a clear advantage of 80% savings for the customer
- **Addition of new OA charges:** There are various new charges, other than the OA charges, many states have introduced for OA consumers. For example, in Gujarat, the hybrid policy of 2018 applied multiple wheeling charges of Re 0.05 per kWh on hybrid projects. In Madhya Pradesh, the Harit Urja Tax was introduced in a new renewable energy policy at the rate of Re 0.10 per kWh. Some states have introduced grid support/parallel operation charges applicable only to captive power plants
- **Captive project status:** Captive projects are more attractive than third-party OA ones. Most C&I consumers are opting for captive OA and as a result, discoms are incurring revenue losses. Group captive customers need to abide by group captive guidelines, in accordance with the Electricity Rules, 2005, and compliance is tested at the end of the year. The Supreme Court, in a judgement on October 9, 2023, clarified multiple aspects of the Electricity Rules, 2005, relating to captive/group captive plants and captive users

Contractual challenges

- **PPA and loan tenure mismatch:** Typically, the duration of a long-term PPA in the C&I segment is 15-25 years, while the duration of the loan taken for the project might be longer. Lenders may be hesitant to offer favourable loan terms if there is a significant tenor mismatch, potentially leading to higher interest rates. However, PPA tariff for the supply of green power is generally at a discount to grid tariff (black power). Therefore, demand for green power is always expected to be there.
- **Contract standardisation:** Government tenders usually have a standardised PPA, which is a part of the RfP document. However, in OA projects, PPAs are often customised based on mutually agreed terms between parties after negotiation. This can lead to inconsistencies in contractual terms, and, in the event of a dispute, the lack of standardisation can complicate the resolution process
- **Contract enforcement:** It arises from challenges associated with ensuring that all parties adhere to the terms of the PPA. However, inconsistent contractual terms, misinterpretation of any regulatory provision or ambiguity in policies and regulation can impact the enforcement of PPAs

Operational challenges

- **Performance:** Fluctuations in wind speed and solar irradiance due to extreme weather can lead to variations in power output, which can affect the revenue projections. Any unexpected breakdowns or faults can also lead to longer downtimes and reduced power generation
- **Grid curtailment:** Integrating an RE project into the grid in a RE rich state can lead to congestion, forcing the grid operator to curtail power to avoid overloading the network. Moreover, intermittent supply of RE can affect grid stability. Standalone solar is more prone to grid curtailment compared with wind or WSH, since all solar projects peak at the same time, which is not the case with wind

Threats and challenges

Threats

- Any adverse shifts in government policy, including a reduction in incentives or changes to electricity regulations, can significantly impact a renewable player's revenue and profitability. However, considering India's COP 26 commitments, climate change ambitions and government push for RE, major alterations in the regulatory regime are less likely. Further, compared with RE capacity addition of ~70 GW, conventional capacity addition stood at just ~20 GW over the last five fiscal years
- Only a few states are fully complying with the RPO obligations, and enforcement on obligated entities - discoms and OA and captive power users - to meet RPO targets has been limited. The proposed amendment to the Electricity Act, 2003, stipulates a penalty on RPO non-compliance and uniform imposition of penalties. Further, strict enforcement would be critical for significant improvement and fair distribution of RPO compliance across states
- The RE industry is facing cost pressures due to volatility in module prices, exchange rates, freight and commodity prices on account of geopolitical uncertainties. This may impact on the EPC margin of renewable players as they may not be able to pass on the cost increases to the project developing SPVs
- The RE sector is highly competitive, with numerous players vying for market share. Further, climate change and extreme weather events can affect the performance and reliability of renewable energy systems, potentially causing disruptions or damage to infrastructure. Further, economic downturns and financial instability can reduce the capital available and increase costs for renewable energy investments, affecting the company's expansion plans
- The Indian RE sector is experiencing increased consolidation, primarily through M&As. This trend is driven by the sector's growth potential, strong investor interest and the desire to create diversified and substantial asset bases. Large players are expanding their portfolios, both organically and inorganically, leading to the transfer of ownership of significant renewable energy assets.

Challenges

- Availability of contiguous land and issues related to acquisition of land parcels are some of the key challenges developers are facing. The acquisition of large tracts of land in a single resourceful location involves multiple stakeholders, which slows down the pace of project execution. The 40-GW solar park scheme, which provides land to successful bidders to set up the projects, is facilitative in this aspect
- Ability to build/access evacuation infrastructure and high voltage transmission line and availability of timely transmission connectivity is another challenge. To optimise costs, utilisation levels and losses associated with the transmission system, robust transmission planning is crucial. Various stakeholders at appropriate levels have raised concerns about the connectivity for renewable projects. In response, nodal agencies (PGCIL and SECI) have planned various schemes to reduce grid congestion and enhance connectivity.

Competitive assessment

Competitive mapping of RE players entails an in-depth analysis of key companies, including the total number of years they have been in the business, technology-wise installed capacity, geographical presence, products and services within a given market to understand competitive intensity.

Clean Max Enviro Energy Solutions Ltd, incorporated in 2010, has established itself as a leading RE player in India's C&I segment. The company operates in a competitive landscape, with some of the listed IPPs such as Adani Green Energy Ltd, ReNew Energy Global Plc, ACME Solar Holdings Ltd, NTPC Green Energy Ltd and other large unlisted IPPs such as Tata Power Renewable Energy Ltd and JSW Neo Energy Ltd. Some of these companies serve C&I customers as part of their broader business operations.

The selected listed peer set comprising Acme Solar Holdings Ltd, NTPC Green Energy Ltd, Adani Green Energy Limited, and ReNew Energy Green PLC, represents the only pure-play renewable IPPs in India with business models that are similar to the business model of CleanMax. These companies are primarily engaged in the development, ownership, and operation of utility-scale solar, wind, and hybrid renewable projects under long-term PPAs, which ensures predictable revenue streams and comparable risk-return profiles to CleanMax. Importantly, these players are not involved in conventional power (e.g. thermal) generation, transmission or retail distribution businesses, ensuring that their financial and operating metrics purely reflect the dynamics of CleanMax. Hence, they serve as the most appropriate and representative peer group.

The listed entities such as NTPC, JSW Energy, Tata Power, SJVN, NHPC, and Torrent Power have been excluded from the benchmarking as their operations are diversified across multiple sources of energy, including thermal, gas-based, hydro, and other conventional segments. Many of these companies also have significant exposure to regulated transmission and

distribution businesses, which result in fundamentally different revenue drivers, risk profiles, and return characteristics compared to renewable-only IPPs.

Further, CleanMax faces direct competition from peers such as Continuum Green Energy Ltd, Amplus Solar Power Pvt Ltd, Fourth Partner Energy Pvt Ltd, and AMPIN Energy Transition Pvt Ltd. These firms have a sizable quantum of operational RE capacities with over 70% of the capacity tied up with C&I customers.

- CleanMax is India's largest C&I renewable energy provider with:
 - 2.18 GW of operational, owned and managed capacity, and 2.77 GW of contracted, yet to be executed capacity, as of March 31, 2025
 - 2.80 GW of operational, owned and managed capacity, and 2.54 GW of contracted, yet to be executed capacity, as of September 30, 2025
 - 2.80 GW of operational, owned and managed capacity, and 3.17 GW of contracted, yet to be executed capacity, as of October 31, 2025
- With nearly 15 years of experience since inception in 2010, CleanMax specialises in delivering net zero and decarbonisation solutions, including supplying renewable power and offering energy services and carbon credit solutions to customers across data centres, AI and technology industries, and large enterprises across sectors including infrastructure, cement, steel, industrial manufacturing, FMCG, pharmaceuticals, real estate and GCCs.
- CleanMax is a market leader with the largest customer base amongst C&I renewable energy players in India with 555 customers across 1,198 signed PPAs, as of September 30, 2025.
- CleanMax is one of the early movers in the C&I RE sector in India, having played a key role in shaping the evolution of the industry and its operating models. It has also been an early adopter of leading global technologies to lower the levelised cost of electricity and enhance efficiency and reliability. For instance, in November 2025, CleanMax installed the first 5 MW Envision's Wind turbine in India, at their Koppal site in Karnataka. The 5 MW Wind turbine is one of the largest turbines available in India.
- CleanMax's business model is distinct from utility-scale RE developers, as the company does not participate in competitive tenders with state-owned distribution companies or central government utilities (SECI, for instance), which award projects based solely on the lowest tariff bids, allowing limited tariff flexibility. As a result, CleanMax prices its offerings at a premium compared with large utility scale peers, primarily due to distinct project economics and risk profile. CleanMax's weighted average tariff for capacity commissioned in fiscal 2025 was Rs 3.76 per kWh, whereas the industry weighted average for listed utility scale renewable energy players for the same period was Rs 2.44 – 2.46 per kWh. Similarly, CleanMax's weighted average tariff for capacity commissioned in 6 months ended September 30, 2025 was Rs 3.66 per kWh.
- CleanMax enjoys significantly greater flexibility in designing contract structures tailored to specific needs of individual consumers. Unlike IPPs operating in the utility-scale segment, where projects are typically awarded through competitive bidding and governed by stringent regulatory frameworks, CleanMax can negotiate innovative bilateral agreements that offer lower prices than grid tariffs, flexible tenure and balanced risk-sharing mechanisms, enabling CleanMax to attract customers to procure RE power from them.
- CleanMax had a market share⁸ of about 8% of the annual OA RE capacity additions⁹ during fiscal 2025, 12% during fiscal 2024 and 3% during fiscal 2023.
- CleanMax had a higher market share in Gujarat and Karnataka during fiscal 2024 where the majority of CleanMax's operational capacity was present during the period. CleanMax's market share in annual OA RE energy capacity addition in Gujarat was about 20% in fiscal 2024, 8% in fiscal 2023 and 7% in fiscal 2022. In Karnataka, its market share in annual OA RE capacity addition was about 21% in fiscal 2025, 25% in fiscal 2024, 16% in fiscal 2023 and 11% in fiscal 2022.
- CleanMax's key customers consist of:
 - High growth industries of data centres, AI and technology, including Equinix, Amazon, Google, Apple, etc
 - Conventional C&I players across industries including infrastructure, manufacturing and allied services,

⁸ Market share refers to the approximate percentage of total OA RE capacity installed by the company during a specific period/year, out of the total OA RE capacity installed by all the players in the market during the same period based on the data available in public domain.

⁹ Renewable energy capacity addition is the new capacity that is added/commissioned during a particular period/year.

airports, cement, steel, real estate and GCCs

- CleanMax plans to deepen its engagement with customers operating in industries that benefit from key India growth themes such as “Make in India”, AI, GCC, data centre growth and India infrastructure growth.
- CleanMax projects are being developed strategically located in states such as Gujarat, Karnataka, Tamil Nadu, Maharashtra, Rajasthan, Haryana, Chhattisgarh, Uttar Pradesh with high solar irradiance or high wind speeds, optimising for greater plant load factors.
- As of September 30, 2025, CleanMax had one of the widest geographical coverages. CleanMax offers onsite solar in 23 states in India and international locations i.e., UAE, Thailand and Bahrain. Further CleanMax offers STU and CTU connected farms across ten states in India with a mix of wind and solar for C&I customers.
- To further penetrate the technology customers segment, CleanMax plans to build its pipeline for future CTU-connected contracting, including developing evacuation and land across Rajasthan, Gujarat and Karnataka, which are high-resource generation states with robust power evacuation infrastructure. This is in addition to existing STU-connected farms, which are strategically located in Maharashtra, Tamil Nadu and Karnataka to ensure seamless supply to data centres clusters in Mumbai, Chennai, and Bengaluru, which are key areas for technology customers. All these states are characterised by high solar irradiation and high wind speeds.
- CleanMax has been awarded Sector Leader status in the 2025 Global Real Estate Sustainability Benchmark (GRESB) Infrastructure Asset Assessment with a 5-star rating and 100/100 score among 650 global participants. This positions the company as a preferred partner for clients, including technology companies that seek vendors dedicated to sustainability principles.
- CleanMax has a deep understanding of the sustainability needs of C&I customers, leveraging its expertise in developing, operating and maintaining long-term infrastructure assets, backed by credentials and balance sheet.
- CleanMax is expecting to explore partnerships in the wind turbine O&M market, which is synergistic with its portfolio and a growing market opportunity.
- CleanMax’s portfolio reflects key growth themes in corporate RE procurement including: (i) the expansion of India's data centre capacity, driven by demand for cloud computing, data storage, digital services and AI, (ii) increased use of India-origin I-RECs by international technology companies to meet sustainability targets, (iii) growth in manufacturing under the “Make in India” initiative and PLI schemes, prompting renewable energy adoption and (iv) infrastructure growth and electrification in sectors such as airports and metro systems, creating demand for customised RE solutions.

*Note:

1. ReNew's reported capacities is as of May 2025 for period ending March 2025, as of November 2025 for period ending September 2025 and as of November 2024 for period ending September 2024 as per the investor presentation
2. JSW Neo's operational & under-construction capacity for March 2025 includes O2 Power's capacity. The acquisition was announced in Dec 2024, CCI approval received in Mar 2025 and transaction completed in Apr 2025
3. Tata Power C&I capacity includes only group captive capacities as reported in their annual reports/press release
4. NTPC Green Energy's energy generation for FY23 is as per carved out numbers from NTPC group given in the RHP document
5. NTPC Green Energy's weighted average tariffs for projects commissioned during FY23, FY24, and FY25 were revised from DRHP values in accordance with its September 2025 investors presentation. The revision is based on changes in PPA and CODs for certain projects

NA — not available or not applicable

Note:

1. The capacity of Amplus is as of Dec 2024
2. Continuum's grid availability refers to the external grid availability as disclosed in the DRHP document

Source: All the figures included above for respective peers have been extracted from public sources such as websites of respective peers, their Annual Reports and other publicly available filings and Crisil Intelligence.

The respective peers' KPIs may not be comparable on account of, inter alia, the size and scale of each of the businesses of the peers', possibility of the peers defining such metrics differently for any reason

Definitions:

Capacity utilisation factor (CUF) or plant load factor (PLF) is the quantum of energy the plant is able to generate compared with its maximum rated capacity.

Grid availability: It is calculated as weighted average of Grid availability by operational projects capacity (solar, wind and hybrid) in the portfolio during the period/year

Installed/operational capacity: Represents total operational capacity as on the given date, excluding hydro capacity, if any.

Offsite: the projects that are located away from the premises of the end consumer and supply electricity through the grid under open access regulatory mechanisms. These projects are connected to the distribution network, allowing energy to be wheeled to customers located at different geographic locations

Onsite solar: It refers to solar power plants that are located within customer's premises

Operating capacity: It refers to the capacity which is commissioned and operational as of the reporting date

Plant availability: It is calculated as weighted average of plant availability by operational projects capacity (solar, wind and hybrid) in the portfolio during the period/year calculated based on the installed capacity of each technology.

Under-construction/pipeline capacity: For CleanMax, under-construction capacity is the contracted capacity for which PPAs/

LoIs have been signed with customers and pipeline capacity includes projects which have either received or applied for evacuation approval. For peers, it is the total capacity including under-construction and projects which are at various stages of development as disclosed by them on their websites/press releases/investor presentations.

- CleanMax’s revenue from sale of power grew at a CAGR of 52.71% from fiscal 2023 to fiscal 2025, and EBITDA grew at a CAGR of 58.14% during the same period, which was higher than the latest available median Revenue and EBITDA growth rate of all peers of 9.77% and 16.11%, respectively.
- CleanMax delivered a cash ROIC (based on Opening funds invested) of 13.03% in fiscal 2025, higher than the 11.12% average for all peers for the latest available period
- CleanMax maintained a Debt (net off liquid assets) to adjusted EBITDA ratio of 4.80 times in fiscal 2025, which was lower than the peers’ average of 6.13 times during the latest available period
- The trade receivable days (power sales) were 26 days for CleanMax in fiscal 2025. The receivable days for the peers averaged at 69 days during the latest available period
- CleanMax delivered a cash ROE (based on Opening equity) of 17.73% in fiscal 2025. The cash ROE (based on Opening equity) may not be directly comparable with that of industry peers due to varying levels of retained earnings among companies, which could have been affected by losses and may not provide a consistent basis for evaluation
- When compared with listed/to be listed (i.e. DRHP filed) renewable energy players, viz. Continuum Green Energy Limited, Adani Green Energy Limited, NTPC Green Energy Limited, ACME Solar Holdings Limited and ReNew Energy Group PLC:
 - CleanMax’s Debt (net off liquid assets)/Adjusted EBITDA was 4.80 times against listed/to be listed peer median ratio of 6.04 times
 - CleanMax’s 3-year average gross block/Adjusted EBITDA was 5.82 times against listed/to be listed peer median of 7.48 times

Notes:

- All the figures included above for respective peers have been extracted from public sources such as websites of respective peers, their Annual Reports and other publicly available filings and CRISIL Intelligence
- The respective peers' KPIs may not be comparable on account of, inter alia, the size and scale of each of the businesses of the peers', possibility of the peers defining such metrics differently for any reason
- In the companies above where FY25 numbers are not available, 2Y average has been computed for Gross Block to Adjusted EBITDA, and average cash ROIC (Based on Opening funds invested) ratio
- For the peers listed above, where a separate segment is disclosed in the financial statements, Revenue from Operations, Gross Margin, Adjusted EBITDA, Adjusted EBITDA Margin, and DSO have been split between Renewable Energy Power Sales and Renewable Energy Services. For companies reporting a single segment, these metrics have been calculated solely for Renewable Energy Power Sales
- Adjusted EBITDA, Adjusted EBITDA Margin, Cash PAT, Cash ROIC (Based on Opening funds invested), Cash ROIC (Based on Average funds invested), Cash ROE (Based on Opening equity), Cash ROE (Based on Average equity) and Cash SG&A are derived by adjusting reported figures to exclude non-cash items and one-off transactions, as identified in respective the financial statements

- *NC: Not computed*
- *NA: Not available*
- *NM: Not meaningful*
- *EBITDA: Earnings before interest, tax, depreciation and amortisation*
- *PAT: Profit after tax*
- *ROIC: Return on invested capital*
- *ROE: Return on equity*
- *SG&A expenses: Selling, general and administrative expenses*
- *3Y/2Y: 3-year/2-year*
- *Figures have been annualised for the period ended 30 September 2025 and 30 September 2024.
- ^Figures have not been annualised for the period ended 30 September 2025 and 30 September 2024

1. *Ratios for fiscal 2024 have been calculated from the restated consolidated financial statements in the prospectus of the company dated November 23, 2024. Ratios for fiscals 2023 and 2022 have been computed based on the special-purpose carved-out combined financial statements in the prospectus of the company dated November 23, 2024*
2. *JSW Neo Energy Limited has disclosed consolidated financial statements for fiscal 2025 and corresponding fiscal 2024. Since the consolidated financial statements for fiscal 2023 are not available in the public domain, they are reported as NA*
3. *The financial year for Amplus Solar Power Private Limited is January to December, accordingly, the ratios have been computed for calendar year instead of financial year*

Formulae used:

- Revenue from operations (power sales): Revenue from operations for the given year from power sales business
- Revenue from operations (Renewable Energy services): Revenue from operations for the given year from Renewable Energy services business
- Revenue from operations: Revenue from operations (power sales) + Revenue from operations (Renewable Energy services)
- Power sales revenue growth: $\text{Revenue from operations (power sales) for the current year} / \text{Revenue from operations (power sales) for the previous year} - 1$
- Total income: Revenue from operations + Other income
- Cost of goods sold (power sales): Operations and maintenance cost + Sub-contracting costs
- Cost of goods sold (Renewable Energy services): Cost of materials consumed + Purchase of goods + Changes in inventory
- Gross margin (power sales): Revenue from operations (power sales) - Cost of goods sold (power sales)
- Gross margin (Renewable Energy services): Revenue from operations (Renewable Energy services) - Cost of goods sold (Renewable Energy services)
- EBITDA: Revenue from operations – cost of materials consumed – cost of services – purchase of traded goods – employee benefits – other expenses
- Adjusted EBITDA (power sales): Gross margin (power sales) - Cash SG&A expenses (power sales)
- Adjusted EBITDA (Renewable Energy services): Gross margin (Renewable Energy services) - Cash SG&A expenses (Renewable Energy services)
- Adjusted EBITDA: Adjusted EBITDA (power sales) + Adjusted EBITDA (Renewable Energy services)
- Adjusted EBITDA margin (power sales): $\text{Adjusted EBITDA (power sales)} / \text{Revenue from operations (power sales)}$

- Adjusted EBITDA margin (Renewable Energy services): Adjusted EBITDA (Renewable Energy services) / Revenue from operations (Renewable Energy services)
- EBITDA CAGR: (EBITDA for the latest available year / EBITDA for the 2 years prior) ^ (1/2)
- Cash PAT: Restated profit/loss attributable to owners + Depreciation/ Amortisation/Impairment + non cash finance costs + non cash expenses – deferred tax credit - non cash incomes
- Cash PAT margin: Cash PAT / Total income
- Total Borrowings: Long-term borrowing + Short-term borrowing
- Funds invested in business: Total Borrowings + Total equity
- Cash ROIC (based on Opening funds invested): Adjusted EBITDA / Funds invested in business at the beginning of the year
- Cash ROIC (based on Average funds invested): Adjusted EBITDA / Average funds invested in business
- Reported ROIC (based on Average funds invested): EBITDA/ Average funds invested in business
- Reported ROIC (based on Opening funds invested): EBITDA/ Funds invested in business at the beginning of the year
- Cash ROE (based on Opening equity): Cash PAT / Opening equity
- Cash ROE (based on Average equity): Cash PAT / Average equity
- Reported ROE (based on Average equity): Restated profit/ loss for the year attributable to owners of company/ Average equity
- Reported ROE (based on Opening equity): Restated profit/ loss for the year attributable to owners of company/ Opening equity
- Cash SG&A / Adjusted EBITDA: Cash SG&A expenses / Adjusted EBITDA
- Debt (net off liquid assets): Total debt -Cash and cash equivalents - Bank balance other than cash and cash equivalents - Long-term margin money – Current investments
- Debt (net off liquid assets): / Adjusted EBITDA: Opening Debt (net off liquid assets) / Adjusted EBITDA
- Debt (net off liquid assets): / Total equity: Closing Debt (net off liquid assets) / Closing total equity
- Gross block / Adjusted EBITDA: Opening gross block of property, plant and equipment (excluding rights of use) and intangible assets / Adjusted EBITDA
- Trade receivable days: Average trade receivables of current year and previous year / Revenue from operations * 365
- Trade receivable days (power sales): Average trade receivables (power sales) of current year and previous year / Revenue from operations (power sales) * 365
- Trade receivable days (Renewable Energy services): Average trade receivables (RE services) of current year and previous year / Revenue from operations (Renewable Energy services) * 365
- Opening funds invested in business: Funds invested in business at the end of previous fiscal.
- Average funds invested in business: Average of Funds invested in business at the end of the fiscal and Funds invested in business at the end of previous fiscal.
- Average equity: Average of Total equity attributable to the owners of the Company as at the end the fiscal and Total equity attributable to the owners of the Company at the end of the previous fiscal
- Opening equity: Total equity attributable to owners of the company as at the end of the previous fiscal.

OUR BUSINESS

Some of the information in the following section, especially information with respect to our plans and strategies, consists of certain forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results may differ materially from those expressed in, or implied by, these forward-looking statements. You should read the section “Forward-Looking Statements” on page 43 for a discussion of the risks and uncertainties related to those statements and the section “Risk Factors” on page 45 for a discussion of certain risks that may affect our business, financial condition, cash flows or results of operations.

Unless otherwise stated, or the context otherwise requires, the financial information used in this section is derived from our Restated Consolidated Financial Information in this Prospectus beginning on page 550. Our financial year commences on April 1 and ends on March 31 of the subsequent year, and references to a particular financial year are to the 12 months ended March 31 of that year.

Industry and market data used in this section have been extracted from the CRISIL Report and such excerpts may have been re-ordered by us for the purpose of presentation. The CRISIL Report has been commissioned by our Company exclusively in connection with the Offer for the purpose of confirming our understanding of the industry in which we operate, pursuant to an engagement letter dated May 7, 2025. References to various segments in the CRISIL Report and information derived therefrom are references to industry segments and in accordance with the presentation, analysis and categorisation in the CRISIL Report. For further details and risks in relation to the CRISIL Report, see “Risk Factors – Certain sections of this Prospectus contain information from the CRISIL Report which has been exclusively commissioned and paid for by us in relation to the Offer and any reliance on such information for making an investment decision in this offering is subject to inherent risks” on page 90. The CRISIL Report will form part of the material documents for inspection and is available on the website of our Company at <https://www.cleanmax.com/>. The information in the following section is qualified in its entirety by, and should be read together with, the more detailed financial and other information included in this Prospectus, including the information contained in “Risk Factors”, “Industry Overview”, “Restated Consolidated Financial Information” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 45, 229, 550 and 829, respectively.

Overview

We are India’s largest commercial and industrial (“C&I”) renewable energy provider with 2.80 GW of operational, owned and managed capacity, and 3.17 GW of contracted, yet to be executed capacity, as of October 31, 2025, according to the CRISIL Report. With 15 years of experience since our inception in 2010, we specialize in delivering Net Zero¹⁰ and decarbonization solutions, including supplying renewable power and offering energy services and carbon credit solutions to customers across data centres, AI and technology industries (“**Technology customers**”); and C&I enterprises across a range of sectors, including infrastructure, cement, steel, industrial manufacturing, FMCG, pharmaceuticals, real estate, and global capability centres (“**Conventional C&I customers**”). Our expertise spans across providing energy contracting, engineering, procurement and construction (“**EPC**”) services, and operation and maintenance (“**O&M**”) services of renewable energy plants including solar, wind and hybrid plants, within our customer’s premises (“**Onsite**”) and within CleanMax-developed renewable energy (solar, wind and hybrid) farms (“**Offsite**”).

We also provide end-to-end decarbonization solutions to customers such as turnkey development, O&M solutions for renewable energy power plants and carbon credits solutions. We are committed to being a Net Zero partner to corporates, driven by a client-first culture, execution excellence, focus on capital efficiency and our people and culture. The diagram below provides an overview of our total portfolio and operational portfolio:

¹⁰ As per CRISIL, Net-zero refers to curbing greenhouse gas (GHG) emissions to a minimum level of residual emissions that can be absorbed and durably stored permanently by technological or natural solutions, leaving zero carbon in the atmosphere.

Total Portfolio as of March 31, 2025

Total Portfolio as of October 31, 2025

Notes:

Image I: (1) **Operational Capacity** refers to projects commissioned as of March 31, 2025 or September 30, 2025 or October 31, 2025 as applicable, and includes 355.89 MW capacity for which we have received CEIG approval but for which CoD certificate is pending as of October 31, 2025 for which Central Electrical Inspector to Government (“CEIG”) charging approval has been received and COD certificate is awaited; (2) **Contracted Capacity** refers to projects for which we have signed power purchase agreements (“PPAs”) or letters of intent (“LOI”) with customers as of March 31, 2025 or October 31, 2025, but are yet to execute projects; (3) **Advance Stage Capacity** refers to projects which have received evacuation approval as of March 31, 2025 or October 31, 2025; and **Under Development Capacity** refers to projects with evacuation approval applied for as of March 31, 2025 or October 31, 2025.

Image II: **STU-Capex** refers to State Transmission Utility projects which are wholly invested in by customers; **STU – Third Party, Open Access** refers to models where we do not require customer equity participation and supply power pursuant to PPAs; **STU – Group Captive** refers to open access projects where customers invest at least 26% equity in a SPV established by us and consume a minimum of 51% of the power generated to qualify as a group captive consumer under the Electricity Act.

We are one of the early movers in the C&I renewable energy sector in India, having played a key role in shaping the evolution of the industry and its operating models, according to the CRISIL Report. We had a market share of 8% and 12% of the annual open access renewable energy capacity additions in Fiscal 2025 and Fiscal 2024, respectively, for C&I in the Indian market, with a higher market share in the states of Gujarat and Karnataka, according to the CRISIL Report, where the majority of our Operational Capacity was present during Fiscal 2024.

We have developed in-house capabilities in various aspects of execution, including project development (evacuation and assessment), land acquisition, EPC, financing and asset management. These capabilities help us achieve project returns, source and develop new projects to support long-term growth, and maintain control over the entire project lifecycle, from greenfield/brownfield development to ownership and operations.

Our business model is distinct from utility-scale renewable energy developers, according to the CRISIL Report, as we do not participate in competitive tenders with state-owned distribution companies or central government utilities, which award projects solely based on the lowest tariff bids. Instead, we pursue customer-specific contracting by tailoring projects for corporate consumers' needs and selling energy generated from our solar, wind, and hybrid renewable energy farms. This business model has enabled us to foster relationships with 555 customers as of September 30, 2025, with 71.72% of our Contracted Capacity for the six months period ended September 30, 2025 being attributable to demand from repeat customers. In addition, it has enabled us to price our offerings at a premium, as compared to large utility-scale peers, according to the CRISIL Report.

Our long-term relationships with our key customers allow us to grow along with our customers, as we support their growing decarbonization requirements. Our key customer cohorts consist of players from high growth industries of data centres, AI and technology. We also have Conventional C&I customers spanning a range of sectors, including infrastructure, industrial manufacturing and real estate. As of September 30, 2025, 94.72% of our customers have a credit rating of "A-" or above by rating agencies in India, such as CARE, India Ratings and CRISIL, or are subsidiaries of multinational corporations with such credit ratings, which enables us to minimize counterparty risk. Through our disciplined contracting practices, we have built a portfolio of PPAs with a weighted average tenure of 22.85 years, and average lock-in period of 16.86 years, as of September 30, 2025.

We have demonstrated consistently improving financial performance and follow disciplined balance sheet risk management. Our revenue from Renewable Energy Power Sales grew at a 52.71% CAGR from Fiscal 2023 to Fiscal 2025 and our EBITDA grew at a CAGR of 58.14% during the same period, which was higher than the latest available median revenue and EBITDA growth rate of all our peers of 20.08% and 18.05%, respectively, according to the CRISIL Report. We delivered Cash ROIC (based on Opening Funds Invested) (defined below) of 13.03% and a Cash ROE (based on Opening Equity) (defined below) of 17.73% in Fiscal 2025, higher than Average Cash RoIC (based on Opening Funds Invested) of 11.33% for peers for the same period, according to the CRISIL Report. We also maintained a Debt (net off liquid assets) to Adjusted EBITDA ratio of 4.80 times in Fiscal 2025 which was lower than our peers whose average ratio was 6.40 times, according to the CRISIL Report. Please see "*Operational and Financial Metrics*" starting on page 300 for the definitions of these terms. For a reconciliation of these terms, see "*Management's Discussion and Analysis of our Results of Operations – Non GAAP Measures*" starting on page 838.

Our current investors include global renewable energy investors such as Brookfield and Augment India I Holdings, LLC.

Our Offerings

We offer a range of renewable energy offerings to our customers across geographies through our two business segments: (i) Renewable Energy Power Sales Segment; and (ii) Renewable Energy Services Segment.

Segment Overview

Particulars (in ₹ million)	Renewable Energy Power Sales	Renewable Energy Services
Revenue	7,192.15	2,050.07
% revenue contribution	77.09%	21.97%
Gross Margin	6,624.19	672.47
% gross margin	92.10%	32.80%
% gross margin contribution	90.78%	9.22%
Invested Capital	107,984.16	515.00

Period: Six months ended September 30, 2025; See “ –Operational and Financial Metrics” on page 300 for the definitions of the terms used above

Renewable Energy Power Sales Segment

We sell electricity generated at our renewable energy plants to customers through long-term Power Purchase Agreements (“PPAs”) and Energy Attribute Purchase Agreements (“EAPAs”). The offerings under this segment include the following:

1. **Onsite Solar:** Onsite Solar are solar power plants that are located within customer’s premises (“**Onsite Solar**”). As of September 30, 2025, according to CRISIL Report, we had one of the widest geographical coverages for Onsite Solar, with 1,330 plants with an aggregate 368.06 MWp across 23 states and union territories in India and internationally across Thailand, the United Arab Emirates, and Bahrain.
2. **Offsite:** We supply renewable power - solar, wind, and hybrid - through our farms, which are contracted through bilateral PPAs with Conventional C&I customers. According to the CRISIL Report, as of March 31, 2025, we had one of the widest geographical coverages and we offer Offsite farms to customers across 10 states in India. Our Offsite farms can be connected to State Transmission Utility (“**STU**”) or Central Transmission Utility (“**CTU**”) networks.

- i) **STU-Connected Offsite:** We supply renewable power generated at our STU-connected farms through the state transmission network for customers located within the same state (“**STU-Connected**”). STU-Connected projects are well-suited for customers that benefit from monthly banking provisions and lower transmission charges under applicable state policies, according to the CRISIL Report. Customers of STU-connected farms are able to settle their energy requirements on a monthly net basis compared to Interstate Transmission System (“**ISTS**”) or CTU plants that require a settlement every 15 minutes or 2,880 times in a 30-day calendar month, according to the CRISIL Report. We execute STU-Connected projects under two models, the group captive, open access model (“**STU Group Captive**”) and the third party open access model (“**STU-Third Party, Open Access**”). As of September 30, 2025, we have 1942.26 MW of STU-Connected operating capacity, of which 72.20% is under the STU Group Captive model. As of September 30, 2025 we have 938.23 MW of STU-Connected contracted yet to be executed capacity, of which 96.98% is under the STU Group Captive model. For more details on these models, see “ – *Business Description*” starting on page 314.
- ii) **CTU-Connected Offsite:** We are currently developing CTU or ISTS connected projects that can supply power throughout India by utilising the national grid network. Our projects are strategically located in states with high solar irradiance or high wind speeds, optimising for better plant load factors. Our CTU-Connected plants are contracted through EAPAs which require us to unbundle the environmental attributes from our CTU connected- plants and sell them to our customers. The electricity generated from these projects will be consumed by the EAPA offtaker or sold either on power exchanges in India or under PPAs. According to the CRISIL Report, data centre and technology companies are purchasing environmental attributes generated from green power in India to meet the renewable energy commitments for their operations in India and the broader Asia-Pacific region. We had 1,421.10 MW of Contracted CTU-Connected capacity as of September 30, 2025 and are in the process of constructing our first CTU-connected plants in Karnataka and Rajasthan.

Renewable Energy Service Segment

Renewable energy services include:

1. **Capital Expenditure Services:** We offer turnkey development services, including land, evacuation infrastructure, EPC services, power evacuation and O&M services for the lifetime of the project, enabling our customers to benefit from our execution capabilities while retaining asset ownership (“**Capex Services**”). The plants may take the form of Onsite Solar plants installed within the customer’s premises or STU-Connected projects located within CleanMax-developed STU-Connected solar, wind or hybrid farms (“**STU - Capex**”). Under the Capex model the renewable energy plant is capitalized on the customer’s financial records. This offering is synergistic with our Renewable Energy Power Sales Segment, particularly where backend integration across STU-Connected farms enables streamlined project execution, energy sales and shared infrastructure for multiple customers. As of September 30, 2025, we have 485.78 MW of operating capacity and 93.73 MW of Contracted yet to be executed capacity under the Capex Services model.
2. **Carbon Services:** Through our Carbon Services offering, we offer customers a suite of Net Zero offerings to meet their carbon neutrality mandates, including (i) environmental attributes, such as International Renewable Energy Certificates (“**I-RECs**”), which we unbundle from Onsite Solar and Offsite projects; and (ii) carbon credits derived from a wide variety of carbon removal and carbon avoidance mechanisms. We also provide advisory services to other corporates seeking to generate carbon credits from their projects by supporting them with carbon project registration and credit issuance. This is a nascent business with select pilot projects underway. According to the CRISIL Report, there is an increase in global demand for carbon offset solutions as organizations seek to meet their decarbonization goals, with the global voluntary credit market projected to reach US\$20-25 billion by 2030.

For details on revenue recognition across our segment, see “*Management’s Discussion and Analysis of our Results of Operations – Material Accounting Policies*” on page 851.

Our Market Opportunity (Source: CRISIL Report)

India is the third largest electricity consumer globally and C&I consumers accounting for over 50% of the total power market. Going forward, C&I consumers are expected to continue to be the largest power consuming category, led by large scale infrastructure build-out, and increasing industrialization. Renewable energy is a compelling proposition for C&I customers, offering cost savings of 30-45% over grid tariffs, further driven by rising sustainability goals, increasing pressure from global stakeholders (such as investors and customers), and a supportive regulatory environment. Notably, this demand is not dependent solely on aggregate electricity consumption growth, but rather growth is primarily driven by substitution of conventional grid-supplied power with bilaterally procured renewable energy. Renewable energy penetration for C&I stood at ~7.4% in Fiscal 2023 and is projected to grow to ~20% by Fiscal 2030, requiring 15-18 GW of annual capacity addition and translating to a 22-24% CAGR in installed capacity. This demand is expected to be primarily STU-connected due to power banking availability, especially in solar-wind rich states.

Beyond STU-connected demand, global corporates operating in India are increasingly exploring Virtual Power Purchase Agreements (“VPPAs”) including EAPAs and other green attribute-based contracting mechanisms to meet their Scope 2 and broader Net Zero targets. VPPAs are expected to contribute 45–50% of the global corporate PPA market by 2030, with India’s share projected to reach 10–12%. According to the CRISIL Report, India is emerging as a preferred destination for such structures owing to its high grid emission intensity (offering meaningful carbon abatement), competitive renewable tariffs, abundant renewable potential, and faster execution timelines. As a result, the Indian energy attribute market is expected to scale to 10-15 GW by 2030, led by demand from large technology companies, data centres, and global multi-national corporations.

Key growth themes in corporate renewable energy procurement include: (i) the expansion of India’s data centre capacity, driven by demand for cloud computing, data storage, digital services, and AI; (ii) increased use of India-origin I-RECs by international technology companies to meet sustainability targets; (iii) growth in manufacturing under the “Make in India” initiative and PLI Schemes, prompting renewable energy adoption; and (iv) infrastructure growth and electrification in sectors like airports and metro systems, creating demand for customized renewable energy solutions.

See “*Industry Overview*” on page 229 for more details.

Our Key Customers

We serve customers primarily across two categories, (i) Technology customers and (ii) Conventional C&I customers, as described in detail below:

1. **Technology customers:** We set up our first Onsite Solar plant with a data centre customer in February 2015 and entered into our first Offsite group captive PPA of 29.96 MW in Tamil Nadu with the same customer in November 2015. More recently, we signed long-term I-REC supply deals with a global technology company, which expanded to multiple deals of 190.94 MW, followed by signing EAPAs of 1,111.70 MW with the same customer in Fiscal 2025. Our technology customers include Amazon, Apple, CISCO, Equinix and Google, among others. Specifically, for Technology customers, we deliver tailored solutions to address their round-the-clock energy demands. Additionally, our renewable energy plants are strategically located in Maharashtra, Tamil Nadu and Karnataka to ensure seamless supply of power to data centres in Mumbai, Chennai, and Bangalore, which are key areas for our data centre customers. Technology customers constituted 150.09 MW (11.12%), 254.29 MW (13.73%), 1,875.54 MW (42.41%), 1875.72 MW (39.45%) and 2343.27 MW (43.51%) of operational and contracted yet to be executed capacity as of March 31, 2023, March 31, 2024, March 31, 2025, September 30, 2025 and October 31, 2025 respectively in the renewable energy power sales segment.
2. **Conventional C&I customers:** Our conventional C&I customers spans across various industries including manufacturing, infrastructure, airports, cement, steel, FMCG, pharmaceuticals, real estate and global capability centres. Due to our group captive contracting, our customers have invested ₹8,410.82 million via equity stakes in 97 of our subsidiaries as of September 30, 2025. As on September 30, 2025, 41.24% of our group captive customers have tied up more capacity in the same SPV. Our Conventional C&I customers include Apar Industries Limited, Bajaj Auto Limited, Bangalore International Airport Limited, BASF India Limited, Concord Biotech Limited, Grasim Industries Limited (Birla Paints Division), Sansera Engineering, Sona Comstar and Welspun Living, among others. Conventional C&I customers constituted 2547.27 (57.59%), 2879.05 MW (60.55%) and

3042.50 MW (56.49%) of operational and contracted yet to be executed capacity as of March 31, 2025, September 30, 2025 and October 31, 2025 respectively in the renewable energy power sales segment.

We have 2.80 GW operational, owned and managed capacity and 2.54 GW of Contracted yet to be executed capacity as of September 30, 2025. Of the 2.54 GW of contracted capacity yet to be executed as of September 30, 2025, firm PPAs and EAPAs are in place for 86.82% of the capacity, representing 2.20 GW whereas the remaining 0.33 GW—representing 28 customers—is currently governed by Letters of Intent (“LOIs”). Of the 2.54 GW Contracted Capacity as of September 30, 2025, 1.35 GW is under construction and is scheduled to be commissioned by July 31, 2026. The balance of 1.19 GW will be scheduled for commissioning after July 31, 2026. For more information, see “– Project Development”.

As of October 31, 2025, we have 2.80 GW operational, owned and managed capacity and our contracted yet to be executed capacity has increased to 3.17 GW. Of the 3.17 GW of contracted capacity yet to be executed as of October 31, 2025, firm PPAs and EAPAs are in place for 74.72% of the capacity, representing 2.37 GW whereas the remaining 0.80 GW—representing 29 customers—is currently governed by Letters of Intent (“LOIs”).

Particulars	As of October 31, 2025
Under construction Capacity (GW)	1.35 GW
% of Under construction capacity contracted (PPA + LOIs)	1.35 GW (100%)
% of Under construction capacity contracted via LOIs	0.09 GW (6.67%)

Development Pipeline

According to the CRISIL Report, in the C&I renewable energy sector, the typical timeline between PPA signing and project commissioning for Offsite projects is 6-10 months for solar and 12-15 months for wind projects, which is significantly shorter than the multi-year timelines seen from award of contract to commissioning with utility-scale projects. Customer contracting, project development and evacuation visibility are essential for consistent delivery, as reflected in our project pipeline. The following table provides details of our capacity and project pipeline as of March 31, 2025, September 30, 2025 and October 31, 2025 respectively:

Stage	Contracting Strategy	As of March 31, 2025			As of September 30, 2025			As of October 31, 2025		
		Solar (MWp)	Wind (MW)	Total (MW)	Solar (MWp)	Wind (MW)	Total (MW)	Solar (MWp)	Wind (MW)	Total (MW)
Operational Capacity ⁽¹⁾	Onsite Solar	339	NA	2,178	368	NA	2,796	371	NA	2,799
	Onsite Solar - Capex	110	NA		111	NA		111	NA	
	STU - Group Captive	595	287		993	409		993	409

Notes:

(1) Operational Capacity refers to projects commissioned as of March 31, 2025 or September 30, 2025 or October 31, 2025 as applicable. Operational Capacity as on September 30, 2025 as well as October 31, 2025 includes 355.89 MW of capacity for which CEIG charging approval has been received and COD certificate is awaited;

- (2) *Contracted Capacity* refers to projects for which we have signed PPAs or LOIs with customers as of March 31, 2025 or September 30, 2025 or October 31, 2025 as applicable but are yet to execute projects; Contracted capacity includes 1,340.97 MW of contracted capacity for scheduled commissioning on or before July 31, 2026.
- (3) *Advance Stage Capacity* refers to projects which have received evacuation approvals as of March 31, 2025 or September 30, 2025 or October 31, 2025;
- (4) *Under Development Capacity* refers to projects with evacuation approval applied for as of March 31, 2025 or September 30, 2025 or October 31, 2025.

Operational and Financial Metrics

Operational KPIs

Particulars	Units	For the six months ended September 30,		As at and for the Fiscal ended March 31,		
		2025	2024	2025	2024	2023
Generation exported ⁽¹⁾	Mn units	1689.14	1319.16	2,615.92	1,932.68	1,048.85
C&I Operational Capacity ⁽²⁾	MW	2,796.10	1,931.34	2,177.99	1,755.21	1,040.14
<i>Solar (Onsite)</i> ⁽¹⁶⁾	MWp	479.21	403.37	448.57	396.09	334.38
<i>Solar (Offsite)</i> ⁽¹⁷⁾	MWp	1,603.81	996.39	1,171.44	850.64	497.86
<i>Wind</i> ⁽¹⁸⁾	MW	713.08	531.58	557.98	508.48	207.90
Contracted yet to be executed Capacity ⁽³⁾	MW	2,538.18	637.57	2,769.66	435.80	580.97
<i>Solar (Onsite)</i> ⁽¹⁶⁾	MWp	85.12	48.26	70.10	32.09	54.82
<i>Solar (Offsite)</i> ⁽¹⁷⁾	MWp	1,705.26	442.16	1,887.16	367.41	263.29
<i>Wind</i> ⁽¹⁸⁾	MW	747.80	147.15	812.40	36.30	262.86
Commissioned during trailing 12 months ⁽⁴⁾	MW	864.76	333.59	422.78	715.07	240.62
<i>Solar (Onsite)</i> ⁽¹⁶⁾	MWp	75.84	47.22	52.47	61.71	45.11
<i>Solar (Offsite)</i> ⁽¹⁷⁾	MWp	607.42	226.97	320.81	352.77	117.21
<i>Wind</i> ⁽¹⁹⁾	MW	181.50	59.40	49.50	300.59	78.30
Evacuation Capacity Available at end of year ⁽⁵⁾	MW	4,943.94	2,072.60	3,411.36	1,567.40	936.50
Plant Load Factor (trailing 12 Months) ⁽⁶⁾						
<i>Onsite Solar (DC)</i> ⁽¹⁶⁾	%	14.60	14.89	14.86	15.11	14.99
<i>Offsite Solar (AC (DC))</i> ⁽¹⁷⁾	%	23.53 (16.21)	23.23 (16.24)	24.65 (16.98)	23.06 (16.19)	23.85 (16.75)
<i>Wind</i> ⁽¹⁸⁾	%	35.95	34.86	31.60	34.52	30.95
<i>Hybrid</i> ⁽¹⁹⁾	%	46.60	45.45	45.90	39.18	34.29
Average plant availability ⁽⁷⁾ (Portfolio level)	%	98.08	98.04	98.17	98.19	98.20
Average grid availability (Offsite) ⁽⁸⁾	%	99.08	99.25	99.10	99.26	98.95
Number of C&I customers ⁽⁹⁾	Count	555	481	531	454	421
Number of PPAs and contracts ⁽¹⁰⁾	Count	1,198	1,005	1,127	931	845
% Customers with credit rating AA and above ^(11a)	%	83.19	77.71	83.85	83.24	83.86
% Customers with credit rating A- and above ^(11b)	%	94.72	94.69	95.61	94.79	95.69
% Share of repeat orders in new contracted volumes ⁽¹²⁾	%	71.72	64.29	77.28	81.53	51.75
Weighted Average PPA Tenor ⁽¹³⁾	Years	22.85	21.97	22.73	21.54	20.38
Weighted average realised tariff ⁽¹⁴⁾	₹ / kWh	4.25	4.35	4.28	4.47	4.95
Weighted average tariff for PPAs commissioned during year ⁽¹⁵⁾	₹ / kWh	3.67	3.88	3.76	4.12	4.09

- (1) *Generation exported* refers to electricity unit generated and exported in million kWh.
- (2) *Operational Capacity* means capacity of a project for which a commissioning certificate or CEIG certificate has been issued. The solar (offsite) includes being solar component of hybrid projects, and being includes the wind component of hybrid projects. This KPI refers to operational capacity that has been contracted with C&I customers.
- (3) *Contracted yet-to-be-executed capacity* refers to the total renewable energy capacity (in MW) for which power purchase agreements (PPAs)/ Letter of Intent (LOI) have been signed with customers but project commissioning is still underway as at end of period.
- (4) *Commissioned during the trailing 12 months* refers to the total renewable energy capacity (in MW) that was successfully commissioned in the 12-month period immediately preceding the reporting date.
- (5) *“Evacuation Capacity”* refers to the maximum amount of electrical power that can be transmitted from a project to the grid or end consumer through the available transmission infrastructure, including substations, transmission lines, and associated grid connectivity/evacuation approval.
- (6) *“Plant Load Factor”* is calculated as total generation by fully operational project capacity divided by maximum generation from fully operational project capacity during the period of operation in the portfolio during the period/year.
- (7) *“Average Plant Availability”* is calculated as weighted average of plant availability by fully operational projects capacity in the portfolio during the period/year (trailing 12 months).

- (8) "Average Grid Availability" is calculated as weighted average of grid availability by fully operational project capacity in the portfolio during the period/year (trailing 12 months).
- (9) Number of C&I customers refers to total number of distinct corporate customers contracted with active PPAs/capex contracts/LOI's as on the end of the fiscal year. Group companies have been considered as one customer for the purpose of calculating distinct customers.
- (10) Number of PPAs and contracts represents the total number of signed power purchase agreements, LOI and capex contracts as of the end of the fiscal year/period.
- (11a) % Customers with credit rating AA and above represents the proportion of customers (by contracted capacity) having a long-term credit rating of AA/AAA or are MNC subsidiaries or others
- (11b) % Customers with credit rating A- and above represents the proportion of customers (by contracted capacity) having a long-term credit rating of A/AA/AAA or are MNC subsidiaries or others.
- (12) Share of repeat orders in new contracted volume refers to share of capacities across PPA's/capex contracts/LOI's contracted during the year with existing customers who have previously contracted with Clean Max at any point of time.
- (13) Weighted Average PPA Tenor represents the weighted average tenor of PPA's/LOI's contracted till the end of the relevant fiscal year/period.
- (14) Weighted average realised tariff represents the average tariff earned from energy sales during the year, calculated as the ratio of total revenue from power sales to total energy generated (Revenue ÷ Energy Generated)
- (15) Weighted average tariff for PPAs commissioned during year represents weighted average tariff of all projects that were commissioned during the fiscal year/period (trailing 12 months), calculated based on tariff contracted in Power Purchase Agreements and/or LOIs.
- (16) Onsite Solar is defined as solar projects that are located within the premises or in the immediate vicinity of the end consumer's facility. These projects are typically installed on rooftops, building structures, carports, or unused land within or adjacent to the consumer's premises, and supply power directly to the consumer without using the distribution network.
- (17) Offsite Solar means solar projects that are located away from the premises of the end consumer and supply electricity through the grid under open access regulatory mechanisms. These projects are connected to the distribution network, allowing energy to be wheeled to customers located at different geographic locations.
- (18) Wind projects that are located away from the premises of the end consumer and supply electricity through the grid under open access regulatory mechanisms. These projects are connected to the distribution network, allowing energy to be wheeled to customers located at different geographic locations.
- (19) Hybrid is defined as wind-solar hybrid project that combines wind turbines and solar photovoltaic (PV) panels to generate electricity.

Financial Metrics

Financial metrics	Units	For the six months ended September 30,		As at and for the Fiscal year ended March 31,		
		2025	2024	2025	2024	2023

- (1) Revenue from operations is as per the Restated Consolidated Statement of Profit and Loss. It is a sum of revenue from sale of power, revenue from sale of goods, revenue from projects, revenue from operation and maintenance services, revenue from common infra services and other operating income.
- (2) Renewable Energy Power Sales Segment includes sale of electricity generated at our renewable energy plants to customers through long-term PPA, Energy Supply Agreement and EAPAs.
- (3) Renewable Energy Services Segment includes Capital Expenditure Services and Carbon Services
- (4) Total Income is as per the Restated Consolidated Statement of Profit and Loss and is a sum of Revenue from Operations and other income.
- (5) Gross Margin is calculated as revenue from operations minus cost of materials consumed and cost of services minus purchase of traded goods. Gross margin % is calculated as Gross Margin as a percentage of Revenue from Operations.
- (6) EBITDA is calculated as Revenue from operations minus Cost of materials consumed and cost of services minus Purchase of traded goods minus Employee benefits expense minus other expenses. The cost of services and other expenses include any maintenance expense towards our renewable energy plants.
- (7) 3 Year EBITDA CAGR calculated as EBITDA growth for last three fiscal years. EBITDA is calculated as Revenue from operations minus Cost of materials consumed and cost of services minus Purchase of traded goods minus Employee benefits expense minus other expenses. The EBITDA is net of any maintenance expense towards our renewable energy plants.
- (8) Adjusted EBITDA is calculated as Restated profit/(loss) for the period/year plus Total tax expenses, Exceptional items, Depreciation, impairment and amortisation expenses, Finance costs and Non-Cash/One-time expenses Less Share of profit of joint ventures and associate (net of taxes) and Non-Cash/One-time incomes. Adjusted EBITDA of the Segment for Renewable Energy Power and Renewable Energy services segment is computed as segment result plus finance cost less share of profit of joint ventures and associate (net of taxes). Depreciation and amortisation expenses and Total tax expense are not included in Segment result.
- (9) Adjusted EBITDA Margin of the Segment is calculated as Adjusted EBITDA of the Segment as a percentage of Total income for the respective segment.
- (10) PAT attributable to owners is the Restated Profit/(Loss) for the year/period minus Restated (Loss)/Profit for the year/period attributable to Non-controlling interest.
- (11) Cash PAT is calculated as Restated Profit/(Loss) before share of profit of joint venture and associate minus Restated (Loss)/Profit for the year attributable to Non-controlling interests plus Exceptional items plus Depreciation, amortisation and impairment expenses plus Non-cash finance cost plus Non-cash expenses minus Deferred tax credit minus Non-cash incomes.
For break-down of Non-cash expenses, Non cash finance cost and Non-cash incomes refer MD&A
- (12) Cash ROIC (based on Average Funds Invested) is calculated as Adjusted EBITDA as a percentage of Average funds invested in business.
- (13) Cash ROIC (based on Opening Funds Invested) is calculated as Adjusted EBITDA as a percentage of Opening funds invested in business. Opening funds invested in business is Funds invested in the business at the end of previous fiscal/period.
- (14) Reported ROIC (based on Average Funds Invested) is calculated as EBITDA as a percentage of Average funds invested in business.
- (15) Reported ROIC (based on Opening Funds Invested) is calculated as EBITDA as a percentage of Opening funds invested in business. Opening funds invested in business is Funds invested in the business at the end of previous fiscal/period.
- (16) 3 Year Average Cash ROIC (Based on Opening Funds Invested) is Average EBITDA of last 3 fiscal years/Average of Funds invested in business at the beginning of the year for last three fiscal years.
- (17) Cash ROE (based on average equity) is calculated as Cash PAT as a percentage of Average equity.
- (18) Cash ROE (based on Opening Equity) is calculated as Cash PAT as a percentage of Opening equity. Opening equity is Total equity attributable to the owners of the Company as at the end of previous fiscal/period.
- (19) Reported ROE (based on Average Equity) is calculated as Restated (Loss)/Profit for the year attributable to Owners of the company divided by Average equity.
- (20) Reported ROE (based on Opening Equity) is calculated as Restated (Loss)/Profit for the year attributable to Owners of the company divided by Opening equity. Opening equity is Total equity attributable to the owners of the Company as at the end of previous fiscal.

- (21) Average equity is calculated as an average of Total equity attributable to the owners of the Company as at the end the fiscal and Total equity attributable to the owners of the Company at the end of the previous fiscal as per Restated Consolidated Statement of Assets and Liabilities.
- (22) 3 Year average Cash ROE (Based on Opening Equity) is calculated for last three fiscal years average Cash PAT as a percentage of Opening equity. Opening equity is Total equity attributable to the owners of the Company as at the end of previous fiscal.
- (23) Debt (net off liquid assets) is calculated as Total Borrowings minus cash and cash equivalents, bank balances other than cash and cash equivalents, balances with bank held as margin money, Lien marked mutual funds - Quoted (measured at FVTPL) and current investments.
- (24) Debt (net off liquid assets) / Adjusted EBITDA is calculated as Opening Debt (net off liquid assets) divided by Adjusted EBITDA. Opening debt (net off liquid assets) for a fiscal is Debt (net of liquid assets) at the end of previous fiscal/period.
- (25) Days Sales Outstanding or Receivable days is calculated as average trade receivables for the fiscal divided by revenue from operations multiplied by 365 days. For the period ended September 30, 2024 and September 30, 2025 Days Sales Outstanding or Receivable days is calculated as average trade receivables for the period divided by revenue from operations multiplied by 182 days.
- (26) Cash SG&A/Adjusted EBITDA is calculated as Cash SG&A as a percentage of Adjusted EBITDA. Cash SG&A is calculated as Employee Benefit expenses plus other expenses, adjusted for non-cash expenses.
- (27) Debt (net off liquid assets) to Equity is calculated as Debt (net off liquid assets) divided by Total Equity.
- (28) Cost of project debt is calculated as the weighted average interest rate on project loans outstanding as at the end of the respective Fiscals or six month periods.
- (29) 3 year average Gross Block/ Adjusted EBITDA Average of opening Gross Block for last 3 fiscal years divided by Average EBITDA of last 3 fiscal years.
- (30) Average funds invested in business is calculated as an average of Funds invested in business at the end of the fiscal and Funds invested in business at the end of previous fiscal.

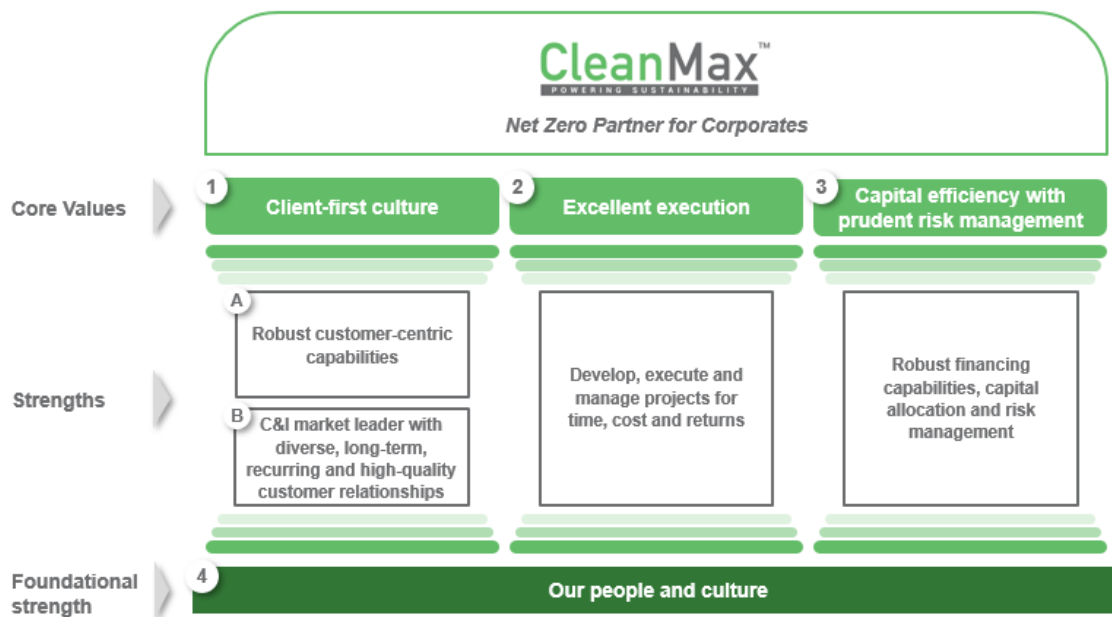

*Please see "Management's Discussion and Analysis of our Results of Operations – Non-GAAP Measures" on page 838 for a reconciliation of the non-GAAP measures mentioned above.

Note:

^Figures have not been annualised for the period ended September 30, 2025 and September 30, 2024.

Our Competitive Strengths

Since our inception, we have remained focused on being a Net Zero partner to corporates as we grew our business. We have strived to adhere to our three core values: (i) a client-first culture, (ii) excellence in execution and (iii) capital efficiency with prudent risk management.

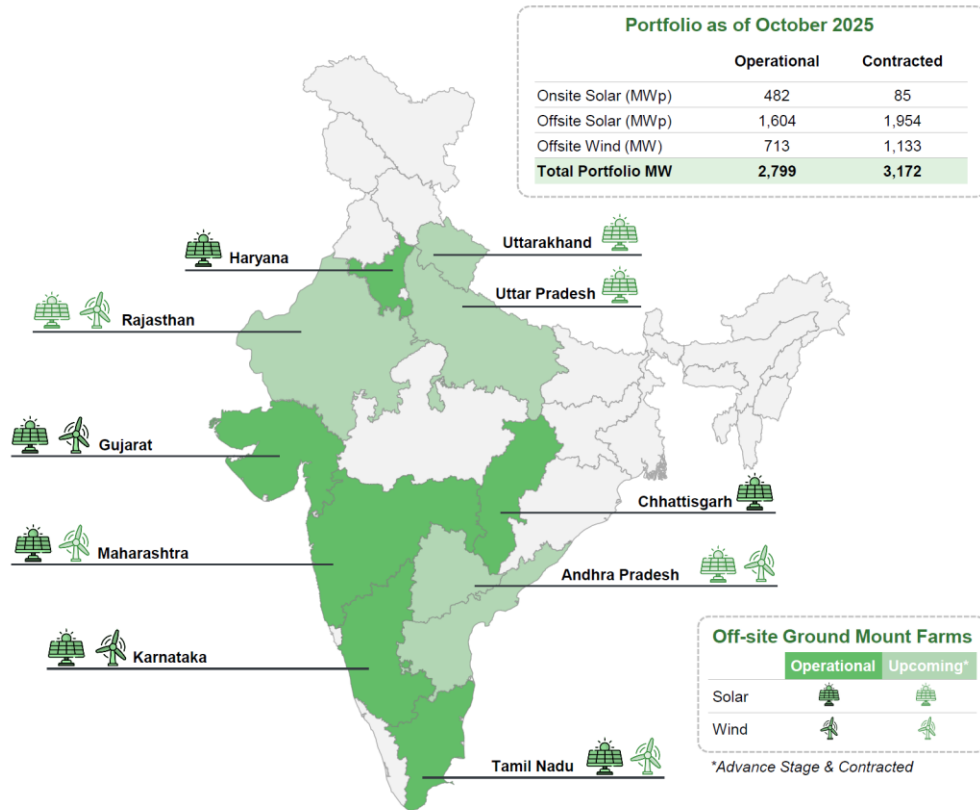

These core values are underpinned by the following strengths:

1. Comprehensive Suite of Customer-Centric Capabilities Leading to C&I Market Leadership and Strong Customer Relationships

i) Robust customer-centric capabilities

- i) Solutions driven sales approach*: With 53 professionals across our offices in India, United Arab Emirates and Thailand, our dedicated business development team manages the entire customer lifecycle, from initial engagement and bespoke contract structuring to co-ordination during project execution, commissioning and ongoing project operation, across a distributed customer base, comprising 555 customers and 1,198 PPAs and contracts, as of September 30, 2025. With average sizes of our group captive models at 24.08 MW per customer and 12.50 MW per PPA, our business model emphasizes on smaller, customer-centric engagements that diversify risk across clients, sectors, and geographies. Our ability to retain and deepen engagement with our existing customer base enables us to develop insights into customer ecosystems that provide inputs to our business strategies and drive product cross-sales and enhance long term visibility in our contracted pipeline.
- ii) Tailored product offerings*: We have five distinct offerings - Onsite, Offsite STU, Offsite CTU, Capex Services, and Carbon Services - that maximize our ability to aid customers in achieving their Net Zero agenda. We believe that this diverse set of offerings that we are able to tailor for our customers enables our customers to meet their carbon neutrality mandates or Net Zero targets.
- iii) Geographic coverage*: According to the CRISIL Report, as of March 31, 2025, we had the largest geographic coverage for Onsite Solar and STU-Connected farms amongst C&I renewable energy players in India. We offer STU-Connected farms in 10 states in India, have upcoming CTU-connected farms in 4 states for Pan-India supply and offer Onsite Solar across 23 states and union territories in India, and in United Arab Emirates, Bahrain and Thailand, as of September 30, 2025. This enables us to service customers with presence across multiple states/geographies.

- iv) **Customer equity co-investment:** Under the STU Group Captive model, all our group captive customers have invested 26% or more equity capital into our SPVs and negotiated long-term shareholder agreements that include board and shareholder approvals for equity infusions. As the power requirements of our group captive customers grow, they routinely expand their capacity by adding new PPAs within the same SPV.
- v) **ESG capabilities:** Our ESG capabilities are a key element of our customer-centric approach, as many of our customers have sustainability goals and Net Zero ambitions. Our ESG efforts have gained international recognition, as our Company was recognized as a sector leader in renewable power sector by Global Real Estate Sustainability Benchmark (“GRESB”) Infrastructure Asset Benchmark Report 2025; with a perfect 5/5 score among 650+ participating companies. Our ESG practices are integrated across the value chain, starting with project development, where we incorporate biodiversity considerations and project impact assessments. This integration extends to EPC, with a focus on water and waste management, recycling, and occupational health and safety. In Fiscal 2025, 2.61 TWh of renewable energy, respectively, for our customers, which translated into 1.89 million tonnes of CO₂, avoided by our customers.
- vi) **Robust counterparty credit risk management:** We partner with investment grade companies with credit ratings of “A” or above to safeguard our cash flows and balance sheet. For certain customers whose standalone rating falls a specified credit ratings threshold, we seek parent- entity- guarantees from higher-rated entities and we seek bank guarantees from certain customers in relation to their obligations under PPAs. We also consider factors like board level approvals, audited financial covenants, and willingness to infuse equity on a pro-rata basis for Group Captive model before contracting with customers.

Customer credit rating (As of Sep 2025)

ii) *C&I market leader with diverse, long-term and recurring customer relationships*

- i) **Scale:** We are a market leader in the C&I renewable energy sector with the largest customer base amongst C&I renewable energy players in India as of March 31, 2025 and September 30, 2025 according to the CRISIL Report.
- ii) **Diversity:** As of the six months ended September 30, 2025, Fiscal 2025, 2024 and 2023, no single customer contributed more than 10% of our revenue. The following graph shows the distribution of Revenue from operations as of September 30, 2025 among our top customers in terms of revenue contribution.

Revenue from customers (As of Sep 2025)

- iii) **Long PPA Tenor:** Through our contracting practices, we have built a portfolio of PPAs with an average tenure of 22.85 years, representing standalone terms, and average lock-in periods of 16.86 years, as of September 30, 2025.
- iv) **Tariff Premium:** According to the CRISIL Report, our business model is distinct from utility-scale renewable energy developers, as we do not participate in competitive tenders with state-owned distribution companies or central government utilities which award projects solely based on the lowest tariff bids. As a result, we price our offerings at a premium compared to large utility scale IPPs, primarily due to distinct project economics and risk profile. Our weighted average tariff for capacity commissioned in the six month period ended September 30, 2025 was ₹3.66 and Fiscal 2025 was ₹3.76 respectively, whereas industry average for listed utility scale renewable energy players was ₹2.44-2.46 as per CRISIL Report.
- v) **High repeat rates:** For the six months ended September 30, 2025, Fiscals 2025, 2024 and 2023, we have achieved high customer repeat rates (i.e. the proportion of new Contracted Capacity in a given period that comes from customers who had previously contracted with us at any point of time) as illustrated in the table below.

Particulars	For the six months ended September 30,		As of March 31,		
	2025	2024	2025	2024	2023
Number of customers ⁽¹⁾	555	481	531	454	421
Number of new PPAs/ Capex contracts/LOI's contracted during the period ⁽²⁾	59	72	196	86	131
Capacity contracted with repeat customers (MW)	268.63	245.11	2,130.42	464.66	317.00
Total capacity contracted during Fiscal (MW)	374.56	381.28	2,756.64	569.90	612.60
% Share of repeat orders in new contracted volumes	71.72%	64.29%	77.28%	81.53%	51.75%

(1) Customers include all companies under the same group of companies as a single customer

(2) Refers to the number of PPAs/LOI's/energy services contracts that have been executed among our customers and us, which may include more than one PPAs executed with a single customer

- vi) Superior customer credit rating and lower collection days: As of September 30, 2025, 94.72% of our customers that have operational and contracted capacity with us are rated A-/A/AA/AAA or are subsidiaries of multi-national corporation, or government educational institutions. The quality of our client relationships is also demonstrated by the receivables period for our Renewable Energy Power Sales Segment, which was 24 days as of September 30, 2025 which is lower than the industry average of 71.66 days, according to the CRISIL Report.

2. Timely and Cost-Effective Project Development, Execution and Management Capabilities

Our in-house project development, execution and management capabilities, which we have cultivated over time, help us in our attempt to commission projects in a timely manner, deliver projects under budget and ensure optimum performance of our plants. This in turn enhances our ability to retain and attract customers, and manage our risks.

- a) Executing Offsite STU-Connected and proposed CTU-Connected farms: Executing our offsite STU-Connected and proposed CTU-Connected farms involves three critical components: (i) site evaluation, for availability of evacuation and land rights; (ii) EPC, which focuses on delivering projects on time and under budget; (iii) O&M, for optimal asset performance and energy generation; and (iv) ESG-focused execution.
- b) Project development: For our Offsite farms, we aim to ensure appropriate availability of evacuation and land rights at the development phase. We have a 38-member land acquisition, regulatory and permitting team that enable our Project Development function as of September 30, 2025. Our team works towards making land available in a timely manner to support project evacuation, ensuring sufficient quantity, suitable resource quality - especially relevant for wind site micro siting - and construction-friendly conditions. According to the CRISIL Report, all these states are characterized by high solar irradiation and high wind speeds. The following table provides details of our firm and unused power evacuation capacity for STU-Connected and CTU-Connected farms, as of March 31, 2025 and as of September 30, 2025.

Particulars	Unused evacuation capacity available as of March 31, 2025			Unused evacuation capacity available as of September 30, 2025		
	Solar (MW)	Wind (MW)	Total (MW)	Solar (MW)	Wind (MW)	Total (MW)
STU- Connected	1,135.45	400.91	1,536.36	1,880.92	759.52	2,640.44
CTU-Connected	1,125.00	750.00	1,875.00	1,273.50	1,030.00	2,303.50
Total	2,260.45	1,150.91	3,411.36	3,154.42	1,789.52	4,943.94

As of September 30, 2025, we had made applications for 1,311.23 MW of power evacuation capacity for STU-Connected farms and 1480.50 MW of power evacuation capacity for CTU-Connected farms pending approval. The availability of adequate and suitable land is a critical enabler for project construction. We have contracted a substantial part of our land requirements for our Contracted Capacity planned for commissioning by July 31, 2026, primarily through sales and lease deeds and the remaining is in the process of being acquired pursuant to an agreement to lease or agreement to sell having been executed.

- c) *EPC and O&M*: We have developed in-house capabilities across key functions including (i) design and engineering, (ii) central procurement; (iii) construction management, and (iv) asset management. This helps us towards maintaining the quality of our services, managing costs, completing projects on time for customers, and handling construction and operational risks.

We have adopted and endeavour to adopt leading global technologies to lower the Levelized Cost of Energy¹¹ and enhance efficiency and reliability. We have also adopted technologies to enhance our operational efficiency and optimize the performance of our projects. For example, we were the first in India to purchase Envision’s 3.3 MW turbine in the year 2022 and have recently partnered with Envision in 2025, placing the first order in India for the 5 MW turbine to optimise our upcoming CTU-Connected project in Koppal, Karnataka. The 5MW turbine has two key advantages over the 3.3 MW turbine including (i) 8-10% reduction in levelized cost of energy through reduced turbine acquisition costs and generation increase; and (ii) it has enabled us to reduce complexity by enabling us to decrease the number of planned turbine locations from 136 to 90 locations.

We have a diversified pool of suppliers for materials and equipment, which has enabled us to enhance operational efficiency and achieve more effective cost management for our projects. For instance, following the implementation of the Approved List of Models and Manufacturers (“ALMM”) by Ministry of New and Renewable Energy (“MNRE”), we have added domestic suppliers from whom we source our solar panels. We manage risks relating to our STU Connected and CTU-Connected farms through timely- interventions and corrective actions, such as defining budgets for land, transmission line rights-of-way and civil construction costs, and securing construction permissions.

We have used 62.35% of lender sanctioned interest cost under our loan agreements for the products, during construction at a portfolio level over the past three years. Further all of our projects that were commissioned for the six months ended September 30, 2025 and between Fiscal 2023 and 2025 were delivered within budgeted cost.

Particulars	For the six months ended September 30,		Fiscal		
	2025	2024	2025	2024	2023
Actual cost as a percentage of overall budgeted cost	96.77%	99.99%	95.24%	95.54%	97.41%
Interest during construction (IDC) as a percentage of lender sanctioned IDC	32.58%	45.27%	61.41%	62.17%	70.18%

- (1) Actual cost refers to the construction cost incurred towards projects commissioned in the respective fiscals (excluding the cost of land)
- (2) Budgeted cost refers to cost of constructing a project budgeted by the Company at the inception of the project used for computing revenue under the percentage completion method
- (3) Interest During Construction (“IDC”) refers to the interest on long term project debt accrued during the construction period and capitalized in the Books of Accounts
- (4) Lender Sanctioned IDC refers to the interest on long term project debt sanctioned by lender for utilization during construction period

- d) *Executing Onsite Solar projects*: For our Onsite Solar projects, we have a dedicated team that navigates and manages our Onsite Solar business which spanned four countries. In our Renewable Energy Power Sales segment, we had 312 onsite solar customers across 588 PPAs and 1,330 plants, as of September 30, 2025. We commissioned Onsite Solar plants with capacities of 28.83 MWp, 36.07 MWp, 34.48 MWp and 41.14 MWp during the six months ended September 30, 2025, Fiscals 2025, 2024, and 2023 respectively. Our Onsite Solar teams are required to navigate customer facility restrictions, such as working hours and safety requirements, and work towards leveraging our expertise to adhere to short time periods for commissioning of Onsite Solar projects. The following table provides an overview of the performance of our onsite and

¹¹ The Levelized Cost of Energy (LCOE) is a metric used to assess the average cost per unit of electricity generated by a particular energy source over its lifetime. It is calculated by taking into account all the costs associated with the construction, operation, and maintenance of the energy-generating asset, as well as the fuel costs, if applicable, and dividing these by the total electricity output over the asset’s lifetime. LCOE is often used to compare the cost-effectiveness of different energy technologies and to inform investment decisions in the energy sector.

offsite plants for the periods indicated (for definitions of these terms, see – “Operational and Financial metrics – Operational KPIs” starting on page 300):

Particulars	For the six months ended September 30,		Fiscal		
	2025	2024	2025	2024	2023
Average Plant availability (%) – Portfolio level	98.08	98.04	98.17	98.19	98.20
Average Grid Availability (%) - Offsite	99.08	99.25	99.10	99.26	98.95
Plant load factor (“PLF”) – Portfolio level					
Onsite Solar PLF (DC) (%)	14.60	14.89	14.86	15.11	14.99
Offsite Solar PLF (AC) (%)	23.53	23.23	24.65	23.06	23.85
Offsite Solar PLF (DC) (%)	16.21	16.24	16.98	16.19	16.75
Wind PLF (%)	35.95	34.86	31.60	34.52	30.95
Hybrid PLF(%)	46.60	45.45	45.90	39.18	34.29

3. Efficient capital allocation and risk management

- (a) *Board level oversight:* Our Company reviews and oversees large-scale projects through a Board committee, and small-scale projects through a committee comprising of KMPs. These committees set specified targets for each of our projects.
- (b) *Unit economics:* The table below shows our equity payback period for our operational Offsite projects as of March 31, 2025. Equity payback period is the time it takes, in years, for our upfront equity investment in an Offsite farm to recover its initial cost from project and financing related cashflows. The equity payback is typically achieved from cash flows generated by the operational farm either from the sale of power or provision of Capex services, our ability to avail additional debt for an operational project, and the release of debt services reserve account payables once the project achieves commercial operations.

Particulars	Equity Payback Period
All our Offsite projects with at least of 12 months of operations as of March 31, 2025 ⁽¹⁾	3.37 years
All our Offsite projects that were commissioned in Fiscal 2022 or later and have has at least 12 months of operations as of March 31, 2025	2.51 years

Further, we achieved a project-level Cash ROE (based on Opening Equity) of 34.93% in Fiscal 2025. This metric is computed as project-level Cash PAT divided by project-level Total Equity attributable to the owners at the beginning of the year for all projects that have been operational for the full fiscal and excludes projects with part/no in-year revenues.

- (c) *Diverse Lender Pool:* We were rated as CARE A+ Positive as of September 30, 2025 pursuant to a credit ratings letter dated November 6, 2024, which is valid. Our credit ratings enable us to secure financing on competitive terms and access a larger pool of lenders. We had Total outstanding borrowings of ₹102,611.28 million from 25 domestic banks, foreign banks, non-banking financial corporations and multilateral financiers, as of September 30, 2025, attributable to our credit metrics. We follow disciplined borrowing practices and avail a mix of fixed and floating interest rate loans. We typically aim to refinance high cost loans within two years of the relevant project’s commercial operation date on more favourable terms, enabling us to lower our weighted average cost of borrowings over time. Additionally, we structure project financing basis with tenors of 15 to 20 years, aligning closely with our PPA durations. As of September 30, 2025 our outstanding debt covers the long-term cash flows of underlying assets, with an average loan tenure of 19 years compared to an average PPA tenure of 22.85 years. We have achieved an average Debt Service Coverage Ratio (DSCR) of 1.40 times (ranging between 1.10 to 2.00 times) for offsite projects with at least 12 months of operations as of March 31, 2025.
- (d) *Equity Efficiency:* In a sector characterized by high upfront capital requirements, we have optimized our equity deployment through several levers, including (i) offtaker equity contributions, (ii) co-investment partnerships, and (iii) cash flows from our renewable services business.

- i) **Offtaker equity contributions:** We adhere to a capital-efficient model, demonstrated through initiatives like our STU-Group Captive co-investments. The minimum requirement for group captive customers to hold 26% or more of the project cost for equity in the related SPV enables us to lower our capital requirements and generate capital efficiency while maintaining a majority shareholding of the SPV.
- ii) **Co-investment partnerships:** Our co-investments with reputable investors, such as Apple, Osaka Gas and Toyota, will play a crucial role in enabling us to scale projects in a capital efficient manner while retaining majority shareholding. Generally, these collaborations stipulate that we maintain 51% of the shareholding of the relevant SPV, whereas our co-investors possess 49%. These collaborations not only bolster our financial capabilities but also align with our commitment to capital efficiency and sustainable growth.
- iii) **Renewable energy services cash flows:** Under our Capex model, we benefit from immediate working capital as customer advances and milestone payments typically exceed our upfront costs for setting up renewable energy plants. For the past three fiscal years, we achieved an average margin from Renewable Energy Services Segment of 18.49% on the design, construction, and commissioning of wind, solar and Onsite systems, which contributed to our EBITDA growth. Additionally, our O&M contracts generate ₹237.08 million annually, with no new equity required, further enhancing our return on funds invested in business. The net working capital from our Renewable energy services business is negative enabling us to manage equity efficiency across rest of our portfolio. The following table summarizes the net working capital from our renewable energy services business for the periods indicated:

Particulars	For the six months ended September 30,		As of and for the Fiscal ended March 31,		
	2025	2024	2025	2024	2023
Revenue from Operations (A)	9,329.53	6,764.66	14,957.01	13,898.37	9,295.82
Renewable Energy Services Gross Margin ⁽¹⁾ (₹ Million) (B)	672.47	285.62	608.95	1,300.54	585.79
Renewable Energy Services Gross Margin % ⁽²⁾ (B/A)	32.80%	29.13%	16.17%	25.11%	12.88%
Net working capital from Renewable Energy Services Segment ⁽³⁾ (₹ Millions)	(402.81)	(3,590.82)	(523.46)	(627.69)	(276.07)

- (1) Gross Margin is calculated as revenue from operations minus cost of materials consumed and cost of services minus purchase of traded goods. For a reconciliation of Gross Margin, see "Management's Discussion and Analysis of our Results of Operations – Non GAAP Measures" starting on page 838.
- (2) Gross margin % is calculated as a percentage of Revenue from Operations. For a reconciliation of Gross Margin %, see "Management's Discussion and Analysis of our Results of Operations – Non GAAP Measures" starting on page 838.
- (3) Net working capital from Renewable Energy Services Segment Is a sum of the Total Current Assets less Total Current Liabilities less Upfront common infrastructure charges received for the useful life of the asset.

4. Our People and Culture

We focus on: (i) hiring and developing talent; (ii) maintaining a culture of belonging and (iii) emphasizing the team rewards for retention. The following table provides details of our employee attrition rate and average tenure as of and for the periods indicated.

Particulars	As of/ for the six months ended September 30,						As of/ for the Fiscal year ended March 31,								
	2025			2024			2025			2024			2023		
	Head-count	Attrition rate ⁽²⁾ (%)	Average tenure ⁽³⁾ (years)	Head-count	Attrition rate ⁽²⁾ (%)	Average tenure ⁽³⁾ (years)	Head-count	Attrition rate ⁽²⁾ (%)	Average tenure ⁽³⁾ (years)	Head-count	Attrition rate ⁽²⁾ (%)	Average tenure ⁽³⁾ (years)	Head-count	Attrition rate ⁽²⁾ (%)	Average tenure ⁽³⁾ (years)
Business Leadership ⁽¹⁾	10	-	8.00	10	-	7.00	10	-	7.52	10	9.52%	7.08	10	-	6.92
Top 20% employees ⁽²⁾	106	1.90%	4.10	59	13.22%	4.20	98	14.97%	4.25	71	14.39%	5.35	61	7.34%	6.23
All employees	565	5.48%	2.50	397	10.01%	2.92	491	16.65%	2.56	337	14.43%	3.97	273	12.37%	4.99

- (1) *Business Leadership includes Managing Director, Chief Operating Officer (Utility Scale Projects), Chief Financial Officer, Chief Commercial Officer, Chief Executive Officer (Onsite Solar), General Counsel, Chief People and Culture Officer, Finance Controller, Chief Technology Officer, Chief Executive Officer (Carbon Business).*
- (2) *Top 20% of employees is based on compensation. Includes business leadership other than directors. Off-roll employees are not included for this analysis.*
- (3) *Attrition rate refers to the number of employees that left during the period divided by the average number of employees during period.*
- (4) *Average tenure refers to the tenure for employees as of end of a year.*

Hiring

We have built up a pipeline of professionals who have grown into leadership roles within the Company. We take pride in hiring well, with several hires in our core commercial/business development functions from institutes like Indian Institute of Technology Bombay, Indian Institute of Technology Madras, and Lady Shri Ram College and Shri Ram College of Commerce. For example, our regional heads of business development, CEO of the Carbon business, heads of international IREC deals and CEOs of our Thailand and Middle East operations were hired through this program and have each been with us for five to ten years, as of September 30, 2025. Similarly, our controllership function includes 19 chartered accountants, many of whom have “Big 4” experience, including Sushant A. Nagre, our Finance Controller. We emphasize internal referrals, as evidenced by majority of our Offsite EPC teams over the past two years coming through this channel (and not through recruitment agencies). We further intend to continue hiring senior talent from top firms. To ensure our employees’ continued education in managerial, leadership and technical skills, we offer our employees training and development programs. In the past three years, we conducted over 180 learning and development programs, with approximately 90% of employees participating in at least one and receiving over 20 hours of training. Further we emphasize people development through initiatives including reviews, feedback and culture surveys.

Culture of “I belong”

We are focused on establishing an environment where every team member feels a sense of belonging to their teams and the Company, through three key pillars: (i) alignment with our purpose and values; (ii) fulfilment of financial and career aspirations; and (iii) support for work-life integration. We aim to align our focus on being a Net Zero partner to corporates to our employees’ personal values. Our emphasis on individual ownership and accountability is aimed to foster a culture where people feel heard, valued, and trusted. We are committed to employee safety through dedicated investments in this area. We also provide need-based support and enablement to employees, ensuring assistance during challenging times. We prioritize work-life integration and seek to foster an inclusive culture, including through office engagement initiatives and gatherings. Our annual flagship celebration, *Ashirwad Day*, held across eight cities, where employees’ families, including their parents, are invited for an evening of festivities, reflect our commitment to creating a sense of belonging that extends beyond the workplace. We have a culture of internal growth and promotion based on meritocracy.

Team based rewards

We emphasize the team over individual achievements. We offer equity-based incentives that align with overall corporate performance and team achievements. For example, our Business Leadership that were eligible for ESOPs had an average annual ESOP vesting-to-annual salary ratio (calculated as ESOP vesting value as a percentage of cost to company (“CTC”) in a fiscal year) of 222.43% in Fiscal 2025. The top 20% of our employees (based on compensation), excluding KMPs and SMPs, received annual ESOP vesting equivalent to 45.22% of CTC in Fiscal 2025. These structures, combined with relatively long tenures, with an average of 8.00 years for Business Leadership and 4.10 years for the top 20% of employees (including business leadership, based on compensation) as of September 30, 2025, have contributed to the emergence of a performance-oriented team culture.

Particulars	For the Fiscal,		
	2025	2024	2023
	ESOP to annual pay ⁽³⁾ (₹)	ESOP to annual pay ⁽³⁾ (₹)	ESOP to annual pay ⁽³⁾ (₹)
Business Leadership ⁽¹⁾	222.43%	160.95%	112.50%
Top 20% employees ⁽²⁾	45.22%	33.93%	33.75%
All employees	56.10%	37.36%	29.13%

- (1) *Business Leadership as defined above, eligible for ESOPs.*
- (2) *Top 20% of employees is based on compensation. Excluding Business Leadership. Off-roll employees are not included for this analysis.*
- (3) *ESOP to annual pay refers to CTC for employee for full year/ ESOP vesting value in year.*

Our Strategies

Our strategy is guided by the dual approach of (1) preserving our core purpose and values and (2) evolving our operating practices and strategies to address the changing needs of our customers and the evolving energy landscape as noted by our Board pursuant to its resolution dated December 4, 2025.

1. Preserving Our Core Purpose and Values

a) Market leadership in C&I renewables and deepening customer relationships

We aim to expand our leadership in the C&I renewables space, driven by India's accelerating green energy adoption. As per CRISIL report, C&I renewable penetration is expected to rise from 7% in Fiscal 2023 to ~20% by Fiscal 2030. We plan to leverage our execution track record, pan-India presence, and flexible solutions to capture this growth, including proactively developing land and wind & solar evacuation pipelines for STU and CTU projects across 11 high-potential states, which together account for approximately 80% of India's C&I energy consumption as per the CRISIL Report which are Karnataka, Gujarat, Maharashtra, Tamil Nadu, Haryana, Chhattisgarh, Rajasthan, Telangana, Andhra Pradesh, Uttarakhand, and Haryana. Beyond India in the past seven years, we have expanded into Thailand, United Arab Emirates and Bahrain. We continue to evaluate opportunities to expand into new geographies, including Saudi Arabia.

We will continue to deepen relationships with both our key customer groups -Technology and Conventional C&I customers—by expanding our revenue streams through cross-selling and up-selling of our offerings. For Technology customers, a high-growth segment we intend to continue to tailor our offerings to service demand include EAPAs, carbon credit services, and STU Connected- solutions in key states. We will also continue to target new Conventional C&I customer acquisition across sectors aligned with India's structural growth themes, such as Make in India, AI, GCCs, data centres, and infrastructure development.

b) Maintain execution excellence and maintain an ESG focus across our portfolio

We see execution as a core competitive differentiator for us. As we scale across geographies and technologies, we intend to continue investing in strengthening our in-house project development, EPC, and asset management teams' capabilities, including real-time monitoring, to maintain high standards of project delivery, safety, and operational performance.

- *Development:* Strengthen capabilities in land aggregation, evacuation planning, and regulatory approvals to ensure timely readiness of sites in alignment with our customer contracting pipeline.
- *EPC:* Continue to adopt industry-leading practices in quality, project safety, and construction efficiency. Our focus remains on minimizing time-to-commissioning while ensuring cost and schedule discipline. We also intend to continue to evaluate and integrate digital construction management tools and remote progress monitoring platforms to drive transparency, improve contractor coordination, and enhance execution productivity.
- *Asset management:* We plan to continue investing in digital tools and analytics to enhance and upgrade our real-time asset monitoring, including Supervisory Control and Data Acquisition (“**SCADA**”) based control systems, predictive maintenance platforms, and our centralized global operations centre. We seek to achieve industry-leading levels of plant availability, PLF across technologies and other performance ratios. We also plan to further strengthen our in-house capabilities in wind turbine generator monitoring, O&M integration, and lifecycle performance optimization for long-term asset reliability.

In parallel, we will continue to maintain our ESG focus across all phases of our operations. For more details please see “– *Environment, Social & Governance*” on page 334.

2. *Evolving Our Operating Practices and Strategies*

a) *Incorporate BESS in our portfolio in the Renewable Energy Power Sales Segment*

According to the CRISIL Report, battery energy storage systems (“**BESS**”) are becoming crucial in renewable energy offerings, driven by declining storage costs, policy support, and regulatory initiatives like Rajasthan’s 5% BESS mandate, as C&I customers seek power reliability, flexibility, and time-shifted consumption. As such, we plan to integrate BESS with our existing offerings and are evaluating opportunities to partner with technology providers to enable integration of BESS at scale. For applicable risks, see “*Risk Factors - We aim to enter into battery energy storage systems business (BESS). Any failure to launch this offering in time or anticipate related costs and challenges could adversely impact our business and financial condition.*” on page 78.

b) *Develop and scale our Carbon Services offering*

The global carbon markets present a large and rapidly evolving opportunity. According to CRISIL, the voluntary carbon market is expected to reach US\$20-25 billion by 2030. We believe we are well positioned to capitalize on this opportunity, given (i) our deep engagement with C&I customers with sustainability agendas, (ii) our core experience in developing, operating and maintaining long term infrastructure assets, and (iii) the strength of our credentials and balance sheet. Our carbon services offering is synergistic with our core renewable energy platform. To capture this opportunity, we have invested in building a carbon business and we have a dedicated team of specializing project origination, registration, trading, advisory, sales and business development. We plan to pilot initiatives including Agroforestry and Cookstoves.

c) *Enhance and expand our Renewable Energy Services Segment beyond Carbon Services*

Our Renewable Energy Services Segment enables us to deepen customer relationships by cross-selling offerings including:

- **Wind Turbine O&M Services:** We are exploring partnerships to enter the growing wind turbine O&M market, which is a synergistic with our portfolio and a growing market opportunity.
- **Capex Services:** As our STU and CTU project base expands, we plan to scale our turnkey Capex solutions – providing land, evacuation, design, and O&M services – for customers preferring asset ownership.

- Energy Efficiency Solutions: We may explore adjacent energy efficiency offerings in the future to enhance customer energy management and operational efficiency beyond renewables.

d) *Increase focus on capital efficiency to underwrite future growth*

We intend to maintain a disciplined approach to capital deployment, improving overall and project-level unit economics by achieving capital efficiency and maintaining conservative leverage levels. We aim to achieve this via levers including developing co-investment partnerships with investors including Apple, Osaka, Toyota and Kanoo. We retain majority control and achieve non-dilutive growth through these partnerships.

Business Description

We offer a range of renewable energy offerings to our customers across geographies through our two business segments: (i) Renewable Energy Power Sales Segment; and (ii) Renewable Energy Services Segment. The table below outlines the composition of revenue generated from our Renewable Energy Power Sales and Renewable Energy Services segments, detailing the revenue amounts and their respective percentages of total segment revenue for the periods indicated.

Particulars	For the six months ended September 30,				As of March 31,					
	2025		2024		2025		2024		2023	
	Revenue	% of Total Revenue from Renewable Energy Power Sales	Revenue	% of Total Revenue from Renewable Energy Power Sales	Revenue	% of Total Revenue from Renewable Energy Power Sales	Revenue	% of Total Revenue from Renewable Energy Power Sales	Revenue	% of Total Revenue from Renewable Energy Power Sales
Onsite	1,110.81	15.44%	762.68	13.30%	1,677.44	15.15%	1,362.79	15.73%	1,220.55	25.70%
STU Group Captive ("STU-GC")	3,774.59	52.48%	2,768.23	48.26%	5,339.55	48.22%	3,424.77	39.53%	1,881.57	39.63%
STU Third Party, Open Access ("STU-OA")	2,306.75	32.06%	2,205.23	38.44%	4,055.49	36.63%	3,876.08	44.74%	1,646.02	34.67%
Total Revenue from Renewable Energy Power Sales	7,192.15	100%	5,736.14	100%	11,072.48	100.00%	8,663.33	100.00%	4,748.15	100.00%
Capex Services	2,029.06	98.98%	943.08	96.19%	3,622.16	96.17%	5,180.04	100.00%	4,547.67	100.00%
Carbon Services	21.01	1.02%	37.36	3.81%	144.37	3.83%	-	0.00%	-	0.00%
Total Revenue from Renewable Energy Services	2,050.07	100%	980.44	100%	3766.53	100.00%	5,180.04	100.00%	4,547.67	100.00%

1. Renewable Energy Power Sales Segment

Under our Renewable Energy Power Sales Segment, we sell electricity generated at our renewable energy plants to customers through long-term PPAs and EAPAs across a range of offerings. The details of our offerings under this segment are as follows:

a) *Onsite Solar*

Onsite Solar are solar power plants that are located within customer's premises. Examples include, rooftops (reinforced cement concrete or metal sheets), ground-mounted plants, car/ bus parking rooftop systems, solar plants on Onsite ponds or walkways, serving the customer's power requirements, either with or without net metering facilities. Onsite solar was our first renewable energy offering in 2015, and it remains the primary entry point for customers commencing their transition to sustainable energy solutions through our product offerings. Our Onsite Solar projects in India typically average a capacity of 0.55 MWp per project, while our international Onsite Solar projects achieve an average capacity of 0.89 MWp per project as of September 30, 2025. Onsite Solar accounted for 15.44%, 13.30%, 15.15%, 15.73% and 25.70% of our Renewable Energy Power Sales segment revenue for the six months ended September 30, 2025, September 30, 2024, Fiscals 2025, 2024, and 2023, respectively.

The table below provides details of our Onsite Solar offering for the periods indicated:

Onsite power plants	For the six months ended September 30,						As of March 31,								
	2025			2024			2025			2024			2023		
	Number of operational Onsite power plants	Number of PPAs	Total Operational Capacity	Number of operational Onsite power plants	Number of PPAs	Total Operational Capacity	Number of operational Onsite power plants	Number of PPAs	Total Operational Capacity	Number of operational Onsite power plants	Number of PPAs	Total Operational Capacity	Number of operational Onsite power plants	Number of PPAs	Total Operational Capacity
India	1080	475	259.08	1000	421	224.18	1,011	445	240.12	995	416	220.07	941	400	213.50
International	250	113	108.98	183	95	85.34	187	106	98.73	170	91	82.70	122	67	54.78

b) *Offsite*

Through our Offsite offering, we supply renewable power – solar, wind, and hybrid – through large farms, which are contracted via bilateral power purchase agreements with C&I customers.

- (i) **STU-Connected:** We supply renewable power generated at our STU-connected farms through the state transmission network for customers located within the same state (“**STU-Connected**”). We execute STU-Connected projects under two key models:
 - o *STU Group Captive:* Under the STU Group Captive model, the customer invests at least 26% equity in a SPV established by us and consumes a minimum of 51% of the power generated to qualify as a group captive consumer under the Electricity Act. In most of our STU Group Captive contracts, our customers purchase all of the energy generated, which exceeds the Electricity Act requirement. STU Group Captive model is aimed at leveraging certain policy benefits applicable under the Electricity Act, 2003, with respect to levy of cross-subsidy surcharges and additional surcharges. See “*Key Regulations and Policies in India*” on page 344. Accordingly, this model offers electricity cost savings of 25.25 - 40.10% (average 33.68%) and 27.63 – 54.30% (average 36.69%) through exemptions from cross-subsidy and surcharge levies during Fiscal 2025 and as of September 30, 2025, respectively in the States of Gujarat, Karnataka, Tamil Nadu, Haryana, Chhattisgarh (for September data only) and Maharashtra. This STU Group Captive model allows our customers to seamlessly scale their power offtake with us - either within the same SPV or by replicating this model in other states - without needing to form a new legal entity. As of September 30, 2025, we have 98 group captive Subsidiaries.
 - o *STU Third Party, Open Access:* We also supply power via STU- Third Party, Open Access model, where we do not require customer equity participation and supply power pursuant to PPAs. In most states, this model does not exempt customers from cross-subsidies or additional subsidy surcharges, and therefore generally results in lower cost savings for customers as compared to the Group Captive structure. However, our farms in Gujarat, Karnataka and Tamil Nadu have secured policy incentives including CSS/ASS waivers, since they were commissioned within the timelines specified in the policy, enabling us to offer cost savings for customers. For details, see “*Key Regulations and Policies in India*” on page 344. As of September 30, 2025, we have commissioned an aggregate of 539.84 MW of capacity from under the STU Third Party, Open Access model.

The table below provides details of our STU Offsite offering for the periods indicated:

Offsite	For the six months ended September 30,				March 31,					
	2025		2024		2025		2024		2023	
<i>STU-Connected</i>	231	1942.26	170	1198.89	181	1,373.95	149	1,039.49	76	486.22
<i>STU Group Captive</i>	118	1402.42	69	707.23	80	882.29	53	567.30	26	252.93
<i>STU Third Party Open Access</i>	113	539.84	101	491.66	101	491.66	96	472.19	50	233.30

- (ii) **CTU-Connected:** We are currently constructing projects in high wind generating and solar irradiation states in India such as Rajasthan and Karnataka, according to the CRISIL Report, and plan to supply the energy generated from such plants to customers located within and outside the relevant states

through the CTU (“**CTU-Connected**”). These CTU-connected projects will enable us to support pan-India operations for corporate customers in multiple ways. Customers with facilities across different states can aggregate demand to purchase electricity under multiple PPAs. Customers with facilities in states where STU-connected projects are not viable or feasible can access power through our CTU-connected projects. Additionally, customers can contract for environmental attributes through EAPAs without the need for purchasing physical electricity. We did not have any CTU connected Operational Capacity as of September 30, 2025. However, 1,421.10 MW of CTU connected capacity is contracted and yet to be executed as of September 30, 2025. The below table describes the movement in our PPA contracted capacity in our Renewable Energy Power Sales segment across the six months ended September 30, 2025, Fiscals 2025, 2024 and 2023.

Description		Onsite - India	Onsite - International	STU – Group Captive	STU – Open Access	CTU-Connected	Total
For the six months ended September 30, 2025	PPA contracted at start of year yet to be commissioned (A)	18.45	51.35	1154.55	64.56	1421.10	2710.01
	PPA/LOIs contracted during the year (B)	7.54	36.61	275.56	11.88	-	331.58
	Projects commissioned during year (C)	18.60	10.23	520.13	48.19	-	597.14
	PPA contracted yet to be commissioned at end of year (A+B-C)	7.39	77.73	909.98	28.25	1421.10	2444.45
For the six months ended September 30, 2024	PPA contracted at start of year yet to be commissioned (A)	5.96	14.33	364.90	19.46	-	404.65
	PPA/LOIs contracted during the year (B)	8.13	9.03	289.68	29.21	-	336.06

Total		1,711.05	283.50	371.97	429.58	2,796.1

Note: Onsite solar projects are 479.21 MWp as of September 30, 2025 (i.e., 17% of operational capacity). These projects are across 1,403 rooftops and 744 PPAs. Average capacity per PPA is less than 0.71 MW. Given the large number of projects, the projects are categorized in two categories: (i) Onsite Solar Opex (368.06 MW) across 3 geographic regions i.e., India, Middle East and Thailand; and (ii) Onsite solar Capex (111.15 MW) across three geographic regions i.e., India, Middle East and Thailand. These onsite projects are capitalized on the customer's books.

2. Renewable Energy Services Segment

a) Capex Services

We assist customers in designing, developing, constructing and maintaining renewable energy plants owned by them and capitalized on the customer's financial records. The plants may take the form of Onsite Solar plants installed within the customer's premises or STU-Connected projects located within CleanMax - developed STU-Connected solar, wind or hybrid farms. We offer turnkey development services, including land, evacuation infrastructure, EPC services, and power evacuation and O&M services for the lifetime of the projects. The following table provides details of our Capex Services for the periods indicated:

Capex services	For the six months ended September 30,				As of March 31,					
	2025		2024		2025		2024		2023	
	Number of Commissioned projects	Total Commissioned Capacity (MW)	Number of Commissioned projects	Total Commissioned Capacity (MW)	Number of Commissioned projects	Total Commissioned Capacity (MW)	Number of Commissioned projects	Total Commissioned Capacity (MW)	Number of Commissioned projects	Total Commissioned Capacity (MW)
	240	485.78	217	422.92	232	465.20	214	412.95	184	285.63

b) Carbon Services

We started offering Carbon Services in 2018 by unbundling environmental attributes - specifically I-RECs - from certain group captive projects and monetizing them separately. In 2023, we formally established Carbon Services as a dedicated offering. We offer customers a full suite of scope 1, 2 and 3 Net Zero offerings to meet their carbon neutrality mandates, including offering (i) environmental attributes, such as I-RECs; and (ii) carbon credits derived from carbon removal and carbon avoidance mechanisms. We also provide advisory services to other corporates to generate carbon credits from their projects. We are also running multiple pilot carbon credit projects - for instance:

- **Cookstoves Initiative –Maharashtra.** This for-profit initiative aims to help rural households transition from traditional firewood-powered cookstoves (chulhas) to more fuel-efficient models. While these upgraded cookstoves will continue to use firewood, their increased efficiency will reduce the amount of firewood needed for cooking, thereby decreasing carbon emissions. We aim to register this project with international registries that issue carbon credits based on validated and verified carbon emission reductions. In addition to decarbonization, the project offers significant community co-benefits, including improvements in health, gender equality, and livelihoods. This initiative has received commendation from the Chief Minister of Maharashtra, and we plan to expand the project to other areas within the state.
- **Agroforestry Projects.** We intend to pilot regenerative agroforestry projects in collaboration with local communities and technical partners in the state of Maharashtra. We aim to design these projects to generate long-duration carbon credits by capturing atmospheric carbon. In addition to decarbonization, these initiatives hope to enhance biodiversity.

Customers

We define customers to include all companies under the same group of companies as a single customer. The following table provides details of the total Operational Capacity, number of customers, average type capacity per customer and average capacity per PPA for our Renewable Energy Power Sales Onsite and Offsite offerings:

Particulars		Onsite Solar	STU Group Captive	STU Open Access	CTU	Capex	Total
For the six months ended September 30, 2025	Operational Capacity (MW)	368.06	1,402.42	539.84	-	485.78	2,796.10
	Contracted yet to be executed capacity (MW)	85.12	909.98	28.25	1,421.10	93.73	2,538.18
	Total capacity (MW)	453.18	2,312.40	568.09	1,421.10	579.50	5,334.28
	Number of Customers	312	96	89	4	153	555
	Average Capacity per Customer ⁽¹⁾ (MW)	1.45	24.09	6.38	355.28	3.79	9.61
	Average Capacity per PPA ⁽²⁾ (MW)	0.71	12.50	4.86	157.90	2.30	4.45
For the six months ended September 30, 2024	Operational Capacity (MW)	309.53	707.23	491.66	-	422.92	1,931.34
	Contracted yet to be executed capacity (MW)	31.51	514.65	29.21	-	62.20	637.57
	Total capacity (MW)	341.04	1,221.88	520.87	-	485.12	2,568.91
	Number of Customers	279	53	83	-	145	481

Fiscal 2023	Operational Capacity (MW)	268.28	252.93	233.30	-	285.63	1,040.14
	Contracted yet to be executed capacity (MW)	29.84	226.63	247.29	-	77.21	580.97
	Total capacity (MW)	298.13	479.55	480.59	-	362.84	1,621.12
	Number of Customers	252	24	75	-	133	421
	Average Capacity per Customer ⁽¹⁾ (MW)	1.18	19.98	6.41	-	-	3.85
	Average Capacity per PPA ⁽²⁾ (MW)	0.60	11.70	5.06	-	-	7.76

(1) "Average capacity per customer" is calculated as total operational and contracted yet to be executed capacity divided by offering wise/total customer groupings.

(2) "Average capacity per PPA" is calculated as total operational and contracted yet to be executed capacity divided by offering wise signed PPAs/LOI as of date.

We serve customers primarily across two categories: (i) Technology customers; and (ii) Conventional C&I customers. The following table provides details of the proportion of Operational Capacity and Contracted Capacity attributable to each of our key customer groups for the periods indicated:

Particulars	For the six months ended September 30, 2025
-------------	---------------------------------------------

	Operational Capacity (MW)	Percentage of Total Operational Capacity (%)	Contracted Capacity (MW)	Percentage of Total Contracted Capacity (%)	Total Capacity (MW)	Percentage of Total Capacity (%)
Technology customers	316.79	11.33%	1563.20	61.59%	1879.99	35.24%
Conventional C&I customers	2479.31	88.67%	974.98	38.41%	3454.29	64.76%

Customer 9	221.97	2.38%	Renewable Energy Power Sales segment
Customer 10	203.80	2.19%	Renewable Energy Power Sales segment

The names in the tables above are anonymised as we did not receive consents to name the customers. Further, none of our related parties form part our top 10 customers for Fiscal 2025 and in the six months ended September 30, 2025.

Technology customers

1. Case Study 1: Google India Private Limited (“Google”) – Enabling growing operations and decarbonization strategy in India

- *Customer Objective:* Support the decarbonisation of Google’s cloud services and offices across India enabling Google’s sustainable growth in India.
- *CleanMax Approach & Solution:* We structured an agreement where CleanMax will develop a 158.40 MW project, consisting of 99 MW solar generation capacity in Rajasthan and 59.40 MW of wind generation capacity in Karnataka. These projects will be connected to the national grid of India and aim to support Google’s objective.
- *Outcomes Achieved:* These projects contracted and are expected to generate an estimated 350,000 million kWh of carbon free energy annually, reducing CO2 emissions by approximately 250,000 tons each year.

2. Case Study 2: CISCO – Long term decarbonization partnership

- *Customer Objective:* Cisco Systems, Inc. aims to integrate sustainability into its operations, and achieve Net Zero greenhouse gas emissions across its value chain. Pursuant to this goal, they seek to power their campuses in India with renewable energy.
- *CleanMax Approach & Solution:* We started our association with Cisco from 2017 to deliver 120.35 MW of renewable energy solutions for their India operations. A significant stride in this partnership is the commissioning of a 92.10 MW hybrid wind-solar project in Jagalur, Karnataka in 2024, which now powers Cisco’s India campus in Karnataka - one of its largest outside the United States – marking a major milestone in their sustainability goals. This hybrid energy solution is projected to generate approximately 181.4 million kWh annually, helping avoid about 0.129 million metric tonnes CO₂ and greenhouse gas emissions each year.
- *Outcomes Achieved:* This multi-year engagement has empowered Cisco to address over 90% of its electricity needs in Karnataka. Cisco recognised us with the Excellence in Sustainability Award at Cisco’s Global Supplier Day in San Jose, California for its impactful contributions in reducing greenhouse gas emissions across the years. The following table outlines the contracts with Cisco over the years:

PPA Signing	Site	Offering	Solar (MWp)	Wind (MW)	Total (MW)
Dec 2017	Sedam, Karnataka	STU Open Access	13.90	-	13.90
Dec 2017	PD Halli, Karnataka	STU Open Access	14.35	-	14.35
Dec 2023	New Jagalur, Karnataka	STU Group-Captive	69.00	23.10	92.10
Total			97.25	23.10	120.35

3. Case Study 3: Supporting ‘Climate Pledge Commitment’ for Amazon

- *Customer Objective:* Amazon intends to achieve net-zero carbon emissions and is working to power its India operations entirely with renewable energy.

- *CleanMax Approach & Solution:* CleanMax structured an agreement with Amazon to develop a 100 MW wind energy project in Koppal, Karnataka which will be connected to the national grid and will help Amazon’s operations meet its electricity consumption needs.
- *Outcomes achieved:* The project is expected to be operational by Q2 2026, generating roughly 355 million kWh of clean electricity annually and offsetting an estimated 252,000 tons of CO₂ annually.

The below table highlights details of select other Technology customer relationships:

S. No	Customer	Year of contract	CleanMax offering	Capacity MW (Operational + Contracted)
1	Equinix India Private Limited (“ Equinix ”)	2024	STU-Connected Group Captive contract	33
2	A global data centre	2020-2023	Multiple STU-Connected group captive and Onsite Solar contracts	More than 60
3	A global data centre	2014 onwards	Multiple Onsite Solar, renewable energy service contracts and STU-Connected group captive and STU connected Open access	More than 40

Conventional C&I customers

1. Case study 1: Enabling Bangalore International Airport Limited (“BIAL”) towards sustainable airport development

- *Client Objective:* BIAL aims to be a sustainable airport development and partnered with us to provide renewable energy to their facility.
- *Cleanmax Approach and Solution:* Our collaboration with BIAL began in 2016 with the commissioning of a 0.5 MWp rooftop solar installation. Subsequently, a 13 MWp solar power supply agreement was signed in 2018 through our Karnataka open access solar farm. Most recently, in 2023, we partnered with BIAL to deliver 36 MWp of solar energy and 9.9 MW of wind energy under the Group Captive model - further cementing our partnership and advancing BIAL’s sustainability journey.

2. Case study 2: Sansera Engineering Limited (“Sansera”): Long-term partnership

- *Client Objective:* Sansera, a precision engineering company in the automotive sector, sought to embed sustainability principles within its operations through decarbonization and sustainable supply chain development.
- *CleanMax Approach and Solution:* Between 2017 and 2024, Sansera contracted 34.44 MWp of solar capacity and 15.60 MW of wind capacity from us under long-term agreements. These renewable energy installations, primarily located in Karnataka, supply a substantial portion of Sansera’s power requirements, contributing to the Sansera’s decarbonization goals and operational cost optimization. The partnership continues to grow, with additional Contracted Capacity: 3.3 MW of wind capacity and 24.75 MWp of solar capacity in Karnataka, and a 5.00 MWp solar capacity in Maharashtra.
- *Outcome:* The CleanMax–Sansera collaboration demonstrates the value of multi-year renewable energy engagements in delivering decarbonization at scale. The projects contribute toward Sansera’s GHG emissions reduction targets while also offering energy cost stability.

3. Case study 3: Sona BLW Precision Forgings Limited (“Sona Comstar”): Collaboration under nascent group captive regulations in Haryana

- *Customer Objective:* Sona Comstar, a manufacturer of automotive systems and components, sought a renewable energy partnership to support its facilities in Gurgaon and Manesar, as well as its newly operational plant in Chakan, Maharashtra. This initiative is part of their broader strategy to meet their internal Scope 2 emissions reduction targets.

- *CleanMax Approach and Solution:* Haryana was a relatively new entrant to group captive regulations, with key policy changes coming into effect in 2023, including the waiver of cross-subsidy and additional surcharges. We partnered with Sona Comstar to take advantage of this progressive environment under the updated regulatory framework. In September 2024, we commissioned a 14.85 MWp captive solar facilities to power Sona Comstar’s operations in Gurgaon and Manesar. Building on this success, the partnership expanded to support Sona Comstar’s new Chakan plant, where a 4.00 MWp captive solar project is under development and targeted for commissioning later this year.
- *Outcomes Achieved:* This partnership helps Sona Comstar achieve upwards of 30% renewable energy offset across the facilities we serve, while also delivering savings versus grid tariffs.

4. Case study 4: Welspun Living Limited (“Welspun Living”): Partnership to Meet Sustainability Requirements

- *Customer Objective:* Welspun Living has undertaken an enterprise-wide program to reduce its carbon footprint through long-term adoption of renewable energy, which extends across its multiple Welspun Group companies.
- *CleanMax Approach and Solution:* We worked with the Welspun Group companies to develop a green energy procurement roadmap leveraging both solar and wind technologies. The plan was designed to offset a significant portion of Welspun Group companies’ power requirements through flexible portfolio of renewable energy sources. Welspun Group Companies signed a mix of open access and group capture contracts to serve multiple facilities across Gujarat.
- *Outcomes Achieved:* The partnership began in May 2022 with the first contract signed by a Welspun Group company for hybrid solar-wind power from our farms in Gujarat. This engagement paved the way for two additional contracts with other companies in the Welspun Group. As of March 31, 2025, Welspun Group companies have contracted with us for an operational renewable capacity of 12.90 MW of wind energy and 10.98 MWp of solar energy.

5. Case study 5: Enabling a cement player to procure renewable energy across 3 Indian states

- *Customer Objective:* The customer was looking to transition multiple cement plants across India to renewable energy, reducing dependency on thermal power and aligning with their long-term sustainability goals.
- *CleanMax Approach and Solution:* We started our association with this customer in 2017 and have since maintained a long-term relationship. We began with providing them Onsite Solar installations. Over the years, the relationship has deepened through multiple Group Captive PPAs, with the customer making equity investments under the Group Captive model. This approach has enabled them to scale their renewable energy portfolio across multiple plants in three states.
- *Outcomes Achieved:* The customer’s Contracted Capacity with CleanMax has grown from less than 2 MWp in Fiscal 2017 to over 250 MW as of Fiscal 2025.

Diversification across clients and sectors

Our growth is underpinned by our ability to attract and leverage a diversified platform across four key dimensions: clients, contracting strategies and technologies. Consequently, we have achieved a mix of contracted offerings as shown in the table below:

Category	Operational Capacity (MW)					Operational Capacity (% of total)				
	For the six months ended September 30, 2025	For the six months ended September 30, 2024	Fiscal 2025	Fiscal 2024	Fiscal 2023	For the six months ended September 30, 2025	For the six months ended September 30, 2024	Fiscal 2025	Fiscal 2024	Fiscal 2023
Onsite	368.06	309.53	338.84	302.77	268.28	13.16%	16.03%	15.56%	17.25%	25.79%

Total	2796.10	1931.34	2,177.99	1,755.21	1,040.14	100%	100%	100.00%	100.00%	100.00%

Our Customer Contracts

Our growth is counterbalanced by a de-risked business model, bolstered by certain economic protections within our PPAs, which are customized to address the specific risks associated with each offering. At a portfolio level, we have a PPA tenure of 22.85 years; with weighted average lock-in periods of 16.86 years.

- Onsite Solar:* While Onsite Solar projects are built directly on customer premises, we retain ownership and operational control of the plant. Consequently, these contracts typically feature relatively stringent lock-in periods and termination penalties to safeguard our investment and ensure financial stability, which include a plant buy-back option by the customer at a price that allows us to recover revenue for the remaining contractual term. As of September 30, 2025 the average PPA tenor for our Onsite Solar projects is 20.20 years and weighted average lock-in period is 19.61 years.
- Offsite:*

 - STU Group Captive:* In the event of customer termination or inability of the customer to offtake the guaranteed consumption under the group captive project, we typically have built-in clauses that allow us to offer power generated by these plants to new customers by negotiating a new PPA without altering the physical infrastructure of the plant. As of September 30, 2025, STU Group captive PPAs have a weighted average tenure of 24.53 years and a weighted average lock in period of 13.37 years. We generally negotiate termination penalties equivalent to an weighted average of eight months of revenue after five years of lock in period and four months of revenue after 10 years of lock in period. This approach helps ensure sufficient time for us to identify and contract with a new customer and facilitate shareholding changes within the group captive structure.
 - STU Third Party Open Access:* These projects are primarily located in states like Karnataka and Gujarat, leveraging policy benefits for cross subsidy surcharge waivers under the 2018 and 2023 policies, respectively. For more information on these policies, see “*Key Regulations and Policies in India – State level policies and regulations*” in page 353. We expect that due to the cross-subsidy surcharge waiver associated exclusively with these plants, we will be able to attract customers at a tariff premium even in the case of termination of existing PPAs. As a result, these contracts typically feature shorter lock-in periods or termination penalties compared to the rest of our portfolio. More than half of our operational capacity under the STU Third Party Open Access model as of September 30, 2025 had an weighted average lock-in period of 8.53 years. For the remaining capacity, while lock-in periods are not specified, contracts specify a weighted average termination penalty of 5 months of revenue after 5 years of PPA signing and 4 months of revenue after 10 years of PPA signing to ensure sufficient time to identify and contract with a new customer. Our STU Third Party Open Access PPAs have a weighted average tenure of 17.34 years as of September 30, 2025.
 - CTU-Connected Projects:* Our CTU projects typically have an average tenor of 23.17 years. 81.82% of contracted capacity (i.e., 1162.70 MW) has lock-in periods equivalent to PPA tenor. For the balance capacity with no defined lock-in periods (258.40 MW), penalties are based on calculations for gains/losses at the time of termination to ensure same economic position with/without contract based on exchange prices for energy at time of termination.

For CTU contracts, physical electricity generated from the CTU projects is sold on power exchanges, while International Renewable Energy Certificates (“*IRECs*”) are settled with the customer, reflecting a structure that combines both physical delivery and virtual attribute transfer.

Settlement of electricity transactions with the power exchanges occurs on a daily basis at 15 minute intervals, whereas settlement of IRECs with clients typically occurs on a monthly basis.

For EAPA contracts, the contracting entity is generally a subsidiary or an associate of the main parent entity. In case the credit ratings of customers falls below a specified credit ratings threshold, the customer or buyer under the EAPA provides a parent company guarantee, and the seller (i.e., the relevant Cleanmax entity) provides credit support in the form of a letter of credit from a bank.

Under all EAPA contracts, there is a 100% offtake obligation on the customer for all energy attributes generated from the project. The physical electricity is sold on power exchanges. For risks related to selling electricity on exchanges, see “*Risk Factors – Selling electricity on exchanges carries inherent risks due to the variability and unpredictability of market prices*” on page 59 of the DRHP. As of September 30, 2025, we had 1,331.1 MW of contracted capacity in the states of Karnataka and Rajasthan which, when built, will be connected to the CTU, and for which we will be selling power on the exchange. Under the terms of our contracts with customers, in relation to 1,111.7 MW of the total contracted capacity, the customer is required to compensate us for any shortfalls in the price of electricity sold on the exchanges. Thus, 83.52% of this portfolio is secured from the risk of price fluctuations associated with selling on these exchanges. As of September 30, 2025, we did not have any operational CTU projects.

Our contracts with the top 10 customers of our operational projects for the Fiscal 2025 range from a weighted average tenor of 20 to 25 years. The weighted average days sales outstanding for the Company’s top 10 customers is 41.66 days. Further, the contracts with such customers do not require security deposits to be made by the customers or us. However, certain bank guarantees or performance bank guarantees as specified under the contracts are required to be furnished by the respective parties. As of the date of this Prospectus, our Company does not have any disputes with any of these customers. Contracts with such customers typically also provide for termination clauses giving right to customers for termination (a) upon expiry of lock-in period by making specified payments (b) due to any delay in commissioning of projects beyond specified time periods (c) due to any failure by us to achieve minimum guarantee savings protections (d) due to any failure by us to meet specified electricity generation thresholds and/or (e) business exigencies. Such contracts also provide for termination clauses giving us a right to terminate (a) upon any failure of the customer to meet guaranteed offtake obligations (b) upon failure of the customer to make timely payments in the required manner.

For the operational capacity as of September 30, 2025 of 2,796.10 MW, 184 PPAs aggregating to 1,620.1 MW have minimum savings guarantee to customers. This includes PPAs with a grid cap, i.e., where the difference between the landed tariff to the client and the grid tariff must be maintained at a minimum of ₹0.01/kWh at all times. Of these, 74 PPAs aggregating to 670.4 MW have a floor tariff. For the contracted capacity of 2,538.18 MW as of September 30, 2025, 51 PPAs aggregating to 736.9 MW have minimum savings guarantee to customers. This includes PPAs with a grid cap, i.e., where the difference between the landed tariff to the client and the grid tariff must be maintained at a minimum of ₹0.01/kWh at all times. Of these, 38 PPAs aggregating to 577.9 MW have a floor tariff.

The following tables provides for details of the tariff contracted during the period and the average PPA tenor for capacity under different contracting models:

Contracting type	Units	For the six months ended September 30, 2025		For the six months ended September 30, 2024		Fiscal 2025		Fiscal 2024		Fiscal 2023	
		Contracted Capacity	Weighted average tariff	Contracted Capacity	Weighted average tariff	Contracted Capacity	Weighted average tariff	Contracted Capacity	Weighted average tariff	Contracted Capacity	Weighted average tariff
Onsite India	₹ per kWh	7.54	4.06	8.13	4.85	32.54	4.32	8.92	4.66	4.97	5.00

Case Studies

- **Co-investment with Apple:** Our subsidiary Clean Max Hyperion Power LLP and Apple South Asia Pte. Ltd. (“**Apple**”) have collaborated to co-invest in a portfolio of six rooftop solar projects with a total size of 14.4 megawatts. The added capacity provides a local solution to power Apple’s offices, its two retail stores in the country and other operations in India.
- **Co-investment partnership with Osaka Gas Co. Ltd. (“Osaka Gas”):** We entered into a joint collaboration with Osaka Gas. As part of this collaboration, a consortium formed between Osaka Gas’ subsidiary, Osaka Gas Singapore Pte. Ltd., and the Japan Bank for International Cooperation will co-invest with us. In its first phase we aim to build and operate renewable energy plants with a combined capacity of approximately 300 MW. This collaboration will enable Osaka Gas to enter the growing C&I market in India and partner with clients in India. As of the date of this Prospectus, we have signed a memorandum of understanding, shareholder’s agreement and share subscription agreement for the partnership.
- **Partnership with Yusuf Bin Ahmed Kanoo Company W.L.L (“Kanoo”) in Bahrain:** We have formed a partnership with Kanoo to co-develop Onsite Solar solutions for C&I consumers in Bahrain. We hold an 50% shareholding in the subsidiary with operating control. As of the date of October 31, 2025, we have invested in 10.90 MW of Onsite Solar Capacity through this partnership.
- **Co-investment collaboration with Toyota Tsusho Corporation (“Toyota Tsusho”):** We formed a partnership with Toyota Tsusho, a wholly owned subsidiary of Toyota Tsusho Corporation Japan, a member of the Toyota Group. The partnership entity aims to leverage synergies between both companies to develop and operate 300 MW of renewable energy projects for corporates by March 2028. The newly created entity will serve as a platform to provide tailored green energy solutions for corporates, beginning with Toyota Group companies in India, and to support other Japanese businesses in India through long-term Corporate Power Purchase Agreements (“**CPPAs**”). This solidifies CleanMax’s strategy around global collaborations focused on helping corporations reduce their carbon footprint, while enabling the company to achieve its growth targets in a more capital-efficient manner.

Our Execution Capabilities

As part of our execution strategy, we adopt a proactive approach to project development to ensure capacity readiness in line with our growth trajectory. We secure land, evacuation approvals, and regulatory clearances well in advance of customer contracting to enable timely execution and minimize development risk. Our development team continuously tracks customer demand patterns, policy evolution, and resource availability to identify priority markets and build a pipeline of executable sites. The following diagram illustrates the typical stages of our project lifecycle from procurement of land and evacuation to commissioning:

Case study: Execution across our multi-phase Jagalur Farm

Our co-located wind-solar project in Jagalur, Karnataka showcases our end-to-end execution capabilities. Designed as a scalable, multi-client hybrid platform under Group Captive, Open Access models, it serves Conventional C&I consumers across Karnataka. By integrating wind and solar at the same site, the project optimizes transmission use, land efficiency, and generation profiles to lower levelized cost of energy.

- Project Development:** We secured 510.30 MW evacuation approvals across 2020 to 2025 of which 479.13 MW has been commissioned over four phases by September 30, 2025. Strategic land acquisition allowed us to locate our substation just 320 meters from the grid, minimizing losses and costs. Detailed resource assessments guided site micro-siting for optimal yield. As of September 30, 2025, the farm serves 27 Conventional C&I customers across sectors, with contract sizes ranging from 1.50 to 73.80 MW. The farm offers 24.08-29.41% savings over grid tariffs and has achieved a weighted average tariff of ₹3.80/kWh. In Fiscal 2025, 73.03% of the farm capacity was contracted with repeat customers.
- EPC:** Our in-house EPC model ensured the project was delivered within budget. Our in-house execution model is particularly critical for Conventional C&I customers, whose requirements often vary significantly based on customer load profile coupled with relevant state level regulations. Each large CleanMax farm is sub-divided into individually engineered units aligned with specific customer contracts, necessitating detailed customization in design, sizing, and compliance - all of which are efficiently managed through our internal teams. Further, we deployed Envision 3.3 MW and GE 2.7 MW WTGs with digital controls, and a mix of bifacial, n-type, and TOPCon solar modules. Further, multi-phase development brought economies of scale through shared common infrastructure across project phases, lower O&M costs, and group negotiation with suppliers for delivery of key equipment.

- *ESG focus in execution:* Our EHS policy focuses on proactive risk management, strict safety protocols, and continuous training. Construction is monitored with mandatory checks, on-site safety teams, and emergency systems. We integrate environmental safeguards to ensure sustainability in execution. Further, our Jagalur farm brought local socio-economic impact, temporary construction jobs and permanent O&M roles, boosting community skills and economic stability.
- *Asset Management and Operations:* Our asset management function uses a third-party platform that consolidates data from SCADA and we deploy IoT sensors and AI to track equipment health to analyse the consolidated data in real time, enabling proactive issue identification before failures occur reducing downtime and maintenance costs. A combination of selection of the right sites, execution excellence and asset management have resulted in hybrid PLFs of 49.80% for Fiscal 2025 and plant availability of 98.51%.

Project Development

The objective of project development is to ensure appropriate evacuation approval and land availability to support our growth pipeline. Successful project development requires two key components: (1) power evacuation approvals and (2) land rights.

1. *Power Evacuation Approvals*

This stage involved procuring necessary evacuation approvals before we enter into contracts with customers. As of September 30, 2025, we have a total of 4,943.94 MW of firm and unused power evacuation capacity available, which is critical to enable our future growth requirements. The table below provides our unused evacuation capacity for our STU-Connected and CTU-Connected farms as of the dates mentioned below.

STU-Connected

CTU-Connected

Location	Type	Capacity (MW)	Month, year of receipt of in-principle connectivity	COD (earlier of grid or client commitment)	Contracting status (2)
Bikaner 2, Rajasthan	Solar	525.00	Oct-24	Dec-25	100% contracted
Bikaner 4, Rajasthan	Solar	450.00	Feb-24	Nov-26	81.67% contracted
Koppal, Karnataka	Hybrid	450.00	Mar-24, Jan-25	Jun-26	100% contracted
Lakadia, Gujarat	Hybrid	450.00	Mar-25	Oct-27	100% contracted

Kurnool V , Andhra Pradesh ⁽³⁾	Hybrid	552.70	Sep-25, Oct-25	Dec-28	To be contracted
Ananthapuram-III Andhra Pradesh ⁽³⁾	Hybrid	656.30	Oct-25	Dec-28	To be contracted

- (1) Contracted is capacity tied up via PPAs/ LOIs as of October 31, 2025.
- (2) Contracting status means percentage of the mentioned capacity committed to a customer under a Power Purchase Agreement (“PPA”) or Letter of Intent (“LOI”).
- (3) Connectivity agreed for grant in CTUIL’s Consultation Meeting for Evolving Transmission Schemes-South Region, awaiting letter for in-principle grant.

2. **Project – Contracted Capacity**

Although land generally accounts for around 5% of the total project cost, it is crucial to have land in a timely manner to support project evacuation, in sufficient quantity, with suitable resource quality (especially important for wind site micro siting), and in a construction-friendly manner. Additionally, it must have clear titles to avoid litigation risks that could affect the plant’s safe and continuous operations. Furthermore, the land should be within a reasonable distance of the substation to manage the risk and complexity of constructing the transmission line from the pooling substation (“PSS”) to the grid substation (“GSS”).

The following table provides a status of our Under Development capacity (as on October 31, 2025) that is scheduled to be commissioned by July 31, 2026.

Type	Site	Solar Capacity (MWp)	Wind Capacity (MW)	Contracting status	Evacuation status	Project type	Land status		Financing status (% of total capacity sanctioned)	Procurement & construction status
							(% of required land acquired/ leased/entered into agreement to lease or sell^)			As on October 31, 2025
							Solar	Wind

	Total	979.57	366.90							

* Capex Site, 100% of the required land being owned by the client.

PSS = Pooling Sub-station; (2) TL = high voltage Transmission Line connecting PSS and GSS for the project; (3) Solar capacity = status of EPC for solar capacity (4) Wind capacity - status of EPC for wind capacity (5) ATS/ ATL = Agreement to Sell/ Agreement to Lease (6) WTG = Wind Turbine Generator (7) Land acres per MW/MWp references have been taken from plant layouts for the respective projects (8) Contracting status means percentage of the mentioned capacity committed to a customer under a Power Purchase Agreement ("PPA") or Letter of Intent ("LOI") and (9) Financing tied up = Includes Opex capacities for which sanction letters have been received and 71.94 MW Third party capex projects for which project financing is not required, hence are considered to be fully financed

for the purpose of the above table. Capex capacities are in Vaghasiya (18.90 MW), Isharwal (2.00 MW), Honawad (3.30 MW), Jagalur 2.0 (28.23 MW), Amaravati (12.00 MW) and Dindigul (7.50 MWp).

^ For risks pertaining to land contracted through ATL or ATS, see “ - We may suffer significant construction delays and finance or construction cost increases in excess of our expectations, leading to time and cost overruns, or we may not be able to acquire the required land rights which could have a material adverse effect on our business, cash flows, financial condition, results of operations and reputation ” on page 57.

3. *EPC and O&M*

We use O&M technologies such as digital tools and analytics to enhance real-time asset monitoring, including Supervisory Control and Data Acquisition (“**SCADA**”) based control systems, predictive maintenance platforms, and our centralized global operations centre. Our operations are underpinned by our commitment to operational health and safety. We have been awarded Silver award CII-SR EHS Excellence Awards 2024 for excellence in EHS practices in Energies and Utilities sector, ISO certifications, and awards from the British Safety Council for multiple locations in our Offsite and Onsite business. We had no recordable work-related injuries reported by employees from Fiscal 2023 to Fiscal 2025 and in the six months ended September 30, 2025, and one reportable incident of injuries for contractors from Fiscal 2023 to Fiscal 2025 and until September 30, 2025.

Our Suppliers

We prioritize quality in our equipment and construction vendor partnerships. Our wind turbines are sourced from suppliers such as Envision who account for 55% of our operational fleet and 100% of our outstanding orders. For our solar panels, prior to the Approved List of Models and Manufacturers import restrictions (“**ALMM**”) in April 2024, we sourced over 95% from international suppliers. After ALMM was introduced, we expanded our sourcing to include domestic suppliers such as from Emmvee and Renew Photovoltaics Private Limited. See “*Risk Factors – Our ability to deliver projects in a timely manner depends on our ability to secure key equipment from suppliers in a timely manner and the cost of solar modules and wind turbine generators, and any delays in the procurement of such equipment may result in project delays and cost overruns and subject us to penalties*” in page 67. The table below provides the breakdown of our supplier as of September 2025.

Table: CleanMax key WTG and Module suppliers (Operational fleet as of September 2025)

We enter into supply agreements with our suppliers for sourcing parts and equipment for our operations. Typical terms under these agreements are as follows:

1. Solar module suppliers typically provide a product warranty of around 12 years and a limited power output warranty of around 30 years. Suppliers also provide guarantees for module performance and/or power output based on agreed thresholds. These agreements also typically include a cap on liquidated damages for delayed delivery of up to 5% of the contract value or purchase consideration and an overall limitation of liability of up to 100% of the purchase price and additional amounts, depending on the nature of the liability. During the supply phase, each party may terminate the agreement in case of a breach of material provisions in the contract (including material defects), bankruptcy, or insolvency.
2. Wind WTG suppliers typically provide defect liability coverage for the initial few years post commissioning or WTG dispatch. Additionally, they provide power curve guarantees based on agreed thresholds. Most contracts feature caps on liquidated damages, and suppliers typically provide performance bank guarantees. During the supply phase, each party may terminate the agreement in case of a breach of material provisions in the contract (including material defects), bankruptcy, or insolvency.
3. Balance of Parts suppliers (e.g., steel, cables, BOP EPC) typically operate under purchase order-based contracts that include select terms on product warranty. Most contracts feature liquidated damages caps based on the aggregate order value. These contracts typically do not include performance bonds.

Sponsorship by Brookfield – A Leading Global Investor with Deep Local Expertise

Brookfield is a leading global investment firm with over US\$1 trillion of assets under management across real estate, infrastructure, renewable power, private equity and credit, as of September 30, 2025. Brookfield has a global presence in over 30 countries, supported by approximately 250,000 operating employees, as of September 30, 2025. Brookfield’s renewable power and transition business manages US\$137 billion of assets globally, with a portfolio of more than 7,000 renewable power generation facilities, as of September 30, 2025. Brookfield has a longstanding presence in India, supported by its 16-year history and US\$30+ billion of assets under management, as of September 30, 2025. One of the keys to Brookfield’s local success is the Brookfield Ecosystem, which represents the collective intelligence and insights they gather from its operational expertise, access to large scale capital, global reach, and deep local relationships. Together, this helps Brookfield identify and act on investment opportunities at scale - and enables each of their businesses and regions to benefit from being a part of the whole.

Environment, Social & Governance

Governance

We have established a robust sustainability governance framework with a credible reporting process. CleanMax Enviro Energy Solutions Ltd. has been audited by a Big Four audit firm since Fiscal 2016. Our Board of Directors sets sustainability goals, adopts policies, ensures accountability, and monitors compliance. In 2023, we constituted a Sustainability Committee to lead the implementation of our GHG targets. Additionally, the Operational Excellence Committee, reporting to Mr. Pramod Deore, Global CEO - On-site Renewable Business, translates ESG targets into actionable operational plans and coordinates ESG initiatives across business units and local operations. Our Global Head of ESG and Health, Safety & Environment, with 15 years of experience, is supported by three regional managers and a 40-member team.

ESG Parameters	Key Metrics	As on September 30,		Fiscals		
		2025	2024	2025	2024	2023
Governance	Incidents reported internally in Ethics and Integrity	0	0	0	0	0
	Whistleblower mechanism ensuring anonymity					

Environment

We have adopted a strategic approach to environmental management, focusing on climate change mitigation, energy efficiency, water stewardship, waste management and biodiversity conservation. Our overarching environmental objective is to minimize ecological impact across its operations and supply chain while supporting the energy transition through clean energy infrastructure.

We have become carbon neutral with respect to both Scope 1 and Scope 2 emissions since 2023. Beyond site operations, we have a focus on emissions reduction in our corporate offices as well.

- *Scope 1 & 2:* To address our Scope 1 emissions, our office locations and sites are powered through grid or Onsite Solar energy. To address Scope 2 emissions, we proactively invest in Renewable Energy Certificates (“RECs”), enabling us to neutralize our electricity-related carbon footprint effectively. We redeemed 2800+ IREC credits for the reporting period of April 2024 to March 2025 to offset the emissions associated with imported electricity for the year.
- *Scope 3:* Approximately 49% of our Scope 3 emissions are from capital goods - this figure underscores the crucial role played by our procurement activities. To minimize Scope 3 emissions, we aim to consciously choose to work with vendor companies who have sustainability as their core objectives. We also have a vendor scorecard tracking mechanism in place based on ESG parameters. We track electricity data from both grid and solar/wind sources and have our Scope 1, 2 and 3 emissions verified externally to ensure transparency. Our greenhouse gas (“GHG”) inventory provides a transparent view of emissions across Scope 1, 2 and 3 categories, guiding our efforts towards achieving our ambitious Net-Zero targets for Scope 1 & 2 emissions by 2030 and for Scope 3 emissions by 2040.

Further, we have produced 2.61 TWh of renewable energy in Fiscal 2025 for our clients. This translates into 1.89 million tons CO₂ avoided by our clients. In Fiscal 2025, our total GHG emissions amounted to 34,726 metric tons of CO₂ equivalent (“tCO₂e”). This assessment includes Scope 1, 2, and 3 emissions, ensuring a holistic understanding of our carbon impact. Since our inception until March 2025, our projects have avoided approximately 12.32 million tons of CO₂ emissions for our clients. Water conservation is another strategic pillar under our environmental stewardship agenda. We are committed to achieving 100% water neutrality across all sites by 2030. Water consumption is meticulously tracked using digital metering, and initiatives to reduce consumption are implemented, including rainwater harvesting ponds, pilots on robotic dry-cleaning systems, optimized water infrastructure and groundwater recharge. Dry-cleaning robots and pressure-controlled hoses have also been deployed to minimize water use in panel cleaning operations.

We also maintain a zero waste-to-landfill commitment. During Fiscals 2025 and Fiscal 2024, we achieved 100% diversion from landfill of operational waste through reuse, recycling and responsible disposal mechanisms. Waste management strategies include segregation at source, partnerships for recycling and using authorized recyclers for e-waste management. Further, we have committed to a “no net loss” approach and are actively conducting biodiversity impact assessments and mitigation plans as part of our environmental and social due diligence procedures. Further to this, we intend to continue integrating climate risk analysis into our investment planning, in line with the TCFD framework, and also intend to adopt TNFD aligned reporting to showcase our focus on biodiversity management and nature protection.

ESG Parameters	Key Metrics	Fiscal		
		2025	2024	2023
Environmental	Scope 1 Emissions (tCO ₂ e)	-	-	1.27
	Scope 2 Emissions (tCO ₂ e)	2031.69	1,620.77	1,246.29
	Scope 3 Emissions (tCO ₂ e)	19,245.41	31,780.87	29,082.49
	Emission Intensity (tCO ₂ e/ Total Energy Generated (MWh))	0.00078	0.00082	0.00120
	Total waste generated (tons)	860.73	479.2	618.6
	Total Waste Diverted to Disposal (tons)	-	-	-
	Water consumption (litres) per MW of electricity generation (Gradual decrease representing water neutrality by Year 2030 goal)	11.99	12.71	35.68

ESG integration across the value chain

Given the complexity of our projects, we ensure that ESG considerations are not just embedded throughout the group but also individually applied to each project and the respective value chain. Our projects undergo independent environmental and social impact assessments (“ESIA”) – these reports cover project descriptions, legal frameworks, baseline studies, stakeholder consultations and impact assessments. The assessment spans the project lifecycle, including construction, operation, maintenance and decommissioning.

Project development: Although project activities of land development can potentially lead to habitat fragmentation, careful site selection and planning help minimize these effects in areas with low existing fragmentation. Adhering to our land procurement policies, we pay attention to avoid cutting Kejri trees and not initiating construction in the GIB conservation areas. These assessments are essential tools for evaluating the ecological value of the area and help mitigate risks to biodiversity. During the project development phase, there are adequate electrical safety measures adopted, and workers undergo formal training on wildlife protection laws to ensure there are no long-term negative effects on species populations classified by the International Union for Conservation of Nature (“IUCN”).

Engineering, Procurement and Construction: Our ESG targets for our sites include renewable energy deployment, ISO 14001-compliant environment management, 100% water neutrality by 2030, implementing comprehensive waste management strategies, and prioritizing biodiversity conservation. We use a collaborative, multi-stakeholder approach to reduce our water footprint. For instance, we prefer contractors who demonstrate resource efficiency, particularly in the use of water, and products that offer practical resource reuse locally. Most of our solar farm sites use semi-robotic dry cleaning in efforts to lower the water consumption and have adopted initiatives such as rainwater harvesting, aquifer recharging, etc.

Electronic and electrical waste is managed in strict accordance with national regulations and the waste hierarchy, prioritizing storage, collection, transportation, processing and reuse. We aim to recycle damaged or replaced panels, inverters and batteries by using authorised recyclers. We adopted the zero waste-to-landfill initiative that advocates for a

circular economy, maximizing resource efficiency and minimizing environmental impact. We are proud to announce that we have achieved 100% waste diversion from landfills in Fiscal 2024.

Asset management: To maintain asset health, we employ an Asset Health Score methodology and conduct half-yearly audits of all assets. We are certified as per international standards under ISO 55001 (Asset Management Standard). When assets reach the end of their useful life, we responsibly dispose of them in accordance with our Scrap Disposal SOP for our internal operations, as well as local and national regulations. We also assess climate risks associated with assets by analysing changes in weather factors and sun irradiation.

We believe that in the strategic context of business, enterprises possess, beyond mere financial resources, the transformational capacity to create development through their power of entrepreneurial vitality and innovation. We are dedicated to our dual-objective endeavour of benefiting the society and environment in areas where the company has its presence via projects. The CSR Taskforce regularly organizes afforestation drives, road safety campaigns, medical camps, farmers' welfare programs and have contributed towards upgradation of rural education infrastructure.

Building Social Harmony

Our social sustainability strategy focuses on creating equitable, inclusive and safe workplaces, promoting human rights, strengthening local communities and ensuring high standards of customer engagement. These priorities are grounded in internal policies such as the Human Rights Policy, Occupational Health and Safety Policy and Equal Opportunity policy which ensures diversity and inclusion in our work place.

We have adopted the Universal Declaration of Human Rights and ILO principles as guiding frameworks for our operations. In Fiscals 2024 to 2025, we completed a comprehensive human rights risk assessment across our business segments and initiated capacity-building workshops to embed awareness of human rights policies across operational and management teams. No incidents of human rights violations or discriminatory practices were reported internally during the period.

Occupational health and safety remain a top priority. We ensure we have protocols in place to maintain a safe environment for our employees. Some initiatives include a comprehensive risk assessment; implementation of safety theme-based months to ensure firmwide awareness (ESG Consciousness Calendar); an Employee Health Index, aimed at prioritizing the health and well-being of our workforce (conducting health assessments, BMI calculations and general exams); and regular internal and external third-party audits of management systems to ensure effectiveness of our safety protocols. In 2020, our OHSMS achieved full compliance with the global standards for occupational health and safety management, earning ISO 45001:2018 certification. We have achieved a zero recordable injury rate and reported that 95% of employees were categorized as low risk on the Employee Health Index in Fiscal 2025.

A 360-degree feedback mechanism was introduced to support professional development and internal leadership pipeline growth. Some initiatives we have implemented include our Six Sigma program, which aims to increase efficiency, streamline operations and increase customer satisfaction; personal effectiveness training to boost workforce communication and professional skills; training on effective client communications; and more around the development of skills. Training on anti-bribery and corruption and whistleblower policy is provided to governance body members and all employees, further reinforcing the commitment to ethical practices. We continue to promote diversity and inclusion across our operations, with a focus on increasing the representation of women across business units and leadership roles. We have implemented the Women Accelerator Program, with an aim to empower female entrepreneurs and professionals through workshops, mentorships and networking opportunities. These initiatives help build our workforce and enhance productivity, and also provide a clear career development path and boost employee satisfaction, leading to a higher retention rate.

We also engage in community development through structured Corporate Social Responsibility programmes. Initiatives include skill training, local procurement, education support and environmental restoration projects. Community feedback is solicited through stakeholder engagement exercises and grievance redressal mechanisms, which are actively monitored and resolved at the site level.

We aim to increase Corporate Social Responsibility (“CSR”) allocation towards rural clean energy access, expand vocational training partnerships and develop gender inclusion targets for senior management positions.

ESG Parameters	Key Metrics	For the six months ended September 30,		Fiscal		
		2025	2024	2025	2024	2023
Social	Total employee training hours*	7,305	4803	12,706	11,533	9,382
	% of female workforce	17.84%	27.17%	20.16%	17.21%	14.65%
	Total investment made in Learning and development initiatives for CleanMax workforce (₹ Million)	2.89	4.18	7.88	12.23	7.88

* calculated based on 1,000,000 hours worked.

Our People and Culture

As of September 30, 2025, we employed a total of 565 full-time employees (excluding consultants). Further, our workforce at project site also includes employees of and contract labourers engaged by OEM and subcontractor for conducting various activities at our project sites. As of September 30, 2025, we have not directly engaged any contract labourers for our project sites. The following table provides a breakdown of our on-roll by function:

Function	For the six months ended September 30,				Fiscals						
	2025		2024		2025		2024		2023		
	Number of on-roll employees	Number of off-roll employees	Number of on-roll employees	Number of off-roll employees	Number of on-roll employees	Number of off-roll employees	Number of on-roll employees	Number of off-roll employees	Number of on-roll employees	Number of off-roll employees

Insurance

Our insurance is on terms generally carried by companies engaged in similar businesses in India. We maintain project specific insurance coverage for commercial general liability insurance, mediclaim and accident insurance, professional indemnity insurance, primary and excess liability insurance and worker’s compensation, erection risk policy, fire policies, burglary insurance policies, electronic equipment policies, and directors’ and officers’ insurance policies. We also maintain “all risk” property insurance coverage for certain of our projects in amounts based on the full replacement value of our projects and business interruption.

(in ₹ millions)

Particulars	For the six months ended September 30,		For Fiscal ended March 31,		
	2025	2024	2025	2024	2023
Total insurance claims made (A)	19.14	68.46	93.67	86.37	50.52
Total accepted amount (B) [#]	15.35	43.70	59.12	49.06	33.21
Claims acceptance ratio (B/A)	80.20%	63.83%	63.12%	56.80%	65.74%

[#] Claims settled up to September 30, 2025, have been allocated to the fiscal year in which the claims were originally reported, rather than the year in which settlement occurred. As a result of this reclassification, the claims settled amounts for earlier fiscal years have been updated to include settlements finalized during the later periods.

While there have been no past instances of a claim exceeding the overall insurance cover for a project, certain claims have been denied on account of standard insurance policy restrictions and deductions. Also, see “Risk Factors – Our assets and operations are subject to certain risks and hazards. Our insurance coverage may not be adequate, and we may become subject to higher insurance premiums or less favourable terms under our insurance policies” on page 82.

Intellectual Property

Our success depends, at least in part, on our ability to protect our technology and technical know-how. We own various information that includes, without limitation, financial, business, scientific, technical, economic and engineering information, formulas, designs, methods, techniques, processes and procedures, all of which is confidential information. We therefore rely on a combination of trade secret and other intellectual property laws and confidentiality agreements to establish and protect our intellectual property rights. We have 35 registered trademarks as at the date of this Prospectus. Further, the application for one of our trademarks was objected by the Registry of Trademarks, Mumbai, to which our Company has submitted a reply. The Registrar of Trade Marks was not satisfied with our reply and has set our application for hearing. In addition to the domain name “www.cleanmax.com”, we also own 10 internet domain names currently used by us. Details of our registered trademarks and domain names are as set forth below:

KEY REGULATIONS AND POLICIES IN INDIA

The following is a brief overview of certain key sector specific laws, regulations, and policies in India, which are applicable to the business and operations undertaken by us. The information detailed below has been obtained from various legislations, including rules, regulations, guidelines, and circulars promulgated and issued by regulatory bodies that are available in the public domain, as may have been amended from time to time. The statements below are based on the current provisions of Indian law, which are subject to change or modification by subsequent legislative, regulatory, administrative, quasi-judicial or judicial decisions. The overview and description set out below is not exhaustive and is only intended to provide general information to the investors, and is neither designed, nor intended, to be a substitute for professional legal advice.

For details of the government approvals and licenses obtained by our Company and our Material Subsidiary, see “Government and Other Approvals” beginning on page 884.

Industry specific legislations

The Electricity Act, 2003 (“Electricity Act”) and the Electricity Rules, 2005 (“Electricity Rules”)

The Electricity Act is the central legislation which covers, among others, generation, transmission, distribution, trading and use of electricity. Under the Electricity Act, the transmission, distribution, and trade of electricity are regulated activities that require licenses from the Central Electricity Regulatory Commission (“CERC”), the State Electricity Regulatory Commissions (“SERCs”) or a joint commission (constituted by an agreement entered into by two or more state governments or the Government of India (“GoI”) in relation to one or more state governments, and one or more union territories), as the case may be. Under the Electricity Act, the appropriate commission, guided by, *inter alia*, the principles and methodologies specified by the CERC, promotion of co-generation and generation of electricity from renewable sources of energy, principles rewarding efficiency in performance, objective of safeguarding consumers’ interest and at the same time, recovery of the cost of electricity in reasonable manner, shall stipulate the terms and conditions for the determination of tariff. The Electricity Act currently requires the GoI to, from time to time, prepare the national electricity policy and tariff policy, in consultation with the state governments and the Central Electricity Authority, Ministry of Power, GoI (“CEA”). The subsidy payable under the Electricity Act shall be done by the distribution licensee, in accordance with the standard operating procedure issued by the Central Government.

Under the Electricity Act, 2003 and the Electricity Rules, 2005 and policies made thereunder, electricity can be supplied to a group of customers in a “captive/group captive structure” without levy of cross-subsidy surcharge and additional surcharge. In order to take advantage of such structure, a captive/group captive project must have, among others, the following characteristics: (a) at least 26% of the voting equity of the project company (or such other percentage calculated pro-rata based on the generating capacity identified as group captive generating capacity) must be owned by customer(s) of electricity from such project; and (b) at least 51% of electricity generation identified for captive use, must be consumed by such customers in a financial year. Consumption of electricity by the subsidiary of a captive user from the captive generating plant, may also be included while determining the captive consumption of such captive user. Consumption of electricity from group captive projects (provided that the criteria are met, and relevant details are filed with the distribution utility/regulator timely) in any financial year exempts such customers from levy of cross-subsidy surcharge and additional surcharge. The Electricity Act, 2003 is proposed to be amended by way of the Electricity (Amendment) Bill, 2025 (“Bill”), which has been issued by the Ministry of Power, GoI (“MoP”) on October 9, 2025 and is currently open to public comments. The Bill has not been passed as on date of this Prospectus. Further, the provisions relating to energy storage system and implementation of uniform renewable energy (“RE”) tariff for central pool are covered under the Electricity Rules. The Central Government may issue orders and practice directions in regard to implementation of the Electricity Rules.

The Electricity Rules along with subsequent amendments *inter alia* provides for: (a) minimum fifty one percent offtake of energy generated in the captive power plant by the captive user; (b) minimum of twenty-six percent ownership of the captive user(s); (c) accounting of subsidy provided to certain consumers; (d) compliance with directions by transmission licensee; (e) surcharge payable by consumers seeking open access; (f) energy storage systems; (g) development of hydro power; and (h) implementation of uniform RE tariff for central pool. The MoP released additional amendments to the Electricity Rules (“Amendment Rules”). To clarify certain changes brought by the Amendment Rules, the MoP in 2023, which *inter-alia*, permitted the consumption of electricity by the subsidiary company or the holding company of a captive user from the CGP, to also be included while determining the captive consumption of such captive user. Additionally, in an effort to provide affordable electricity and grid reliability, the MoP has also notified the Electricity (Amendment) Rules, 2024, pursuant to which, *inter alia*, generating companies, CGPs, ESS or consumers having a load of 25 Megawatt (“MW”), in case of Inter State Transmission Systems (“ISTS”), and 10 MW, in case of Intra State Transmission System (“InSTS”), shall not be required to obtain a license for the establishment, operation and maintenance of dedicated transmission lines. Further, for a person availing General Network Access (“GNA”) or open access, the additional surcharge (“AS”) leviable shall be linearly reduced and eliminated within four years from the date of grant of such access. Subsequently, to clarify ownership, operation, and commercial utilization of energy storage systems (“ESS”), the MoP notified the Electricity (Amendment) Rules, 2025, pursuant to which, *inter alia* provides for, (a) ESS may be developed, owned, leased, or operated by, generating companies, transmission

licensees, distribution licensees, consumers, system operators, or independent energy storage service providers, (b) legal status of co-located and non-co-located ESS shall be the same as that of the owner, however in case of non-co-located ESS for the purpose of scheduling, dispatch, and operation, it will be treated as a separate storage element, (c) developer or owner of an ESS may sell, lease, or rent out the whole or part of its storage capacity.

National Electricity Policy

The GoI notified the National Electricity Policy on February 12, 2005, in accordance with the provisions of the Electricity Act. The National Electricity Policy provides guidelines for accelerated development of the power sector, providing supply of electricity to all areas and protecting interests of consumers and other stakeholders keeping in view availability of energy resources, technology available to exploit these resources, economics of generation using different resources, and energy security issues.

The National Electricity Policy provides that the SERCs should specify appropriate tariffs in order to promote RE, up until RE power producers relying on non-conventional technologies can compete with conventional sources of energy. The SERCs are required to ensure progressive increase in the share of generation of electricity from non-conventional sources and provide suitable measures for connectivity with grid and sale of electricity to any person. Further, the SERCs are required to specify, for the purchase of electricity from RE sources, a percentage of the total consumption of electricity in a distribution licensee. Furthermore, the National Electricity Policy provides that such purchase of electricity by distribution companies should be through a competitive bidding process. The National Electricity Policy permits the SERCs to determine appropriate differential prices for the purchase of electricity from RE power producers, in order to promote renewable sources of energy.

Additionally, the MoP has prepared a Draft National Electricity Policy, 2026, which aims to supersede the National Electricity Policy dated February 12, 2005. The Draft National Electricity Policy, 2026 provides for CERC and SERC to enforce Renewable Consumption Obligations (“RCO”) targets as set under the Energy Conservation Act, 2001, which may be met through procurement of green power, green attributes, or other mechanisms such as RCO buyout under frameworks notified by the Central Government. The appropriate government policies are required to support renewable energy procurement through seamless open access and captive consumption by commercial and industrial consumers by creating necessary regulatory frameworks.

The policy also provides for promotion of hybrid projects by combining variable renewable energy with storage for reliability and optimised transmission use. The policy also promotes rooftop solar installation with battery storage for self-consumption, enables peer-to-peer energy trading, and ensures open access to renewable energy free from cross-subsidy surcharges. The CERC and SERCs are required to ensure parity between renewable energy and conventional sources in scheduling and deviation settlement mechanisms to ensure grid stability. Furthermore, the Central Government is required to evolve appropriate market-based frameworks and the CERC to make necessary regulatory provisions for mechanisms such as virtual power purchase agreements and bilateral contract settlement to attract investments in non-fossil fuel-based generation capacities.

National Electricity Plan (“NEP”)

The CEA has notified the NEP (Volume-I - Generation) for the period of 2022-32. The plan document, issued on May 31, 2023, includes the review of the last five years (2017-22), a detailed plan for the next five years (2022-27) and the prospective plan for the next five years (2027- 32). As per section 3(4) of the Electricity Act, CEA has been mandated to prepare a NEP in accordance with the National Electricity Policy and notify such plan once in five years. The NEP envisages that the share of non-fossil based capacity is likely to increase to 57.4% by the end of 2026-27 and may likely to further increase to 68.4% by the end of 2031-32 from around 40% as on March, 2022. Eventually, the projection of total non-fossil based capacity addition is in line with the target of the country to achieve a non-fossil based installed capacity of around 500 Gigawatt (“GW”) by the year 2029-30.

The NEP (Volume-II - Transmission), notified by the CEA in October, 2024, under section 3 of the Electricity Act, outlines India's strategic roadmap for transmission infrastructure development from 2022 to 2032. The plan targets the addition of over 191,000 circuit kilometers of transmission lines and 1,270 GVA of transformation capacity at 220 Kilovolt (“kV”) and above, aiming to support the integration of 500 GW of RE by 2030 and over 600 GW by 2032. It emphasizes the adoption of advanced technologies such as hybrid substations, digital substations, and voltage-sourced converter-based HVDC systems to enhance grid reliability and efficiency. The plan also addresses the need for 47 GW of battery energy storage systems (“BESS”) and 31 GW of pumped storage plants to manage the variability of RE sources. Furthermore, it promotes private sector participation through mechanisms like tariff based competitive bidding, aligning with the Electricity Act's objectives of fostering competition and efficiency in the transmission sector.

National Tariff Policy, 2016 (“National Tariff Policy”)

National Tariff Policy seeks to, *inter alia*, ensure availability of electricity to consumers at reasonable and competitive rates, ensure financial viability of the sector and attract investments, promote competition, efficiency in operations and improvement

in quality of supply, promote generation of electricity from renewable sources and evolve a dynamic and robust electricity infrastructure for better consumer services. The objectives of the National Tariff Policy includes, (i) promotion of transparency and predictability, (ii) cost-reflective tariffs, (iii) minimizing regulatory risks, (iv) reducing cross-subsidization, (v) promotion of RE and energy efficiency, (vi) facilitating competition and private sector participation, (vii) rationalization of tariff structures, and (viii) stakeholders' consultation and participation. National Tariff Policy also discusses the implementation of Multi-Year Tariff framework for determination of tariff of generating stations within Commission's jurisdiction and for interstate transmission of electricity, which is likely to minimize risks for utilities and other stakeholders, reduce regulatory uncertainty and provide for a transparent and stable system of incentives and disincentives, and attract investments. Further, to encourage the renewable power sector, the National Tariff Policy exempts wind and solar projects from the applicability of charges and losses for use of ISTS for a period of 25 years from the date of commissioning of such wind and solar projects, subject to fulfilling certain conditions

The National Tariff Policy with specific regard to RE, seeks to foster the integration of non-conventional energy sources, such as solar and wind, into the national grid by establishing mandatory renewable purchase obligations ("RPO") for distribution licensees ("DISCOMs"), thereby ensuring a prescribed percentage of power is procured from renewable sources. In accordance with this policy, the tariff structure for RE projects is determined by various financial parameters, including return on equity, operational and maintenance costs, interest on loans, and depreciation. Furthermore, the policy promotes the adoption of emerging renewable technologies through incentives like differentiated renewable energy certificate ("REC") multipliers, tailored for specific technologies and vintages. It stipulates that interstate transmission charges shall not apply to solar and wind-generated electricity, as per the National Tariff Policy. State-level implementation is entrusted to the SERCs, which are tasked with setting RPO targets and defining the applicable tariffs. Finally, the policy advocates for competitive bidding processes in transmission projects to ensure efficient and cost-effective development of the transmission infrastructure.

Provisions for RPOs

The Electricity Act and the National Tariff Policy require the SERCs to specify, for the purchase of electricity from RE sources, a minimum percentage of the total consumption of electricity within the area of a distribution licensee, which are known as RPOs. RPOs are required to be met by obligated entities (DISCOMs, captive power plants and open access consumers) by purchasing RE, either by RE power producers such as the Company and its Subsidiaries, or by purchasing RECs. In the event of default by an obligated entity in any fiscal year, the SERCs may direct the obligated entity to pay a penalty or to deposit an amount determined by the relevant SERC, into a fund to be utilized for, among others, the purchase of RECs.

Central Electricity Regulatory Commission (Terms and Conditions for Renewable Energy Certificates in Renewable Energy Generation) Regulations, 2022 ("REC Regulations")

The CERC notified the REC Regulations on May 9, 2022, which have been amended from time to time. The REC Regulations were enacted to develop the market in electricity from non-conventional energy sources by issuance of transferable and saleable credit certificates ("REC Mechanism"). The REC Mechanism provides a market-based instrument which can be traded freely and provides means for fulfilment of RPOs by the distribution utilities/consumers. Under the REC Regulations, one certificate represents one MW-hour of energy generated and injected or deemed to have been injected into the grid, with a special provision that a certificate multiplier may be issued by the CERC keeping in view the maturity level and cost of various RE technologies. The REC Regulations determine the quantum of such certificates to be issued to the eligible entities and the method of dealing in the certificates. The National Load Despatch Centre is the central agency which oversees the REC Mechanism, including, inter alia, registration of eligible entities, issuance of certificates, maintaining and settling accounts in respect of certificates, acting as repository of transactions in certificates and such related functions of the REC Mechanism as may be assigned by the CERC. There are certain conditions which are now imposed on electricity generating company, distribution licensee and CGP to be eligible to apply for REC.

Central Electricity Regulatory Commission (Indian Electricity Grid Code) Regulations, 2023 ("Grid Code")

The Grid Code specified by the CERC on May 29, 2023, as further amended on October 23, 2024, contains the provisions regarding the roles, functions and responsibilities of the concerned statutory bodies, generating companies, licensees, and any other person connected with the operation of the power systems within the statutory framework envisaged in the Electricity Act. These regulations aim to promote a stable, reliable, and secure grid operations while achieving maximum economy and efficiency in the power system.

Central Electricity Authority (Measures Relating to Safety and Electric Supply) Regulations, 2023 ("CEA Safety Regulations")

The CEA Safety Regulations framed by CEA under the Electricity Act to regulate measures relating to safety and electric supply in India. CEA Safety Regulations apply to electrical installations, including electrical plants and electric lines, as well as persons engaged in electricity generation, transmission, distribution, trading, supply, or usage. CEA Safety Regulations encompass general safety guidelines for the construction, installation, protection, operation, and maintenance of electric supply lines and apparatus. Additionally, the CEA Safety Regulations outline general conditions related to the supply and use of

electricity. Furthermore, CEA Safety Regulations include safety provisions for electrical installations and apparatus with voltages both above and below 650 volts, overhead lines and underground cables, renewable generating stations, electric vehicle charging stations, high voltage direct current, and other related aspects.

Central Electricity Regulatory Commission (Deviation Settlement Mechanism and Related Matters) Regulations, 2024

The CERC introduced the Deviation Settlement Mechanism and Related Matters Regulations, 2024 ("**DSM Regulations, 2024**"), effective from September 16, 2024, as further amended effective from December 24, 2024. These regulations play a crucial role in upholding grid discipline and security, aligning with the objectives set forth in the Grid Code. The DSM Regulations, 2024, establish a commercial framework for deviation settlement, outlining specific penalties for both over-injections and under-injections of electricity.

National Wind-Solar Hybrid Policy ("Hybrid Policy")

Ministry of New and Renewable Energy, GoI ("**MNRE**") announced the Hybrid Policy on May 14, 2018, with an aim to encourage renewable power generation and promote new projects as well as hybridization of the existing wind and solar projects. The main objective of the Hybrid Policy is to provide a framework for promotion of large grid connected wind-solar photovoltaic hybrid system for optimal and efficient utilization of transmission infrastructure and land, reducing the variability in renewable power generation and achieving better grid stability.

Guidelines for development of onshore wind power projects ("Wind Projects Guidelines")

The MNRE issued the Wind Projects Guidelines dated October 22, 2016, to ensure healthy and orderly growth of wind power sector in the country with the objective of facilitation of development of wind power projects in an efficient, cost effective and environmentally sustainable manner. The Wind Projects Guidelines enumerate the MNRE advisories for project developers in relation to establishing and operating a wind power project. The Wind Projects Guidelines also require manufacturers of wind turbines and components to acquire type and quality certification by an internationally accredited certification body. The Wind Projects Guidelines also require that if the project developer should ensure availability of necessary clearances from concerning authorities in case the site being selected falls in the area of forest land or in the vicinity of habitat of migratory birds and their flight routes, civil aviation, defence and heritage establishments.

Further, the amendment to the Guidelines for Development of Onshore Wind Power Projects on July 4, 2024, issued by the MNRE, revises key aspects of wind power project development in India. It introduces updated criteria for site selection and land use to minimize environmental impact, streamlines grid connectivity procedures, and simplifies the approval and permitting processes, thus reducing project lead times. Additionally, it enhances compliance mechanisms to ensure adherence to environmental and technical standards.

Ministry of Power Orders regarding waiver of Inter-State Transmission Charges

To encourage the renewable power sector, the MoP, *vide* orders dated November 23, 2021, November 30, 2021, December 1, 2022, December 6, 2022, May 29, 2023, and June 9, 2023 (collectively, "**Orders**"), announced the conditions for the applicability of ISTS charges to RE projects, including solar, wind, pumped hydro storage, and projects with BESS commissioned up to June 30, 2025. Such charges will be levied in a gradual manner with an increase of 25% every year; which is that they will be levied at 25% of the applicable ISTS charges for projects commissioned from July 1, 2025, to June 30, 2026, and will escalate to 100% of the applicable ISTS charges for projects commissioned after July 1, 2028. The Orders have also waived levy of ISTS charges on the transmission of power from hydro power projects where construction work is awarded and the power purchase agreement is signed until June 30, 2025. Further, in order to facilitate execution of offshore wind energy initiatives and promote green hydrogen or green ammonia projects, the Orders waived levy of ISTS charges for all offshore wind power projects and green hydrogen / green ammonia projects commissioned on or before December 31, 2032 and December 31, 2030, respectively, for a period of 25 years from the date of commissioning of the projects. Such charges will then be levied in a gradual manner with an increase of 25% every year; which is that they will be levied at 25% of the applicable ISTS charges for projects commissioned from January 1, 2033 to December 31, 2033 and will escalate to 100% of the applicable ISTS charges for projects commissioned after January 1, 2036.

The MoP has announced a complete waiver of ISTS charges for hydro pumped storage projects where construction is awarded on or before June 30, 2028. Similarly, a 100% ISTS charges waiver applies to co-located BESS projects commissioned by the same date, provided the power is consumed outside the state of commissioning. For a BESS project to qualify as co-located, it must be connected to the same ISTS sub-station as the associated RE project. However, no ISTS charges waiver will be granted for Hydro PSPs with construction awarded after June 30, 2028, or for co-located BESS projects commissioned after that date. For non-co-located BESS projects, ISTS charges waivers will follow existing MoP orders and CERC regulations.

Central Electricity Regulatory Commission (Connectivity and General Network Access to the Inter-State Transmission System) Regulations, 2022 ("GNA Regulations")

The CERC issued the GNA Regulations to facilitate non-discriminatory open access to licensees or generating companies or consumers for use of ISTS through GNA. The regulations were notified on June 7, 2022 and the 'Detailed Procedure for Connectivity and GNA' under Regulation 39.1 was approved by CERC on October 14, 2022. Subsequently, the CERC notified the first amendment, second amendment and third amendment to the CERC Regulations on April 6, 2023, June 19, 2024 and September 8, 2025, respectively. Key changes introduced through the third amendment are as follows: (i) no restriction on utilisation of connectivity by the subsidiary of same parent company, (ii) restriction to maintain the control as per the original structure i.e. in the instance of connectivity grantee is a single company, the promoters or shareholders; and in case the connectivity grantee is a consortium, the consortium members are collectively required to retain control of the consortium until the project is commissioned, (iii) the applicant for ESS in its application to inter-state transmission system is required to specify the maximum quantum of power intended to be injected and withdrawn from the grid, based on the installed capacity, (iv) allows renewable energy generating stations based on wind source or ESS to seek connectivity based on solar hour access and non-solar hour access. Accordingly, an applicant can seek connectivity with non-solar hour access for a quantum of 50MW and above at terminal bay of an inter-State transmission system substation. Further, CERC through a suo moto order dated December 8, 2025, introduced certain relaxations to the provisions of third amendment such as (i) extension of timelines from earlier three months to five and a half months to apply for converting to solar hour access and for related right of first refusal applications, and (ii) extension of time period of at least nine months from communication of tentative coordinates to furnish land documents where final grant of connectivity is delayed by Central Transmission Utility of India Limited and no coordinates are furnished.

The Central Electricity Regulatory Commission (Procedure, Terms and Conditions for Grant of Trading Licence and Other Related Matters) Regulations, 2020 ("Trading License Regulations")

The Central Electricity Regulatory Commission (Procedure, Terms and Conditions for Grant of Trading Licence and Other Related Matters) Regulations, 2020 notified on January 2, 2020, prescribe the procedural framework and eligibility criteria for the grant, continuation, suspension, and revocation of licences for inter-state trading in electricity under the provisions of the Electricity Act. The Trading License Regulations classify trading licences into five categories based on the volume of electricity proposed to be traded and stipulate distinct thresholds of net worth, liquidity, and creditworthiness for each category. Applications are required to be submitted in the prescribed format along with requisite fees and supporting documents and are subject to public scrutiny and CERC's satisfaction regarding compliance. Licensees are mandated to pay annual licence fees, adhere to trading margins as notified by the CERC, and comply with obligations including maintenance of accounts, reporting requirements, and operational transparency. The CERC retains the authority to suspend or revoke licences in cases of contravention, non-compliance, or on grounds of public interest, in accordance with the principles of natural justice. These regulations are binding upon all applicants and licensees engaged in inter-state electricity trading.

Central Electricity Regulatory Commission Power Market Regulations 2021

The CERC has notified the CERC (Power Market) Regulations, 2021, which came into effect on August 15, 2021. These regulations apply to power exchanges, market participants other than power exchanges, and the over the counter market ("OTC Market").

Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020

On May 4, 2020, the CERC issued the CERC (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020. The purpose of these regulations is to ensure that transmission charges are fully covered, thereby minimizing power losses during interstate transmission. These regulations apply to all designated ISTS customers, inter-state transmission licensees, the National Load Dispatch Centre, regional load dispatch centres, state load dispatch centres, and regional power committees.

Central Electricity Regulatory Commission Guidelines for Virtual Power Purchase Agreements, 2025

On December 24, 2025, the CERC issued the Guidelines for Virtual Power Purchase Agreements, 2025. The objective of the guidelines is to establish a statutory framework for virtual power purchase agreements ("VPPA") as non-transferable, non-tradable, over-the-counter contracts to facilitate renewable consumption obligation compliance by consumers and designated consumers. The guidelines recognise VPPA as non-transferable specific delivery bilateral arrangements wherein renewable energy generating stations sell electricity through authorised market mechanisms for purposes other than renewable purchase obligation / renewable consumption obligation compliance, and the renewable energy certificates arising from such generation are transferred to the contracting consumer for compliance purposes, with bilateral settlement of the price difference between the agreed VPPA strike price and the market settlement price. The guidelines also provide for regulatory jurisdiction, eligibility, implementation, payment mechanism, and dispute resolution.

Approved Models and Manufacturers of Solar Photovoltaic Modules (Requirement for Compulsory Registration) Order, 2019 ("ALMM Order") and ALMM Order for Solar PV Cells

To ensure the quality of solar cells and solar modules used in solar photovoltaic ("solar PV") power plants, the MNRE issued the ALMM Order on January 2, 2019. The ALMM Order provides that the government will enlist eligible models and

manufacturers of solar PV power plants complying with the applicable BIS standards, and publish a list titled the “Approved List of models and manufacturers” (“**ALMM**”). Only the models and manufacturers included in the ALMM would be eligible for use in government / government assisted projects under government schemes and programmes installed in the country, including the projects set-up for sale of electricity to the government under the “Guidelines for Tariff Based Competitive Bidding Process for Procurement of Power from Grid Connected Solar PV Power Projects” dated August 3, 2017 and the amendments thereof (collectively, the “**Applicable Projects**”).

The ALMM will consist of List I, specifying models and manufacturers of solar PV modules and List II specifying models and manufacturers of solar PV cells. Further with respect to the Applicable Projects, solar PV module manufacturers from List I would have to mandatorily source solar PV cells only from manufacturers in List II. For being eligible to be included in List-I, the manufacturers are required to obtain a BIS certification in accordance with the Compulsory Registration Order. Manufacturers are required to make an application to the MNRE for registration, and if enlisted, such enlistment shall be valid for a two-year period and can be renewed by submitting necessary documents and satisfactory performance of products. Prior to inclusion in the ALMM, a team of MNRE will inspect the manufacturing facility of the applicant. Enlisted models and manufacturers will be subjected to random quality tests and failure, or non-compliance will lead to removal from ALMM. However, List II was not implemented initially.

The ALMM Order will not apply to projects for which bids have been finalised before the issuance of the ALMM Order. Further, the MNRE has amended the ALMM Order in January, 2022, to include open access and net metering projects under its ambit with effect from October 1, 2022. From 2019 to 2024, certain clarifications were issued by MNRE in relation to the scope of the ALMM Order. The office memorandum dated October 7, 2022 was issued to clarify that the ALMM Order will not be applicable to open access and net-metered projects for which the ‘first-application’ for grant of: (a) in-principle approval; (b) no-objection certificate; (c) government order; or (d) any other approval that may be necessary for seeking open access or net-metering, was made before October 1, 2022 (“**First Application Exemption**”). However, the MNRE issued another memorandum dated March 10, 2023, as per which, the enforcement of the ALMM Order and subsequent memorandums (including the First Application Exemption), was kept in abeyance for until March 31, 2024. Thus, projects commissioned by March 31, 2024 were exempted from the requirement of procuring solar PV modules from the ALMM. On March 29, 2024, MNRE issued another memorandum stating that for projects where the modules are received at the project site by March 31, 2024, but could not be commissioned by then (due to delays beyond the control of the project developer), would be assessed on a case-to-case basis. However, MNRE failed to clarify here whether the First Application Exemption would continue to be applicable from April 1, 2024.

The MNRE has issued an amendment to the ALMM Order dated December 9, 2024, to implement ALMM List-II for solar PV cells, effective from June 1, 2026. This move follows the anticipated growth in domestic cell manufacturing capacity. Projects with bid submissions on or before December 9, 2024 must use ALMM-listed modules (List-I) but are exempt from using ALMM-listed cells (List-II), regardless of their commissioning date. Projects with bids submitted after this date must use both ALMM-listed modules and cells, even if commissioned before June, 2026. From June 1, 2026, only modules using ALMM-listed cells will remain in List-I; others will be moved to a separate List-I(a) for exempted projects. Net-metering and open access RE projects must use ALMM-listed modules and will also need to comply with List-II from June, 2026, unless exempted. Thin film modules made in integrated units are deemed compliant. Procedural guidelines for listing solar PV cells under ALMM List-II will be issued separately. Further, the MNRE has also issued an office memorandum dated July 28, 2025, providing certain clarifications in relation to queries received stating (a) that in case of a solar plant feeding power/charging a BESS supplying electricity to the grid directly or indirectly, no exemptions shall be granted in relation to sourcing solar PV cells from ALMM listed vendors (b) solar projects installed solely to charge BESS will be exempted from this requirement if the ‘energy storage system’ project is exempted from this requirement. Further, the MNRE has also published the first version of the ALMM List-II for solar PV cells specifying nine manufacturers. This reiterates the upcoming requirement for restrictions on purchase of solar PV cells June, 2026 onwards.

Procedure to apply for inclusion of a Wind Turbine Model in the Revised List of Models and Manufacturers of Wind Turbines (“RLMM”) for wind turbines dated November 1, 2018, and amendments thereto

The MNRE on November 1, 2018, had issued certain procedures for inclusion of a wind turbine model in the revised list of models and manufacturers of wind turbines (“**RLMM**”) eligible for installation of India. The MNRE issued a circular dated April 17, 2025, seeking stakeholder comments on certain draft amendments to its order dated November 1, 2018, regarding the procedure to apply for inclusion of a wind turbine model in the revised list of models and manufacturers of wind turbines. These proposed amendments *inter alia* provide for certain components of wind turbines such as gearbox, generators, and blade towers to be sourced from manufacturing facilities in India only, as a requirement for enlistment of wind turbine manufacturers/models in the RLMM. However, the same has not been notified yet. Further to this, the MNRE issued an Official Memorandum on July 31, 2025 whereby it set out the revised requirements for enlistment of wind turbine manufacturers/models in the RLMM. This order confirmed that a technical team constituted by the MNRE shall inspect the manufacturing facilities for blade, tower, gearbox, generator and special bearings, and issue a special list named as Approved List of Models and Manufacturers (Wind Turbine Components) (“**ALMM Wind**”). These wind turbine components shall be sourced from such facilities which are included in the ALMM (Wind Turbine Components) list.

Electricity (Promoting Renewable Energy Through Green Energy Open Access) Rules, 2022

The MoP notified the Electricity (Promoting Renewable Energy Through Green Energy Open Access) Rules, 2022, on the June 6, 2022, and certain subsequent amendments thereto dated January 27, 2023, and May 23, 2023 (the “**Green Energy Open Access Rules**”). The Green Energy Open Access Rules have been promulgated with the objective of promoting the generation, procurement, and consumption of green energy. Pursuant to the provisions of the Green Energy Open Access Rules, consumers are vested with the right to demand the supply of green energy from DISCOMS, and such DISCOMS are correspondingly mandated to procure and supply green energy to consumers who are deemed eligible under these rules. The Green Energy Open Access Rules further establish a streamlined and time-bound framework for the processing of applications seeking green energy open access. Uniformity and transparency in the application and approval process have been ensured through the establishment of a centralized national portal. It is mandated that all such applications for open access to green energy shall be processed and approved by the designated nodal agency within a period not exceeding 15 days from the date of receipt of the application, subject to the condition that the minimum contract demand is not less than 100 kW.

Additionally, green energy open access consumers shall be entitled to bank a minimum of 30% of their total monthly electricity consumption, as sourced from the distribution licensee.

The charges applicable to green energy open access consumers shall include, inter alia, transmission charges, wheeling charges, CSS, standby charges, banking charges, and such other statutory fees and charges as may be prescribed, including but not limited to Load Despatch Centre (“**LDC**”) fees, scheduling charges, and deviation settlement charges, in accordance with the relevant regulations as framed by the appropriate commission.

Furthermore, the Green Energy Open Access Rules provide for certain exemptions applicable to captive consumers. Specifically, there shall be no quantitative restriction on the supply of power to captive consumers availing supply under these Rules. Such consumers shall not be liable to pay the CSS and the AS. Moreover, the CSS and the AS shall not be applicable in cases where green energy is utilized for the production of green hydrogen or green ammonia.

Provided that the CSS for a green energy open access consumer purchasing green energy, from a generating plant using RE sources, will not be increased, during twelve years from the date of operating of the generating plant using RE sources, by more than 50% of the surcharge fixed for the year in which open access is granted and AS will not be applicable for green energy open access consumers, if fixed charges are being paid by such a consumer.

Electricity (Rights of Consumers) Rules, 2020

The Electricity (Rights of Consumers) Rules, 2020, notified by the MoP on December 31, 2020, provide a framework for consumer participation in electricity generation through net metering, gross metering, and net billing. Under net metering, consumers (prosumers) with sanctioned loads up to 500 kW can offset their electricity consumption with energy generated from rooftop solar, with surplus carried forward for future billing cycles. Gross metering requires all generated power to be fed into the grid, and the consumer is compensated at a regulated feed-in tariff while continuing to purchase electricity separately. Net billing, or net feed-in, allows self-consumption of solar energy, with any surplus exported to the grid being monetarily credited at a tariff set by the SERC, instead of a unit-to-unit adjustment. These mechanisms are subject to state-specific regulations and are aimed at promoting RE while protecting consumer rights.

Further, the Electricity (Rights of Consumers) Rules, 2020, through successive amendments in 2021, 2022, 2023, and 2024, reflected a continued statutory intent to ensure efficient, consumer-centric, and sustainable electricity services in alignment with national energy objectives.

Integrated Energy Policy, 2006 (“IE Policy”)

The IE Policy, is a report of an expert committee constituted by the Government of India, aimed to achieve sustainable energy development by exploring alternative technologies and possible synergies that would increase energy system efficiency and meet the requirement for energy services. The aims and objectives of the IE Policy include, amongst others, providing appropriate fiscal policies to take care of externalities, tax measures, transparent and targeted subsidies, promoting energy efficiency, providing incentive for renewable energy production by linking the incentive to not just the outlay but also the output. The IE Policy also provides for the respective power regulators to mandate feed-in-laws for renewable energy, as may be appropriate and as provided under the Electricity Act.

Energy Conservation Act, 2001

The Energy Conservation Act, 2001 as further amended in 2010 and 2022 establishes a legal framework to promote energy efficiency and conservation, creating the Bureau of Energy Efficiency to oversee initiatives. The Energy Conservation (Amendment) Act, 2022 grants the Bureau of Energy Efficiency the power to introduce a carbon credit trading scheme and mandate minimum share of consumption of non-fossil energy use by designated consumers. Section 14AA introduced by the

Energy Conservation (Amendment) Act, 2022, provides that the Central Government, or any agency authorised by it may issue carbon credit certificate to a registered entity which complies with the requirements of the notified carbon credit trading scheme. The registered entity shall be entitled to purchase or sell the carbon credit certificate in accordance with the notified carbon credit trading scheme.

Permission from Municipal Authorities/Zila Parishad/Gram Panchayat/any other local authority

In many states in India, local laws require obtaining “*no objection certificates*” and approval for changing land use from relevant local authorities, such as municipal authorities, zila parishad, or gram panchayat, before setting up infrastructure.

Foreign investment and trade regulations

Foreign investment regulations

Foreign investment in India is governed by the provisions of Foreign Exchange Management Act, 1999, as amended, along with the rules, regulations and notifications made by the Reserve Bank of India thereunder, and the consolidated FDI Policy, effective from October 15, 2020, issued by the DPIIT, and any modifications thereto or substitutions thereof, issued from time to time (the “**FDI Policy**”).

Foreign Trade (Development and Regulation) Act, 1992 (the “FTA”)

The FTA seeks to provide for the development and regulation of foreign trade by facilitating imports into, and augmenting exports from, India. The FTA provides that no person shall make any import or export except under an importer-exporter code number (“**IEC**”) granted by the Director General of Foreign Trade, Ministry of Commerce (“**DGFT**”). The IEC granted to any person may be suspended or cancelled inter alia in case the person contravenes any of the provisions of FTA or any rules or orders made thereunder or the DGFT or any other officer authorized by him has reason to believe that any person has made an export or import in a manner prejudicial to the trade relations of India. Any person who makes any export or import in contravention of any provision of this Act or any rules or orders made thereunder or the foreign trade policy would become liable to a penalty under the FTA.

Environmental Laws

The major legislations in India which protect the environment against pollution and also regulate the related activities include the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1981 and the Environment (Protection) Act, 1986 (“**Environment Act**”) and the rules notified thereunder. The primary purpose of these legislations are to control, abate and prevent pollution. In order to achieve these objectives, Pollution Control Boards (“**PCBs**”), which are vested with diverse powers to deal with water and air pollution, have been set up in each state. PCBs are responsible for setting the standards for maintenance of clean air and water, directing the installation of pollution control devices in industries and undertaking inspection to ensure that industries are functioning in compliance with the standards prescribed. These authorities issue consent to establish (one-time approval) and consent to operate (required to be renewed periodically) under the Air (Prevention and Control of Pollution) Act, 1981 and the Water (Prevention and Control of Pollution) Act, 1974. These authorities also have the power of search, seizure and investigation in case of any alleged violation of the regulations. However, there is no requirement to obtain a consent to establish and/or consent to operate under the Air (Prevention and Control of Pollution) Act, 1981 and the Water (Prevention and Control of Pollution) Act, 1974, for certain ‘white category’ of industries. The Central Pollution Control Board of India (“**CPCB**”), under the Ministry of Environment and Forests (“**MoEF**”) has classified industrial sectors under the red, orange, green or white categories. The white category relates to those industrial sectors which are practically non-polluting, including solar power generation through photovoltaic cells, wind power projects of all capacities and mini hydroelectric power. In relation to the white category of industries, only intimation to the relevant PCB is required.

Further, the MoEF mandates that Environment Impact Assessment (“**EIA**”) must be conducted for specified projects. In the process, the MoEF receives proposals for the setting up of projects and assesses their impact on the environment before granting clearances to the projects. Such clearances must be obtained in accordance with the procedure specified in the EIA notification S.O. 1533, issued by the then Ministry of Environment and Forests, GoI (now the Ministry of Environment, Forest and Climate Change, GoI) on September 14, 2006, and amended from time to time, under the provisions of the Environment Act.

Authorisations for usage of groundwater are also mandatorily required from government authorities in certain specified situations, under the provisions of state-specific legislations and rules thereunder regulating the use of groundwater. For example, Karnataka Ground Water Authority issues NOC for extraction of ground water under Karnataka Ground Water (Regulation for protection of sources of Drinking water) Act, 1999 and Rule 6 of the Rules.

Labour related regulations

Shops and establishments legislations

Under the provisions of local shops and establishment legislations applicable in the states in which establishments are set up, establishments are required to be registered under the respective legislations. These legislations regulate the condition of work and employment in shops and commercial establishments and generally prescribe obligations in respect of, among others, registration, opening and closing hours, daily and weekly working hours, rest intervals, overtime, holidays, leave, health and safety measures, termination of service and wages for overtime work. There are penalties prescribed in the form of monetary fine or imprisonment for violation of these legislations.

Labour Codes

In order to rationalize and reform labour laws in India, the Government of India had framed four labour codes (“**Labour Codes**”), which (*barring certain provisions*) have been brought into effect, through a notification, from November 21, 2025, namely:

a) *The Code on Wages, 2019*

The Code on Wages, 2019, provide for subsumption of 4 (four) legislations, namely, the Payment of Wages Act, 1936, the Minimum Wages Act, 1948, the Payment of Bonus Act, 1965 and the Equal Remuneration Act, 1976. It provides for a new definition of ‘wages’ and minimum wages to be notified for all employees in all industries, based on the categories of employees and/or geographical locations and other conditions of service, which shall be equal to or above the rate of floor wages set by the Central Government, and further mandates fixation of wage period and timely wage payment. It also requires that pay parity should be ensured for all genders, and provides for payment of annual bonus, and normal working hours to be prescribed (with the requirement to pay overtime at twice the normal pay rates in the event an employee works beyond the normal working hours).

b) *The Industrial Relations Code, 2020*

The Industrial Relations Code, 2020, subsumes 3 (three) legislations *inter alia* the Trade Unions Act, 1926, and the Industrial Disputes Act, 1947. The objective of the Industrial Relations Code, 2020, is to promote industrial harmony whilst balancing worker protection with business flexibility. The key provisions include (i) recognition of negotiating union and negotiation council, (ii) specific recognition of fixed-term employment with equal benefits including parity in wages, working hours, and allowances with permanent workers, (iii) definitions of key terms including ‘employee’ and ‘worker’, (iv) conditions for lay-offs, retrenchment and closure, including increase in the headcount threshold from 100 (one hundred) to 300 (three hundred) workers for applicability of certain special provisions of retrenchment, lay-off and closure to factories, mines and plantations, (v) constitution of a grievance redressal committee with equal employer and employee representatives, (vi) mandatory notice requirements for strikes and lock-outs in all industrial establishments, (vii) provision of notice to workers prior to change in certain conditions of service; (viii) prohibition of identified unfair labour practices, (ix) adoption and certification of standing orders, and (x) dispute resolution through conciliation, labour courts and industrial tribunals.

c) *The Occupational Safety, Health and Working Conditions Code, 2020 (“Occupational Safety Code”)*

The Occupational Safety Code subsumes 13 (thirteen) legislations such as the Factories Act, 1948, the Contract Labour (Regulation and Abolition) Act, 1970, the Inter-State Migrant Workmen (Regulation of Employment and Conditions of Service) Act, 1979, and the Building and Other Construction Workers (Regulation of Employment and Conditions of Service) Act, 1996, among others.

The Occupational Safety Code provide for definitions of key terms including ‘contract labour’, ‘contractor’, ‘principal employer’ and ‘establishment’, annual leave with wages and prescription of working hours and rest intervals, special provisions on employment of women in night shifts, and prescription of health and safety obligations and provision of welfare facilities. The Occupational Safety Code provides for a common registration to be obtained by establishments (including factories and commercial establishments), licence for contractors supplying contractor labour, and scope for prescription of requirement for factories to obtain specific licences, etc. The Occupational Safety Code also regulates the employment of contract labour including inter-state migrant workers in certain establishments including with respect to prohibition of engagement of contract labour in core activities, and provisions for welfare and health of contract labour.

d) *The Code on Social Security, 2020*

The Code on Social Security, 2020 provide for subsumption of 9 (nine) social security related legislations, *inter alia* the Employee’s Compensation Act, 1923, the Employee’s State Insurance Act, 1948, the Employees’ Provident Funds and Miscellaneous Provisions Act, 1952, the Maternity Benefit Act, 1961, and the Payment of Gratuity Act, 1972. The Code on Social Security, 2020 provides for a common registration to be obtained, social security provisions including on

provident fund, pension, and employees' deposit-linked insurance, employees' state insurance coverage and benefits including sickness benefit, disablement benefit, etc, compensation to be paid to employees for workplace injuries/occupational diseases, maternity benefits, gratuity payments including to fixed-term employees, and prescription of social security benefits including for building and other construction workers, unorganised workers, gig workers and platform workers. Employers are required to obtain necessary registration and make necessary contributions/payments as prescribed.

For the implementation of the Labour Codes, including on requirements relating to registrations and other procedural compliances, certain rules and schemes are required to be notified by the Central and State Governments. Presently, the Central Government and most State Governments have published draft rules that are yet to be notified. The Labour Codes prescribe penalties in the form of monetary fine or imprisonment or both for violations of the provisions provided therein.

In addition to Labour Codes and shops and establishments legislations, certain other labour and employment-related legislations (and rules issued thereunder) that may apply to our operations, from the perspective of protecting the workers' rights, reporting and other compliances, and the requirements that may apply to us as an employer, such as:

- The Child and Adolescent Labour (Prohibition and Regulation) Act, 1986;
- Labour welfare fund legislations; and
- Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013.

State level policies and regulations

The various states in India, from time to time, have announced specific policies relating to RE power projects and the matters relating thereto. These policies provide for, among others, fiscal incentives and procedural relaxations for setting up of RE power projects in the relevant states for promoting RE and its adoption. The Company's operations are also subject to the RE policies formulated in the states in which it undertake/may undertake projects.

Gujarat

Gujarat Wind-Solar Hybrid Policy, 2018

Government of Gujarat introduced this policy in 2018 to promote efficient use of renewable resources through wind-solar hybrid projects. The policy was effective from 2018 to 2023 for projects commission during this period. The wind turbine generators/ solar PV generation plants developed during the operative period of this policy are eligible for benefits for up to 25 years or the project life, whichever is earlier. It applied to projects set up for captive use, third-party sale, or sale to DISCOMS, but excluded supply for green hydrogen and ammonia. The policy provided key incentives that consumers availed due to the on-time commissioning of the projects during this period, including (i) exemption of 50% of wheeling charges & losses (as applicable to normal open access consumer) for captive consumption; (ii) exemption from cross subsidy surcharge ("CSS") & AS for captive users and 50% exemption from CSS and AS for sale of solar power to third party under open access; (iii) exemption to electricity duty in accordance with Gujarat Electricity Duty Act, 1958 and its amendments from time to time; and (iv) monthly banking facility to wind solar hybrid projects.

Gujarat Renewable Energy Policy 2023 (the "GRE Policy")

Government of Gujarat has come up with the GRE Policy on October 4, 2023 in order to tap the maximum RE potential of the state and to achieve 50% cumulative electric power installed capacity from RE sources by 2030. The GRE Policy will be effective from October 4, 2023 (date of notification) until September 30, 2028 for projects installed and commissioned during the operative period are eligible for benefits, lasting up to 25 years from commissioning or lifespan of the renewable project, whichever is earlier. The GRE Policy is applicable on all kind of RE projects including wind, solar, wind solar hybrid, however, not applicable for supply of power for producing green hydrogen and green ammonia. The GRE Policy enables RE projects to be developed without any capacity restrictions for captive use or for selling power to third party, whether registered under REC Mechanism or not.

Overall, the GRE Policy aims to establish Gujarat as a leading hub for RE development in India. By leveraging the state's natural resources, fostering investments, and implementing supportive policies, the government aims to achieve sustainable energy security, economic growth, and environmental stewardship.

Gujarat Electricity Regulatory Commission (Terms and Conditions for Green Energy Open Access) Regulations, 2024 ("GGEOA Regulations")

The GERC introduced the GGEOA Regulations by way of notification dated February 20, 2024 and also notified further amendments on October 23, 2024, March 28, 2025 and August 30, 2025, respectively to facilitate the transmission and distribution of green energy in the state of Gujarat. The GGEOA Regulation provide a comprehensive legal framework for facilitating non-discriminatory open access to green energy, applicable to consumers with a contracted demand or sanctioned

load of 100 kW and above, including entities with aggregated demand within the same electricity division. The regulations permit the establishment of RE generating systems for captive use without restriction on capacity and allow for banking of energy, subject to prescribed banking charges. Open access is categorized into short-term, medium-term, and long-term, with corresponding procedural and charges including transmission charges, CSS, AS, standby charges, and energy accounting mechanisms. These provisions aim to promote RE integration, ensure grid discipline, and balance the financial viability of DISCOMs, while mandating applicants to certify non-duplication of power procurement agreements for the capacity for which green open access is sought.

In accordance with the GGEOA Regulations, the GERC grants waivers and exemptions to promote RE adoption, including exemption from the payment of CSS for consumers procuring power from waste-to-energy projects and for those utilizing green energy for the production of green hydrogen and green ammonia. AS shall not be applicable to green energy open access consumers to the extent of their contract demand maintained with the distribution licensee and shall also be waived for procurement from waste-to-energy and offshore wind projects commissioned on or before December 31, 2032. Consumers availing captive rooftop solar projects of capacity up to 1 MW under the net metering framework are exempt from submitting equity shareholding and consumption details required under CGP norms.

Gujarat Integrated Renewal Energy Policy, 2025

The Gujarat Renewable Energy Policy, 2025, was notified by Energy and Petrochemicals Departments on December 24, 2025. The objective of the policy is to enable large-scale deployment of solar, wind, wind-solar hybrid and other notified renewable energy sources, and to ensure grid security and adherence to the applicable provisions of the electricity laws. The Policy stipulates on the following: (i) eligibility criteria, (ii) project approval procedures, (iii) land allotment and grid connectivity arrangements, (iii) facilitation of open access and captive consumption, (iv) principles governing banking and energy accounting, and (v) the applicability of transmission, wheeling and other charges as determined by the Gujarat Electricity Regulatory Commission from time to time. The Policy shall remain in force for projects commissioned up to December 31, 2030, or until the notification of a subsequent policy, whichever is earlier.

Karnataka

Karnataka Solar Policy 2014-2021

The Karnataka Solar Policy 2014-2021 was introduced to promote solar energy development in the state. The policy came into effect from 2014 and was to remain in force till 2021. All solar power projects (Solar PV and solar thermal) established in the state of Karnataka were eligible for benefits under the policy. Further, in exercise of the powers conferred under the then applicable Karnataka Electricity Regulatory Commission (Terms and conditions of open access) Regulations, 2004, the Karnataka Electricity Regulatory Commission ordered on August 18, 2014, that, all solar power generators achieving commercial operation date between April 1, 2013, and March 31, 2018, were granted a waiver on CSS and AS applicable under open access regulations and banking and wheeling charges for a period of 10 years.

Karnataka Renewable Energy Policy 2022-2027

This policy aims continue Karnataka's position as a preferred investment destination in the RE sector and create an ecosystem for sustainable and green energy development in the state. This policy provides comprehensive framework for land acquisition, project allotment, connectivity options, and completion timelines through various fiscal and non-fiscal incentives.

Karnataka Electricity Regulatory Commission (Terms and Conditions for Open Access) Regulations, 2025

The Karnataka Electricity Regulatory Commission (Terms and Conditions for Open Access) Regulations, 2025 notified on March 26, 2025, promulgated pursuant to the directive of the High Court of Karnataka, establish a comprehensive legal framework governing open access to intra-state transmission and distribution systems within Karnataka. These regulations delineate eligibility criteria for open access consumers, stipulating a minimum contract demand or sanctioned load of 100 kW, and encompass provisions for application procedures, timelines, and requisite fees, including processing charges and bank guarantees. The regulations prescribe detailed methodologies for calculating transmission charges, wheeling charges, CSS, AS, banking charges, and standby charges, ensuring alignment with the Electricity Act, the National Electricity Policy, and the National Tariff Policy. Notably, the regulations introduce mechanisms for energy banking, specify conditions for the surrender and reallocation of unused capacity, and mandate the execution of wheeling agreements within defined timeframes. Furthermore, they establish protocols for the State Load Despatch Centre ("SLDC") to maintain transparency through regular dissemination of open access information. These regulations supersede the previous Green Energy Open Access framework, thereby reinforcing a legally robust and transparent regime for open access in Karnataka.

Maharashtra

Unconventional Energy Generation Policy, 2020

The Unconventional Energy Generation Policy, 2020 issued by the Government of Maharashtra, comprises the ‘New and Renewable (Unconventional) Energy of the State Transmission of power generation from sources for attached projects Integrated Policy-2020’ and the ‘New and Renewable State Transmission of power generation from (unconventional) energy sources Integrated Policy for Projects – 2020’. The policy, which is applicable until March 31, 2025, is aimed towards commissioning non-conventional power projects with a capacity of 25,000 MW by 2025. While the policy supersedes previous policies, including the Comprehensive Policy for Grid-connected Power Projects based on New and Renewable (Nonconventional) Energy Sources – 2015, benefits of the incentives mentioned in the previous policies relating to such projects continue to be admissible if the project is implemented within one year from the date of promulgation of the new policy.

The new policy provides for various support systems including but not limited to setting up a single window web system for approvals and permits, promoting land availability, re-energization of existing projects, rural electrification and decentralization of micro grids.

Maharashtra Electricity Regulatory Commission (Distribution Open Access) Regulations, 2016

The Maharashtra Electricity Regulatory Commission (Distribution Open Access) Regulations, 2016 notified on June 7, 2019, and further amended on November 10, 2023, was introduced to align the framework with the Electricity (Promoting Renewable Energy Through Green Energy Open Access) Rules, 2022 and aim to enhance the framework for RE open access in the state. These regulations reduce the eligibility threshold for green energy open access to consumers with a contracted demand or sanctioned load of 100 kW, allow aggregation across multiple connections, and exempt captive users from this limit. They mandate specific metering requirements, revise banking provisions including an 8% charge on banked energy and forfeiture of unutilized energy (with REC entitlement), and exempt certain green energy uses—such as waste-to-energy and production of green hydrogen/ammonia—from cross-subsidy and AS. Further, they enable concurrent use of rooftop solar and open access and designate the SLDC and state transmission utility (“STU”) as nodal agencies for short-term and long-term access, respectively, thereby streamlining compliance and promoting RE integration across Maharashtra.

Rajasthan

Rajasthan Electricity Regulatory Commission (Terms and Conditions for Green Energy Open Access) Regulations, 2025

The Rajasthan Electricity Regulatory Commission (“**REERC**”) has notified through its order May 21, 2025 the “Rajasthan Electricity Regulatory Commission (Terms and Conditions for Green Energy Open Access) Regulations, 2025,” establishing a comprehensive legal and regulatory framework to govern and facilitate the procurement and utilization of RE through open access within the State of Rajasthan.

Under these regulations, captive RE projects, including behind-the-meter installations, are permitted to have an installed capacity of up to 200% of the consumer’s contract demand. Where the capacity of such a captive power project exceeds 100% and extends up to 200% of the contract demand, the installation of a BESS is mandated. The BESS in such cases must have a storage capacity equivalent to at least 20% of the energy generated by the additional capacity—that is, the portion of capacity exceeding 100% of the contract demand.

The regulations impose specific technical requirements to support grid stability and the efficient integration of RE. New RE projects, excluding hydroelectric projects, that are connected to the STU network and have an installed capacity exceeding 5 MW are required to install an energy storage system capable of storing either two hours of energy or 5% of the installed project capacity, whichever is higher.

Consumers with a contract demand or sanctioned load of 100 kW or more, whether through a single connection or through multiple connections within the same electricity division of a distribution company, are eligible to procure green energy through open access in accordance with these Regulations.

Transmission charges for co-located wind-solar hybrid power projects shall be levied on the contracted transmission capacity. In the case of non-co-located hybrid projects where solar and wind components are injected separately, the generation from the hybrid project must not exceed the contracted capacity.

Transmission and wheeling charges shall be exempted for power supplied from BESS during peak hours or non-solar hours, up to a total capacity of 2,000 MW or until such capacity is installed by the year 2030, whichever occurs earlier. RE projects equipped with BESS of at least 5% of the installed renewable capacity shall be eligible for a 75% exemption on transmission and wheeling charges for a period of seven years. For each additional 1% of BESS capacity up to 30%, an additional 1% exemption shall be granted. Projects with BESS capacity exceeding 30% of the renewable capacity shall be granted a full exemption. Similarly, standalone BESS projects and those connected to 11 kV or 33 kV substations shall also be fully exempted from such charges for a period of seven years. Projects supplying green hydrogen or ammonia and commissioned prior to 2030 shall be eligible for a 50% waiver of intrastate transmission and wheeling charges. However, associated transmission and wheeling losses shall be determined by the Commission.

No AS shall be applicable on the quantum of green energy consumed under open access, provided the consumer pays fixed charges to the distribution licensee for that amount of energy within the sanctioned load or contract demand.

For RE projects having an installed capacity up to 100% of the consumer's contract demand, banking of energy is permitted for captive use within the state. The maximum permitted banking limit shall be the higher of 25% of the monthly energy injected by the project or 30% of the total monthly consumption from the distribution licensee. In order to avail this facility, captive RE projects must be equipped with ABT-compliant special energy meters capable of 15-minute block-wise accounting, and must enter into a valid wheeling and banking agreement with the concerned distribution licensee. Banking shall be permitted on an annual basis and shall be subject to applicable scheduling requirements. Banking is also allowed for the consumers for RE projects having installed capacity between 100%-200% of the consumer's contract demand subject to a maximum ceiling of 30% of the total monthly consumption and on a billing cycle basis.

Banking of energy is permitted only for captive consumption and limited to 30% of the total monthly consumption from the DISCOM. Banking shall not be permitted for RE projects supplying energy to third-party consumers or for behind-the-meter installations. Such projects must also install ABT-compliant special energy meters and execute a wheeling and banking agreement with the DISCOM. In these cases, banking shall be allowed only on a billing cycle basis and must be scheduled. Energy injected, after accounting for transmission and wheeling losses, shall be adjusted against energy drawn in the same billing cycle. Credit for banked energy shall not be carried forward beyond the billing cycle. A monthly set-off shall be allowed except in respect of excess energy drawn during peak hours.

Any unutilized banked energy remaining at the end of a billing cycle shall lapse. However, the concerned project shall be eligible to receive RECs equivalent to the quantum of lapsed energy, subject to the prevailing rules and regulations governing RECs.

Rajasthan Renewable Energy Policy, 2023

The policy designates Rajasthan Renewable Energy Corporation Limited (“**RREC**”) as the nodal agency and focuses on developing the utility scale and decentralized renewable projects. It provides that all renewable projects installed in Rajasthan shall be required to be registered with the RREC. It further provides guidelines for land allocation, grid integration, and project development while offering incentives under Rajasthan Investment Promotion Scheme.

Tamil Nadu

Tamil Nadu Electricity Regulatory Commission (Terms and Conditions for Green Energy Open Access) Regulations, 2025

Tamil Nadu Electricity Regulatory Commission (Terms and Conditions for Green Energy Open Access) Regulations, 2025 notified on September 18, 2025, aims to provide non-discriminatory open access for renewable energy using intra-state transmission and distribution systems, by regulating charges and banking of energy. The regulation introduces a granular 15 minutes settlement, and restricts the settlement of banking of energy generated during normal hours within only normal hours and not during off-peak hours. Further, energy banking facility is prohibited for third-party open access projects and restricts to real-time basis. In relation to a writ petition filed by a third party challenging the validity of these regulations, the Madras High Court has granted an interim stay on its implementation.

Tamil Nadu Renewable Energy Policy 2024

The Tamil Nadu Renewable Energy Policy 2024 aims to significantly boost the state's clean energy capacity to 20,000 MW by 2030 through targeted reforms and incentives. It introduces three key initiatives: (1) a wind repowering policy to upgrade aging turbines and allow hybrid solar-wind projects with financial and regulatory benefits; (2) a small hydel policy that for the first time allows private participation in small hydroelectric projects (100 kW–10 MW), offering tax exemptions and long-term incentives; and (3) a PSP policy to address renewable intermittency with streamlined approvals, tax breaks, and resource allocation guarantees. Collectively, the policy strengthens grid reliability, promotes private investment, and reinforces Tamil Nadu's leadership in sustainable energy.

Tamil Nadu Electricity Regulatory Commission (Grid Connectivity and Intra-State Open Access) Regulations, 2014

The Tamil Nadu Electricity Regulatory Commission (Grid Connectivity and Intra-State Open Access) Regulations, 2014 notified on May 7, 2014 and its amendment dated March 21, 2022, govern the grant of grid connectivity and the provision of non-discriminatory open access to intra-State transmission and distribution networks in Tamil Nadu, in accordance with the Electricity Act. The Regulations classify open access into long-term, medium-term, and short-term categories, each with defined eligibility, procedures, and charges, including transmission/wheeling charges, CSS, and other applicable fees. Connectivity to the grid requires approval from the STU, which evaluates technical feasibility and mandates compliance with relevant codes and standards. The Regulations also outline the roles of the STU, DISCOMs, and the SLDC in system planning, energy accounting, metering, and scheduling. Curtailment of access is permitted in the interest of grid security, following a prescribed

priority. All open access users must adhere to technical, operational, and commercial requirements as stipulated by the Commission.

Haryana

Haryana Electricity Regulatory Commission (Green Energy Open Access) Regulations, 2023

The Haryana Electricity Regulatory Commission (“**HERC**”) introduced the HERC (Green Energy Open Access) Regulations, 2023 on April 24, 2023 and its amendment dated February 25, 2025, to facilitate and regulate the access to RE within the state. These regulations aim to align the state's regulatory framework with national RE policies and enhance open access adoption. The amendment expands eligibility to consumers with an aggregate load of 100 kW within a distribution division, removes capacity limits for captive RE projects (subject to sanctioned demand), and extends exemption from AS to offshore wind projects commissioned up to December, 2032. It permits open access for non-independent feeder consumers, subject to system constraints, and exempts long-term solar and wind open access transactions from deviation settlement mechanism charges, capping standby charges at 25% of applicable energy charges. Additionally, captive renewable generators may bank energy monthly, draw it in the same or lower Time-of-Day (“**ToD**”) slots at 8% charge. The amendment also introduces deemed approval timelines for green energy open access applications, thereby streamlining the approval process and facilitating RE growth in the state.

Chhattisgarh

Chhattisgarh Solar Policy 2017-27

The Chhattisgarh Solar Energy Policy 2017–2027 aims to promote solar energy adoption in the state by reducing reliance on conventional energy sources, encouraging private sector participation, and ensuring energy access for remote areas. The policy designates the Chhattisgarh State Renewable Energy Development Agency as the nodal agency responsible for facilitating project approvals, land allocation, and infrastructure support. It offers incentives such as exemptions from transmission and wheeling charges, and banking facilities for solar power producers. The policy also emphasizes the development of off-grid solar applications to meet the energy needs of vulnerable communities. It is effective from April 1, 2017, to March 31, 2027, or until a new policy is introduced.

Chhattisgarh State Electricity Regulatory Commission (Grid Interactive Distributed Renewable Energy Sources) Regulations, 2019

The Chhattisgarh State Electricity Regulatory Commission (“**CSERC**”) introduced CSERC (Grid Interactive Distributed Renewable Energy Sources) Regulations, 2019 dated October 4, 2019 and its recent amendment October 6, 2023 to promote the adoption of distributed RE systems in the state. This amendment aims to promote RE adoption by reducing the minimum capacity for green energy open access from 500 kW to 100 kW, thereby enabling a broader range of consumers to participate. It also removes the previous cap that limited the maximum capacity to 2.5 times the contract demand, allowing greater flexibility for consumers. Additionally, the first 500 MW of solar distributed RE projects commissioned by December 27, 2023, are exempted from transmission charges, CSS, wheeling charges, and State Load Despatch Center charges for the entire life of the project. The amendment introduces definitions for 'banking cycle' and 'green energy,' with the banking cycle aligning with the financial year and green energy encompassing electricity from renewable sources, including hydro and storage systems powered by renewables, green hydrogen, and green ammonia.

Uttarakhand

Uttarakhand State Solar Policy 2023

The Uttarakhand State Solar Power Policy 2023 came into effect on March 13, 2023 and it aims to achieve a cumulative solar capacity of 2,500 MW by December, 2027, encompassing 1,100 MW from utility-scale projects, 750 MW from domestic installations, and 350 MW from institutional use. The policy promotes distributed solar energy adoption, including rooftop systems, and introduces mechanisms like virtual and group net metering, peer-to-peer trading, and green tariffs to facilitate consumer participation. It mandates that solar projects on leased government land provide 70% employment to local youth and offers incentives such as exemptions from various fees and streamlined single-window clearances. The Uttarakhand RE Development Agency serves as the nodal agency, responsible for land identification, project facilitation, and policy implementation. The Uttarakhand State Solar Policy 2023 offers a variety of exemptions and incentives aimed at promoting the development of RE projects in the state. Captive and group-captive solar power plants are exempt from paying transmission and wheeling charges, thereby ensuring cost-effective energy distribution. Additionally, developers of solar projects are granted a fifty percent (50%) exemption on stamp duty for land lease deeds and purchases, along with a full (100%) waiver on land use conversion charges. Utility-scale solar projects commissioned within the prescribed timeline are exempt from electricity duty for up to ten (10) years, which enhances their financial viability. Furthermore, a fifty percent (50%) reimbursement of state GST paid on rooftop solar power plants is provided for five (5) years, reducing the tax burden on these installations. Solar

power plants operating under the Virtual Net Metering (VNM) framework are also exempt from cross-subsidy and AS, promoting equitable energy distribution. Collectively, these exemptions and incentives are designed to create a favorable environment for the growth of solar energy projects, in line with the state's RE goals.

Uttarakhand Electricity Regulatory Commission (Green Energy Open Access) Regulations, 2023

The Uttarakhand Electricity Regulatory Commission (“UERC”) has introduced the Green Energy Open Access Regulations, 2023 dated October 18, 2023, to promote RE usage within the state. These regulations enable consumers with a contracted demand or sanctioned load of 100 kW or more—either through a single connection or multiple connections under the same name within the same electricity division—to access green energy without limitations. Captive consumers and RE generators are also eligible without specified caps. Applicants can simultaneously apply for connectivity and open access, provided they are connected to the intra-state transmission or distribution system. Consumers must maintain their approved capacity or schedule for at least 12-time blocks daily. The State Load Dispatch Centre is designated as the nodal agency for short-term open access (up to one month), while the STU handles medium-term (exceeding three months but not exceeding three years) and long-term (exceeding twelve years but not exceeding 25 years) open access. CSS for green energy consumers are capped for the initial 12 years, with exemptions for captive generation and specific renewable sources like offshore wind projects commissioned up to December 2032. Additionally, the permitted quantum of banked energy by Green Energy Open Access consumer shall be at least 30% of its total monthly consumption of electricity from the Distribution licensee.

Andhra Pradesh

Andhra Pradesh Integrated Clean Energy Policy, 2024

The Government of Andhra Pradesh, through its Integrated Clean Energy Policy, 2024 dated May 2, 2024, establishes a comprehensive legal and regulatory framework with the objective of transitioning the state towards a decarbonized energy economy and achieving net-zero carbon emissions by the year 2047. This policy envisages the development of 160 GW of RE capacity, comprising 78.5 GW of solar power, 35 GW of wind energy, 22 GW of pumped storage hydro, and 25 GWh of BESS, along with an annual production target of 1.5 million tonnes of green hydrogen. To facilitate such development, this policy provides for a suite of fiscal and non-fiscal incentives, including but not limited to, capital subsidies (25% for solar, wind, and electrolyser manufacturing units; and 20% for battery manufacturing units), reimbursement of GST, exemptions on stamp duty and registration charges, and the grant of land on concessional lease terms. The Policy further mandates the establishment of a University for Green Energy and Circular Economy and ancillary skill development centers to foster a qualified workforce. The New and Renewable Energy Development Corporation of Andhra Pradesh (“NREDCAP”) is designated as the Nodal Agency for the administration, facilitation, and monitoring of all activities undertaken pursuant to the Policy and shall be vested with the authority to grant necessary approvals and clearances in coordination with relevant governmental departments and stakeholders.

Andhra Pradesh Electricity Regulatory Commission (Green Energy Open Access, Charges, and Banking) Regulations, 2024

The Andhra Pradesh Electricity Regulatory Commission (Green Energy Open Access, Charges, and Banking) Regulations, 2024, notified on May 2, 2024, establishes a comprehensive legal framework to facilitate open access to RE within the state, superseding all prior directives on the matter. It delineates eligibility criteria for consumers seeking open access, categorizing them into long-term, medium-term, and short-term users, and prioritizes green energy open access over fossil-based sources in scenarios of system constraints. The regulation outlines a structured tariff system to incentivize RE adoption and specifies that banking facilities are available exclusively to wind, solar, and mini-hydel power generators. Banked energy must be utilized within the same billing cycle, with an 8% banking charge applied at the consumer's end; unutilized energy at the cycle's end is compensated at 75% of the last discovered SECI tender rate for the respective renewable source. Additionally, the regulation designates the Andhra Pradesh State Load Dispatch Centre (“APSLDC”) as the State Nodal Agency for short-term access and the STU for medium and long-term access, ensuring streamlined processing of applications.

Additionally, on December 8, 2025, the first amendment to the Andhra Pradesh Electricity Regulatory Commission (Green Energy Open Access, Charges, and Banking) Regulations, 2024 was notified with the objective to remove regulatory ambiguities, ensure grid discipline, and facilitate greater participation of renewable energy generators and consumers under the green energy open access framework without disturbing vested rights under valid existing arrangements. The amendment (i) clarifies key definitions including banking of surplus green energy, (ii) prescribes operational modalities for scheduling, accounting and settlement of energy on a 15-minute time-block basis, and (iii) clarifies the treatment of excess and inadvertent injections. It also expands the scope of eligible consumers by (i) permitting procurement of power through green energy open access for electric vehicle charging stations, (ii) aligning connectivity provisions with applicable transmission and evacuation regulations, and (iii) providing transitional clarity for existing open access approvals for new applicants.

Uttar Pradesh

Uttar Pradesh Solar Energy Policy, 2022

The Uttar Pradesh Solar Energy Policy, 2022 promulgated by the Government of Uttar Pradesh, confers fiscal incentives including a 100% exemption from stamp duty on land transactions for solar projects, a decade-long exemption from electricity duty, and a capital subsidy of ₹2.5 crore per MW for solar parks equipped with a minimum of four-hour battery storage systems. Furthermore, it stipulates lease provisions for government undertakings at ₹1 per acre per annum and for private entities at ₹15,000 per acre per annum for a tenure of 30 years. The Uttar Pradesh New and Renewable Energy Development Agency (“UPNEDA”) is designated as the nodal agency to facilitate implementation, approvals, and coordination across departments. The policy also mandates the training of 30,000 individuals over five years to support employment in the solar energy sector. Additionally, it promotes the development of solar cities, with Ayodhya as a pilot, and the establishment of green energy corridors in regions like Bundelkhand to enhance transmission infrastructure.

The Uttar Pradesh Solar Energy Policy, 2022, also expands eligibility to public institutions and private educational entities, with net metering allowed under (“RE Service Company”) RESCO or CAPEX modes. System capacity must be between 1 kW and 2 MW, not exceeding the sanctioned load. The nodal agency, UPNEDA, facilitates bidding and contract standardization. The policy aims to enhance adoption in institutional and government facilities while maintaining DISCOM revenue balance. According to the Uttar Pradesh Solar Energy Policy, 2022, RESCO Mode is defined as the methodology in which entire investment is to be incurred by a company/individual other than the consumer for setting up of the solar power project in the consumer premises and the consumer pays for the electricity generated from such solar power project at mutually agreed tariff to such investor company/individually.

Uttar Pradesh Electricity Regulatory Commission (Terms and Conditions for Open Access) Regulations, 2019

The Uttar Pradesh Electricity Regulatory Commission (“UPERC”) promulgated the UPERC (Terms and Conditions for Open Access) Regulations, 2019 dated December 10, 2019 and its amendment dated December 16, 2024, to establish a structured framework governing open access to intra-state transmission and distribution systems within the state. These regulations apply to generating companies, captive consumers, eligible licensees, and distribution franchisees possessing a contracted demand of contracted load / sanctioned load of hundred (100) kW & above, connected at 11 kV or higher voltage levels. The UPERC (Terms and Conditions for Open Access) (First Amendment) Regulations, 2024, amend the 2019 regulations to streamline open access mechanisms and enhance the integration of RE in alignment with the Electricity (Promoting Renewable Energy Through Green Energy Open Access) Rules, 2022. The amendment redefines open access categories, setting long-term access as exceeding five years but not more than twenty-five years, medium-term as more than eleven months up to three years, and short-term as up to eleven months. It introduces key provisions for Green Energy Open Access consumers, including exemption from AS upon payment of fixed charges, and waivers for offshore wind projects commissioned by December, 2025. Furthermore, consumers using energy for Green Hydrogen or Green Ammonia production, and those procuring power from waste-to-energy or offshore wind sources, receive concessions in additional and CSS. These provisions aim to facilitate a transparent and equitable open access regime, promoting competition and efficiency in the state's electricity sector.

Telangana

Telangana Clean and Green Energy Policy, 2025

The Telangana Clean and Green Energy Policy, 2025, promulgated by the Government of Telangana, establishes a comprehensive legal framework to augment the state's RE capacity by 20,000 MW by 2030 and 40,000 MW by 2035. This policy, effective for a decade from its issuance, aims to attract investments amounting to ₹1.98 lakh crore and generate approximately 1.14 lakh employment opportunities. It encompasses the promotion of diverse RE sources, including solar, wind, hybrid systems, pumped storage, BESS, and green hydrogen production. The policy provides for fiscal incentives such as reimbursement of stamp duty for land acquisition, electricity duty exemptions for MSMEs utilizing solar or wind energy, and reimbursement of state GST components on capital investments. Furthermore, it designates Telangana Power Generation Corporation and Telangana Renewable Energy Development Corporation as the nodal agencies responsible for the policy's implementation and governance. By fostering a conducive environment for RE development, the policy aligns with India's broader objective of achieving net-zero emissions by 2070.

Telangana State Electricity Regulatory Commission (Terms and Conditions of Open Access), Regulations, 2024

The Telangana State Electricity Regulatory Commission (Terms and Conditions of Open Access) Regulations, 2024, promulgated on March 18, 2024, establishes a comprehensive legal framework for facilitating open access to electricity within the state, in alignment with the provisions of the Electricity Act, and the Electricity Rules, as amended. This regulation supersedes prior directives, to provide a consolidated and updated structure for open access. It delineates eligibility criteria, permitting consumers with a contracted or sanctioned load of 100 kW or more, including those aggregating multiple connections within the same electricity division of a distribution company, to procure power through green energy open access. The regulation categorizes open access into short-term, medium-term, and long-term, each with specified durations and conditions. It also outlines the procedures for application, approval, and scheduling of open access transactions, and stipulates charges related to transmission, wheeling, and CSS. Furthermore, the regulation provides for energy banking up to 30% for RE

generators, with specific provisions for settlement and adjustment. By instituting these measures, the regulation aims to promote competition, enhance efficiency, and encourage the use of RE sources within the state's electricity sector.

Rooftop solar policies across Indian states

Maharashtra

Maharashtra Electricity Regulatory Commission (Grid Interactive Rooftop Renewable Energy Generating Systems) Regulations, 2024

The SERCs have been assigned the function of promoting generation of electricity from renewable sources of energy by providing suitable measures for connectivity with the grid and sale of electricity to any person. Accordingly, the Maharashtra Electricity Regulatory Commission (Grid Interactive Rooftop Renewable Energy Generating Systems) Regulations, 2019 was introduced by the Maharashtra Electricity Regulatory Commission, and further amended by the Maharashtra Electricity Regulatory Commission (Grid Interactive Rooftop Renewable Energy Generating Systems) (First Amendment) Regulations, 2023 and Maharashtra Electricity Regulatory Commission (Grid Interactive Rooftop Renewable Energy Generating System) (Second Amendment) Regulations, 2024.

The Maharashtra Electricity Regulatory Commission (Grid Interactive Rooftop Renewable Energy Generating Systems) (First Amendment) Regulations, 2023 notified on November 16, 2023 provide that the maximum rooftop solar PV system capacity to be installed at any eligible consumer's premises shall be 100% of the consumer's sanctioned load for industrial and commercial consumers or contract demand, whichever is lower. Further, in case of net metering arrangement, the capacity of renewable energy generating system shall be limited to 5 MW or contract demand/sanction load of consumer, whichever is lower. By way of the amendment, the limit has been increased to 5 megawatts from 1 MW. The proposed limit 5 MW is disputed and subject to certain proceedings before the Maharashtra Electricity Regulatory Commission.

Haryana

Haryana Electricity Regulatory Commission (Rooftop Solar Grid Interactive Systems Based on Net Metering/Gross Metering), Regulations, 2021

The Haryana Net Metering Regulations, 2021, governed by HERC, aim to promote rooftop solar adoption across residential, commercial, and industrial consumers (excluding agricultural users). The policy allows net metering for systems up to 500 kilowatt-peak ("kWp"). Consumers are exempt from transmission, wheeling, cross-subsidy, and banking charges for behind-the-meter installations. Net metering and open access cannot be clubbed for the same load but may coexist independently. The policy supports decentralized solar generation and contributes to Haryana's RPO targets by simplifying interconnection and billing mechanisms.

Rajasthan

Rajasthan Electricity Regulatory Commission (Grid Interactive Distributed Renewable Energy Generating Systems) Regulations, 2021 ("2021 Distributed RE Regulations")

The RERC governs net and gross metering under the 2021 Distributed RE Regulations. Net metering is allowed for loads up to 1 MW or sanctioned load, whichever is lower, across all consumer categories. The policy aims to enhance rooftop solar adoption, which currently accounts for less than 2% of Rajasthan's total energy basket. The state targets 90 GW of RE by 2030, and the RERC may revise conditions (like storage or banking charges) as penetration increases.

Further, an amendment to the 2021 Distributed RE Regulations was notified on December 3, 2025, which clarifies the provisions related to applicability, technical standards, grid connectivity, metering, energy accounting and settlement mechanisms for distributed renewable energy systems, including rooftop solar and other eligible distributed RE technologies. It also provides for compliance obligations on eligible consumers and generating entities by aligning technical and operational requirements with the prevailing regulations, and by removing procedural ambiguities.

Uttar Pradesh

Uttar Pradesh Electricity Regulatory Commission (Rooftop Solar PV Grid Interactive Systems Gross / Net Metering) Regulations, 2019 ("RSPV Regulations, 2019")

The RSPV Regulations, 2019, were notified on January 4, 2019. These regulations established the framework for both net metering and gross metering arrangements. As per the original provisions, the net metering facility was available only to agricultural consumers and residential/domestic consumers.

Subsequently, the first amendment/addendum to the RSPV Regulations, 2019, notified on June 1, 2022, introduced the concept

of net billing/net feed-in arrangements. Accordingly, following this amendment, Rooftop Solar Photovoltaic (RSPV) systems could be installed under three distinct arrangements.

Furthermore, the second amendment to the RSPV Regulations, 2019, notified on November 17, 2023, further expanded the framework for rooftop solar power generation in Uttar Pradesh. This amendment extended the net metering facility to a broader category of consumers, including government and non-government institutions.

West Bengal

West Bengal Electricity Commission (Grid Interactive Rooftop Solar System for Prosumers) Regulations, 2025

The West Bengal Electricity Regulatory Commission (“**WBERC**”) promulgated the West Bengal Electricity Commission (Grid interactive Rooftop Solar System for Prosumers) Regulations, 2025 on July 31, 2025. The regulations define a “prosumer” as a person who consumes electricity from the grid and can also inject electricity into the grid using the same point of supply. Prosumers may opt for three metering mechanisms: net metering, net billing, or gross metering. Net metering is permitted for prosumers with sanctioned load or contracted demand of at least 1 kW, allowing installations from 1 kW up to 500 kW or the prosumer’s contracted demand or sanctioned load, whichever is lower. Net billing is permitted to prosumers having a contract demand or sanctioned load of at least 1 kW, allowing installation with a minimum 1 kW capacity and maximum up to the contract demand or sanctioned load. Gross metering is permitted to prosumers having a contract demand or sanctioned load of at least 1 kW, enabling installation with a minimum capacity of 1 kW and up to the prosumer’s contract demand or sanctioned load. Prosumers have the right to set up grid interactive rooftop solar photovoltaic systems either independently or through a service provider. For net metering, energy accounting is conducted as per the regular metering cycle of consumers, with excess generation carried forward within the financial year, and any surplus at year-end is forfeited. The regulations also emphasize technical standards, mandating compliance with CEA guidelines to ensure grid stability and safety.

Tamil Nadu

Tamil Nadu Electricity Regulatory Commission (Generic Tariff Order for Grid Interactive PV Solar Energy Generating System (GISS)) Regulations, 2021

The Tamil Nadu Electricity Regulatory Commission (“**TNERC**”) has established guidelines for the implementation and operation of Grid Interactive Photovoltaic Solar Energy Generating Systems within the state. These regulations apply specifically to onsite solar installations under the industrial and commercial tariff segments and offer three operational models: net feed-in metering, gross metering, and behind-the-meter configurations. Beyond 1 MW (AC), a rooftop solar plant is required to be behind-the-meter and the consumer shall utilize the entire solar power being generated without any export option to the grid.

Net Feed-in (Net Billing) Mechanism

Under the Net Feed-in model, a single bidirectional meter is installed at the point of supply to measure both the import and export of electricity. The key features of this mechanism include:

- Energy imported from the grid is billed at the prevailing retail tariff.
- Solar energy exported to the grid is credited at a feed-in tariff determined by TNERC.
- The net bill is calculated by offsetting the monetary value of the exported energy against the imported energy.

This model is available to all consumer categories—excluding hut and agricultural consumers—regardless of their tariff classification or voltage level, up to the sanctioned load or contracted demand, with a maximum capacity limit of 999 kW.

Applicable network charges

For consumers opting for the Net Metering or Net Billing mechanism, network charges will apply based on the total units of solar energy generated by the system.

Telangana

Telangana State Electricity Regulatory Commission (Guidelines for implementation of Net metering Rooftop Solar PV Grid Interactive Systems) Regulations, 2020

The eligible consumer is a consumer of electricity in the area of supply of the DISCOM, who uses or proposes to use a Rooftop Solar PV System, which can be self-owned or a third party owned to offset a part or all of the consumer's own electrical requirement. The maximum rooftop solar PV capacity permitted at a consumer’s premises is capped at 80% of the sanctioned load for both industrial and commercial consumers. Net metering is allowed for loads up to 1 MWp or 80% of the sanctioned load, whichever is lower.

The Telangana Electricity Regulatory Commission (Rooftop Solar PV Grid Interactive Systems) Regulations, 2025

The Telangana Electricity Regulatory Commission (Rooftop Solar PV Grid Interactive Systems) Regulations, 2025, were notified on November 15, 2025. The regulations allows eligible consumers to install rooftop solar systems under four arrangements i.e., net metering (up to 500 kW), gross metering (up to 1 MW), group net metering (less than 100 kW), and virtual net metering (less than 100 kW). Its sets out eligibility criteria, technical standards, safety requirements, and application procedures, such as deemed approval based on capacity. It defines the rights and obligations of distribution companies, consumers, prosumers, and third-party system owners and provides for a uniform tenure of 25 years for permitted arrangements. The regulations address energy accounting, billing mechanisms, treatment of surplus energy, minimum billing requirements, and exemptions from certain charges (such as wheeling and banking charges for specific arrangements). Further, the energy generated under these arrangements are counted towards renewable purchase obligations. The regulations also establish dispute resolution mechanisms, aiming to promote rooftop solar deployment whilst ensuring grid safety and fair access.

Andhra Pradesh

Andhra Pradesh Electricity Regulatory Commission (The Grid Interactive Solar Photovoltaic system under Gross/Net metering) Regulations, 2023

The Government of Andhra Pradesh promotes the deployment of grid-connected rooftop solar PV systems (“SRTPVS”) on public, domestic, commercial, and industrial buildings under net or gross metering arrangements. Under the net metering framework, the maximum permissible capacity of SRTPVS (with or without BESS) is the lesser of 500 kWp or the consumer’s contracted demand. This initiative aligns with the state’s broader policy goals to achieve 50% of cumulative power capacity from non-fossil fuel sources by 2030 and net-zero emissions by 2047.

First Amendment to the APERC (Grid Interactive Solar Rooftop Photovoltaic Systems under Net/Gross Metering) Regulations, 2023.

The First Amendment to the Andhra Pradesh Electricity Regulatory Commission (Grid Interactive Solar Rooftop Photovoltaic Systems under Net/Gross Metering) Regulations, 2023, were notified on December 4, 2025. It primarily revises and clarifies provisions relating to the applicability of net metering and gross metering mechanisms, settlement of excess solar energy, billing methodology, and the roles and responsibilities of distribution licensees and consumers. It introduces modifications to the definitions and operative clauses such as treatment of surplus energy injected into the grid, settlement periods, and applicability of applicable tariffs as determined by the Commission from time to time. It also safeguards consumer interests by providing regulatory certainty on compensation for excess generation and continuity of existing rooftop solar arrangements.

Karnataka

Karnataka Electricity Regulatory Commission (Implementation of Solar Rooftop Power Plants) Regulations, 2016

The maximum rooftop solar PV system capacity to be installed at any eligible consumer’s premises shall be 80% of the consumer’s sanctioned load for industrial and commercial consumers. Net metering is allowed for loads up to 2 MWp or 80% of the consumer’s sanctioned load whichever is lower. Net metering facility for SRTPV plants would not be available to consumers who are using power from other sources or captive sources through an open access mechanism. Such consumers have the option to choose between gross metering arrangements or setting up a captive plant for self-consumption.

Other Indian Laws

In addition to the above, we are also governed by the provisions of the Companies Act, 2013 and rules framed thereunder, fire-safety related laws, and rules framed thereunder, taxation statutes such as the Income-Tax Act, 1961 and the Central Goods and Services Tax Act, 2017, the Contract Act, 1872, Transfer of Property Act, 1882, the Competition Act, 2002, Trademarks Act, 1999, other applicable laws and regulations notified by the Central Government and State Governments and other authorities for our day-to-day business.

HISTORY AND CERTAIN CORPORATE MATTERS

Brief history of our Company

Our Company was originally incorporated as ‘Clean Max Enviro Energy Solutions Private Limited’ at Mumbai, Maharashtra as a private limited company under the Companies Act, 1956 pursuant to a certificate of incorporation dated September 29, 2010 issued by the Deputy Registrar of Companies, Maharashtra at Mumbai. Subsequently, upon conversion of our Company into a public limited company, the name of our Company was changed to ‘Clean Max Enviro Energy Solutions Limited’, pursuant to the resolution passed by our Board on July 9, 2025 and the resolution passed by our Shareholders at the extraordinary general meeting on July 14, 2025. A fresh certificate of incorporation dated August 7, 2025 was issued by the Registrar of Companies, Maharashtra at Mumbai consequent to the conversion.

Brief history of our Promoters

The brief history of the Promoters of our Company is set forth below:

Name of Promoter	Date of becoming Promoter	Founder/joined later	Initial shareholding	Increase/decrease since joining till date
Kuldeep Jain	October 3, 2010	Founder	7,500 equity shares of face value of ₹ 10.00 each	Shareholding has increased to 11,675,640 Equity Shares of face value of ₹ 1.00 each
Pratap Jain	October 3, 2010	Founder	2,500 equity shares of face value of ₹ 10.00 each	Shareholding has increased to 50,000 Equity Shares of face value of ₹ 1.00 each
KEMPINC LLP	October 26, 2023	Joined later	69,750 Series K CCPS allotted to KEMPINC LLP and 167,352 equity shares of face value of ₹ 10.00 each allotted on October 26, 2023 on conversion of 69,750 Series K CCPS	Shareholding has increased to 13,678,677 Equity Shares of face value of ₹ 1.00 each
Nidhi Jain	May 27, 2025	Joined later	48,016 equity shares of face value of ₹ 10.00 each	Shareholding has increased to 501,300 Equity Shares of face value of ₹ 1.00 each
BGTF One Holdings (DIFC) Limited	May 27, 2025	Joined later	313,411 Series M CCPS allotted to BGTF One Holdings (DIFC) Limited on May 25, 2023 and 464,035 equity shares of face value of ₹ 10.00 each allotted on October 25, 2023 on conversion of 501,458 Series M CCPS	Shareholding has increased to 33,417,101 Equity Shares of face value of ₹ 1.00 each

For details of the relevant shareholder agreements and its key terms and conditions along with the key terms and conditions to survive post listing, see “– Shareholders’ agreements and other material agreements – Key terms of all subsisting shareholders agreements and investment agreements” on page 370.

Changes in the Registered Office

Except as stated below, there has been no change in the address of our registered office since incorporation.

Effective date of change	Details of change	Reason for change
March 26, 2019	The registered office of our Company was changed from 33, Ashoka Apts, Rungta Lane, Off Nepean Sea Road, Mumbai – 400 006, Maharashtra, India to 4 th Floor, The International, 16 Maharshi Karve Road, New Marine Lines Cross Road No.1, Churchgate, Mumbai – 400 020, Maharashtra, India	To conduct business activities smoothly

Main Objects of our Company

The main objects contained in our Memorandum of Association are as mentioned below:

1. “To carry out business in India or elsewhere for developing clean and green energy solutions that provide sustained benefits to all stakeholders including the environmental users, investors, management and also to research, develop, explore, transit, distribute, purchase, sell, trade, import, export or accumulate or otherwise deal in all forms with various environmentally friendly energy solutions using choice of fuels including natural gas, coal and various forms of renewable energy by attracting, retaining, developing, and incentivizing the best talent and enable them with

appropriate ability to take risks and deploy cartel and all other forms of energy in all aspects including both conventional and non-conventional or as any other market mechanism and to plan, promote, develop, establish transmission and distribution of networks or systems and to act as an agent or representative or operator or licensee or franchisee of any person, public or private sector enterprise, financial institutions etc. engaged in the planning, development, generation, transmission, distribution, supply, trading, purchase, sale, import, export, storage of all form of energy solutions including both conventional and non-conventional or as any other market mechanism.”

The main objects as contained in our Memorandum of Association enable our Company to carry on the business presently being carried out and proposed to be carried out.

Amendments to the Memorandum of Association

Set out below are the amendments to our MoA in the last 10 years preceding the date of this Prospectus:

Date of Shareholders' Resolution	Particulars
September 30, 2016	Clause III (a) of our Memorandum of Association was amended and replaced with following: <i>“To carry out business in India or elsewhere for developing clean and green energy solutions that provide sustained benefits to all stakeholders including the environmental users, investors, management and also to research, develop, explore, transit, distribute, purchase, sell, trade, import, export or accumulate or otherwise deal in all forms with various environmentally friendly energy solutions using choice of fuels including natural gas, coal and various forms of renewable energy by attracting, retaining, developing, and incentivizing the best talent and enable them with appropriate ability to take risks and deploy capital and all other forms of energy in all aspects including both conventional and non-conventional or as any other market mechanism and to plan, promote, develop, establish transmission and distribution of networks or systems and to act as an agent or representative or operator or licensee or franchisee of any person, public or private sector enterprise, financial institutions etc engaged in the planning, development, generation, transmission, distribution, supply, trading, purchase, sale, import, export, storage of all form of energy solutions including both conventional and non-conventional or as any other market mechanism.”</i>
June 10, 2017	Clause V of our Memorandum of Association was amended to reflect a reclassification of authorised share capital from ₹ 86,677,444 divided into (i) 8,667,702 equity shares of ₹ 10 each and; (ii) 2 preference shares of ₹ 212 each to ₹ 86,677,444 divided into (i) 4,930,402 equity shares of face value ₹ 10 each; (ii) 373,730 Series I compulsorily convertible preference shares of face value of ₹ 100 each; and (iii) 2 preference shares of ₹ 212 each.
October 6, 2017	Clause V of our Memorandum of Association was amended to reflect an increase in authorised share capital of our Company from ₹ 86,677,444 divided into (i) 4,930,402 equity shares of face value ₹ 10 each; (ii) 373,730 Series I compulsorily convertible preference shares of face value of ₹ 100 each; and (iii) 2 preference shares of ₹ 212 each to ₹ 186,677,444 divided into 11,330,402 equity shares of ₹ 10 each, 373,730 Series I compulsorily convertible preference shares of face value of ₹ 100 each, 2 preference shares of ₹ 212 each and 360,000 Series II compulsorily convertible preference shares of face value of ₹ 100 each.
November 6, 2017	Clause V of our Memorandum of Association was amended to reflect a reclassification of authorised share capital of our Company from ₹ 186,677,444 divided into 11,330,402 equity shares of ₹ 10 each, 373,730 Series I compulsorily convertible preference shares of face value of ₹ 100 each, 2 preference shares of ₹ 212 each and 360,000 Series II compulsorily convertible preference shares of face value of ₹ 100 each to ₹ 186,677,444 divided into 9,276,412 equity shares of ₹ 10 each, 373,730 Series I compulsorily convertible preference shares of face value of ₹ 100 each, 2 preference shares of ₹ 212 each and 175,750 Series II compulsorily convertible preference shares of face value of ₹ 100 each, 255,488 Series III compulsorily convertible preference shares of face value of ₹ 100 each and 134,161 Series A compulsorily convertible preference shares of face value of ₹ 100 each.
January 24, 2018	Clause V of our Memorandum of Association was amended to reflect a reclassification of authorised share capital of our Company from ₹ 186,677,444 divided into 9,276,412 equity shares of ₹ 10 each, 373,730 Series I compulsorily convertible preference shares of face value of ₹ 100 each, 2 preference shares of ₹ 212 each and 175,750 Series II compulsorily convertible preference shares of face value of ₹ 100 each, 255,488 Series III compulsorily convertible preference shares of face value of ₹ 100 each and 134,161 Series A compulsorily convertible preference shares of face value of ₹ 100 each to ₹ 186,677,444 divided into 6,993,922 equity shares of ₹ 10 each, 373,730 Series I compulsorily convertible preference shares of face value of ₹ 100 each, 2 preference shares of ₹ 212 each, 175,750 Series II compulsorily convertible preference shares of face value of ₹ 100 each, 255,488 Series III compulsorily convertible preference shares of face value of ₹ 100 each, 134,161 Series A compulsorily convertible preference shares of face value of ₹ 100 each, 195,642 Series IV compulsorily convertible preference shares of face value of ₹ 100 each and 32,607 Series B compulsorily convertible preference shares of face value of ₹ 100 each.
August 1, 2018	Clause V of our Memorandum of Association was amended to reflect a reclassification of authorised share capital of our Company from ₹ 186,677,444 divided into 6,993,922 equity shares of ₹ 10 each, 373,730 Series I compulsorily convertible preference shares of face value of ₹ 100 each, 2 preference shares of ₹ 212 each, 175,750 Series II compulsorily convertible preference shares of face value of ₹ 100 each, 255,488 Series III compulsorily convertible preference shares of face value of ₹ 100 each, 134,161 Series A compulsorily convertible preference shares of face value of ₹ 100 each, 195,642 Series IV compulsorily convertible preference shares of face value of ₹ 100 each and 32,607 Series B compulsorily convertible preference shares of face value of ₹ 100 each.

Date of Shareholders' Resolution	Particulars
August 20, 2021	As per the terms of shareholders agreement (“SHA”) the MOA was amended and restated to align the applicable provisions of the Companies Act, 2013.
February 21, 2023	Clause V of our Memorandum of Association was amended to reflect an increase in the authorised share capital of our Company from ₹286,677,444 divided into 4,551,992 equity shares of ₹10 each, 373,730 Series I compulsorily convertible preference shares of face value of ₹100 each, 2 preference shares of ₹212 each, 175,750 Series II compulsorily convertible preference shares of face value of ₹100 each, 255,488 Series III compulsorily convertible preference shares of face value of ₹100 each, 134,161 Series A compulsorily convertible preference shares of face value of ₹100 each, 195,642 Series IV compulsorily convertible preference shares of face value of ₹100 each, 32,607 Series B compulsorily convertible preference shares of face value of ₹100 each, 141,132 Series V compulsorily convertible preference shares of face value of ₹100 each and 23,522 Series C compulsorily convertible preference shares of face value of ₹100 each, 147,941 Series VI compulsorily convertible preference shares of face value of ₹100 each, 24,657 Series D compulsorily convertible preference shares of face value ₹100 each, 42,786 Series VII compulsorily convertible preference shares of face value of ₹100 each and 7,131 Series E compulsorily convertible preference shares of face value of ₹100 each, 91,735 Series VIII compulsorily convertible preference shares of face value of ₹100 each, 15,289 Series F compulsorily convertible preference shares of face value of ₹100 each, 700,000 Series X compulsorily convertible preference shares of face value of ₹100 each and 100,000 Series K compulsorily convertible preference shares of face value of ₹50 each to ₹311,677,444 divided into 7,051,992 equity shares of ₹10 each, 373,730 Series I compulsorily convertible preference shares of face value of ₹100 each, 2 preference shares of ₹212 each, 175,750 Series II compulsorily convertible preference shares of face value of ₹100 each, 255,488 Series III compulsorily convertible preference shares of face value of ₹100 each, 134,161 Series A compulsorily convertible preference shares of face value of ₹100 each, 195,642 Series IV compulsorily convertible preference shares of face value of ₹100 each, 32,607 Series B compulsorily convertible preference shares of face value of ₹100 each, 141,132 Series V compulsorily convertible preference shares of face value of ₹100 each and 23,522 Series C compulsorily convertible preference shares of face value of ₹100 each, 147,941 Series VI compulsorily convertible preference shares of face value of ₹100 each, 24,657 Series D compulsorily convertible preference shares of face value of ₹100 each, 42,786 Series VII compulsorily convertible preference shares of face value of ₹100 each and 7,131 Series E compulsorily convertible preference shares of face value of ₹100 each, 91,735 Series VIII compulsorily convertible preference shares of face value of ₹100 each, 15,289 Series F compulsorily convertible preference shares of face value of ₹100 each, 700,000 Series X compulsorily convertible preference shares of face value of ₹100 each and 100,000 Series K compulsorily convertible preference shares of face value of ₹50 each.
February 21, 2023	Clause V of our Memorandum of Association was amended to reflect a reclassification in the authorised share capital of our Company from ₹311,677,444 divided into 7,051,992 equity shares of ₹10 each, 373,730 Series I compulsorily convertible preference shares of face value of ₹100 each, 2 preference shares of ₹212 each, 175,750 Series II compulsorily convertible preference shares of face value of ₹100 each, 255,488 Series III compulsorily convertible preference shares of face value of ₹100 each, 134,161 Series A compulsorily convertible preference shares of face value of ₹100 each, 195,642 Series IV compulsorily convertible preference shares of face value of ₹100 each, 32,607 Series B compulsorily convertible preference shares of face value of ₹100 each, 141,132 Series V compulsorily convertible preference shares of face value of ₹100 each and 23,522 Series C compulsorily convertible preference shares of face value of ₹100 each, 147,941 Series VI compulsorily convertible preference shares of face value of ₹100 each, 24,657 Series D compulsorily convertible preference shares of face value of ₹100 each, 42,786 Series VII compulsorily convertible preference shares of face value of ₹100 each and 7,131 Series E compulsorily convertible preference shares of face value of ₹100 each, 91,735 Series VIII compulsorily convertible preference shares of face value of ₹100 each, 15,289 Series F compulsorily convertible preference shares of face value of ₹100 each, 700,000 Series X compulsorily convertible preference shares of face value of ₹100 each and 100,000 Series K compulsorily convertible preference shares of face value of ₹50 each to ₹311,677,444 divided into 7,051,992 equity shares of ₹10, 2 preference shares of ₹212 each, 100,000 Series K compulsorily convertible preference shares of face value of ₹50 each and 2,361,571 Series M compulsorily convertible preference shares of face value of ₹100 each.
June 27, 2025	Clause V of our Memorandum of Association was amended to reflect a reclassification in the authorised share capital of our Company from ₹311,677,444 divided into 7,051,992 equity shares of ₹10, 2 preference shares of ₹212 each, 100,000 Series K compulsorily convertible preference shares of face value of ₹50 each and 2,361,571 Series M compulsorily convertible preference shares of face value of ₹100 each to ₹311,677,444 divided into 30,667,702 equity shares of ₹10, 2 preference shares of ₹212 each, 100,000 Series K compulsorily convertible preference shares of face value of ₹50 each. Accordingly, ₹311,677,444 divided into 30,667,702 equity shares of ₹10, 2 preference shares of ₹212 each, 100,000 Series K compulsorily convertible preference shares of face value of ₹50 each were split into ₹311,677,444 divided into 306,677,020 Equity Shares of ₹1, 2 preference shares of ₹212 each, 100,000 Series K compulsorily convertible preference shares of face value of ₹50 each.
July 14, 2025	Clause I of the Memorandum of Association was amended to reflect the change in name of our Company from ‘Clean Max Enviro Energy Solutions Private Limited’ to ‘Clean Max Enviro Energy Solutions Limited’ pursuant to the conversion of our Company from a private limited company to a public limited company.

Major events and milestones

The table below sets forth some of the key events and milestones in the history of our Company and our Subsidiaries:

Calendar Year	Particulars
2010	Establishment of our Company.
2013	Commissioned the first onsite solar plant for a corporate client for 100 KWp.
2015	Began offering grid-connected solutions for corporate clients through our SPV, KAS Onsite Power Solutions LLP.
2017	Secured equity investment from Warburg Pincus and a global development financial institution based in the US.
	Expanded operations to Dubai, UAE through our SPV, Cleanmax Solar MENA FZCO.
	Commissioned its first grid connected STU solar project under group captive mode for 30 MWp in Tamil Nadu for a large datacentre client through our SPV, KAS Onsite Power Solutions LLP.
	Commission our first STU connected third party open access project in Karnataka.
2018	Achieved a cumulative operating capacity of 500 MWp+.
	Signed our first solar photovoltaic system leasing and operation agreement in Dubai, UAE, through CleanMax Alpha LeaseCo FZCO.
2019	Secured an equity investment from UK government's climate-based fund.
	Signed our first onsite solar project in Thailand through our subsidiary, Clean Max Energy (Thailand) Co. Ltd.
	Started operations in Bangkok, Thailand, through our subsidiary, Clean Max Energy (Thailand) Co. Ltd.
	Expanded into wind power projects by commissioning our first wind farm at Hosahalli, Karnataka through our SPV, Cleanmax Pluto Solar Power LLP.
2021	Secured an equity investment from Washington based fund amidst Covid'19 pandemic and provided full exit to the erstwhile PE investors.
	Commissioned a wind-solar hybrid ("WSH") farm in Jagalur, Karnataka with more than 100 MW capacity.
2022	Expanded our grid connected STU offerings to Maharashtra, through our SPV, Clean Max Light Power LLP.
	Started developing Central Transmission Utility of India ("CTU") sites and received up to 600 MW connectivity approval for CTU wind site at Koppal, Karnataka.
	Established a new carbon business offset business line for carbon credit/green credit trade.
2023	BGTF One Holdings (DIFC) Limited, an affiliate of Brookfield, committed to invest ₹18,000 million in our Company, as primary infusion along with secondary investment of approximately ₹10,970 million.
	Reached a cumulative capacity of 1 GW.
	Reached a cumulative capacity of 100+ MWp onsite solar capacity in international operations i.e. Dubai and Thailand.
	Entered into a strategic collaboration with Apple for investing together into rooftop projects through our SPV, Clean Max Hyperion Power LLP.
	Partnered with a technology player, through their designated affiliate, for sale of renewable energy certificates from projects commissioned by our Company for corporate customers.
	Achieved water neutrality for 40% of our utility scale solar portfolio.
	Received ISO 14001:2015 and ISO 45001:2018 certifications.
	Achieved carbon neutrality (Scope 1 + Scope 2) greenhouse gas ("GHG") emissions.
Built and commissioned 350 MW+ State Transmission Utility ("STU") wind-solar hybrid capacity in Gujarat.	
2024	Entered into a partnership with Yusuf Bin Ahmed Kanoo Company WLL, through our SPV, Clean Max Solar Mena FZCO, for developing renewable energy projects in Bahrain and Kingdom of Saudi Arabia.
	Reached a cumulative capacity of 2 GW+.
	Commissioned our first onsite solar photovoltaic plant in Bahrain, through our SPV, Kanoo Clean Max Renewables Asset Co W.L.L.
	Expanded our grid connected STU offerings to Haryana and Chhattisgarh.
2025	Received ISO 9001:2015 certification.
	Entered into a strategic collaboration with Osaka Gas and Japan Bank for International Cooperation for investing in C&I renewable energy projects together.
	Entered into a co-investment collaboration with Toyota Tsusho India Private Limited aimed at serving Toyota group companies in India through long-term corporate power purchase agreements.
2026	Signed a renewable energy certificate sale and purchase agreement with a global technology services company, an energy attribute purchase agreement with a leading technology firm, and a power purchase agreement with a renewable energy trading arm of a multinational corporation.
	Pursuant to the Pre-IPO Placement and certain secondary transactions in the Equity Shares of our Company, Jongsong Investments Pte. Ltd. (an indirect wholly owned subsidiary of Temasek Holdings Private Limited), GSS India Opportunities AIF Scheme I (an affiliate of Bain Capital Special Situations, LP), and TRUST Group's Relativity Resilience Fund – I, among others, acquired certain shareholding in our Company.

Key awards, accreditations, and accolades received by our Company

Set out below are some of the key awards, accreditations, recognition, and appreciation received by our Company:

Calendar Year	Particulars
2018	Our Company was awarded 'India Green Energy Award' in the category of outstanding renewable energy

Calendar Year	Particulars
	generation, solar by Indian Federation of Green Energy (IFGE) in 2018.
	Our Company was declared as the winner of 'Achievement in Transformational Infrastructure' for the rooftop project developed by it in Gujarat for a client, at the FT/IFC Transformational Business Awards, 2018.
2020	Our Company was awarded '5-star rating' for excellence in EHS practices at the CII-SR EHS Excellence Awards, 2020.
2021	Our Company was awarded the 'Fastest Growing Solar Developer of the Year 2021' at EQs UAE Annual Solar Awards 2020-21.
	Our Company was awarded the 'Gold Award' for excellence in EHS practices, as well as sectoral topper in power at CII-SR EHS Excellence Awards, 2021.
	Our Company was awarded the 'Silver Award' for commitment to excellence in EHS practices at CII-SR EHS Excellence Awards, 2021.
	Our Company was awarded the 'EHS Award (Haryana) Renewable Energy Sector' at the Global Safety Summit, 2021.
2022	Our Company was awarded the 'National ESG Excellence Award' in the large enterprises – renewable energy sector at the 10 th Global Safety Summit, 2022.
2023	Our Company was awarded the 'Sustainability Leadership Award (Organization)' at the India Sustainability Conclave and Awards, 2023.
	Our Company was awarded the 'Best Hybrid Project Award' at the Mercom India Clean Energy Awards, 2023.
	Our Company was awarded the 'Super Gold Award', the 'Green Excellence Award' and the 'Best Organization in Propagation of Quality Concepts Award' at the 34 th Chapter Convention on Quality Concepts, 2023.
2024	Our Company was awarded 'Great Indian Sustainable Performance in Net Zero Award' at the India Sustainability Conclave and Awards, 2024.
	Our Company was awarded the 'Best Hybrid Project Award' at the Mercom India Clean Energy Awards, 2024.
	Our Company was awarded the 'CARE' award at the India Supplier Conference, 2024 organised by Baker Hughes.
	Our Company was awarded the 'Bronze Award' for commitment in EHS practices in energy and utilities sector at the CII- EHS Excellence Awards, 2024.
	Our Company was awarded the 'Silver Award' for commitment to excellence in EHS practices in energy and utilities sector at the CII-SR EHS Excellence Awards, 2024.
	Our Company was awarded the 'Environmental Sustainability Award' by Cisco.
2025	Our Company was awarded distinction in onsite renewable business for the Maruti (Manesar) Project and in utility renewable business for the Jagalur Project along with merit in onsite renewable business for the Mondelez Project (Bahrain) and Indorama Project (Thailand) at the International Safety Awards, 2025 organised by the British Safety Council.
	Our Company was recognised as one of the Iconic Brands of India 2025 by ET Now
	Our Company was awarded the 'CARE' award at the India Supplier Conference, 2025 organised by Baker Hughes.

Time and cost over-runs

There have been no delays or cost overruns in commissioning of the operational capacities of our projects during the six months period ended September 30, 2025 and September 30, 2024, and Fiscals 2023, 2024 and 2025. All such projects have been commissioned within the timelines prescribed in the relevant approvals received, as amended from time to time.

As on September 30, 2025, we served 555 customers and had 1,198 PPAs and contracts with such customers. In respect of our contracts with our customers, we are required to meet specified commissioning timelines, the failure of which may result in imposition of penalties/commitment charges upon us. In the half year ended September 30, 2025, we faced an instance where we had to pay commitment charges of ₹67.80 million for delays in commissioning a project – the delay related to a project at the Saraipalli farm in Chhattisgarh primarily due to delays in land aggregation in the region. In the six months period ended September 30, 2025 and September 30, 2024 and Fiscals 2023, 2024 and 2025, we have not paid any corresponding penalties/commitment charges to our customers which materially and adversely affected our business or results of operations. For details, see "Risk Factors – Internal Risks – Our PPAs or EAPAs may be terminated by counterparties upon the occurrence of certain events. In the event our PPAs or EAPAs are terminated, and we are unable to secure a replacement PPA or EAPA in a timely manner or on similar terms, our business, results of operations, cash flows and prospects may be adversely affected." on page 47. See also – "Risk Factors – Internal Risks – We may suffer significant construction delays and finance or construction cost increases in excess of our expectations, leading to time and cost overruns, which could have a material adverse effect on our business, cash flows, financial condition, results of operations and reputation." on page 57.

Defaults or re-scheduling/restructuring of borrowings with financial institutions/banks

As on the date of filing of this Prospectus, there have been no defaults or rescheduling/ restructuring of borrowings with financial institutions/ banks in respect of our Company's borrowings from the lenders.

Significant financial and/or strategic partnership

Our Company does not have any significant financial and/or strategic partners as on the date of this Prospectus.

Capacity/ facility creation, launch of key products or services, entry into new geographies or exit from existing markets

For details of capacity/ facility creation, key products or services launched by our Company, entry into new geographies or exit from existing markets, to the extent applicable, see "Our Business" and "– Major events and milestones" on pages 293 and 368, respectively.

Details regarding material acquisitions or divestments of business/undertakings, mergers, amalgamation, any revaluation of assets, etc. in the last 10 years

Our Company has not made any material acquisitions or divestments of business/undertakings, mergers, amalgamation, any revaluation of assets, etc. in the last 10 years immediately preceding the date of this Prospectus.

Shareholders' agreements and other material agreements

Except as disclosed below, there are no other agreements / arrangements entered into by our Company or clauses / covenants applicable to our Company which are material and which are required to be disclosed, or the non-disclosure of which may have a bearing on the investment decision of prospective investors in the Offer.

A. Key terms of all subsisting shareholders agreements and investment agreements

Amended and restated shareholders' agreement dated July 30, 2025 entered into amongst our Company, Kuldeep Jain, Pratap Jain, Nidhi Jain and KEMPINC LLP ("Promoter Block"), BGTF One Holdings (DIFC) Limited ("Investor 1"), Augment India I Holdings, LLC ("Investor 2"), DSDG HOLDING APS ("Investor 3"), and Rikhab Investments B.V. ("Rikhab") as amended by the amended and restated shareholders' agreement dated November 4, 2025 entered into amongst the Company, Promoter Block, Investor 1, Investor 2, Investor 3 and Rikhab

The Company, the Promoter Block, Investor 1, Investor 2 and Investor 3 ("**Investors**") and Rikhab have entered into the amended and restated shareholders' agreement dated July 30, 2025 ("**SHA**") to *inter alia*, record their understanding with respect to the rights of the respective parties, including with respect to the rights and obligations inter-se the shareholders and the terms and conditions pertaining to the management and operations of the Company and its Subsidiaries.

Pursuant to the terms of the SHA, as on date of the Draft Red Herring Prospectus, the Board was required to have a maximum of eight Directors, comprising four independent Directors, two Directors nominated by the Promoter Block ("**Promoter Directors**"), and two Directors nominated by Investor 1 ("**Investor 1 Directors**"). In addition to such nomination rights on the Board, the Promoter Block and Investor 1, respectively, also have nomination rights on certain committees on the Board, subject to compliance with applicable law. Subject to additional requirements as may be specified under applicable law and other conditions prescribed in the SHA, the presence of at least one Promoter Director and one Investor 1 Director is mandatory to constitute valid quorum of the Board, unless waived by the Promoter Block or the Investor 1, as applicable.

The SHA also provides certain inspection and information rights to the relevant parties, including the Promoter Block, Rikhab and the Investors. Under the terms of the SHA, the Company is required to provide certain information to the Promoter Block, Rikhab and the Investors on a periodic basis, including monthly management information reports, financial information, confirmation of compliance with all applicable statutory dues and details of any material litigations, among others. Investors are also entitled to receive information from the Company on request, as may be required to ensure compliance with their respective statutory or regulatory requirements, with such information to be prepared on the basis of instructions and advice of the respective Investors (as the case may be), and any financial/ audit information from the auditors or internal auditors of the Company, as they may require.

Further, the Company is also precluded from taking any actions in respect of certain reserved matters defined under the SHA without the prior written consent of the Promoter Block, Investor I and Investor 2. Such reserved matters include, among others, change in the nature of the business of the Company or any of its Subsidiaries (including group captive special purpose vehicles) and joint ventures ("**Intra Group Entities**"), any related party transactions entered into by the Company or any of its Intra Group Entities, other than on an arm's length basis, any divestment of or sale of assets representing more than 26% of the total assets (either in a single transaction or a series of transactions), any fresh issuance of securities including equity, preference shares or debentures other than in connection with the Offer

or pursuant to existing employee option scheme(s). The Promoter Block, Rikhab and Investors have also agreed to certain restrictions and obligations in relation to transfer of shareholding, including providing inter-se rights of first offer/ refusal, tag along rights and drag along rights, subject to certain agreed exceptions. In addition, under the terms of the SHA, the Investor also have certain exit rights with a view to provide an exit to the shareholders, including through an initial public offering. The SHA also provides for indemnification of the Directors by our Company, in accordance with and subject to conditions prescribed under the SHA and applicable law. The special rights available to the parties to SHA remain subject to stipulated shareholding thresholds, as agreed therein.

In order to facilitate the Offer, the parties to the SHA have also recorded certain amendments, waivers and consents in relation to their rights under the SHA, which came into effect from the date of the filing of the Draft Red Herring Prospectus with SEBI. Accordingly, the respective parties (to the extent that such party is entitled to such rights) have agreed (i) to waive the relevant information and inspection rights with effect from the date of filing of the Red Herring Prospectus with the RoC, and (ii) to waive the relevant transfer restrictions, to the extent of the offer, sale and transfer of Equity Shares by the relevant parties as part of the proposed Offer for Sale and any actions taken in relation to their participation as 'selling shareholders' in such Offer for Sale. In addition, the parties have also recorded their consent (i) solely to the extent of creation of statutory lock-in on the Equity Shares required to be locked-in from the date of allotment pursuant to the Offer for a period as prescribed under the SEBI ICDR Regulations, (ii) for the disclosure of the terms and conditions of the SHA and certain share purchase agreements in the Offer Documents, and for such documents to be made available to the public for inspection in compliance with the SEBI ICDR Regulations, among others.

The SHA was further amended on November 4, 2025 to exempt transferees who receive Equity Shares in our Company pursuant to pre-IPO secondary transfers from having to enter into a deed of adherence. Further, pursuant to the terms of the SHA and confirmation letter dated December 4, 2025, the parties to the SHA have agreed upon the allocation between the Promoter Block, Rikhab, Investor 1, Investor 2 and Investor 3, with respect to their respective secondary sale entitlements in the pre-IPO secondary transfers and the Offer for Sale.

The SHA shall automatically terminate on the date on which the Equity Shares of the Company are listed on the Stock Exchanges pursuant to the Offer, except for certain clauses relating to governing law, dispute resolution, confidentiality, non-compete, and notices that will continue to survive such termination.

Inter-se agreement dated July 30, 2025 entered into by and between Kuldeep Jain, Nidhi Jain, KEMPINC LLP, Pratap Jain, Rikhab Investments B.V., BGTF One Holdings (DIFC) Limited, Augment India I Holdings, LLC and DSDG HOLDING APS ("Inter-se Agreement")

The Inter-se Agreement was entered into between Kuldeep Jain, Nidhi Jain, KEMPINC LLP, Pratap Jain, ("**Promoter Block 1**"), BGTF One Holdings (DIFC) Limited ("**Promoter Block 2**"), Rikhab Investments B.V., Augment India I Holdings, LLC and DSDG HOLDING APS on July 30, 2025 to *inter alia* set out the terms and conditions governing their inter-se relationship with respect to the Company, on and after listing of the Equity Shares on the Stock Exchanges pursuant to the Offer ("**Listing**").

Pursuant to the Inter-se Agreement, the Promoter Block 1 and Promoter Block 2 have agreed that (a) Kuldeep Jain, Nidhi Jain (pursuant to a request letter dated February 25, 2026) and KEMPINC LLP shall collectively contribute 9.80% of the post-Offer equity share capital of our Company towards minimum promoters' contribution as required under Regulations 14 and 16 of the SEBI ICDR Regulations, and (b) BGTF One Holdings (DIFC) Limited shall contribute 10.20% of the post-Offer equity share capital of our Company towards such minimum promoters' contribution. In addition, Promoter Block 1, Promoter Block 2 and Rikhab Investments B.V. have agreed, among others: (a) that with effect from Listing, the Board of our Company shall comprise of two nominee directors appointed by Promoter Block 1, two nominee directors appointed by Promoter Block 2, and four independent directors, (b) on the constitution of certain committees of the Board post Listing, namely the risk management committee, the nomination and remuneration committee, the stakeholders' relationship committee, and the audit committee, including nomination rights to such committees in favour of Promoter Block 1 and Promoter Block 2, and further provides that any decision by the risk management committee with respect to borrowings, exceeding certain agreed thresholds, will require unanimous consent of the members of the risk management committee, and if such matter has been referred to the Board or if Promoter Block 2 has not nominated its nominee director to the risk management committee, shall require affirmative vote of the respective nominee director(s) appointed by Promoter Block 1 and Promoter Block 2, and (c) have further agreed to use reasonable endeavours and take all reasonable steps to exercise their voting rights at any shareholders' meeting in favour of (including voting in favour of any resolutions for the amendment of the articles of association of the Company) the appointment or re-appointment (if required) of the nominees of the relevant parties and independent directors in the manner described above, as well as in respect of the respective committee constitutions, as agreed between them. In the event that any nominee Director is required, at any subsequent general meeting of the Company, to retire by rotation in accordance with applicable law, each of the Promoter Block 1, Promoter Block 2 and Rikhab Investments B.V. have agreed to use reasonable endeavours to exercise their respective

voting rights in relation to the Equity Shares held by them at such meeting in favour of the re-appointment of the relevant nominee Director.

In addition, the Promoter Block 1 and Promoter Block 2 have agreed to consult with each other and use reasonable endeavours to reach mutual agreements in respect to exercising their voting rights for certain identified reserved matters captured in the Inter-se Agreement. The Promoter Block 1, Promoter Block 2 and Rikhab Investments B.V. have also agreed to, among others, exercise their voting rights and cooperate in good faith to incorporate such reserved matters and related principles (which would require Company to obtain prior consent of the Promoter Block 1 and Promoter Block 2 for any decisions in relation to such reserved matters, once incorporated) in the articles of association of the Company in the first shareholders' meeting called after Listing. Such reserved matters include, among others, (a) the Company entering into any new line of business, (b) any fresh issuance of securities involving differential voting or economic rights in comparison to the Equity Shares; and/or that provides a right to convert to Equity Shares: (i) with differential voting rights or economic rights in comparison to Equity Shares; and/or (ii) at a value that is lower than the fair market value of the Equity Shares at the time of conversion, other than in connection with the issuance of Equity Shares pursuant to exercise of employee stock options schemes/plans of the Company as existing on Listing, (c) any buyback of securities of the Company, reduction of capital or share repurchase or changing the face value of the securities, other than (i) any buybacks / reduction of share capital offered on a prorata basis to all shareholders of the Company or (ii) any repurchase of shares under agreed employee stock option arrangements, (d) any amendment to the memorandum of association or articles of association of the Company, which results in an adverse alteration in the rights of the Promoter Block 1 and Promoter Block 2 and Rikhab Investments B.V., under this Agreement, (e) any divestment of or sale or demerger or spin offs of assets (including investments) of the Company which represent more than 26% (of the total existing assets (either in a single transaction or a series of transactions) of the Company in a Fiscal, in accordance with its last audited financial statements (on a consolidated basis) other than (i) sale or disposal of relevant assets in the ordinary course of the Company's sell-down business (ii) sale or disposal of assets in the ordinary course of business, or (iii) sale or disposal of assets to any subsidiary or joint venture of the Company or to a group captive off-taker, or (f) any change in the rights attached to any class of shares which adversely affects Promoter Block 2. In addition, the Inter-se Agreement imposes certain contractual restrictions on share transfers by the parties (including Augment India I Holdings, LLC and DSDG HOLDING APS), establishes a framework governing subsequent transfers and acquisitions of Equity Shares by the Promoters and Rikhab Investments B.V., and sets out indemnification provisions amongst the parties.

The Promoter Block 1, Promoter Block 2 and Rikhab have agreed that in the event the aggregate shareholding of Promoter Block 2 falls below 12%, (a) its right to appoint two nominee Directors to the Board as described above shall fall away, and it shall thereafter have the right to appoint only one nominee Director for so long as its aggregate shareholding is at least 5%, (b) its right to appoint a nominee Director to the respective committees will fall away, (c) the voting arrangements between Promoter Block 1, Promoter Block 2 and Rikhab with respect to the reserved matters shall fall away, and (d) certain transfer restrictions applicable to the Promoter Block 2 will fall away. Further, in the event the aggregate shareholding of Promoter Block 2 falls below 5%, the right of Promoter Block 2 to appoint a nominee director shall fall away.

Other than the provisions governing minimum promoters' contribution and certain customary provisions of the Inter-se Agreement which became effective from signing (i.e. July 30, 2025), the terms of the Inter-se Agreement (including as described above) will become effective from Listing. The Inter-Se Agreement will terminate *inter alia* at the expiry of 42 months from Listing, unless extended by the Promoters and Rikhab Investments B.V. in writing. It is clarified that the Inter-se Agreement will terminate with respect to Augment India I Holdings, LLC and DSDG HOLDING APS at the expiry of 24 months from Listing, and with respect to any party (together with its affiliates), upon such party and its affiliates ceasing to hold any Equity Shares. In the event of any termination after Listing, certain provisions of the Inter-se Agreement, including those governing further acquisitions of Equity Shares by the Promoters and Rikhab Investments B.V, indemnification and confidentiality, shall survive such termination.

The Company is not a party to the Inter-se Agreement and there are no special rights provided by the Company to any of the parties pursuant to the Inter-se Agreement.

Inter-se Agreement dated February 6, 2026 entered into by and between Jongsong Investments Pte. Ltd. ("New Investor"), Augment India I Holdings, LLC ("Augment"), BGTF One Holdings (DIFC) Limited ("BGTF"), Kuldeep Jain, KEMPINC LLP and Rikhab Investments B.V. (Augment, BGTF, Kuldeep Jain, KEMPINC LLP and Rikhab Investments B.V., collectively known as the "Existing Shareholders") ("New Investor Inter-se Agreement")

The Existing Shareholders and the New Investor entered into the New Investor Inter-se Agreement on February 6, 2026 to record the rights and obligations of the New Investor, the Existing Shareholders and the founder group members (being Nidhi Jain and Pratap Jain) in relation to the Company.

Pursuant to the New Investor Inter-se Agreement, the parties thereto have agreed to certain transfer restrictions until the earlier of the date of the IPO Failure Event (as defined thereunder) or the date on which the Equity Shares of the Company are listed on a recognized Stock Exchange, subject to certain agreed exceptions. Other than the provisions governing *inter alia* transfer restrictions with respect to the shareholding of the New Investor and Existing Shareholders in the Company as indicated above and certain other customary provisions which became effective from signing (i.e. February 6, 2026), the remaining terms of the New Investor Inter-se Agreement shall come into effect on and from the occurrence of an 'IPO Failure Event'.

The New Investor Inter-se Agreement shall automatically terminate *inter alia* on the date on which the Equity Shares of the Company are listed on a recognized Stock Exchange. The Company is not a party to the New Investor Inter-se Agreement and there are no special rights provided by the Company to any of the parties pursuant to the New Investor Inter-se Agreement.

Summary of the rights expiring upon listing and surviving post listing of the Equity Shares under the SHA and Inter-se Agreement

The summary of the rights expiring and rights surviving post listing of the Equity Shares of our Company on the Stock Exchanges are set forth below:

Sr. No.	Rights expiring upon listing of the Equity Shares on the Stock Exchanges	Rights of parties post listing of the Equity Shares on the Stock Exchanges
SHA		
1.	<ul style="list-style-type: none"> • Board composition and nomination rights - Rights of Promoter Block and Investor 1 to nominate directors (two Promoter Directors and two Investor 1 Directors) and committee members. • Quorum requirements - Mandatory presence of at least one Promoter Director and one Investor 1 Director for valid Board quorum. • Information and inspection rights - Periodic reporting requirements and information rights for Promoter Block, Rikhab and Investors (these are waived from the date of filing the Red Herring Prospectus with the RoC). • Reserved matters veto rights - Prior written consent requirements from Promoter Block, Investor 1 and Investor 2 for specified reserved matters (including changes to business nature, related party transactions, asset sales exceeding 26%, fresh issuance of securities). • Transfer restrictions - The relevant transfer restrictions, to the extent of the offer, sale and transfer of Equity Shares by the relevant parties as part of the proposed Offer for Sale has been waived from the date of the filing of the Draft Red Herring Prospectus. • Director indemnification provisions (as prescribed under the SHA). 	No rights will survive after listing of the Equity Shares on the Stock Exchanges. Only certain clauses relating to governing law, dispute resolution, confidentiality, non-compete, and notices will continue to survive the termination of the SHA upon listing of the Equity Shares on the Stock Exchanges.
Inter-se Agreement		
2.	No rights are operative prior to listing of the Equity Shares on the Stock Exchanges, other than for provisions on minimum promoters' contribution, as agreed between Promoter Block 1 and Promoter Block 2. Hence, no rights are expiring upon listing of the Equity Shares on the Stock Exchanges.	<p>After the listing of the Equity Shares, the parties to Inter-se Agreement shall endeavour to bring in the following rights subject to shareholders' approval.</p> <ul style="list-style-type: none"> • Board composition rights - Promoter Block 1 and Promoter Block 2 each have rights to appoint two nominee directors (subject to shareholding thresholds). • Committee nomination rights – Right of Promoter Block 1 and Promoter Block 2 to nominate directors to risk management committee, nomination and remuneration committee, stakeholders' relationship committee, and audit committee. • Voting arrangements - Obligations of Promoter Block 1, Promoter Block 2 and Rikhab Investments B.V. to vote in favour of appointment/re-appointment of nominee directors and independent directors. • Reserved matters framework - Agreement between Promoter Block 1 and Promoter Block 2 to consult and

		<p>reach mutual agreement on specified reserved matters, with commitment to incorporate these into the articles of association post-listing (including matters such as entering new lines of business, fresh issuance of securities with differential rights, buybacks, amendments to constitutional documents, asset sales exceeding 26%, changes affecting share rights).</p> <ul style="list-style-type: none"> • Transfer restrictions - Contractual restrictions on share transfers by parties to the Inter-se Agreement. • Framework for subsequent transfers and acquisitions of Equity Shares by Promoters and Rikhab.
New Investor Inter-se Agreement		
3.	Pursuant to the New Investor Inter-se Agreement, the parties thereto have agreed to certain transfer restrictions until the earlier of the date of the IPO Failure Event (as defined thereunder) or the date on which the Equity Shares of the Company are listed on a recognized Stock Exchange, subject to certain agreed exceptions.	The New Investor Inter-se Agreement shall automatically terminate on the date on which the Equity Shares of the Company are listed on a recognized Stock Exchange. Accordingly, no rights are intended to survive post listing of the Equity Shares on the Stock Exchanges.

B. Key terms of other subsisting material agreements

Our Company has not entered into any other material agreements, arrangements, clauses, covenants, which are material, and which are required to be disclosed and which are subsisting other than in the ordinary course of business of our Company as on the date of this Prospectus. Further, there are no clauses or covenants which are adverse or pre-

judicial to the interest of the minority/public shareholders or the non-disclosure of which may have a bearing on the investment decision of the investors.

C. Details of agreements required to be disclosed under Clause 5A of Paragraph A of Part A of Schedule III of the SEBI Listing Regulations

Except as disclosed in “– Key terms of all subsisting shareholders agreements and investment agreements” on page 370, there are no agreements entered into by our shareholders, our Promoters, our members of the Promoter Group, related parties, our Directors, our Key Managerial Personnel, our employees among themselves or with a third party, solely or jointly, which, either directly or indirectly or potentially or whose purpose and effect is to, impact the management or control of our Company or impose any restrictions or create any liability upon our Company, except as entered into in the normal course of business, whether or not our Company is a party to such agreements, as required to be disclosed pursuant to Clause 5A of Paragraph A of Part A of Schedule III of the SEBI Listing Regulations.

Holding Company

As on the date of this Prospectus, our Company has no holding company.

Details of guarantees given to third parties by the Promoter offering Equity Shares in Offer

Except as disclosed below, our Promoters have not provided guarantees to third parties with respect to the Company as on the date of this Prospectus:

Name of the Promoter(s)	Name of the borrower	Name of the lender	Date of deed of guarantee	Type of facility	Guaranteed amount (in ₹ million)*	Purpose of the facility	Consideration
Kuldeep Jain	KEMPINC LLP	360 One Prime Limited	July 22, 2025	Loan against security	6,700.00	Purchase of Company shares under secondary transaction, permissible investments and general purposes.	Nil

* The guarantee amounts are towards the whole of such principle sum or any other outstanding dues and shall cover the indemnity of the secured parties at all times, including but not limited to all losses, damages, costs, charges, expenses and claims. The guaranteed amounts are towards initial principal sum or any other outstanding dues and shall cover the indemnity of the secured parties at all times against any and all losses, damages, costs, charges, expenses and claims. Thus, the guaranteed amounts are greater than the current outstanding amounts.

The above-mentioned guarantees are effective for a period till the underlying facilities are repaid. In the event of any default by the principal borrower towards payment of the outstanding amount under the aforementioned facilities, Kuldeep Jain, one of the Promoter Selling Shareholders shall be liable for payment of the outstanding amount, including the interest amount, expenses incurred by the lender and any loss suffered by reason of such default. For further details in relation to the outstanding amount as of September 30, 2025, see “Restated Consolidated Financial Information – Note 55 – Details of Borrowing” on page 768.

Agreements with Key Managerial Personnel, Senior Management, Directors, Promoter, or any other employee

As on the date of this Prospectus, none of our Promoters, Directors, Key Managerial Personnel, Senior Management or any other employee have entered into any agreement with any shareholder or any third party with regard to compensation or profit sharing in connection with dealings in the securities of our Company.

However, pursuant to the KEMPINC-BGTF SPA, the KEMPINC-Augment SPA II and KEMPINC DSDG HOLDING SPA II, respectively, KEMPINC LLP, one of the Promoters of our Company, has agreed to purchase 3,150,000 Equity Shares from BGTF One Holdings (DIFC) Limited, 1,318,452 Equity Shares from Augment India I Holdings, LLC and 262,338 Equity Shares from DSDG HOLDING SPA, in each case for a consideration of ₹1.00 (Rupee One). Such transfers have been contemplated with a view to reward the Founder Group (comprising KEMPINC LLP, Kuldeep Jain, Nidhi Jain and Rikhab Investments B.V.) through enhancement of its shareholding in the Company and to ensure, *inter alia*, continuity of management and leadership. These transfers are proposed to be completed prior to filing of this Prospectus with the RoC. For further details, see – “History and Certain Corporate Matters – Shareholders’ agreements and other material agreements – Key terms of all subsisting shareholders agreements and investment agreements” on page 370.

Our Subsidiaries and Joint Ventures

As on the date of this Prospectus, our Company has (i) 205 Subsidiaries out of which 6 are foreign Subsidiaries and (ii) 3 Joint Ventures out of which 2 are foreign Joint Ventures. Further, as on date of this Prospectus, our Company does not have any associates.

The details of our Subsidiaries are as follows:

NPS Allowance	89,375	1,072,500
Personal Allowance	1,348,655	16,183,860
Telephone	2,000	24,000
Company Car	104,845	1,258,140
Company Car Reimbursement	41,667	500,000
Gross Earnings	2,979,167	35,750,000

[II] Bonus / variable pay:

In addition, Kuldeep Jain will be eligible for a bonus that shall not exceed 1.5x of the base salary in any Financial Year. calculated in accordance with the formula prescribed in the Employment Agreement.

[III] Statutory Entitlements:

Kuldeep Jain shall be eligible to receive all statutory payments that are applicable to him, including but not limited to employee provident fund, gratuity etc. as per applicable laws.

B. Reimbursement of expenses

Our Company shall reimburse, at actuals, all reasonable business-related expenses incurred by Kuldeep Jain in the performance of his duties, including those incurred in business-related travel, boarding and lodging and telecommunication in accordance with our Company's policy in force at the relevant time in this regard.

C. Withholding

Kuldeep Jain's remuneration is subject to applicable taxes and our Company may withhold therefrom any amounts as are required to withheld pursuant to the applicable law.

Remuneration to our Directors:

The remuneration paid to our Directors in Financial Year 2025 is as follows:

Remuneration to our Executive Director

The details of the remuneration paid to our Chairperson and Managing Director in the Financial Year 2025 is as follows:

<i>(in ₹ million)</i>		
Sr. No.	Name of the Director	Remuneration
1.	Kuldeep Jain	102.69

Remuneration to Independent Directors

Pursuant to the appointment letters of the Independent Directors, they are entitled to a remuneration of ₹ 3.50 million per annum including sitting fees for attending the meetings of our Board and committees of our Board. This includes (i) sitting fees of ₹0.10 million for attending each meeting of our Board, and (ii) sitting fees of ₹0.06 million for attending each meeting of the committees of our Board, approved by the Nomination and Remuneration Committee pursuant to its resolution dated August 13, 2025. However, our Independent Directors currently on our Board have been appointed post Financial Year 2025. Accordingly, no remuneration has been paid to our Independent Directors currently on our Board, in the Financial Year 2025.

Remuneration to Non-Executive Directors

As on the date of this Prospectus, our Non-Executive Directors are neither entitled to any sitting fees for attending meetings of the Board or any of its committees, nor entitled to any commission or remuneration from our Company. Accordingly, Pratap Jain, Murzash Manekshana and Nawal Saini, did not receive any compensation from our Company during Financial Year 2025.

Remuneration paid or payable to our Directors by our Subsidiaries

None of our Directors have been paid any remuneration by any of our Subsidiaries, including contingent or deferred compensation accrued for the year during the Financial Year 2025.

Contingent and deferred compensation payable to our Directors by our Company

Other than an amount of ₹ 53.63 million which has been paid to Kuldeep Jain, no contingent or deferred compensation has accrued for Financial Year 2025 which is payable to any of our Directors.

Bonus or profit-sharing plan for our Directors

Our Company does not have any performance linked bonus or a profit-sharing plan in which our Directors have participated.

However, Kuldeep Jain, our Chairperson and Managing Director is entitled to an incentive bonus as per his terms of employment. For further details, see “- *Terms of employment of our Chairperson and Managing Director*” on page 526.

Service Contracts with Directors

None of our Directors have entered into a service contract with our Company pursuant to which they are entitled to any benefits upon termination of employment.

Shareholding of Directors in our Company

As per our Articles of Association, our Directors are not required to hold any qualification shares.

Except as disclosed below, as on the date of this Prospectus, none of our Directors hold any shares in our Company:

Name	Nature of shares held	Number of shares held	Percentage of the pre-Offer paid up share capital on a fully diluted basis* (%)

[@] Pursuant to the completion of the share purchase transactions in accordance with the Augment SPA, UK Climate Investment SPA and DSDG HOLDING SPA as disclosed in "History and Certain Corporate Matters - Shareholders' agreements and other material agreements - A. Key terms of all subsisting shareholders agreements and investment agreements - Material share purchase agreements and share subscription agreements" on page 374 of this Prospectus, and in accordance with the terms of the amended and restated shareholders' agreement dated April 22, 2023, the composition of our Board changed. Based on such change in the composition of our Board, the requirement of having three independent directors on our Board reduced to one independent director. Accordingly, the two independent directors, namely, Somak Biman Ghosh and Christoph Maria Wolff resigned as independent directors from the Board.

Borrowing Powers

In accordance with our Articles of Association and the applicable provisions of the Companies Act, and pursuant to a resolution passed by our Board in its meeting held on July 18, 2025, and a resolution passed by our Shareholders at their extra ordinary general meeting held on July 22, 2025, our Board is authorized to borrow a sum or sums of money, which together with the monies already borrowed by our Company, apart from temporary loans obtained or to be obtained by our Company in the ordinary course of business, in excess of our Company's aggregate paid-up capital and free reserves, provided that the total amount which may be so borrowed and outstanding shall not exceed a sum of ₹ 199,600.00 million.

Corporate Governance

The provisions of the Companies Act along with the SEBI Listing Regulations, with respect to corporate governance, will be applicable to our Company immediately upon the listing of the Equity Shares on the Stock Exchanges. Our Company is in compliance with the requirements of the applicable regulations in respect of corporate governance in accordance with the SEBI Listing Regulations, and the Companies Act, including those pertaining to the constitution of the Board and committees thereof.

As on the date of this Prospectus, our Board comprises of eight Directors including one Executive Director, three Non-Executive Directors and four Independent Directors (including one woman Independent Director).

In compliance with Section 152 of the Companies Act, not less than two-thirds of the Directors (excluding Independent Directors) are liable to retire by rotation.

Committees of our Board

In terms of the SEBI Listing Regulations and the provisions of the Companies Act, our Company has constituted the following committees of our Board that are set forth below. In addition to the committees of our Board described below, our Board of Directors may, from time to time, constitute committees for various functions.

- (a) Audit Committee
- (b) Nomination and Remuneration Committee
- (c) Stakeholders' Relationship Committee
- (d) Corporate Social Responsibility Committee
- (e) Risk Management Committee

Audit Committee

The members of the Audit Committee are:

Sr. No.	Name of Director	Committee Designation
1.	Shilpa Divekar Nirula	Chairperson
2.	Santosh Janakiram	Member
3.	Kuldeep Jain	Member

Further, our Company Secretary and Compliance Officer shall act as a secretary to the Audit Committee. The Audit Committee is required to meet at least four times in a year under Regulation 18(2)(a) of the SEBI Listing Regulations. The quorum for a meeting of the Audit Committee shall be two members or one third of the members of the Audit Committee, whichever is greater, with at least two independent directors.

The Audit Committee was constituted by way of resolution passed by our Board on July 15, 2025.

The terms of reference of the Audit Committee are in accordance with Section 177 of the Companies Act and the SEBI Listing Regulations, and its terms of reference are as disclosed below:

1. oversight of Company's financial reporting process and the disclosure of its financial information to ensure that the financial statement is correct, sufficient and credible;
2. to consider and recommend to the Board, the appointment (including filling of a casual vacancy), noting of resignation, dismissal, remuneration and terms of appointment (including qualification and experience) of the Statutory Auditor, Internal Auditors, Cost Auditor and Secretarial Auditor and fixation of audit fee;
3. approval of payment to statutory auditors for any other services rendered by the statutory auditors;
4. reviewing, with the management, the annual financial statements and auditor's report thereon before submission to the board for approval, with particular reference to:
 - i. matters required to be included in the director's responsibility statement to be included in the board's report in terms of clause (c) of sub-section (3) of Section 134 of the Companies Act, 2013;
 - ii. changes, if any, in accounting policies and practices and reasons for the same;
 - iii. major accounting entries involving estimates based on the exercise of judgment by management;
 - iv. significant adjustments made in the financial statements arising out of audit findings;
 - v. compliance with listing and other legal requirements relating to financial statements;
 - vi. disclosure of any related party transactions; and
 - vii. modified opinion(s) in the draft audit report.
5. reviewing, with the management, the quarterly financial statements before submission to the board for approval;
6. reviewing, with the management, the statement of uses / application of funds raised through an issue (public issue, rights issue, preferential issue, etc.), the statement of funds utilized for purposes other than those stated in the offer document / prospectus / notice and the report submitted by the monitoring agency monitoring the utilisation of proceeds of a public issue or rights issue or preferential issue or qualified institutions placement, and making appropriate recommendations to the board to take up steps in this matter;
7. to look into the reasons for substantial defaults in the payment to the depositors, debenture holders and creditors;
8. reviewing and monitoring the auditor's independence and performance, and effectiveness of audit process;
9. approval or any subsequent modification of transactions of the Company with related parties and omnibus approval for related party transactions proposed to be entered into by the Company subject to the conditions as may be prescribed, by the independent directors who are members of the Audit Committee;
 - a) recommend criteria for omnibus approval or any changes to the criteria for approval of the Board;

- b) Make omnibus approval for related party transactions proposed to be entered into by the Company for every financial year as per the criteria approved;
- c) Review of transactions pursuant to omnibus approval;
- d) d) Make recommendation to the Board, where Audit Committee does not approve transactions other than the transactions falling under Section 188 of the Companies Act 2013.

Explanation: The term “related party transactions” shall have the same meaning as provided in Clause 2(zc) of the SEBI Listing Regulations and/or the applicable Accounting Standards and/or the Companies Act, 2013;

10. scrutiny of inter-corporate loans and investments;
11. valuation of undertakings or assets of the Company, wherever it is necessary and report its findings to the Board of the Company;
12. evaluation and effectiveness of internal financial controls and risk management systems and reporting its findings to the Board of the Company;
13. reviewing, with the management, performance of statutory and internal auditors, adequacy of the internal control systems;
14. ensuring that an information system audit of the internal systems and processes is conducted at least once in two years to assess operation risks faced by the Company;
15. reviewing the adequacy of internal audit function, if any, including the structure of the internal audit department, staffing and seniority of the official heading the department, reporting structure coverage and frequency of internal audit and reporting its significant findings to the Board of the Company;
16. discussion with internal auditors of any significant findings and follow up there on;
17. reviewing the findings of any internal investigations by the internal auditors into matters where there is suspected fraud or irregularity or a failure of internal control systems of a material nature and reporting the matter to the Board;
18. discussion with statutory auditors before the audit commences, about the nature and scope of audit as well as post-audit discussion to ascertain any area of concern;
19. to look into the reasons for substantial defaults in the payment to the depositors, debenture holders, shareholders (in case of non-payment of declared dividends) and creditors;
20. to review the functioning of the whistle blower mechanism/ vigil mechanism and report its findings and make recommendations for improvement to the Board (unless in exceptional circumstances it is inappropriate to do so);
21. monitoring the end use of funds raised through public offers and related matters;
22. overseeing the vigil mechanism established by the Company, with the chairperson of the Audit Committee directly hearing grievances of victimization of employees and directors, who used vigil mechanism to report genuine concerns in appropriate and exceptional cases;
23. review the financial statements, in particular, the investments made by any unlisted subsidiary;
24. considering and commenting on rationale, cost-benefits and impact of schemes involving merger, demerger, amalgamation etc., on the Company and its shareholders;
25. approving the key performance indicators (“KPIs”) for disclosure in the offer documents, and approval of KPIs once every year, or as may be required under applicable law;
26. to review the functioning of the whistle blower mechanism;
27. approval of appointment of chief financial officer after assessing the qualifications, experience and background, etc. of the candidate;
28. identification of list of key performance indicators and related disclosures in accordance with the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended, for the purpose of the Company’s proposed initial public offering;
29. carrying out any other function as is mentioned in the terms of reference of the audit committee or as required as per the provisions of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, the SEBI ICDR Regulations, each as amended and other applicable laws or by any regulatory authority and performing such other functions as may be necessary or appropriate for the performance of its duties;
30. reviewing the utilization of loans and/ or advances from/investment by the holding company in the subsidiary exceeding ₹100 crore or 10% of the asset size of the subsidiary, whichever is lower including existing loans / advances / investments;
31. consider and comment on rationale, cost-benefits and impact of schemes involving merger, demerger, amalgamation etc., on the Company and its shareholders;
32. monitoring the end use of funds raised through public offers and related matters;

33. reviewing compliance with the Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 2015 as amended and verifying that the systems for internal control are adequate and are operating effectively;
34. carrying out any other functions and roles as provided under the Companies Act, the SEBI Listing Regulations, SEBI ICDR Regulations, each as amended and other applicable laws or by any regulatory authority and performing such other functions as may be necessary or appropriate for the performance of its duties;
35. to carry out such other functions as may be specifically referred to the Audit Committee by the Board and/or other committees of directors of the Company; and
36. to review the annual budget and business plan and significant variance thereof.

The Audit Committee shall mandatorily review the following information:

1. management discussion and analysis of financial condition and results of operations;
2. statement of significant related party transaction (as defined by the Audit Committee), submitted by management;
3. management letters / letters of internal control weaknesses issued by the statutory auditors;
4. internal audit reports relating to internal control weaknesses; and
5. the appointment, removal and terms of remuneration of the chief internal auditor shall be subject to review by the audit committee;
6. statement of deviations, as and when they become applicable:
 - i. quarterly statement of deviation(s) including report of monitoring agency, if applicable, submitted to stock exchange(s) in terms of Regulation 32(1) of SEBI Listing Regulations, as amended; and
 - ii. annual statement of funds utilized for purposes other than those stated in the offer document/prospectus/notice in terms of Regulation 32(7) of SEBI Listing Regulations, as amended.
7. Such information as may be prescribed under the Companies Act, and the rules thereunder, SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2018 and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, each as amended; and
8. To review the financial statements, in particular, the investments made by an unlisted subsidiary.

Nomination and Remuneration Committee

The members of the Nomination and Remuneration Committee are:

Sr. No.	Name of Director	Committee Designation
1.	Ajay Kaul	Chairperson
2.	Murzash Manekshana	Member
3.	Arijit Basu	Member

The terms of reference of the Stakeholders Relationship Committee are in accordance with Section 178 of the Companies Act and the SEBI Listing Regulations. The terms of reference of the Stakeholders Relationship Committee include the following:

1. To consider and look into various aspects of interest of shareholders, debenture holders and other security holders including review of statutory compliance relating to all security holders;
2. To resolve the grievances of the security holders of the Company including complaints related to transfer/transmission of shares, non-receipt of annual report, non-receipt of declared dividends, issue of new/duplicate certificates, general meetings etc.;
3. To give effect to allotment of equity shares, approve transfer or transmission of equity shares, debentures or any other securities and oversee and review the matters related thereto;
4. To review measures taken for effective exercise of voting rights by shareholders;
5. To review adherence to the service standards adopted by the Company in respect of various services being rendered by the registrar and share transfer agent;
6. To review various measures and initiatives taken by the Company for reducing the quantum of unclaimed dividends and ensure timely receipt of dividend warrants/annual reports/statutory notices by the shareholders of the Company; and
7. To review quarterly compliance certificates and filings made to all regulatory authorities and request for and review the complinty tool report (or such other similar tool or processes as may be used by the Company); and
8. To carry out any other functions required to be carried out by the Stakeholders Relationship Committee as contained in the Companies Act, SEBI Listing Regulations or any other applicable law, as and when amended from time to time.

The Stakeholders' Relationship Committee is required to meet at least once in a year under Regulation 20(3A) of the SEBI Listing Regulations.

Corporate Social Responsibility Committee

The members of the Corporate Social Responsibility Committee are:

Sr. No.	Name of Director	Committee Designation
1.	Kuldeep Jain	Chairperson
2.	Pratap Jain	Member
3.	Ajay Kaul	Member
4.	Arijit Basu	Member

The Corporate Social Responsibility Committee was constituted by way of resolution passed by our Board on March 28, 2016 and was last re-constituted by our Board on August 14, 2025. The scope and functions of the Corporate Social Responsibility Committee is in accordance with Section 135 of the Companies Act.

The terms of reference of the Corporate Social Responsibility Committee include the following:

1. formulate and recommend to the Board, a "Corporate Social Responsibility Policy" which shall indicate the activities to be undertaken by the Company as specified in Schedule VII of the Companies Act and recommending it as appropriate to the Board for approval and adoption;

2. identifying the areas of CSR activities for making expenditures in terms of CSR Policy adopted by the Company with the assistance from the management;
3. recommending the amount of expenditure to be incurred on the identified CSR activities as per the CSR Policy;
4. identifying and prioritising the local areas where the Company operates for spending the amount earmarked for CSR activities, based on the recommendations of the management;
5. ensure that the management co-ordinates with agency in implementing programs and executing initiatives as per CSR Policy of the Company and also ensure periodic review of the performance of such agency;
6. ensure institution of a transparent monitoring mechanism for implementation of the CSR projects or programs or activities undertaken by the Company;
7. reviewing and recommending the annual report on CSR to the Board for inclusion in the Board's report every financial year;
8. reviewing the management reporting progress of various initiatives, including impact assessment report, and making appropriate disclosures on a periodic basis to the Board and such other authorities as may be required from time to time;
9. reviewing the CSR Policy and associated frameworks, processes and practices of the Company annually and making appropriate recommendations to the Board;
10. monitor the corporate social responsibility policy of the Company and its implementation from time to time;
11. the Corporate Social Responsibility Committee shall formulate and recommend to the Board an annual action plan in pursuance of its corporate social responsibility policy, which shall include the following:
 - a) the list of corporate social responsibility projects or programmes that are approved to be undertaken in areas or subjects specified in Schedule VII of the Companies Act 2013;
 - b) the manner of execution of such projects or programmes as specified in the rules notified under the Companies Act 2013;
 - c) the modalities of utilisation of funds and implementation schedules for the projects or programmes;
 - d) monitoring and reporting mechanism for the projects or programmes; and
 - e) details of need and impact assessment, if any, for the projects undertaken by the Company.

Provided that the Board may alter such plan at any time during the financial year, as per the recommendation of its Corporate Social Responsibility Committee, based on the reasonable justification to that effect; and
12. any other matter as the Corporate Social Responsibility Committee may deem appropriate after approval of the Board or as may be directed by the Board from time to time and/or as may be required under applicable law, as and when amended from time to time.

Risk Management Committee

The Risk Management Committee is comprised of members who are also on our Board of Directors, in compliance with SEBI LODR Regulations, and the chairperson of the Risk Management Committee will be appointed at every meeting of the Risk Management Committee:

Sr. No.	Name of Director	Committee Designation
1.	Arijit Basu	Member
2.	Kuldeep Jain	Member
3.	Murzash Manekshana	Member

The Risk Management Committee was constituted by way of resolution passed by our Board on August 14, 2025. The scope and functions of the Risk Management Committee is in accordance with the SEBI Listing Regulations.

The terms of reference of the Risk Management Committee include the following:

1. to avail any facilities/borrowings and/or lend and/or provide guarantee(s) and/or provide security in respect of loans including any new facilities or refinancing of existing facilities and all ancillary activities in connection therewith and approve any material amendment to any pricing, security, tenor, and any other terms in the financing documents resulting in any adverse impact on the Company. For clarification, any change which is agreed under the financing documents shall not be considered as a change / amendment to pricing.
2. to monitor any breach of financial covenants in relation to the financings availed by the Company and/or its subsidiaries on an annual basis, unless another periodicity is specified in the relevant financing document.
3. to manage and approve the investments of the Company's funds in subsidiaries/associates/companies/joint venture /special purpose vehicles within the limits approved by the Board;
4. to review other routine transactions permissible under the Companies Act, 2013 read together with the relevant rules subject to the restrictions provided under the articles of association of the Company and the applicable laws;
5. to oversee (i) over the roof-top and/or open access ground-mounted renewable energy projects and power purchase agreements ("PPA") undertaken by the Company and (ii) that decisions taken by the Management Investment Committee ("MIC") are consistent with the annual plan approved by the Board every financial year ("Annual Plan") (as may be applicable) or refer the same to the Board for passing appropriate directions;
6. to review projects related MIS construction-related updates, environmental, social, and governance ("ESG") / HSSE performance reviews provided by the MIC and have the authority to review whether the Projects and PPAs undertaken by the Company and decisions by the MIC are consistent with the Annual Plan as adopted by the Board;
7. to review all HSSE incidents, including high-risk incidents that result in or could result in fatality or disability presented/submitted by the management of the Company. The committee shall call for a report which shall also provide rates for reportable incidents, lost-time incidents, and high-risk incidents, based on the number of hours worked each quarter;
8. to approve (i) submission of bank guarantees, (ii) expenditure towards development and (iii) expenditure towards construction equity for projects which are (a) in accordance with the Annual Plan and (b) which are within the agreed investment criteria thresholds as agreed under the Annual Plan. If either (a) or (b) above are not met, the same shall be referred to the Board for passing appropriate directions;
9. to approve amendments to debenture trust deeds, documents and intimate the stock exchanges;
10. to approve execution of the PPAs of a capacity which are greater than 12 MW;
11. to conduct quarterly reviews with the management on the performance of the Company being in line with the Annual Plan and the recommendations made by the risk management committee in the previous meetings during that financial year;
12. noting details of the projects approved by the MIC on a monthly basis as well as any information with regard to the activities of the Company and relevant subsidiaries and associates of the Company and the operations and decisions undertaken by the MIC;
13. approve any deviations to the Annual Plan, provided that such deviations are (i) in accordance with the agreed investment criteria thresholds as agreed under the Annual Plan, and (ii) within the overall thresholds prescribed under the Annual Plan and to review, on a quarterly basis, details (including the reason for) relating to substantial financial penalties or losses incurred on account of operational issues, including but not limited to, delay LDs on PPAs, loss of investment on sites, loss of revenues due to delays in power evacuation etc.;
14. to note details of the projects approved by the MIC on a monthly basis as well as any information with regard to the activities of the Company, relevant subsidiaries, associates of the Company, the operations and decisions undertaken by the MIC;
15. to unanimously approve (i) any assumption or incurrence of any borrowings (whether secured or unsecured) by the Company, as a result of which borrowing the Net Debt of the Company divided by the aggregate Cash EBITDA exceeds 6.5x; and/or (ii) aggregate debt (from parties that are not Company and / or its Intra Group Entities) incurred in respect of all under-construction projects being undertaken by the Intra Group Entities of the Company exceeds 80% (Eighty Percent) of the total project costs of all such projects being undertaken by such Intra Group Entities. For clarification, the terms 'Net Debt', 'Cash EBITDA' and 'Intra Group Entities' shall have the meaning given to such terms under the Shareholders' Agreement of the Company executed on July 30, 2025, or the Inter Se Agreement dated July 30, 2025,

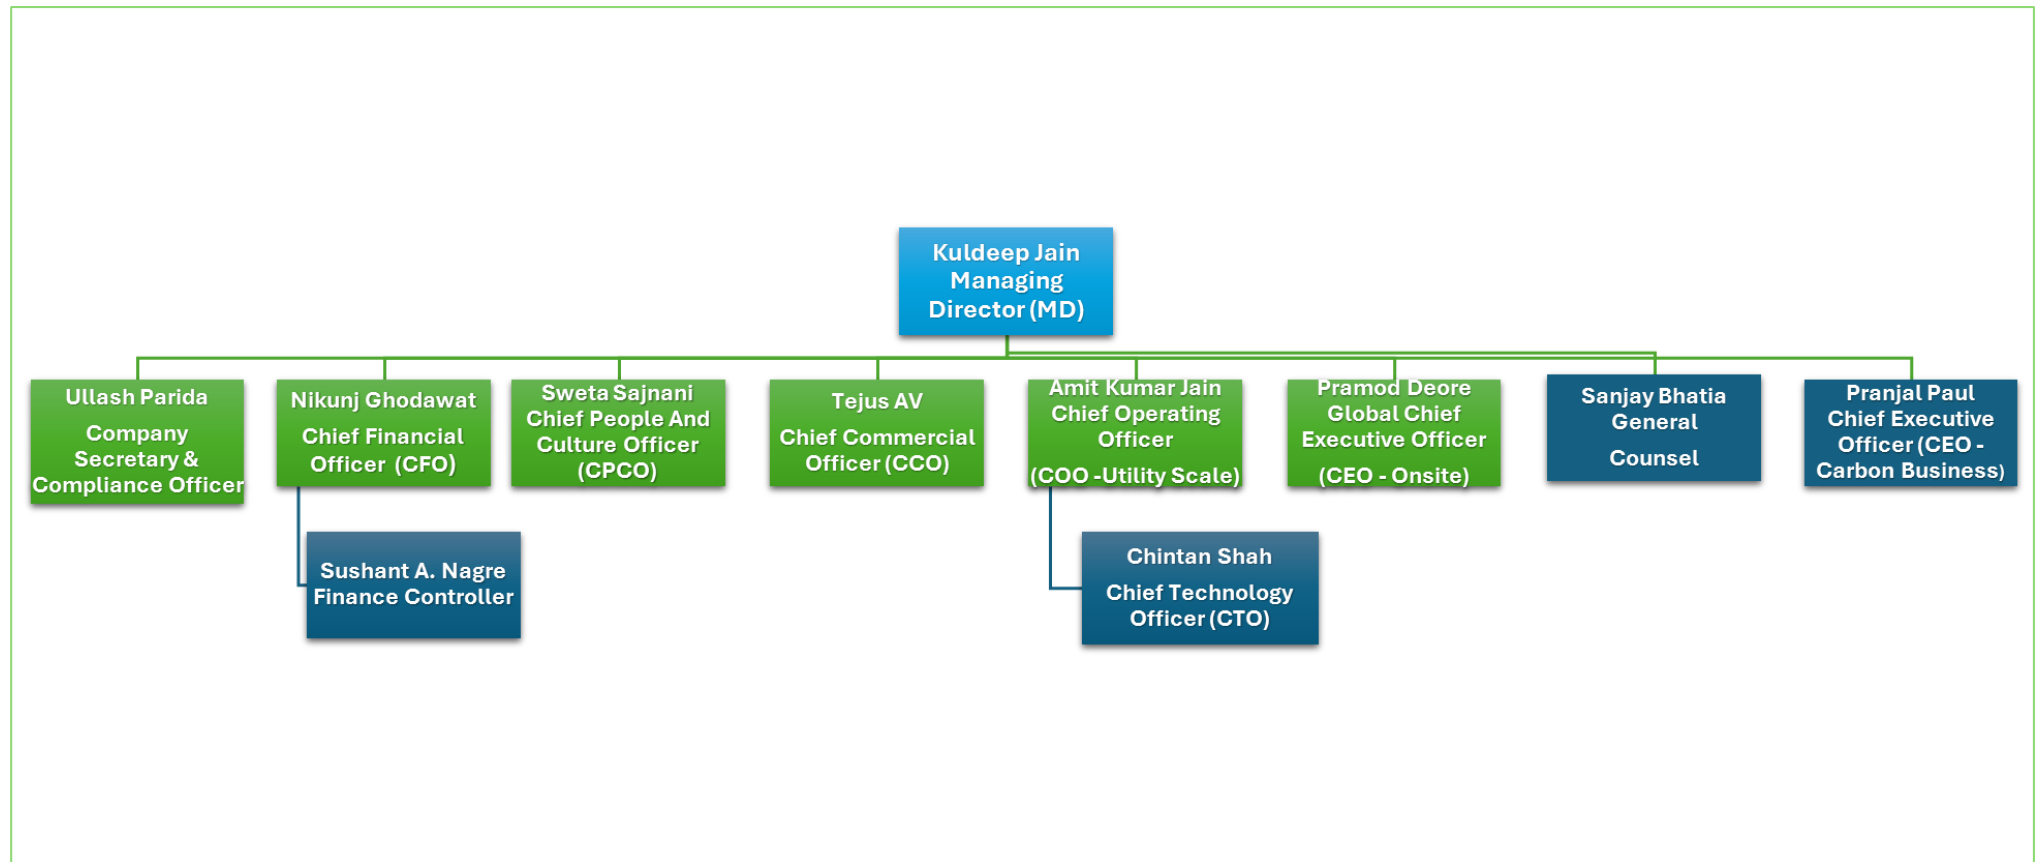

executed between certain shareholders of the Company, as may be applicable. To clarify, the Company shall present on a quarterly basis, the ratio of Net Debt to Cash EBITDA to the committee for their review;

16. to formulate, update and periodically review (as required) a detailed risk management policy which shall include:
 - i. a framework for identification of internal and external risks specifically faced by the Company, in particular including financial, operational, sectoral, sustainability (particularly, ESG-related risks), information, cyber security risks or any other risk as may be determined by the RMC;
 - ii. measures for risk mitigation including systems and processes for internal control of identified risks; and
 - iii. business continuity plan;
17. to ensure that appropriate methodology, processes and systems are in place to monitor and evaluate risks associated with Company's business activities, and in this respect to adopt, review, and update such methodologies, processes, and systems, as required;
18. to monitor and oversee implementation of the risk management policy, including evaluating the adequacy of risk management systems;
19. to periodically review the risk management policy, at least once in two years, including by considering the changing industry dynamics and evolving complexity;
20. to keep the Board informed about the nature and content of its discussions, recommendations and actions to be taken;
21. to review the appointment, removal and terms of remuneration of the chief risk officer (if any);
22. to coordinate with other committees of the Board, in instances where there is any overlap with activities of such committees, as per terms of reference of the committees;
23. to assess, approve, endorse, and provide comprehensive strategic oversight of the Company's ESG strategy, goals, targets, and initiatives to ensure that all ESG activities are aligned with long-term stakeholder value creation in order to support the Company's overall business objectives and sustainable growth, which should include comprehensive sustainability goals, particularly environmental targets, decarbonization milestones, renewable energy adoption targets, and their implementation timelines and resource requirements, for formal approval by the Board;
24. to oversee implementation and monitoring of the sustainability strategy and initiatives of the Company;
25. to evaluate significant ESG risks (including those arising from climate change) and opportunities, the Company's mitigation and adaptation strategies, and their associated financial impacts;
26. to provide an annual report and on progress against ESG performance targets to the Board summarizing the RMC's activities, key risk assessments, and recommendations for the coming year;
27. to perform any other similar or other functions as may be laid down by the Board from time to time and/or as may be required under applicable law, as and when amended from time to time, including the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015;
28. to consider any other key issues/ matters as may be referred by the Board or as may be required under any other statutory provisions; and
29. such other duties & functions as the Board may determine from time to time.

The Risk Management Committee is required to meet at least twice in a year under Regulation 21(3A) of the SEBI Listing Regulations.

KEMPINC LLP

Limited Liability Partnership Information

KEMPINC LLP is a registered limited liability partnership (“LLP”) incorporated on July 27, 2021 under the Limited Liability Partnership Act, 2008 (“LLP Act”). The registered office of KEMPINC LLP is located at 13/A, Peregrine Apt 400, Veer Savarkar Marg, Siddhi Vinayak Temple, Prabhadevi, Mumbai City, 400025, Maharashtra, India. The LLP identification number of KEMPINC LLP is AAX-9503. KEMPINC LLP is engaged in the business of consultancy and advisory across the renewable energy sector. There has been no change in the activities of KEMPINC LLP since its incorporation. The permanent account number of KEMPINC LLP is AAXFK6715B.

As per Section 23 of the LLP Act, the mutual rights and duties of the partners of an LLP, and the mutual rights and duties of an LLP and its partners shall be governed by the LLP agreement between the partners, or between the limited liability partnership and its partners. In the absence of such an agreement as to any matter, the above shall be determined by the First Schedule of the LLP Act. Since KEMPINC LLP has an LLP agreement in place, the rights and duties of KEMPINC LLP and its partners, are governed by the limited liability partnership agreement dated July 27, 2021 (“LLP Agreement”).

Partners of KEMPINC LLP

The partners of the KEMPINC LLP as on the date of this Prospectus are:

1. Kuldeep Jain; and
2. Nidhi Jain.

Details of profit-sharing ratio

As on date of this Prospectus, the profit-sharing ratio between the partners of KEMPINC LLP, i.e., Kuldeep Jain and Nidhi Jain is 99:1 under the Limited Liability Partnership Agreement dated July 27, 2021.

Details of change in control of KEMPINC LLP

There has been no change in the control of KEMPINC LLP in the last three years preceding the date of this Prospectus.

Our Company confirms that the permanent account number, bank account number, LLP identification number of KEMPINC LLP and the address of the registrar of companies where KEMPINC LLP is registered, shall be submitted to the Stock Exchanges at the time of filing this Prospectus.

Interest of our Promoters

Our Promoters are interested in our Company to the extent: (i) that they have promoted our Company; (ii) of their direct and indirect shareholding in our Company and to the extent of the shareholding held by their relatives in our Company, directly and indirectly; (iii) of the dividend payable, if any and any other distributions in respect of the Equity Shares held by them in our Company, directly or indirectly, from time to time; and (iv) directorships held by them in our Company or our Subsidiary, and remuneration payable to them in this regard. For details of the Promoters' shareholding in our Company, see “*Capital Structure – History of the share capital held by our Promoters*” on page 140.

Our Promoters do not have interest in any property acquired by our Company during the three years immediately preceding the date of this Prospectus or proposed to be acquired by our Company, or in any transaction by our Company for acquisition of land, construction of building or supply of machinery.

No sum has been paid or agreed to be paid to any of our Promoters or to the firms or companies in which our Promoters are interested as member in cash or shares or otherwise by any person, either to induce it to become or to qualify it, as director or promoter or otherwise for services rendered by our Promoters or by such firms or companies in connection with the promotion or formation of our Company.

Our Individual Promoters, namely, Kuldeep Jain and Pratap Jain, who are also our Directors, may be deemed to be interested to the extent of their remuneration/ fees and reimbursement of expenses, payable to them, if any and to the extent of their shareholding in our Company. For further details, see “*Our Management – Board of Directors – Interests of Directors*” and “*Our Management – Interests of Key Managerial Personnel and Senior Management*” on pages 528 and 541, respectively.

Our Promoters are not interested in the intellectual property of our Company.

Payment of benefit to our Promoters or Promoter Group

Except as disclosed in “*History and Certain Corporate Matters – Shareholders’ agreements and other material agreements – Key terms of all subsisting shareholders agreements and investment agreements*”, “*Other Financial Information - Related Party Transactions*” and “*Restated Consolidated Financial Information*” on pages 370, 824 and 550, respectively, no amount or benefit has been paid or given to our Promoters or any of the members of the Promoter Group during the two years preceding the filing of this Prospectus nor is there any intention to pay or give any amount or benefit to our Promoters or any of the members of the Promoter Group.

Material guarantees given by our Promoters

Except as disclosed in “*History and Certain Corporate Matters – Details of guarantees given to third parties by the Promoters offering Equity Shares in Offer*” on page 377 and as disclosed below, our Promoters have not given any material guarantee to any third party with respect to specified securities, as on the date of this Prospectus:

Name of the Promoter(s)	Name of the borrower	Name of the lender	Date of deed of guarantee	Type of facility	Guaranteed amount (in ₹ million)*	Purpose of the facility	Consideration
Nidhi Jain	KEMPINC LLP	360 One Prime Limited	July 22, 2025	Loan against security	6,700.00	Purchase of Company shares under secondary transaction, permissible investments and general purposes.	Nil

*The guarantee amounts are towards the whole of such principle sum or any other outstanding dues and shall cover the indemnity of the secured parties at all times, including but not limited to all losses, damages, costs, charges, expenses and claims. The guaranteed amounts are towards initial principal sum or any other outstanding dues and shall cover the indemnity of the secured parties at all times against any and all losses, damages, costs, charges, expenses and claims. Thus, the guaranteed amounts are greater than the current outstanding amounts.

Companies and firms with which our Promoters have disassociated in the last three years

As on the date of this Prospectus, our Promoters have not disassociated themselves from any company during the preceding three years from the date of filing this Prospectus.

For other relevant confirmations in relation to our Promoters and Promoter Group, see “*Other Regulatory and Statutory Disclosures – Prohibition by SEBI, RBI or other Governmental Authorities*” on page 893.

Change of Control

Except as disclosed below, there has been no change in the control of our Company during the last five years preceding the date of this Prospectus:

BGTF One Holdings (DIFC) Limited, KEMPINC LLP and Nidhi Jain are not the original Promoters of our Company.

Kuldeep Jain and Pratap Jain were the original shareholders and promoters of our Company. Augment India I Holdings, LLC acquired control through their shareholding in our Company in Financial Year 2022 pursuant to the acquisition of equity shares of the Company as disclosed in “*Capital Structure - Notes to the Capital Structure - Share capital history of our Company - Equity share capital*” and “*Capital Structure - Notes to the Capital Structure - Share capital history of our Company - Secondary transactions of equity shares*” on pages 120 and 133, respectively, and entered into the amended and restated shareholders’ agreement dated July 30, 2021, executed amongst Augment India I Holdings, LLC, UK Climate Investments Apollo Limited, our Company, Kuldeep Jain, Nidhi Jain and KEMPINC, LLP. Thereafter, DSDG HOLDING APS acquired minority shareholding in our Company pursuant to the amended and restated shareholders’ agreement dated December 10, 2021, executed amongst Augment India I Holdings, LLC, DSDG HOLDING APS, UK Climate Investments Apollo Limited, Kuldeep Jain, Nidhi Jain, KEMPINC, LLP and our Company. However, the shareholding of Augment India I Holdings, LLC in our Company reduced in Financial Year 2024 to 20.27% as BGTF One Holdings (DIFC) Limited acquired certain equity shares in our Company under certain primary issuances and through secondary purchases, as disclosed in the section titled “*Capital Structure - History of the share capital held by our Promoters*” on page 140. Further, BGTF One Holdings (DIFC) Limited appointed nominee directors to our Board constituting majority of the directors on the Board, along with becoming a shareholder in Financial Year 2024 pursuant to the amended and restated shareholders’ agreement dated April 22, 2023, executed amongst BGTF One Holdings (DIFC) Limited, Augment India I Holdings, LLC, DSDG HOLDING APS, UK Climate Investments Apollo Limited, our Company, Kuldeep Jain, Nidhi Jain and KEMPINC, LLP. For details of such acquisitions and appointment of nominee directors see “*Capital Structure – History of the share capital held by our Promoters*”, “*History and Certain Corporate Matters - Amended and restated shareholders’*

agreement dated July 30, 2025 entered into amongst our Company, Kuldeep Jain, Pratap Jain, Nidhi Jain and KEMPINC LLP (“Promoter Block”), BGTF One Holdings (DIFC) Limited (“Investor 1”), Augment India I Holdings, LLC (“Investor 2”), DSDG HOLDING APS (“Investor 3”), and Rikhab Investments B.V (“Rikhab”) and “Our Management – Changes to our Board in the last three years” on pages 140, 370 and 528, respectively.

KEMPINC LLP is owned and controlled by Kuldeep Jain. Further, Nidhi Jain is a designated partner in KEMPINC LLP.

Accordingly, pursuant to the resolution dated August 14, 2025, passed by our Board of Directors, (i) Kuldeep Jain, (ii) Pratap Jain, (iii) Nidhi Jain, (iv) BGTF One Holdings (DIFC) Limited, and (v) KEMPINC LLP, have been identified as Promoters of our Company.

Other confirmations

Our Promoters have not been declared as Wilful Defaulter or Fraudulent Borrower by any bank or financial institution or consortium thereof, in accordance with the guidelines on Wilful Defaulters or Fraudulent Borrowers issued by Reserve Bank of India.

Our Promoters have not been declared as fugitive economic offenders under the Fugitive Economic Offenders Act, 2018.

Our Promoters and members of our Promoter Group have not been prohibited or debarred from accessing the capital markets or debarred from buying, selling or dealing in securities under any order or direction passed by SEBI or any other securities market regulator or any other authority, court or tribunal inside and outside India.

There is no conflict of interests between the lessors of immovable properties of our Company (which are crucial for the operations of our Company) and our Promoters or members of our Promoter Group.

There is no conflict of interests between the suppliers of raw materials and third-party service providers of our Company (which are crucial for the operations of our Company) and our Promoters or members of our Promoter Group.

Promoter Group

The following individuals and entities constitute our Promoter Group in terms of Regulation 2(1)(pp) of the SEBI ICDR Regulations.

I. Individuals forming part of the Promoter Group

S. No.	Name of Promoter	Name	Relationship

		Amit Jain	Brothers
		Anuj Jain	
		Dhruv Jain	Sons
		Dheer Jain	
		Pratap Jain	Spouse’s father
		Rajmani Pratap Jain	Spouse’s mother
Manisha Shailesh Mehta	Spouse’s sister		

II. Entities forming part of the Promoter Group

- BGTF Four Holdings (DIFC) Limited;
- Rikhab Investments B.V.;
- Amit Jain HUF;
- Vinod Kumar Jain HUF;
- Anuj Jain HUF;
- Shailesh Mehta HUF;
- Premchand Jain Family Trust; and
- Rikhablal Marwari Family Trust.

DIVIDEND POLICY

The declaration and payment of dividends on our Equity Shares or Preference Shares, if any, will be recommended by our Board to the Shareholders for their approval in the Annual General Meeting, at their discretion, subject to compliance with the Articles of Association and provisions of the Companies Act, including the rules made thereunder and other relevant regulations, if any, each as amended.

Further, the Board shall also have the absolute power to declare interim dividend in compliance with the Act. The dividend policy of our Company was approved and adopted by way of a resolution dated August 14, 2025 passed by the Board of Directors (“**Dividend Policy**”).

In terms of the Dividend Policy, the dividend, if any, will depend on a number of internal factors including but not limited to, future earnings, financial condition, cash flows, working capital requirements, capital expenditure and any other factor which is deemed fit by our Board, and external factors, including but not limited to applicable laws and regulations, regulatory changes and prevalent market practices or any other external factors which may be deemed fit by our Board.

There is no guarantee that any dividends will be declared or paid in the future, and we may retain all our future earnings, if any, for any proposed or ongoing or planned business expansion or for any other purposes which may be considered by the Board subject to compliance with the provisions of the Companies Act. For details in relation to risks involved in this regard, see “*Risk Factors – We cannot assure payment of dividends on the Equity Shares in the future.*” on page 90.

Our Company has not declared and paid any dividends on the Equity Shares or Preference Shares for the six months period ended September 30, 2025 and for the Financial Years ended March 31, 2025, March 31, 2024 and March 31, 2023, and during the period from October 1, 2025 until the date of this Prospectus.

RESTATED CONSOLIDATED FINANCIAL INFORMATION

(The remainder of this page is intentionally left blank)

INDEPENDENT AUDITOR’S EXAMINATION REPORT ON RESTATED CONSOLIDATED FINANCIAL INFORMATION

The Board of Directors

Clean Max Enviro Energy Solutions Limited

(formerly known as Clean Max Enviro Energy Solutions Private Limited)

4th Floor, The International,
16 Maharshi Karve Road,
New Marine Lines Cross Road No.1,
Churchgate, Mumbai 400 020

Dear Sirs,

1. We, B S R & Co. LLP, Chartered Accountants, have examined the attached restated consolidated financial information of Clean Max Enviro Energy Solutions Limited (formerly known as Clean Max Enviro Energy Solutions Private Limited) (the “Company” or the “Issuer”) and its subsidiaries (the Company and its subsidiaries together referred to as the “Group”), its associates and its joint ventures, comprising the restated consolidated statement of assets and liabilities as at 30 September 2025, 30 September 2024, 31 March 2025, 31 March 2024 and 31 March 2023, and the restated consolidated statement of profit and loss (including other comprehensive income), the restated consolidated statement of changes in equity, the restated consolidated statement of cash flows for the six months period ended 30 September 2025 and 30 September 2024 and for the years ended 31 March 2025, 31 March 2024 and 31 March 2023, the material accounting policies and other explanatory information and notes (collectively, the “Restated Consolidated Financial Information”), as approved by the Board of Directors of the Company at their meeting held on 19 November 2025 for the purpose of inclusion in the Red Herring Prospectus/Prospectus (“RHP/Prospectus”) prepared by the Company in connection with its proposed initial public offer of equity shares (“Proposed IPO”) prepared in terms of the requirements of:
 - a) Section 26 of Part I of Chapter III of the Companies Act, 2013, as amended (the “Act”);
 - b) The Securities and Exchange Board of India (“SEBI”) (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended (“ICDR Regulations”); and
 - c) The Guidance Note on Reports in Company Prospectuses (Revised 2019) issued by the Institute of Chartered Accountants of India (“ICAI”) (the “Guidance Note”).
2. The Company’s Board of Directors is responsible for the preparation of the Restated Consolidated Financial Information for the purpose of inclusion in the RHP/Prospectus to be filed with SEBI, the BSE Limited (“BSE”), the National Stock Exchange of India Limited (“NSE”, together with BSE referred to “Stock Exchanges”) and the Registrar of Companies, Maharashtra, situated at Mumbai in connection with the Proposed IPO. The Restated Consolidated Financial Information have been prepared by the management of the Company on the basis of preparation stated in note 1.2 to the Restated Consolidated Financial Information. The responsibility of respective Management and Board of

Directors/ Designated Partners of the companies/ limited liability partnerships included in the Group, its associates and its joint ventures includes designing, implementing and maintaining adequate internal control relevant to the preparation and presentation of the Restated Consolidated Financial Information. The respective Board of Directors/ Designated Partners are also responsible for identifying and ensuring that the Group, its associates and its joint ventures complies with the Act, ICDR Regulations and the Guidance Note.

3. We have examined such Restated Consolidated Financial Information taking into consideration:
 - a) The terms of reference and terms of our engagement agreed upon with you in accordance with our engagement letter dated 8 November 2025 in connection with the Proposed IPO of equity shares of the Issuer;
 - b) The Guidance Note. The Guidance Note also requires that we comply with the ethical requirements of the Code of Ethics issued by the ICAI;
 - c) Concepts of test checks and materiality to obtain reasonable assurance based on verification of evidence supporting the Restated Consolidated Financial Information; and
 - d) The requirements of Section 26 of the Act and the ICDR Regulations.

Our work was performed solely to assist you in meeting your responsibilities in relation to your compliance with the Act, the ICDR Regulations and the Guidance Note in connection with the Proposed IPO.

4. These Restated Consolidated Financial Information have been compiled by the management from:
 - a) Audited special purpose consolidated interim financial statements of the Group and its joint ventures as at and for the six months period ended 30 September 2025 prepared in accordance with the basis of preparation described in Note 1.2 to the Special Purpose Consolidated Interim Financial Statements, which have been approved by the Board of Directors at their meetings held on 19 November 2025;
 - b) Audited special purpose interim consolidated financial statements of the Group, its associates and its joint ventures as at and for the six months period ended 30 September 2024 prepared in accordance with the basis of preparation described in Note 1.2 to the special purpose consolidated interim financial statements, which have been approved by the Board of Directors at their meeting held on 19 November 2025; and
 - c) Audited consolidated Ind AS financial statements of the Group, its associates and its joint ventures as at and for the years ended 31 March 2025, 31 March 2024 and 31 March 2023 prepared in accordance with Indian Accounting Standards (“Ind AS”) as prescribed under Section 133 of the Act read with Companies (Indian Accounting Standards) Rules 2015, as amended, and other accounting principles generally accepted in India, which have been approved by the Board of Directors at their meetings held on 27 May 2025, 27 May 2024 and 29 May 2023, respectively.

5. For the purpose of our examination, we have relied on:
- a) Auditor's report issued by us dated 19 November 2025 on the special purpose consolidated interim financial statements of the Group and its joint ventures as at and for the six months period ended 30 September 2025 as referred in Paragraph 4 (a) above;
 - b) Practitioner's report issued by M/s Deloitte Haskins & Sells LLP ("the Previous Auditor") dated 19 November 2025 on the special purpose interim consolidated financial statements of the Group, its associates and its joint ventures as at and for the six months period ended 30 September 2024 as referred in Paragraph 4 (b) above.
 - c) Auditor's reports issued by the Previous Auditor dated 27 May 2025, 27 May 2024 and 29 May 2023 on the consolidated Ind AS financial statements of the Group, its associates and its joint ventures as at and for the years ended 31 March 2025, 31 March 2024 and 31 March 2023 as referred in Paragraph 4 (c) above.

The audits for the six months period ended 30 September 2024 and financial years ended 31 March 2025, 31 March 2024 and 31 March 2023 were conducted by the Company's Previous Auditor, and accordingly reliance has been placed on the restated consolidated statement of assets and liabilities as at 30 September 2024, 31 March 2025, 31 March 2024 and 31 March 2023, and the restated consolidated statements of profit and loss (including other comprehensive income), the restated consolidated statement of changes in equity, the restated consolidated statement of cash flows for the six months period ended 30 September 2024 and years ended 31 March 2025, 31 March 2024 and 31 March 2023, the summary statement of material accounting policies, and other explanatory information (collectively, the "2025, 2024 and 2023 Restated Consolidated Financial Information") examined by them for the said period/ years. The examination report included for the said period/ years is based solely on the reports submitted by the Previous Auditor. They have also confirmed that the 2025, 2024 and 2023 Restated Consolidated Financial Information:

- a. have been prepared after incorporating adjustments for the changes in accounting policies, material errors and regrouping/reclassifications retrospectively in the financial years ended March 31, 2025, 2024 and 2023 and in the six months period ended September 30, 2024 to reflect the same accounting treatment as per the accounting policies and grouping/classifications followed by the Group as at and for the six months period ended September 30, 2025;
 - b. do not require any adjustments for modification as there is no modification in the underlying audit reports; and
 - c. have been prepared in accordance with the Act, ICDR Regulations and the Guidance Note.
6. As indicated in our auditor's report referred above:
- a) we did not audit the financial statements / information of four subsidiaries and five step-down subsidiaries and two joint ventures whose special purpose financial statements / information reflects share of total assets (before consolidation adjustments), total revenues (before consolidation adjustments), net cash inflows / (outflows) (before consolidation adjustments) and share of profit/ loss in its joint ventures included in the Special Purpose Consolidated Interim Financial Statements, as at and for the six months

period ended 30 September 2025 is tabulated below, which have been audited by PKF – Chartered Accountants (Dubai Br), D.S.K. & Associates and HSDR & Associates, whose reports have been furnished to us by the Company’s management and our opinion on the special purpose consolidated interim financial statements, in so far as it relates to the amounts and disclosures included in respect of these components, is based solely on the reports of the other auditors:

(Rs in million)	
Particulars	As at/ for the six months period ended 30 September 2025
Total assets (before consolidation adjustments)	23,046.02
Total revenue (before consolidation adjustments)	966.59
Net cash inflows/ (outflows) (before consolidation adjustments)	1.04

(Rs in million)	
Particulars	As at/ for the six months period ended September 30, 2025
Share of profit in its joint ventures	31.36

Of the above, one of the subsidiary, five step-down subsidiaries and two joint ventures are located outside India whose special purpose interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in their respective countries and which have been audited by other auditors under generally accepted auditing standards applicable in their respective countries. The Group’s management has converted the special purpose consolidated financial information of such subsidiary, step-down subsidiaries and joint ventures, located outside India from accounting principles generally accepted in their respective countries to accounting principles generally accepted in India. We have audited these conversion adjustments made by the Group’s management. Our opinion in so far as it relates to the balances and affairs of such subsidiary, step-down subsidiaries and joint ventures, located outside India is based on the report of other auditors and the conversion adjustments prepared by the management of the Group and audited by us.

Our opinion on the special purpose consolidated interim financial statements, is not modified in respect of this matter.

M/s PKF – Chartered Accountants (Dubai Br), auditors of a material subsidiary – Cleanmax Solar Mena FZCO, have examined the restated consolidated financial information as at and for the six months period ended 30 September 2025 and have confirmed that the restated consolidated financial information:

- a. have been prepared after incorporating adjustments for the changes in accounting policies, material errors and regrouping/reclassifications to reflect the same accounting treatment as per the accounting policies and grouping/classifications followed as at and for the six months period ended 30 September 2025.
- b. does not contain any modification requiring adjustments; and
- c. have been prepared in accordance with the Act, ICDR Regulations and the Guidance Note.

7. Based on examination report dated 19 November 2025 provided by the Previous Auditor, the audit reports on the consolidated financial statements of the Group, its associates and its joint ventures as at and for the six months period ended 30 September 2024 and years ended 31 March 2025, 31 March 2024 and 31 March 2023 issued by the Previous Auditor included following other matters:

- a. Previous Auditor did not audit financial statements of certain subsidiaries as at and for the years ended March 31, 2025, 2024 and 2023 and as at and for the six months period ended September 30, 2024, whose share of total assets, total revenues, net cash inflows / (outflows), and Group's share of net profit in associate and joint ventures, included in the audited consolidated Ind AS financial statements / special purpose consolidated interim financial statements, for the relevant years / period is tabulated below, which have been audited by other auditors (listed in Appendix I), and whose reports have been furnished to the Previous Auditor by the Company's management and Previous Auditor's opinion on the audited consolidated Ind AS financial statements / special purpose consolidated interim financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, associate and joint ventures, is based solely on the reports of the other auditors:

(Rs in million)

Particulars	As at/ for the six months period ended	As at/ for the years ended		
	30 September 2024	31 March 2025	31 March 2024	31 March 2023
Number of subsidiaries	121	139	100	67
Total assets	42,129.22	66,736.88	31,046.26	19,332.53
Total revenue	1,554.04	3,357.79	2,460.32	1,724.57
Net cash inflows/ (outflows)	278.28	812.79	132.26	303.76

(Rs in million)

Particulars	For the six months period ended	For the years ended		
	30 September 2024	31 March 2025	31 March 2024	31 March 2023
No. of joint ventures / associate	3	4	3	2
Share in net profit of associate and joint ventures	30.66	75.52	13.05	19.53

- b. Previous Auditor did not audit financial statements of 13 subsidiaries whose share of total assets, total revenues, net cash inflows / (outflows) included in the consolidated Ind AS financial statements / special purpose interim consolidated financial statements, for the year ended 31 March 2023 tabulated below, which are unaudited and have been furnished to the Previous Auditor by the Company's management and their opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, is based solely on such unaudited financial statements. In the opinion of the Previous Auditor and

according to the information and explanations given to the Previous Auditor by the management, these financial statements are not material to the Group:

(Rs in million)

Particulars	As at / for the year ended 31 March 2023
Total assets	0.93
Total revenue	-
Net cash inflows/ (outflows)	-

The Previous Auditors opinion on the consolidated financial statements/ special purpose interim consolidated financial statements is not modified in respect of these matters.

As mentioned in Note 1.2 to the Restated Consolidated Financial Information, subsequently, the financial information as at and for the year ended 31 March 2023 of these subsidiaries were audited by other auditors and whose reports have been furnished to the Previous Auditors by the Company's management (Refer Appendix II).

These other auditors of the subsidiaries, associate and joint ventures, as mentioned in paragraph 7 (a) and (b) above, have examined the restated financial information (listed in Appendix III) and have confirmed that the restated financial information of the components:

- i. have been prepared after incorporating adjustments for the changes in accounting policies, material errors and regrouping/reclassifications retrospectively in the six months period ended 30 September 2024 and the financial years ended 31 March 2024 and 2023 to reflect the same accounting treatment as per the accounting policies and grouping/classifications followed by the Group as at and for the year ended 31 March 2025, as applicable;
 - ii. do not require any adjustments for modification as there is no modification in the underlying audit reports; and
 - iii. have been prepared in accordance with the Act, ICDR Regulations and the Guidance Note.
8. Based on our examination and according to the information and explanations given to us and also as per the reliance placed on the audit reports and examination reports submitted by the Previous Auditor and other auditors for the respective periods/years, we report that the Restated Consolidated Financial Information:
- a. have been prepared after incorporating adjustments for the changes in accounting policies, material errors and regrouping/reclassifications retrospectively in the six months period ended 30 September 2024 and financial years ended 31 March 2025, 31 March 2024 and 31 March 2023 to reflect the same accounting treatment as per the accounting policies and grouping/classifications followed as at and for the six months period ended 30 September 2025;
 - b. does not contain any modification requiring adjustments; and
 - c. have been prepared in accordance with the Act, ICDR Regulations and the Guidance Note.

9. We have not audited any financial statements of the Group and its joint ventures as of any date or for any period subsequent to 30 September 2025. Accordingly, we express no opinion on the financial position, results of operations, cash flows and statement of changes in equity of the Group and its joint ventures as of any date or for any period subsequent to 30 September 2025.
10. The Restated Consolidated Financial Information do not reflect the effects of events that occurred subsequent to the respective dates of the reports on the special purpose consolidated interim financial statements and the consolidated financial statements mentioned in paragraph 5 above.
11. This report should not in any way be construed as a reissuance or re-dating of any of the previous audit reports issued by the Previous Auditor, nor should this report be construed as a new opinion on any of the financial statements referred to herein.
12. We have no responsibility to update our report for events and circumstances occurring after the date of the report.
13. Our report is intended solely for use of the Board of Directors for inclusion in the RHP/Prospectus to be filed with SEBI, relevant Stock Exchanges and the Registrar of Companies, Maharashtra, situated at Mumbai in connection with the Proposed IPO. Our report should not be used, referred to, or distributed for any other purpose except with our prior consent in writing. Accordingly, we do not accept or assume any liability or any duty of care for any other purpose or to any other person to whom this report is shown or into whose hands it may come without our prior consent in writing.
